2720. Emergency Preparedness Information

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-03-28 16:09:18 UTC
From: Steve Vander Hill
Topic: 2720 Message: 2720

Emergency Preparedness Information is Just a Click Away with the New Online Be Red Cross Ready Presentation

A new online presentation is now available at www.redcross.org/beredcrossready to help prepare individuals for emergencies at home, at work and in their communities. The presentation includes sound narration throughout, as well as streaming video of key first aid skills, including conscious choking and CPR. Visitors to the site can also download an emergency preparedness kit shopping list and key steps in making an emergency plan.

2721. Packet Demo this Saturday March 31 at Coffee Break

Yahoo group: WestMichiganHams (2006 — 2008)

2724. Re: Fw: [MCECS] New 146.82 on air

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-03-30 23:51:40 UTC
From: Bill
Topic: 2722 Message: 2724

Just for grins and while I was mobile in the Newaygo area I used the "new" '82 repeater. The report of my signal on the repeater was quite flattering. Even from right on the bridge over the Muskegon River and again downtown among the buildings my fifty watts to a roof mounted quarter wave was quite readable into the repeater.

Congratulations to those who made this possible. This will be one really great repeater for our area.

Bill, AB8SC

2725. Spotter training program

Yahoo group: WestMichiganHams (2006 — 2008)

From: Tom VanderMel
Topic: 2725 Message: 2725

It's not a book, but here's a pretty nifty online training program for spotters put out by the NWS. It's intended to supplement the training sessions, not take their place. Plenty of good photos and graphics:

From: Jeffs Lists
Topic: 2726 Message: 2726

All:

CERT is holding a exercise on April 14th at.. well.. Sorry I cant tell you that..

Were in need of Victims. If you don't mind being victimized for the good of CERT and your fellow man kind then we need you.

Were in need of Victims 12 & Up (under 16 with parent's only) The location & The times will be kept to only victim's as everything else is a huge surprise.

For those of you who are CERT trained, keep the day open and on your calendar. Just figure all day, Rain or Shine!

If you want to be a victim please email us @ cert@... and we'll get you on the list.

tnx

2732. Emergency communications project imperiled

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-01 23:56:39 UTC
From: paul odem
Topic: 2732 Message: 2732

DAILY BRIEFING
March 26, 2007 Audit: Emergency communications project imperiled By Daniel Pulliam dpulliam@...
A partnership between the departments of Justice and Homeland Security to create an interoperable wireless communications network for police and first responders has fallen apart and the project is imperiled, according to an audit released Monday. The report from the Justice Department's inspector general office stated that despite more than six years of development and $195 million in funding, the Integrated Wireless Network project "does not appear to be on the path to providing the seamless interoperable communications system that was envisioned." The two agencies now appear to be pursuing separate solutions, the report said. The Treasury department is also involved in the project, but has a smaller percentage of potential users. Uncertain and disparate funding mechanisms, the fractured partnership and a poor governing structure are all causes for the project's high-risk status, the 89-page report stated. The audit found that Justice has been spending more money to maintain its existing communications system instead of developing new wireless solutions as part of the network project. Justice, Homeland Security and Treasury agreed in 2004 to work together to develop the network, which could cost as much as $5 billion through 2021. It was expected to consist of a combination of land mobile radios, cell phones and walkie-talkie devices that would provide a secure nationwide wireless communications system. The project would permit 81,000 federal law enforcement officers to communicate across agencies and with state and local partners. A majority of Justice's communications systems are considered obsolete because they are not supported by the manufacturer and spare parts are difficult to find, the IG noted. Justice Inspector General Glenn Fine said a failure of the project would represent a significant missed opportunity to achieve needed communications interoperability among federal, state and local law enforcement agencies. "We believe that the departments of Justice, Homeland Security and Treasury need to repair the partnership and work together more closely to develop an interoperable communications system," Fine said. The project's failure could have significant consequences beyond the financial losses, the IG said. The safety of Justice law enforcement officers could be at stake because the department's legacy communications systems have limited functionality, diminished voice quality and weak security, the report stated. It recommended that Justice reach an agreement with DHS and Treasury that accurately reflects each agency's commitment to the network project by explicitly stating the shared goals, responsibilities and funding requirements. If the agencies are unable to reach such an agreement, Justice officials concurred with the IG that Congress and the Office of Management and Budget should be notified that the joint network project is not viable.
Vance Hitch, Justice's chief information officer, said in a statement that the department believes the network program is the most appropriate strategy for providing agency agents with secure, reliable and interoperable communications in the field. He cited successful implementations of the network in Oregon and Washington state, but acknowledged that the audit raises valid concerns regarding funding and interagency partnership. "We are working diligently to address these issues," Hitch said. A DHS spokesman said the department agrees with the report's recommendations. Treasury officials did not respond to requests for comment. Potential Integrated Wireless Network Users

For those who might wonder how to figure out where the center of an "L" shaped county is this might help. The repeater is just south and west of the "L" where Muskegon county meets the SW corner of Newaygo county.

Approxamately the center of the county. Aim there and fine tune for the best signal.

It has been worked from Whitehall with an HT.

2734. Restarting the 2m digital net

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-02 01:52:11 UTC
From: Joe Veldhuis
Topic: 2734 Message: 2734

The net was put on hiatus over the winter due to the poor propagation conditions, but with spring underway, conditions are improving and it would be a good time time to resume the net.

However, I am hoping that someone else can be the net control station this time. I only have a single 13 element beam at 30 ft, with no preamp, so my effective range is quite limited. I can barely pick out Mike KC9DOA at only 120 miles under normal conditions, and band enhancement is necessary for me to copy Jerry KC0HLN at 320 miles. Someone with a better tower and antenna system would be much better as a net control station.

Opinions?

-Joe, N8FQ
Grand Haven, MI

2735. For Sale: New Yaesu VX-150 5-watt 2m FM HT

I have a new VX-150 5-watt 2m FM HT for sale. It has never been taken out of the box so it is just like buying new from a dealer with warranty card intact.

Information & a description about the VX-150 can be found at:

http://www.yaesu.com/indexVS.cfm?cmd=DisplayProducts&ProdCatID=111&encProdID=SnUxsyxpdj8%3D&DivisionID=65&isArchived=0

The average dealer selling price for this model seems to be around $120. If interested and want to make a reasonable offer please contact me off-list at either my email address or call me at my mobile # at 847-867-2774.

Tom,
Please confirm that Jim Duram will be at your shop on April 14 with his service monitor to check out deviation and frequency accuracy. If hams want to have any problems corrected they will need to bring a copy of the service manual (paper or electronic) for their radio. Service manuals can be obtained from www.mods.dk for just about any radio. All it takes is to register with the site and you are allowed to download your manual for no cost.
Tom

2753. Help w/ Your New License Privileges

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-06 07:18:01 UTC
From: Bill
Topic: 2753 Message: 2753

QST:

It has been mentioned that lots of folks are upgrading their license from Technician to General and even Amateur Extra class. These upgrades are due to the recent FCC decision to remove the code test impediment. This is a very good thing and the ham community congratulates and welcomes these amateurs and their new privileges.

Probably this weekend even more hams are going to upgrade at the test session on Saturday, April 7. This session is held at 9:00 am at the Red Cross Building in downtown Muskegon. Remember to bring a copy of your current license (if you have one), identification, and fourteen dollars in cash. You probably will want to bring along a simple calculator, too.

At any rate it has been suggested that these new General and Amateur Extra hams might want to exercise their new privileges. If this is the case then following the exam session we should adjourn to the MAARC clubhouse and their great radio shack. Should there be this type of interest I am sure there will be experienced hams to assist the /AG and /AE hams around the HF bands and modes. Please make your request known at the test session and I, for one, will welcome the opportunity for an Open Shack session following the testing on Saturday.

Also, some of these newly created and upgraded hams have asked for some help from Elmer in getting on the air. The MAARC can offer this assistance in the form of a class, an Open Shack type event, individual assistance, and informal counseling. We have offered Technician, General, and even special Extra study groups and classes in the past. This next step seems reasonable and fun for everyone.

Please contact a member of the Board of Directors of the MAARC and mention your interest in these training opportunities. The MAARC is here to help its membership enjoy the amateur radio hobby. We can make any number of accommodations to accomplish this goal. We insist that you enjoy your new privileges and we welcome the chance to show you around the bands and modes.

2757. SPECIAL EVENTS TO COMMEMORATE 95TH ANNIVERSARY OF TITANIC TRAGEDY

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-06 12:55:02 UTC
From: Hank Greeb
Topic: 2757 Message: 2757

****
From: The ARRL Letter Vol. 26, No. 14 April 6, 2007
****

==>SPECIAL EVENTS TO COMMEMORATE 95TH ANNIVERSARY OF TITANIC TRAGEDY

Several Amateur Radio special event operations are scheduled to mark the 95th anniversary of the sinking of the RMS Titanic. The "unsinkable" White Star Line passenger vessel was on its maiden voyage from Liverpool, England, to New York City when it struck an iceberg and sank early on April 15, 1912. More than 1500 people perished, while some 700 passengers in 19 lifeboats were rescued by the RMS Carpathia, whose radio operator copied the frantic distress call (the still common "CQD" signal, possibly coupled with the then-new "SOS") transmitted by MGY radio operator Jack Phillips as the Titanic foundered.

Special event W0S <http://www.wzeros.com/> (for "White Star Line") will be on the air from the Titanic Museum in Branson, Missouri, commencing at 1300 UTC on Saturday, April 14, and concluding at 2400 UTC on Sunday, April 15. Members of the Nixa Amateur Radio Club and the Southwest Missouri Amateur Radio Club (SMARC) will be among those at the helm of W0S. Icom has loaned Amateur Radio equipment for the special event.

Look for W0S on or around: SSB, 3.860, 7.260 and 14.260 MHz; CW, 3.560, 7.060 and 14.060 MHz. Operators will be listening 2 kHz up for calls. Visitors are welcome. E-mail the Nixa club for more information <titanichams@...>. In conjunction with the W0S operation, GB2MGY will be on the air from Belfast, Northern Ireland.

In Titanic wireless operator Jack Phillips' home town of Godalming, England, members and guests of the Wey Valley Amateur Radio Group <http://www.weyvalleyarg.org.uk> will run special event station GB95MGY. Operation will begin at 1000 UTC on April 14 and continue through 0547 UTC on April 15, the time the Titanic sank. After a short radio silence, operation will continue until April 16 at 0547 UTC. The special event will celebrate Phillips' heroism. The 25-year-old radio operator went down with the ship.

GB95MGY will operate CW only on all HF bands, 80 through 15 meters, 15 kHz up from the band edge, and will QSL all contacts (QSL via the bureau). For more information, contact Michael Shortland, G0EFO <michaelgs@...>.

Special event station W1MGY will be on the air from the Titanic Historical Society Museum in Indian Orchard, Massachusetts. Operation

will concentrate on 40 and 20 meters April 14 from 1400 UTC until 2030 UTC, although W1MGY may be on the air at other times, bands and modes throughout the 95th anniversary weekend.

Look for W1MGY on or around: CW, 3.533, 7.033, 14.033, 18.099, 21.033 and 28.033 MHz; SSB, 3.860, 7.260, 14.260, 18.160, 21.360 and 28.336 MHz, conditions permitting.

To schedule a contact with W1MGY, contact Dave Isham, KB1MU <kb1mu@...>, indicating a preferred date, time, and frequency. Include an SASE with QSL requests to Titanic Historical Society, W1MGY, PO BOX 51053, Indian Orchard, MA 01151-0053 USA.

Well lets try this again.

Michigan QSO party. is on the 21st, at the MAARC club house. 12:00 noon to Midnight. 2 weeks after the testing on the 7th.

No that I slowed down on the keyboard, the msg might make a little more sense.

Subject: [WestMichiganHams] Help w/ Your New License Privileges

QST:

It has been mentioned that lots of folks are upgrading their license
from Technician to General and even Amateur Extra class. These
upgrades are due to the recent FCC decision to remove the code test
impediment. This is a very good thing and the ham community
congratulates and welcomes these amateurs and their new privileges.

Probably this weekend even more hams are going to upgrade at the test
session on Saturday, April 7. This session is held at 9:00 am at the
Red Cross Building in downtown Muskegon. Remember to bring a copy of
your current license (if you have one), identification, and fourteen
dollars in cash. You probably will want to bring along a simple
calculator, too.

At any rate it has been suggested that these new General and Amateur
Extra hams might want to exercise their new privileges. If this is

the case then following the exam session we should adjourn to the MAARC clubhouse and their great radio shack. Should there be this type of interest I am sure there will be experienced hams to assist the /AG and /AE hams around the HF bands and modes. Please make your request known at the test session and I, for one, will welcome the opportunity for an Open Shack session following the testing on Saturday.

Also, some of these newly created and upgraded hams have asked for some help from Elmer in getting on the air. The MAARC can offer this assistance in the form of a class, an Open Shack type event, individual assistance, and informal counseling. We have offered Technician, General, and even special Extra study groups and classes in the past. This next step seems reasonable and fun for everyone.

Please contact a member of the Board of Directors of the MAARC and mention your interest in these training opportunities. The MAARC is here to help its membership enjoy the amateur radio hobby. We can make any number of accommodations to accomplish this goal. We insist that you enjoy your new privileges and we welcome the chance to show you around the bands and modes.

2763. V.E. Testin in Muskegon

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-06 23:45:38 UTC
From: Dennis Harriss
Topic: 2763 Message: 2763

The Muskegon Area Amateur Radio Council (M.A.A.R.C.) V.E. team will be conducting Amateur Radio Licensing Testing Tomorrow the 7th.

The testing will take place at the Red Cross building at 3rd and Webster in downtown Muskegon starting at 9AM. We will be monitoring the 94 repeater until testing starts for those that might need directions.

You will need to bring $14.00 CASH, and I.D. If you are upgrading you will need a copy of your current license.

If anyone is doing a "paper" upgrade we will need copies of your documents to submit with your application.

Looking forward to seeing you in the morning.

2764. QRP ARCI Spring Contest This weekend

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-07 01:49:47 UTC
From: Hank Greeb
Topic: 2764 Message: 2764

It begins 1200Z Saturday, and runs through 2359Z Sunday. If my calculations are correct, that's 08:00 EDT Saturday to 8 p.m. Sunday.

Details of the contest are at

http://www.qrparci.org/

72 de n8xx Hg (No, that's not a typo, for whatever reason the QRP folks use 72 instead of 73. :)

All:

Yes, the Michigan QSO Party is an excellent introduction to hf radio. It is sort of a contest and kinda like being dx. It is tons of fun as Jim, KC8PCJ will tell you from first hand experience. Last year he participated in an effort taking W8ZHO to third place in the multi single category. Don't know what that is? All things are revealed at the event.

This year's running offers operators and loggers the chance to sign up for a specific time slot. Not into that kind of structure? Drop in and we'll fit you in.

There will be a pot luck dinner starting at 5:00 pm. There will be twelve hours of nonstop fun, too.

As was mentioned earlier, starts noon ends midnight (local times, or EDT) April 21 at the MAARC clubhouse at 2888 Scenic Drive between Muskegon and White Lakes.

Another really fun way to enjoy radio, ham friends, and food.

We'll leave the light on for you!

Bill I am thinking about bringing my Ft847 and laptop to do a little satelite education. Not sure about antennas but will do what I can. I do have a power point presentation if we can get the projector to work or have another one available.

From: Hank Greeb
Topic: 2768 Message: 2768

If anyone, newcomers, or olde tymers alike, wants to try some contesting, I've listed some of the domestic contests for the months of April. For a more complete list of contest, including those sponsored by groups outside the Untied States, see http://www.arrl.org/contests/months/apr.html

You needn't be a die-hard contester to join the fun! You may operate for a short period of time, or the entire contest period. The best way to learn procedures is to "jump in with all four feet flailing" and "give it the olde college try." Contesting can be fun! It's a good way to test your rig, antenna, and sharpen your operating skills.

Jump in - have some fun!

73 de n8xx Hg

==========

Apr 3-9

Missouri QSO Party -- CW/SSB, sponsored by the Boeing Employees Amateur Radio Society of St. Louis (BEARS) from 1800Z Apr 7-0500Z Apr 8 and 1800Z-2400Z Apr 8. Frequencies (MHz): CW -- 40 kHz from band edge and 1.810; Phone -- 1.850, 3.980, 7.280, 14.280, 21.380, 28.310 kHz, work MO stations once per band and mode. Categories: Fixed, MO Mobile, MO Rover. Exchange: RST, serial number and MO county or S/P/C. QSO points: CW -- 2 points, Phone -- 1 point. Score: MO stations -- QSO points ? States + Provinces + MO counties + 1 for DX; non-MO stations -- QSO points ? MO counties. Multipliers count only once. QSO with W0MA counts 100 QSO points one time. For more information: www.qsl.net/w0ma. Logs due 30 days after the contest to moqso@... or n0aj@... or James L. Kinser, N0AJ, 2147 Encino Dr, Florissant, MO 63031-7627.

QRP ARCI Spring QSO Party -- CW, sponsored by the QRP ARCI, from 1200Z Apr 7-2400Z Apr 8, work 24 hours max (same rules as Fall QSO Party, see Oct 2006 QST, p 102 or www.qrparci.org). This is one of the largest QRP contests of the year. Turn down your output power to 5 W and join the fun -- you will be surprised at how easy it is to make contacts with a few watts. Try for the 1000 Miles Per Watt award, too!

DX YL to North American YL Contest -- CW, sponsored by YLRL from 1400Z Apr 3-0200Z Apr 5, work 24 hours max (Phone -- Apr 10-12). Frequencies: all HF bands. Exchange: RST, serial number and ARRL Section, province or DXCC entity. QSO points: 1 point/QSO. Score: QSO points ? S/P/C counted only once ? 1.5 (<100 W CW, 200 W SSB). For more information: www.ylrl.org. Logs due 30 days after the contest to kc4iyd@... or Nancy Rabel Hall, KC4IYD, PO Box 775, North Olmsted, OH 44070.

Apr 10-15

Montana QSO Party -- Phone/CW/Digital--sponsored by the Flathead Valley Amateur Radio Club from 2300Z Apr 13 through 2300Z Apr 15. Frequencies: 160 meters-70 cm. Categories: Fixed and Mobile/Portable. Repeaters and IRLP are permitted. Exchange: RST and S/P/C or MT county. Work mobiles in each county. Score: QSOs ? S/P/C + MT counties (counted only once). 100 point bonus for national or state park. 10 point bonus for mobile stations on a lake or river shoreline - specify location. For more information: www.fvarc.org. Logs due May 31 to normsclassicradio@... (Cabrillo format) or Norm Palin K7NCR, 68 Silver Leaf Dr, Kalispell, MT 59901.

Georgia QSO Party -- CW/SSB, sponsored by SECC and SEDXC from 1800Z Apr 14-0359Z Apr 15 and 1400Z-2359Z Apr 15. Frequencies: 80-10 meters. Categories: SOAB, MS, MM, Rover, Novice/Tech; HP, LP (<150 W), QRP; CW/SSB/Mixed. Rovers must activate at least two GA counties, no county line QSOs. Exchange RST and GA county or S/P/C. QSO points: SSB -- 1 point, CW -- 2 points. Score: QSO points ? GA counties (GA station use states and provinces) counted only once per band and mode. For more information: gqp.contesting.com. Logs are due May 15 to gqp@... or mail to John Laney, K4BAI, PO Box 421, Columbus, GA 31902-0421.

DX YL to North American YL Contest -- Phone, Apr 10-12 (see Apr 3-5).

PSK31 Flavors Contest -- PSK31 and variants, sponsored by the PODXS 070 Club from 1200 - 1800 local time 14 April 2007. Frequencies (MHz): 14.070-14.080 only. Categories: SO (QRP, LP, MP). Exchange: S/P/C and name or 070 number. QSO Points: 1 pt/QSO for each PSK variant used. Score: QSO pts x S/P/C + PSK variants uses. For more information: http://harvey.licht.home.sprynet.com/PSKFlavors/2007/2007RulesPost.htm. Logs due May 14 to pskflavors@....

Radio Maritime Day -- CW, from 1200Z Apr 14-1200Z Apr 15 (note silent periods). Frequencies (MHz): 1.824, 3.520, 7.020, 14.052, 21.052, 28.052. Categories: Coastal Station (LP, HP),SO & MO (LP only; Radio Officers and Radio Amateurs). Exchange: RST + call sign of last assignment or serial number. QSO points: QSO with Coastal Station -- 5 points, Ship Call to Ship Call -- 3 points, Ship Call to Amateur -- 2 points, Amateur to Amateur -- 1 point. Score: QSO points ? country flags (counted once only). For more information: www.radiomaritimeday.org. See Web site for log submission requirements.

Apr 21-22

Michigan QSO Party -- CW/SSB, sponsored by the Mad River Radio Club, from 1600Z Apr 21-0400Z Apr 22. Bands: 80-10 meters. Frequencies: CW -- 45 kHz from band edge; Phone (MHz) -- 3.825, 7.200, 14.250, 21.300, 28.450. Work stations once per band and mode, MI-to-MI QSOs allowed, mobiles and portables can be worked from each county. Categories: SO, MS, MM, Mobile SO, Mobile MO. Exchange: serial number and MI county or S/P/C. QSO points: CW -- 2 points, Phone -- 1 point. Multipliers for MI stations are states, provinces and MI counties; multipliers for non-MI

stations are MI counties. Multipliers count once per mode. Score: QSO points ? multipliers. For more information: www.miqp.org. Logs due 30 days after contest to logs@... or Mad River Radio Club, c/o Dave Pruett, 2727 Harris Rd, Ypsilanti, MI 48198.

Motorola QSO Party -- CW/SSB, sponsored by the Motorola Amateur Radio Club - Illinois Section from 1700Z Apr 21 - 0300Z Apr 22. Frequencies (MHz): 160 - 2 meters; Phone: 1.880, 3.880, 7.180, 14.280, 21.380, 28.380, 50.180. Categories: see Web site. Exchange: RS(T) + S/P/C (Motorolans give office location code). QSO Points: Phone -- 1 pt/QSO, CW -- 2 pts/QSO. Score: QSO points x Motorola office codes (Motorolans also count S/P/C). For more information: www.qsl.net/k9mot/motqp.htm. Logs due 31 May to motoham@... or 2007 MOTQP, c/o Mike Swiatkowski, AA9VI, 225 Southgate Dr, Northbrook, IL 60062 USA.

Ontario QSO Party -- CW/Phone, sponsored by Contest Club Ontario and the Ontario DX Association from 1800Z Apr 21-1800Z Apr 22. Frequencies (MHz): SSB -- 1.870, 3.735, 3.860, 7.070, 7.260, 14.130, 14.265, 21.260, 28.360; CW -- 30 kHz above band edges; VHF-SSB: 50.130, 144.205, 432.105; VHF-FM 52.540, 146.550, 446.1; no repeater QSOs. Categories: SOAB and SOSB (HP, LP <150 W HF and 50 W VHF, QRP) in CW, Phone and Mixed Modes, SO VHF FM QRP, MS, SWL, Mobile, Rover. Exchange: RS(T) and S/P/C or Ontario QTH. QSO points: HF SSB -- 1 point, HF CW -- 2 points, VHF -- 5 points (work stations once per VHF band), 10 points for each QSO with VA3CCO, VE3ODX and VA3RAC. No county line QSOs. Score is QSO points ? Ontario QTHs (non-VE3 stations) or S/P/C + Ontario QTHs (mults count once per band). For more information: cco.ve3xd.com/oqp. Logs due May 31 to ve3agc@... or Ontario QSO Party, Ontario DX Association, PO Box 161, Station A, Willowdale, ON M2N 5S8, Canada.

Kids Roundup -- Phone, sponsored by the Anne Arundel Radio Club, Jr, from 1400Z Apr 21-2200Z Apr 22. Frequencies: 80 meters- 70 cm. See Web site for categories and QSO point rules. Exchange: Call sign, QTH, category, first name. Contacts with Amateur Radio station KI3DS count 25 points. For more information: www.ki3ds.org. Logs due May 1 to ki3ds@... or AARC Jr, Attn: Bob Rose, 7901 Pepperbox Ln, Pasadena, MD 21122-6328.

Apr 28-29

Florida QSO Party -- sponsored by the Florida Contest Group from 1600Z Apr 28-0159Z Apr 29 and 1200Z-2159Z Apr 29, 20 hours max, work FL stations. Frequencies (MHz): CW -- 35 kHz from band edges, Phone -- 7.260, 14.260, 21.335, and 28.485, no 160 or 80 meters, VHF/UHF. Categories: SO, MS, MM (one signal per band), Mobile (SO and SO+driver), School Club, SWL, all categories HP (<150 W), LP or QRP, Mixed Mode/CW/SSB (except MM and SWL). Exchange: RST and FL county or S/P/C. QSO points: CW -- 2 points, SSB -- 1 point. Score: FL stations -- QSO points ? S/P/C (W/VE/KH6/KL7 do not count as DXCC entities, DC is a separate multiplier) ? power multiplier; non-FL stations -- QSO points ? FL counties ? power multiplier. All multipliers count once per mode.

Power multiplier -- HP ?1, LP ?2, QRP ?3. For more information: www.floridaqsoparty.org. Logs due May 29 via the Web log entry page at www.b4h.net/cabforms/flqp_cab.php or to logs@... (ASCII text or Cabrillo format) or Florida QSO Party, c/o Ron Wetjen, WD4AHZ, 5362 Castleman Dr, Sarasota, FL 34232. The FQP is one of the largest state QSO parties and is a good time to put some rare Florida counties in your log. Watch for the mobile stations as they move around the state -- and watch for those Nebraska stations in their contest, too!

Nebraska QSO Party -- CW/SSB/Digital, sponsored by the Heartland DX Association 1700Z Apr 28-1700Z Apr 29. Frequencies (MHz): 160-2 meters; CW -- 1.805 and 35 kHz above band edge, Novices/Technicians -- 10 kHz above band edge; Phone -- 1.915, 3.865, 7.265, 14.265, 21.365, 28.465, 146.460. Categories: SO, MS, NE Mobile. Work stations once per band/mode. Work NE mobile stations again in each county. County lines count as one QSO with each county. Exchange: RST and NE county or S/P/C. QSO points: CW/Digital -- 2 points, Phone -- 1 point. Score: QSO points ? S/P/C for NE stations or NE counties (multipliers count once only). For additional information: www.qsl.net/hdxa. Logs due May 31 to nqp@... or Nebraska QSO Party, c/o Steve Rasmussen, N0WY, 312 N 6th St, Plattsmouth, NE 68048-1302.

Old-Old-Timers Club QSO Party -- CW/SSB, from 0000Z Apr 28-2359Z Apr 29. Frequencies: 80-10 meters. Exchange: RS(T) and member number or state. Score: total number of QSOs, work stations once per band and mode. For more information: www.ootc.us/party. Report scores by 30 days after the contest to w1eof@... or OOTC QSO Party, c/o Mark Titterington, W1EOF, 74 Hornet Rd, North Kingstown, RI 02852.

All:

What a fantastic day we had testing and upgrading folks in the Saturday test session. I'd rather not list the success stories for fear that I'll forget half. Suffice it to say that there were lots of folks testing and lots of folks passing.

The test proctors were tremendously busy grading and watching, with amazement, the folks attending and earning that CSCE and /AG and even /AE credentials. We worked from 9:00 until noon or later making this one of the most successful test sessions in our history. I'm sure that Bob, WB8OQT would be the first to say, "Thanks to Everyone for helping make today a Huge success."

Congratulations to all who tested successfully. The ham community welcomes you. We look forward to learning new call signs and getting to know more folks on the bands.

Without your dedication and persistence our hobby would be much different. Welcome!

Let's everyone endeavor to help these new hams and folks with new privileges learn and enjoy the world's best hobby. Welcome!

We certainly hope the new call signs are assigned quickly. And if you are already a ham you can get on the air right now by just adding a /AG or /AE and enjoy those opportunities on hf you have earned. A wonderful job well done!

Bill, AB8SC
MAARC guy

2771. Mini-Swap, Saturday, April 14

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-08 13:46:42 UTC
From: Jack Amelar
Topic: 2771 Message: 2771

HOPE EVERYONE'S ENJOYING EASTER.

And hope to see many of you next Saturday, April 14 as mini-swaps return to the Grand Rapids
area. There is snow on the ground as I type this, BUT THIS IS MICHIGAN. The forecast is for the 50s by Saturday.

The Lowell Amateur Radio Club http://www.w8lrc.org/ is pleased to announce the summer 2007 series of Asphalt Adventure mini-hamfests.

First one STARTING SATURDAY, APRIL 14. Setup 9AM, begin 10AM "until it ends", figure sometime past noon.
Frank, N8UVI, will be operating the club's service monitor in the new club shack. If you want to see how your radio's performing, bring it. (Thanks Tom KB8VEE for the idea! :) For those of you in the Muskegon area, the Tool Max store will have a service monitor available on the same morning.)
An article, with photos, about the mini-swap, has been submitted to the local paper inviting
the public to check us out. Let's not be a dissapointment.

Here's the deal. The monthly LARC meeting will begin at 9, the swap immediately follows at 10. (Visitors always welcome at our meetings) Seller setup can begin at 9.
Location, just outside the new shack, 11435 Fulton St E (Hwy-M21), West end of Lowell, between Cumberland Dr and Alden Nash Dr. About 11 miles from GR city limits. Same location as the FLAT RIVER OUTREACH MINISTRIES (F.R.O.M.) THRIFT STORE.
Former location of Cumberland Manor.
Yahoo Map:
http://maps.yahoo.com/maps_result?addr=11435+Fulton+St+E&csz=49331&country=us&new=1&name=&qt
y=

What is a mini-swap? It's a small version of a Hamfest. Not nearly the planning or advertising that goes into a full fledged Hamfest, you don't have a variety of commercial vendors. But their fun and cheep to operate.

Advantages of a mini-swap at this location, besides being where the LARC Ham shack is located:
Lots of traffic passing by on Hwy M-21. Signs will be placed to attract spectators.
Co-located with the Thrift Store, which also opens at 10.
Set-up is on a circle drive in front of the building, out of the way of other building traffic on main driveway, yet easily seen from the main driveway as well as Hwy M-21.
Just outside the windows of the LARC ham shack. If you need electricity, bring your own cord.

What's the catch? Sure we'd like to raise a couple bucks with this FUNdraiser, but we certainly don't have grandeurs of cleaning up either.
ADMISSION IS FREE.

Sellers are asked to contribute $10 per setup*. (Please read statement at bottom)
Considering the location, with no admission fee, lots of drive by traffic, potential
shoppers from the Thrift Store, that's really a good deal.
Coffee, pop, and donuts available. Sellers get free coffee.

TALK-IN: 145.27-(94.8Hz) Lowell (naturally) repeater.

Here's the summer 2007 schedule:

April 14, Saturday

May - Likely, SUNDAY, May 13, to avoid conflict with the need for ham radio volunteers for the River Bank Run on the 12th. Stay tuned! VOLUNTEER at http://www.kcraces.net

June - NO mini-swap, enjoy the IRA's Hamfestival at Hudsonville Fairgrounds, Saturday, June 2. http://www.w8hvg.org/IRAfest2k.htm

July 14, Saturday

August 11, Saturday

September - NO mini-swap, enjoy GRARA's GRAHamfest 2??7 at Kent County Fairgrounds, Lowell, Saturday, September 8. http://www.grahamfest.org/

October 13, Saturday

*SETUP: We really don't want to get into fine details here. Your open trunk, with or
without
your buddies = 1 Setup. Your open trunk next to your buddy's open trunk = 2 setups. Your
van
with trailer with a bunch of tables = 1 Setup. You get the idea. No measuring tapes here.
If
there's a disagreement on what constitutes a setup, you win. Can't get better than that.
WHAT TO SELL: In respect to the co-located Thrift Store, who's owners have granted us permission to pursue our mini-swaps (its their property after all), LARC must insist that items offered for sale stay with the theme of this event. Radio, electronics, computers and related items only. General household items sold at the Thrift Store should not be sold at our swap meet (however, TVs radios stereos computers, anything electronics is OK). If you have good general household items you no longer need, please consider donating to the Flat River Outreach Ministries Thrift Store. F.R.O.M. is a 501c3 organization.

Let's have fun, see you there.

Jim:

I more or less constantly monitor the dx spots. My software highlights the countries I need in my chase for DXCC(R). You can get a feel for the dx spots by visiting: http://www.dxwatch.com/

There is always something being "called in" or posted on the dx spots. I have, in the past, noticed quite a few spots to an area and the light bulb comes on that there is a band opening to that area. These dx spots are great for a band like ten meters that is suffering from low sunspot numbers.

When you get to the site, mouse over "dx spots" in the upper right corner where you filter the spots into a manageable number by only seeing the last fifty or only the twenty meter phone spots.

Drop by there and give it a try.

Oops, meant to type "upper left" corner. Being a surveyor I should have said, "Northwest corner of the screen." Hi

Any rate, there are lots of filters available. With only a few countries confirmed this is a great place to start searching for dx. You can find lots of dx here. Just remember, work the dx first THEN spot them. You don't need to call in a dx, alert the world, and ruin your chances of a QSO. Work them first, then spot. It's great fun and quite easy.

From: Steve Vander Hill
Topic: 2638 Message: 2779

Hello, it's hard to believe that the Tulip Time Festival parades are only a month away with the Michigan weather we've been receiving lately.

The purpose of the email is to ask for your assistance in filling the open the position for the three parades in which we work hand-in-hand with the American Red Cross and AMR in providing First Aid and emergency response along the parade route.

For both the Wednesday (May 9) parade and the Thursday (May 10) parade we are short ONE POSITION, and that is an Assistant Net Control Operator.

For the big parade on Saturday (May 12) we are short FOURTEEN POSITIONS, thirteen positions as a member of the walking American Red Cross First Aid Teams, and one position working ARES packet. If you know of anyone who would be interested in volunteering for these open positions, please have him or her drop me an email as soon as possible.

Thanks again to those that have already volunteered their skills, enthusiasm, and equipment in making the Tulip Time festival such an enjoyable one.

Best regards,

Steve - N8UJD

2780. N8S - Swain Islands

If folks want some rather rare DX, but fairly easy to work, there's a DXpedition on Swain Island, operating as N8S

There are many spots for it, and it would appear that it is readily workable.

For more info on the Dxpedition, see http://www.yt1ad.info/n8s/index.html

"easy to work"?

I've been pounding the keyer and working the phone bands without success. I'm beginning to believe my Carolina Windom won't work on seventeen meters and I'm not being heard on twenty meters.

My DX Elmer got N8S, first call, on thirty meters, cw. Guess that is what makes him a DX Elmer. HI

I even listened a bit from the clubhouse shack without success.

We've got until Sunday to score this very rare DX when they go QRT.

Best of Luck to you!

I haven't tried them, but I subscribe to the Minnesota Wireless Associations reflector, and they've been saying that N8S is easy to work. Maybe the ones who have made contact are running KW's and multi element beams.

"easy to work" is, of course, relative.

I was listening on thirty meters yesterday. Wonderful signal from N8S. He was, of course, working up. In fact, he sent, often "N8S up 2 to 20"! Now how can I figure where he is listening with such a wide split? I'm using the spots which give some direction but the exchanges are going so fast, snap, snap, snap that there is hardly time to find the station he is working before working the next guy. Thinking back, maybe I should have set up above the reported listening, pounded the keyer, and let the DX find me. I've read that the really great operators eventually work everyone. That plan takes guts, too.

Or the twenty meter phone story I've suffered: the DX is almost begging for QSOs and saying he is listening up seven. I hear him working others up seven and he is not moving around his listening. I pound the push to talk. Then the DX gets a bit erratic, saying up ten, then up seven, and then "must QRT now. I've been on this radio eight hours straight and need some rest." Out.

I've been working on a new tower and beam. Hams have said this project will really put me in the game. But it is still pieces in the barn and the DX is on the air today. Frustrating.

I'm going to try the W8ZHO shack, maybe Wednesday. Maybe it is just my inner self fooling me. I've had some success with their shack on other DXpeditions.

DX Is!

I worked N8S on 17M SSB on Sunday at 3:20pm. Power out was 90watts into my G5RV that is hanging slightly as a V (no center support). The antenna is about 40 feet off the ground. I worked them again today on 17M when I found out that many QSOs were lost due to a computer crash. Today I worked them with setup on 17m. The time was 4:05pm. I have monitored 16, 12 and 10 and have not heard them well enough to make a go at. I tried on 20M and did not get through the pile up.

I tried getting them on CW. Unfortunately the are operating most of the time in the AE segment. When they have been in the General portion of the band I have been no match for those 20+ wpm operators. My speed still averages between 7 and 10wpm. So, to correct this problem for future DXs I need to continue studying for AE so I can take and pass that test. I also need to contine practicing my CW to get it quicker.

I am happy to have at least made it on 17m. That will be a nice piece of wall paper.

Have a great day everyone!
Doc, KD8BGQ

Date: 2007-04-11 17:16:31 UTC
From: Hank Greeb
Topic: 2789 Message: 2789

NAQCC Sprint April 11, 2007

MyCall QSO's Mbrs QSOPts Mults Score Bonus Final
N8XX 17 17 34 9 306 1 306

Operating time, 40 minutes.

The NAQCC Sprints are somewhat "laid back" CW contests, where the particpants are all QRP (5W or Less), where straight keys are encouraged, and where <10 WPM isn't at all uncommon. Folks using straight keys get a 2X multiplier, which encourages such operation. I lost (hopefully temporarily) my J-38 key in the move from Ohio, so I used my computer for keying, and didnt' get the bonus.

The Sprints are run on the 2nd Tuesday evening of even numbered months (February, April, June, etc.), and the 3rd Wednesday evening of odd numbered months (January, March, May, etc.)

Stations with any power are allowed to participate, but only those running <5W will be considered for awards. Full details of the NAQCC and their sprints may be found at:

http://www.arm-tek.net/~yoel/contests.html

2790. Smoke Alarm Installation, Grand Rapids, Saturday, March 14

All available hams are encouraged to join with Greater Grand Rapids Red Cross and the Grand Rapids Fire Department this coming Saturday, March 14, at Berean Baptist Church, 1574 Coit Avenue NE, Grand Rapids. This is off the Ann Street Exit of US 131.

Hams are needed to provide communications for the teams which will survey the area surrounding the Berean Baptist Church. This is a very worthwhile public service event - teams typically find several homes with a non-working or non-existent smoke detector. We can help save lives by this effort.

Come on out, Saturday, April 14, 9:00 a.m. to no later than 1 p.m. The Red Cross will provide a nice lunch when we finish.

- HR 462
- Legislative Action Program
- ARRL and National Public Safety Telecommunications Council MOA
- New Q-Signal
- It's my Turn
- Michigan QSO Party
- BPL Information
- RM-11306
- Tnx for the Memories
- Not all Thumbs
- Tentative Travel Schedule

== HR 462 ==

In January, Arkansas US Rep Mike Ross, WD5DVR introduced the Emergency Amateur Radio Interference Protection Act of 2007 into the House. This bill has been referred to the House Committee on Energy and Commerce. If enacted into law, the bill will require the FCC to conduct a comprehensive study on BPL. The bill is intended to lead to improved rules to prevent interference from BPL and similar devices.

So should everyone rush to send letters to their US Representative and Senators? The answer to this is a clear "No; definitely no." Now is not the time to do this.

The most logical sequence of activities we can expect to take on this bill will begin at the top of the ARRL Legislative Action Program when the Directors and Division Legislative Action Chairs receive the "go" signal from HQ.

This "go" signal is likely to request Legislative Action Assistants (LAAs) who are assigned to members of the House Committee on Energy and Commerce to call on these Representatives or their aides in their home offices. These visits will promote favorable action by the Committee. Depending on the precise manner in which things develop, the next step is likely to be to ask all LAAs to call on the local offices of each Representative. Finally, every member will probably be asked to write their Representative to encourage them to vote for the bill.

One major risk exists if we jump the gun in our zeal to get this bill passed. This is that we can inadvertently ruin the chances of its passage. Effective lobbying requires that we work in a coordinated manner. Lack of coordination can prove disruptive to the effort and cause us to throw away our chances of a legislative victory.

Please hold tight and take no action until the right time comes and you
are asked to take action. Be part of the team. Your help is needed
and it will be requested . . . at the right time.

== Legislative Action Program =

Legislative Action Assistants are the people who will be given the
information needed to call on our congressional representatives to
promote Amateur Radio-favorable legislation. We continue to make good
progress in enlisting additional volunteers as LAAs in our three
states, but we need more. If you are interested in learning how you
can help get the ARRL Legislative Program passed, contact the
Legislative Action Coordinator (LAC) in your state. These are: Brent
Stover, WD8PNZ (wd8obz@...) for Ohio and Bob "Scotty" Wright,
KB8APS (kb8aps@...) for Michigan. For the time being, contact me
(k8je@...) for the Commonwealth.

2793. Have your radios check out this Saturday at TOOL MAX

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-12 01:41:18 UTC
From: Tom VanderMel
Topic: 2793 Message: 2793

All Hams

Join us for coffee this Saturday At the Tool Max Store from 9AM-12PM

Jim Duram will be at Tool Max this Saturday April 14 with his service monitor to check out deviation and frequency accuracy. If hams want to have any problems corrected they will need to bring a copy of the service manual (paper or electronic) for their radio. Service manuals can be obtained from www.mods.dk for just about any radio. All it takes is to register with the site and you are allowed to download your manual for no cost.

NEW THIS WEEK
Antennas and mounts from Tower Electronics. We are now a Dealer for Tower and have put them in Stock. Check out their website below to see what we have or can get for you in Muskegon so you do not have to wait for the next Hamfest.

Tower Electronics on line Catalog website http://www.pl-259.com/catalog.html

NEW items on consignment this week

MFJ-722 Notch Filter $30.00
B23G Mirage 30 watt VHF Power Amp $40
QF-1A SSB Filter by Autek Research $30.00
Model 21-533 Radio Shack SWR Meter $10.00

Now in Stock

The Te-Ne-Ke code key by the North Ottawa Club $35.00
We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, and Industrial Batteries for your HT's
300 ohm twin lead 100Ft $10.00
RG-8 .60 per Foot
RG-8X Coax Cable .35 per Foot
PL-259 Connectors $2.50 ea adadapters for RG-8X $1 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
New 2 Amp Power Supplies good to power Hand Held $12
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

The only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.
Technician Class $18.95
General Class $17.95 Get yours NOW and upgrade before the changes on July 1, 2007
Extra Class $19.95
FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Other Used Equipment on Consignment

MFJ 407C keyer $15
Code Key $15
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
PRO-2038 Radio Shack 50 Ch Scanner Works Great $45
Yaesu MP-1 Microphone $40
Allied A-2515 Short Wave Receiver $75
HF Tuner $40
Sharp SF7320 working Copy Machine $50
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40

Heathkit items in stock

Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40
Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Extra Speakers For Radios $3
Keychain LED lights $1.50 and up
Other items coming in Daily

I still need some more items for Sale. Bring your consignment items in today

The POP machine is working, with cold sodas of your choice. Snacks are in. Have one of your favorer candies or snacks.
Come in and Join us for FREE Coffee and sweets (FREE Popcorn this week only) Saturday from 9AM-12PM

Tool Max Industrial Supply is the new retail store on Schamber Dr just off Pontaluna Rd and US-31 behind the old Hob Knob or Michael's Restaurant in Muskegon . We have tools, industrial suppliers and Ham radios for sale.For more information call me at 231 798-7898

2794. Q Signals That Never Made It

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-12 01:44:54 UTC
From: Hank Greeb
Topic: 2794 Message: 2794

From THE RADIOGRAM, APRIL 2007,
Portage County (OHIO) Amateur Radio Service, Inc. (PCARS)
Reprinted by Permission

Q Signals That Never Made It

Here are some Q signals have never made it to the ARRL's official list. I found these while on the internet. As with regular Q signals, each can be a statement or a question, depending on whether a question mark follows it.

QBA My antenna is BIG!
QBA? How big is your antenna?

QBO Don't sit next to that guy in the meeting.
QBO? Buddy, can you spare some soap?

QBS It's getting deep in here.
QBS? Did I tell you about the one that got away?

QCP I am using Cat Power (From Rotary Cat PowerWheel)
QCP? Are you using Cat Power?

QCW I am going to whistle Morse Code on FM (or SSB)
QCW? Why are you whistling Morse?

QDR Damn Right the frequency is busy! (In response to QRL)
QDR? Do you have a Receiver? (In response to QRL)

QET Phone home.
QET? Has anyone called me from another planet?

QFH This frequency is MINE! - go elsewhere.
QFH? Is this frequency hogged?

QHI I am jumping in quick to say hi, then going QRT.
QHI? Are you leaving after only one transmission?

QLF I am sending with my left foot.
QLF? Are you sending with your left foot?

QOK Your last transmission was Okie Dokie.
QOK? Was my last transmission OK?

QPM Your signal is purr modulated.
QPM? Is my signal purr modulated?

QRC Warning, rag chewer on frequency.
QRC? Are you a rag chewer?

QWC? Who cares?
QWC I don't care

QZZ I fell asleep at the mike.
QZZ? Is that a 60Hz hum, or are you snoring?

Thanks to Russ - KB8DPN

2795. Tulip Time Festival 2007

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-12 02:03:35 UTC
From: Tom VanderMel
Topic: 2638 Message: 2795

All Hams
Steve is still in need of 10 people for Tulip Time this year. If you can help him please e mail him direct. Please Please He needs help bad. It is a fun day to work

svanderhill@...

Hello, it's hard to believe that the Tulip Time Festival parades are only a month away with the Michigan weather we've been receiving lately.

The purpose of the email is to ask for your assistance in filling the open the position for the three parades in which we work hand-in-hand with the American Red Cross and AMR in providing First Aid and emergency response along the parade route.

For both the Wednesday (May 9) parade and the Thursday (May 10) parade we are short ONE POSITION, and that is an Assistant Net Control Operator.

For the big parade on Saturday (May 12) we are short FOURTEEN POSITIONS, thirteen positions as a member of the walking American Red Cross First Aid Teams, and one position working ARES packet. If you know of anyone who would be interested in volunteering for these open positions, please have him or her drop me an email as soon as possible.

Thanks again to those that have already volunteered their skills, enthusiasm, and equipment in making the Tulip Time festival such an enjoyable one.

Best regards,

Steve - N8UJD svanderhill@chartermi.net

2796. Newspaper article for the "ham shack" / mini-swap this Saturday

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-12 11:09:39 UTC
From: Jack Amelar
Topic: 2796 Message: 2796

This Saturday, April 14, mini-swaps return to the Grand Rapids area.
Signage is posted at the site along heavilly traveled M-21 inviting the public: "RADIO ELECTRONICS SWAP MEET SATURDAY 10AM FREE ADMISSION". Come out to look, come out to sell. Together this can be a great event.

A nice article appears in today's (April 11) Lowell Ledger. They got all the details correct. I would hope so since I'm the one who made the submission.

A photo of adult and youth members operating in the shack accompanyed the article.

Here is the article as appears in the paper with the minor changes the editor made.

New Location for the ?Ham Shack?

The Lowell Amateur Radio Club (L.A.R.C.) and the Amateur Radio Group of Youth in Lowell (A.R.G.Y.L.) have moved their ?ham shack? into a new home located in the former Cumberland Manor Building ? just down the hall from the new Flat River Outreach Ministries (F.R.O.M.) Thrift Store, 11535 Fulton St E.
The new ?shack? will be christened with a swap meet this Saturday.
The ham shack will provide a hub for volunteer communications for the area. Amateur radio organizations throughout the world provide communications during emergencies and community events. Ham communications also use radio repeaters. In Lowell, the repeater frequency is 145.27 MHz.
L.A.R.C. and A.R.G.Y.L. members also have fun. With permission of F.R.O.M., beginning this Saturday, April 14, and about once a month into Fall, L.A.R.C. will host a ?Mini-Hamfest?, an Electronics-Radio flea market, held outside in the circle drive in front of the building. Selling starts the same time the Thrift Store opens at 10AM and goes until sometime past noon. Admission is free and open to the public. Sellers are asked for a nominal contribution. Items offered for sale are limited to the theme of the swap meet: electronics, radios, computers, and related items. The idea is to complement the Thrift Store, not compete with it.
A ?Mini-Hamfest? is a smaller, mostly general area event, unlike a full fledged ?Hamfest? which attracts buyers and sellers including new equipment vendors, from a wider region.
The ?GRAHamfest? (Grand Rapids Area Hamfest), sponsored by the Grand Rapids Amateur Radio Association, will be held at the Fairgrounds on Saturday, Sept. 8. The ?Year End Hamfest?, sponsored by A.R.G.Y.L., will take place at Lowell High School, on Saturday, December 15. Call 897-6885 for more information.
L.A.R.C. meetings are on the second Saturday of the month, 9AM during the ?mini-swap? season. Visitors always welcome. Updates can be found at http://www.w8lrc.org
A.R.G.Y.L. meetings are on the first Saturday of the month at 9AM. Membership open to school age youth. More information can be found at http://www.argyl.org

---

The Lowell Amateur Radio Club http://www.w8lrc.org/ is pleased to announce the summer 2007 series of Asphalt Adventure mini-hamfests.

First one STARTING SATURDAY, APRIL 14. Setup 9AM, begin 10AM "until it ends", figure sometime past noon.
Frank, N8UVI, will be operating the club's service monitor in the new club shack. If you want to see how your radio's performing, bring it. (Thanks Tom KB8VEE for the idea! :) For those of you in the Muskegon area, the Tool Max store will have a service monitor available on the same morning.)

Here's the deal. The monthly LARC meeting will begin at 9, the swap immediately follows at 10. (Visitors always welcome at our meetings) Seller setup can begin at 9.
Location, just outside the new shack, 11435 Fulton St E (Hwy-M21), West end of Lowell, between Cumberland Dr and Alden Nash Dr. About 11 miles from GR city limits. Same location as the FLAT RIVER OUTREACH MINISTRIES (F.R.O.M.) THRIFT STORE.
Former location of Cumberland Manor.
Yahoo Map:
http://maps.yahoo.com/maps_result?addr=11435+Fulton+St+E&csz=49331&country=us&new=1&name=&qt
y=

What is a mini-swap? It's a small version of a Hamfest. Not nearly the planning or advertising that goes into a full fledged Hamfest, you don't have a variety of commercial vendors. But their fun and cheep to operate.

Advantages of a mini-swap at this location, besides being where the LARC Ham shack is located:
Lots of traffic passing by on Hwy M-21. Signs will be placed to attract spectators.
Co-located with the Thrift Store, which also opens at 10.
Set-up is on a circle drive in front of the building, out of the way of other building traffic on main driveway, yet easily seen from the main driveway as well as Hwy M-21.
Just outside the windows of the LARC ham shack. If you need electricity, bring your own cord.

What's the catch? Sure we'd like to raise a couple bucks with this FUNdraiser, but we certainly don't have grandeurs of cleaning up either.
ADMISSION IS FREE.
Sellers are asked to contribute $10 per setup*. (Please read statement at bottom)
Considering the location, with no admission fee, lots of drive by traffic, potential shoppers from the Thrift Store, that's really a good deal.
Coffee, pop, and donuts available. Sellers get free coffee.

TALK-IN: 145.27-(94.8Hz) Lowell (naturally) repeater.

Here's the summer 2007 schedule:

April 14, Saturday

May - Likely, SUNDAY, May 13, to avoid conflict with the need for ham radio volunteers for the River Bank Run on the 12th. Stay tuned! VOLUNTEER at http://www.kcraces.net

June - NO mini-swap, enjoy the IRA's Hamfestival at Hudsonville Fairgrounds, Saturday, June 2. http://www.w8hvg.org/IRAfest2k.htm

July 14, Saturday

August 11, Saturday

September - NO mini-swap, enjoy GRARA's GRAHamfest 2??7 at Kent County Fairgrounds, Lowell, Saturday, September 8. http://www.grahamfest.org/

October 13, Saturday

*SETUP: We really don't want to get into fine details here. Your open trunk, with or without
your buddies = 1 Setup. Your open trunk next to your buddy's open trunk = 2 setups. Your van
with trailer with a bunch of tables = 1 Setup. You get the idea. No measuring tapes here. If
there's a disagreement on what constitutes a setup, you win. Can't get better than that.
WHAT TO SELL: In respect to the co-located Thrift Store, who's owners have granted us permission to pursue our mini-swaps (its their property after all), LARC must insist that items offered for sale stay with the theme of this event. Radio, electronics, computers and related items only. General household items sold at the Thrift Store should not be sold at our swap meet (however, TVs radios stereos computers, anything electronics is OK). If you have good general household items you no longer need, please consider donating to the Flat River Outreach Ministries Thrift Store. F.R.O.M. is a 501c3 organization.

Let's have fun, see you there.

2798. Re: [WestMichiganHams] It's that time of the year

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-12 13:20:46 UTC
From: paul odem
Topic: 2797 Message: 2798

send me more information for the greenville march of dimes, when you get them thanks paul

k8mhz@... wrote: But you wouldn't know it by looking outside!

Muskegon's first event of the season, the March of Dimes WalkAmerica will be April 28, 2007

I am just in the process of gathering names. The Walk will take place in Muskegon on the bike trail from Heritiage Landing to the BC Cobb plant.

I don't have the exact times yet, but we are looking at approx 9am to Noon. I will post exact times when I get them. This is a great event for new hams interested in EmComm training.

I also see several other WalkAmerica events on the list. Holland for the 21st, Fremont for May 5th, Greenville and Milford for the 29th that are covered by the office I work with.

Can anyone tell me if they know if the other events are being covered by ham radio?

Besides staffing the WalkAmerica events I have been asked to staff the upcoming Saddle Up and Mystery Rides as well. They are later in the year.

After WalkAmerica in Muskegon there will be the Muskegon Chronicle's Seaway Run.

Thanks and stay tuned for more info.

From: Hank Greeb
Topic: 2800 Message: 2800

For those who are having trouble working N8S with 100 watts or so, eat your heart out. :)

Note: I haven't even tried to work N8S, should I? I have 100 watts and a dipole up 30 feet or so.

-------- Original Message --------
Subject: [QRP-L] Worked Swains Island QRP ON 17 Meters
Date: Thu, 12 Apr 2007 14:53:14 -0400
From: Thomas Giella KN4LF <kn4lf@...>
To: a QRP-L eList <qrp-l@...>

At 1845 UTC from here in west central Florida I worked Swains Island on 18150.0 RX 18155.0 TX with 5 watts on phone. I worked them on second call using a dipole at 50 feet. My signal report was 55.

At 1838 UTC I worked them with 90 watts and my report was 59.

2802. Re: Fwd: [QRP-L] Worked Swains Island QRP ON 17 Meters

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-12 23:36:16 UTC
From: Bill
Topic: 2800 Message: 2802

Working N8S via QRP? You're braver than I. I'd be much more impressed if a QRPer could accomplish this task in the first three days of a DXpedition when the competition is fierce.

I scored the dx this afternoon, local time. It was sad, sort of, to hear the guys on N8S begging for QSOs. There was still a full compliment of lids to make the twenty meter QSO questionable. Sure wonder why a lid would tune up on the dx and then change his transmit to the listening frequency. Why not tune up there? Or causing QRM is a badge of some distinction?

2805. Michigan QSO Party at the MAARC clubhouse!

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-13 16:32:10 UTC
From: Linda
Topic: 2805 Message: 2805

Hello all:

A reminder to anyone who would like to attend, the clubhouse will be open on April 21st, we will be contesting. Come on down to help, observe, eat potluck at 5 p.m., hang out, shoot the breeze and watch the club kick some bravo-united-tango-tango in the Michigan QSO Party contest. Bill, AB8SC, promises amazing results. Weather looks good so far for that day. The clubhouse is located at 2888 Scenic Drive, Muskegon. I believe that we'll have at least one demonstration mode for folks to see, possibly more. You're welcome to stay as long as you like, or pop in briefly. We had fun last year and this year should be no different.

73,
Linda, AB8QH

2806. New and upgraded license statistics

Topic: 2800 Message: 2808

Greg:

I'm amazed at the folks who like to brag about getting the DX on every band and using every mode. Well, maybe not amazed as just wondering, Why? I have not noticed an Honor Roll for Five Band DXCC. Is it because this one is a sure QSL when that Serbia might not be such a sure thing?

The best one I read was a guy complaining that the on-line log did not have his call sign. He had worked the DX six times, the DX had told him he was a dupe, and the DX had made a special point to give the guy his call sign extra slow and twice. I guess it isn't over until the paperwork is done, meaning you have the QSL card on the wall. But why?

DX pig comes to mind.

An insurance QSO on another band or mode, fine. Ten QSOs on six bands seems extreme. Twenty QSOs on one band and mode? Certainly NOT priceless!

A guy could argue that the DX is rare and the next opportunity won't be for a while. And besides, toward the end of the DXpedition the DX is begging for QSOs. If it weren't for weekend warriors I'd bet that Saturday would be a great day to chase this DX with success. Sure seems that too many folks make too big a thing out of getting into the DX log too many times too early in the DXpedition.

The Peter One Isl folks worked nearly 90k QSOs. These Swains Isl guys had over 100k QSOs in the log before the on-line log went down. You can't keep everyone happy but numbers like those sure seem to indicate a pretty healthy percentage?

Hi Hank.
I worked N8S on 17 meters SSB with 90W going into a G5RV that is a slight V (no center support) that is hanging about 40 feet of the ground. The center I estimage to be around 37 feet of the ground. I was given a solid 59 for my RS(T). I know they have worked on other bands too. Either I have not been able to hear them on the other bands/modes or they have been in the AE portion. The one time they were in the General class portion of 20M SSB there was a gigantic pile-up and I was not able to get through.

Have a great day!

2815. Batch File QSLs 2 N8S?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-16 13:21:13 UTC
From: Bill
Topic: 2815 Message: 2815

All:

Is there any interest in collecting QSL cards to the N8S, putting them all into one envelope, putting donations into that same envelope, and mailing a handful of cards to the QSL manager?

I'm pretty sure AB8QH, and I would donate.

Maybe we can put together our cards and envelope at the Michigan QSO Party this weekend?

Congratulations to all who managed to get into the log. I remember reading they had 115K QSOs in the log before they pulled the plug Sunday. I was reading the mail on thirty meters when the operator went QRT to pack his gear and head for the boat.

Bill, AB8SC
MAARC guy

Next challenge? BS7H is predicted to be much more difficult.

2816. Reminder, Michigan QSO Party Saturday, April 21

2817. Fw: ARRL Update on Red Cross Background Investigations

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-16 22:44:00 UTC
From: Mark Thompson
Topic: 2817 Message: 2817

ARRL Update on Red Cross Background Investigations

NEWINGTON, CT, Apr 16, 2007 -- In March, the ARRL posted its position statement regarding the American Red Cross background check policy for volunteers. This updates information the League has obtained about that program.

ARRL General Counsel Chris Imlay, W3KD, and Chief Technology Officer Paul Rinaldo, W4RI, met March 20 at American Red Cross offices in Washington, DC, with two attorneys from the Red Cross General Counsel's office and two management-level staff members from Red Cross Disaster Services.

ARRL asked the Red Cross staff if ARRL ARES volunteers would be subject to the American Red Cross background check if they are providing communications for more than seven days. The position of the Red Cross is that ARES volunteers would not be permitted to provide communications at a disaster site for more than seven days without submitting to the Red Cross background check procedure.

Discussion was then held regarding the Red Cross announcement that credit checks and mode-of-living checks would not be conducted. ARRL's stated concern was that the ARC background investigation consent form states that a consumer report and/or an investigative consumer report -- which includes certain credit checks and includes mode of living checks -- will be obtained on the volunteer signing the form.

The ARRL team asked if the Red Cross would be willing to modify the consent form so that it limits the authority granted by the person signing the form to criminal background checks only. The Red Cross representatives did not indicate a willingness to modify the consent form.

The ARRL team also suggested alternatives to the Red Cross investigation firm, MyBackgroundCheck.com. ARRL was given an indication that the Red Cross is also unwilling to accept background checks conducted by other entities, because the Red Cross would be required to compare the methodologies of its selected entity with those of the alternative background-check provider.

ARRL reiterates its recommendation that members carefully review any consent document permitting a private organization to conduct a background investigation on that person. The current Red Cross background check consent form does include permission, without further consent from the volunteer, to conduct a consumer report and/or an investigative consumer report. The Federal Trade Commission and Federal statutes define investigative consumer reports as including a mode-of-living check as well as certain credit checks.

ARRL will not suggest what organizations or agencies should or should not be supported by volunteer Amateur Radio communications. ARRL does wish to facilitate the provision of volunteer services, however.

2818. License Test Session, Friday

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-16 23:16:08 UTC
From: Bill
Topic: 2818 Message: 2818

All:

We have settled the details around the next licensing testing opportunity. We will be testing Friday evening, April 20, between 7:00 and 8:30 pm, give or take, at the First Congregational Church in Fremont.

Please visit the radio club's www site for more details, directions, and what to expect and bring.

http://www.qsl.net/w8zho/

The three licensing exams will be administered to anyone wanting to test. Please note that you should bring copies of some material. We will not be able to access the church's copy machine so bring the necessary copies. And also bring $14 in cash as we cannot process credit cards or checks.

You still have time to practice test on-line and I encourage you to be testing that way. It is a wonderfully effective way to prepare for this experience.

Please pass the word so we are all prepared. I am not aware of another test session available outside the other more formal or regular sessions in Grand Rapids or at a hamfest.

We wish you all the success in this next step to obtaining your FCC license and entry into the amateur radio hobby.

I know that several other activites are happneing on April 28, but the Greater Grand Rapids Chapter of the American Red Cross has a LARGE smoke alarm survey and istallation event set for this date.

If at all possible, please send a message to Courtney Myers <cmeyers@...>, or WD8USA <wd8usa@...> with particulars.

It appears that volunteers for this event will be given a T shirt. Nice addition!

To: undisclosed-recipients:;

Hello All-
This is a reminder that there is a smoke alarm installation on Saturday April 28th. This event is being coordinated with Home Repair Services for their annual community event "Raise the Roof". We need as much manpower as possible for this day. I especially need Spanish-speakers!! Registration will begin at 8:30 AM at Home Repair Services, located at 1100 S. Division Ave. We will be going into Roosevelt Neighborhood and will wrap up at about 2 PM. If you are interested in volunteering, please contact me by Wednesday April 18th with your name, number, address and t-shirt size. (I need all of these so Home Repair Services knows how many t-shirt, lunches, thank you cards, etc will be needed)

Thank you!!!

PS- If you have already told me you are volunteering I still need all of the info sent to me!

I don't recall if the Ludington to Manitowoc ferry is running, but if it is, there's a submarine on the waterfront not far from where the ferry lands. They have a working WW-II vintage ham radio station on board. They typically operate during these contests. The tour of their submarine is very worthwhile!

2837. DHS Announces $29.1 Million Available for National Preparedness

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-19 21:30:22 UTC
From: Mike
Topic: 2837 Message: 2837

DHS Announces $29.1 Million Available for National Preparedness
Training Initiatives

Release Date: April 17, 2007
Release Number: FNF-07-011

WASHINGTON, D.C. -- The Department of Homeland Security's Federal Emergency Management Agency (FEMA) announced the availability today of $29.1 million to eligible state, local, tribal, and territorial governments, national associations, higher education institutions, non-profit organizations, and private sector businesses as a part of the 2007 Competitive Training Grant Program (CTGP). This program awards funds to competitively selected applicants to develop and deliver innovative training programs for high priority national homeland security training needs.

CTGP provides funds to support training initiatives that are national in scope and further the department's mission of preparing the nation to prevent, protect against, respond to, and recover from catastrophic events. The emphasis this fiscal year is on the development and delivery of courses in one of the following five focus areas:

* Public communications
* Executive leadership of homeland security programs
* Intergovernmental coordination and planning
* Managing homeland security risks
* Legal issues in preparation, response, and recovery

Eligible entities must apply for funding through the Grants.gov portal, accessible on at www.grants.gov, no later than 11:59 pm EDT on May 4. Registering with Grants.gov is a one-time process, but first time registration could take 3-5 business days to validate, confirm, and receive a user name and password. It is highly recommended to start the registration process as early as possible.

Since 2003, CTGP has developed more than 40 training programs targeting areas like community outreach; vulnerable populations and special needs; intelligence, information sharing, and fusion centers; cyber-terrorism; agriculture; regional collaboration and continuity of operations planning; transit, port and infrastructure protection; rural communities; law enforcement; and mass casualty.

For further information on CTGP and other DHS programs, visit www.dhs.gov.

40: 112 22
20: 13
15: 0
10: 0

Total: 214 49

CW Mults = 67 Ph Mults = 36 Total Score = 49,131

Club: Mad River Radio Club

Comments:

This is my second year in Michigan, and MiQP. Personal Best! Not bad for a LID operator and a wet noodle wire antenna! I bought a new microphone for my Drake TR-5, and managed a few SSB Q's, for an added 36 Phone multipliers! It was nice to work several stations from Kent County - last year I heard nary a one. Locally heard W8N (AF8A) in Montcalm County, W8MSK in Kent County, and W8ZHO in Muskegon County. Propagation during MiQP on 40 and 20 was poor. 40 metres was a bust for in State - only 8 counties worked on 40 CW, most in the upper peninsula, none on 40 phone. Even though I looked for the mobiles according a "proposed schedule" I could hear only a few of them, except for those which came through locally. (Thanks, WT9U on 40, for the KENT county - you must have been next door!) 20 metres had a pipeline into the Czech Republic. I did manage a few west coast stations, but they were generally weak. Oh, well, the experts tell us that we have actually hit the low for the current cycle, so maybe next year!

2847. Saturday, May 12 - Tulip Time Parade 2007

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-24 14:06:34 UTC
From: Steve Vander Hill
Topic: 2847 Message: 2847

Hello, the purpose of this email is to request your assistance in filling the remaining seven open spots for this year's Saturday Tulip Time parade.

Hams pride themselves on being good emergency communicators. Public service events like Tulip Time are a great way to sharpen our skills, and test our equipment, and operating procedures. Working such an event is also a great way to meet, and spend time with other hams in the area.

For those that are new to the hobby or those that have sat on the sidelines in the past years, please consider giving it a try. It is fun, and is a great way to brush up on your net operating procedures while providing a highly visible community service.

If you?re interested in volunteering, please provide me with you full name, call sign, physical limitations or special needs, contact phone number, email address, and any special assignments you would like to cover.

Thank you in advance!

Best regards,

Steve - N8UJD

2851. Armed Forces Day, Crossband Contacts May 12

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-26 19:55:49 UTC
From: Hank Greeb
Topic: 2851 Message: 2851

From http://www.arrl.org
reprinted by permission

Armed Forces Day Crossband Radio Communications Test set (Apr 26, 2007) -- The US Army, Air Force, Navy, Marine Corps and Coast Guard will co-sponsor the annual military/Amateur Radio Communications Tests to celebrate the 57th Armed Forces Day. Although Armed Forces Day falls on Saturday, May 19, the 2007 Armed Forces Day Military/Amateur Crossband Communications Test will take place a week earlier, on Saturday, May 12, to avoid conflicting with the Dayton Hamvention May 18-20. The annual celebration features military station-to-amateur station crossband tests on SSB and copying the Secretary of Defense message via digital modes. "These tests give Amateur Radio operators and Short Wave Listeners (SWLs) an opportunity to demonstrate their individual technical skills, and to receive recognition from the Secretary of Defense and/or the appropriate military radio station for their proven expertise," the Armed Forces Day announcement states. Amateur Radio participants will listen for designated military stations on military frequencies, while military participants will listen for Amateur Radio calls in the adjacent ham band. QSL cards will go to Amateur Radio stations making contact with participating military stations. Special commemorative certificates will be awarded to anyone who receives and copies the digital Armed Forces Day message from the Secretary of Defense. Full details on participating stations, times and frequencies are available on the Army MARS Headquarters Web site.

2852. Heathkit HA-10 Amp?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-27 01:18:03 UTC
From: heavyfistcharlie24
Topic: 2852 Message: 2852

Hi,

This is my first post on WestMichiganHams. Just got my first Ham license, a General, after taking the exam for the first time. Of course, I have only been studying off and on for the last 30 years, but never followed through and pulled the trigger! Yes, I tend to be a big time procrastinator. With Al, KV8X, after me for the last 20 years to get my license, (along with other Hams), and then recently telling me I had run out of excuses to not get my license, I enrolled in Mark's, K8MHZ, excellent eight week Technician Class study group. Under his excellent teaching skills, I passed the Tech exam without a problem, and then immediately took the General exam. The General exam had beads of sweat breaking out on my forehead as I took it. After the examiner walked up to me and told me I had passed the General, I was grinning ear to ear. I am still smiling! This is something I started thinking about and wanting to do 45 years ago. Now, I have it, and the enjoyment begins. I have met some really fine people that are in this field. I feel like I have been given the key to a whole new world of action and knowledge. Heck, it's like Christmas!
In the next couple of days, I will be taking delivery on a Heathkit HW-101 with the power supply, complete manuals, and Shure 444 mic. It is from the shack of a Silent Key in Illinois. The items are in excellent condition. I have also been offered to buy a Heathkit HA-10 "Warrior" , 1KW amp, that was from the early 60's era. It is also from the SK's radio shack, and in excellent condition. Price is $275, but I will have to drive and pick it up as it weighs about 100 lbs. It's a tank. (A boat anchor large enough to hold the Queen Mary in a hurricane). I will also be buying the Heathkit SA-2060 antenna tuner that was connected to the HW-101, and it is also in excellent condition.
I have Googled the HA-10 and SA-2060, and read about these two pieces of equipment. My question to the members of WestMichiganHams is about the HA-10 amp. I'm sure there are members that know this amp well. I would just like some thoughts and info. I would be using it mostly on sideband.
For those wondering about my "HeavyFistCharlie24" ID, it was my first radio call sign when I was in Vietnam in the USMC.

73's,
- Scott -

Scott:

Welcome to ham radio. Well, in your case, a Big Congratulations on finally taking the exams and getting your call.

There are tons of local hams who enjoy boat anchors. Your ham friend, Al, KV8X would be your first choice for information. And don't forget to speak with Tom, W8AMZ who has a number of "green" rigs. Would that be "green" as it is popular in the press today? Hi

We encourage all our ham friends to get involved in the amateur radio related opportunities presented almost every week. A March of Dimes walk on Saturday (tomorrow) and the club meeting on Thursday. A clubhouse work bee, special opportunity to work the radio, and dinner on May 12. There are tons of things happening.

Welcome to you and all the new hams and upgraded hams. A special encouragement to the "been there, done that" hams who are pressed into service as Elmer, too.

2857. Re: [WestMichiganHams] Heathkit HA-10 Amp?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-27 13:56:54 UTC
From: Tom Nickisch
Topic: 2852 Message: 2857

Hi Scott,

I do indeed have an HA-10. I got real lucky, I had been looking for one for a long time in good condition. This one it turned out the original owner Had built it in the early sixties along with the matching RX-1 receiver and transmitter HX-10. When he finished building it and read about the high voltages inside he said he got scared of it and never plugged it in. Instead he boxed it up, and there it sat till last year. I will tell you it looks like it was just built yesterday. I would recommend a better match to the HW-101 (Hot Water -101) would be A Heathkit SB-200. Same power lighter weight and all parts are readily available and can also be used with all the newer modern rigs as well. the HA-10 does not have tunned inputs. So it has to be connected with older tube rigs with pie network on the outputs. Plus it's about 3-4 times the size of the hw-101. Good luck,

73' Tom W8AMZ

2859. WQ8RP (N8XX) in QRPTTF 2007 Tomorrow, April 28

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-27 15:47:28 UTC
From: Hank Greeb
Topic: 2859 Message: 2859

Reminder - please look for WQ8RP/TB from Greenville, MI during QRP TTF. I can't predict if skip will be short enough, even on 40 metres, but the best possibility would be 7030 KHz ? Florida QSO Party QRM early to mid afternoon. There is/was at least one Sunspot yesterday, so maybe, just maybe, short skip on 40 might work! The hours for this event are from 11 a.m. EDT to 11 p.m. EDT, though I doubt I'll last the entire period.

If you're in the neighborhood, I'll be operating from the auxiliary parking lot of the Taco Bell in Greenville, 1825 W Washington St. It's on the south side of M-57 (Washington Street) near the Meijer store.

If you want to operate from home or another field location, rules for QRP TTF are at http://www.zianet.com/QRP/2007/qttfruls.html

Note that you do NOT have to run <5 watts to contact me, or any other QRP TTF station. We'll take contacts from anyone!

72 de n8xx (WQ8RP during QRPTTF 2007)

a big time procrastinator. With Al, KV8X, after me for the last 20
years to get my license, (along with other Hams), and then recently
telling me I had run out of excuses to not get my license, I enrolled
in Mark's, K8MHZ, excellent eight week Technician Class study group.
Under his excellent teaching skills, I passed the Tech exam without a
problem, and then immediately took the General exam. The General exam
had beads of sweat breaking out on my forehead as I took it. After
the examiner walked up to me and told me I had passed the General, I
was grinning ear to ear. I am still smiling! This is something I
started thinking about and wanting to do 45 years ago. Now, I have
it, and the enjoyment begins. I have met some really fine people that
are in this field. I feel like I have been given the key to a whole
new world of action and knowledge. Heck, it's like Christmas!
In the next couple of days, I will be taking delivery on a Heathkit
HW-101 with the power supply, complete manuals, and Shure 444 mic. It
is from the shack of a Silent Key in Illinois. The items are in
excellent condition. I have also been offered to buy a Heathkit HA-10
"Warrior" , 1KW amp, that was from the early 60's era. It is also
from the SK's radio shack, and in excellent condition. Price is $275,
but I will have to drive and pick it up as it weighs about 100 lbs.
It's a tank. (A boat anchor large enough to hold the Queen Mary in a
hurricane). I will also be buying the Heathkit SA-2060 antenna tuner
that was connected to the HW-101, and it is also in excellent condition.
I have Googled the HA-10 and SA-2060, and read about these two
pieces of equipment. My question to the members of WestMichiganHams
is about the HA-10 amp. I'm sure there are members that know this amp
well. I would just like some thoughts and info. I would be using it
mostly on sideband.
For those wondering about my "HeavyFistCharlie24" ID, it was my
first radio call sign when I was in Vietnam in the USMC.

73's,
- Scott -

LOCAL EMERGENCY MANAGEMENT:

From the on-going discussion of local emergency management in the IAEM Discussion List pulled the following item:

"Now lets take a look at rural America. In Rural America the County EM coordinator (one person only in most cases) might be full time, 1/4 FTE,
1/2 FTE or less. He or she might also be the EMS director, Sheriff, Fire, etc. Most, if not all, wear multiple hats. Why, dollars drive the train along with county commissioners because that is who they work for. In some cases, in rural Montana, the EM Coordinator might only get
paid $100 - 200 a month and are expected to do the work of a full-time Coordinator. Sad but true, that is rural America. What suffers, plans, EOCs (which in some cases don't exist) coordination between agencies, etc. Thank your lucky stars if you are full time and have folks working
for or with you."

Scott-a very BIG welcome to the hobby! I am sure you will find it gratifying. Another thing about the old warrior, is I don't believe it was set up with a T/R switch from the "factory". If it was used with the Hot-Water-101, it may have been so modified, though. One thing for sure.... if you get it, you'll not need another amp in YOUR lifetime!!! (Unless, of course, you want to get on 160M).

Best luck-
Greg, KC8HXO

The order page is there already:

http://www.elecraft.com/K3/K3%20Order%20form%20rev%204.pdf

It's interesting to see that even the assemble-it-yourself ones require
no soldering: the individual modules are all pre-built.

I still think I prefer the new FLEX-5000 -- except for its looks:

http://www.flex-radio.com/

Paul:

Come on down to the MAARC club meeting in August, we plan on having a radio control guru from the Muskegon area talk about radio controlled aircraft. In the meantime, Bob Duplissis, N9AUY, is also a radio control guru...if you know him, talk to him, he's often listening to the .94 repeater. He listens, on occasion, to our Wednesday night net. He'd give you an idea. Or, I will contact him for you, if you like, I don't think that he is a member of this list. Also, there's a place called, but don't quote me, Fishmas Charters/Anderson's Sport Shop in Whitehall, on White Lake. He's huge into radio controlled toys and his shop is worth visiting, it's very interesting. Half the shop is fishing gear, the other half is radio controlled toys. He'd definitely be able to tell you what the Futaba is worth. Hams get extra frequency space in the R/C spectrum!

2869. 2007 Spring VHF/UHF Sprints

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-04-30 22:07:38 UTC
From: Mark Thompson
Topic: 2869 Message: 2869

http://www.sysadnet.com/vhfsprintrules.htm

2007 Spring VHF/UHF Sprints
Sponsored by
John Kalenowsky, K9JK, and Steve Gilmore, W4SHG
John Kalenowsky, K9JK, and Steve Gilmore, W4SHG, with support from Ham Radio Outlet of Virginia, are pleased to announce the 2007 Spring VHF/UHF Sprints. Everyone is encouraged to participate, even if only in a small way. The rules have intentionally remained simple, and the contest's focus continues to be for single operator, single transmitter entries, both "fixed" and "rover". A new item for 2007, is a "Rookie" classification, to recognize 'first-time' participants, from their own stations OR as "guest-op" at an "experienced" station to introduce newcomers to weak signal vhf/uhf operations and, hopefully, encourage their participation in the future. Guidance from an experienced operator for a "Rookie" IS permitted as long as entries in this class are clearly identified by comments in the SOAPBOX: lines for Cabrillo formatted logs or on the Summary Sheet for paper logs. The detail should identify who is the "Rookie" and list any "experienced" operator(s) who were present.

Please note that, for 2007, we are both shortening the log submission date window and STRONGLY encouraging electronic log submissions using the Cabrillo format, but we will continue to accept paper logs (though the shorter deadline will apply to paper log submissions as well). A summary sheet which includes your total contacts, multipliers and calculated score WILL BE required with Paper Logs (see sample at: http://www.sysadnet.com/vhfsprintsummary.pdf). Such summary info is not required for electronic logs but may be included in the SOAPBOX: area of the Cabrillo formatted log if participants so desire. Be sure to include the grid square you operated from in either your log or summary sheet.

Please take a look at the sponsors for this year's events at http://www.sysadnet.com/springsprintsponsors.htm. Several sponsorship opportunities are still available. If interested in becoming a prize sponsor or sponsoring a plaque for the events in 2007 (or in the future), please email us at springsprintquestions@...
** Log submissions may be viewed here. **

We wish you the very best of VHF! 73,
John Kalenowsky, K9JK, and Steve Gilmore, W4SHG

1. Object: To work as many amateur stations in as many 2 degree by 1 degree grid squares as possible, using authorized amateur frequencies on the 50, 144, 222, 432, 902 MHz and above bands.
2. Contest Period:
2.1. - 144 MHz
The 144 MHz Sprint will be from 7 PM until 11 PM local time on Monday, April 9, 2007.
2.2. - 222 MHz
The 222 MHz Sprint will be from 7 PM until 11 PM local time on Tuesday, April 17, 2007.
2.3. - 432 MHz

The 432 MHz Sprint will be from 7 PM until 11 PM local time on Wednesday, April 25, 2007.
2.4. - Microwave (902+)
The Microwave Sprint will be on Saturday, May 5, 2007, from 6 AM until 1 PM local time. This includes all Amateur frequencies above 902 MHz. Please include band data in summaries and logs. NOTE: use of Liaison Frequency is encouraged.
2.5. - 50 MHz
The 50 MHz Sprint will be from 2300Z Saturday, May 12, until 0300Z Sunday, May 13, 2007.
3. Exchange: Grid-square locator - PLEASE EXCHANGE and LOG SIX-Character Grid Locators where possible. Correct exchange of FOUR-Character Grid Locator is the minimum requirement for a valid contact but we'd REALLY like to see SIX-Character locators exchanged and recorded in the submitted logs.

What's that, you say you have no clue what your SIX-Character Grid Locator is? To assist you with that, please try the following...
Enter your FOUR-Character Grid Locator here:
When you click the "Show me my Grid Square!" Button, you will be presented with a Google Map showing the borders of the 2-degree by 1-degree FOUR-character Grid Square that you entered. You can then navigate as well as Zoom in and out using the controls at the upper left of the screen. When you click a point on the map, however, the Latitude and Longitude of that point ALONG WITH THE SIX-Character Grid Locator for that point will pop up in a text balloon and the border of the SIX-Character Grid Locator will be shown. This is provided as a service to the Amateur Radio Community by Laurent/Larry Haas, F6FVY, using the Google Maps API. Thanks to Larry and Google! Try it, we think you'll like it!
4. Scoring:
4.1. QSO Points: Count one point for each complete QSO.
4.2. Multipliers: The total number of different FOUR-Character Grid Squares worked. Each FOUR-Character Grid Locator represents a 2 degree by 1 degree area on the earth's surface, the SIX-character designators are just sub-divisions of that. So, to be clear, if you work a station in EN53bj and another in EN53we, that is only ONE Multiplier, EN53.
4.3. Final score: Multiply QSO points by multipliers. Each Sprint is scored separately.
4.4. Rovers use same QSO Point and Multiplier criteria but scoring for Rovers is cumulative, total # of multipliers worked from each grid activated multiplied by total # of complete QSOs from each grid activated. Segregation of rover logs by grid activated is no longer required as long as the log makes it clear from which FOUR-Character grid locator each contact was made.
Example: Scores from EM98 5 qso's , 3 grids / EM99 10 qso's, 4 grids / EM89 3 qso's, 2 grids.
Total score would be 18 qso's x 9 grids = 162 points
4.5. Microwave Sprint scoring is cumulative, total # of grids worked from each band activated multiplied by total # of stations worked in each band activated.
5. Reporting: Logs (Cabrillo format preferred) must be received via e-mail or paper logs WITH summary sheet postmarked no later than following deadlines (roughly two weeks after the close of each event):
5.1. - 144 MHz - April 24, 2007
5.2. - 222 MHz - May 2, 2007
5.3. - 432 MHz - May 10, 2007
5.4. - Microwave (902+) - May 21, 2007
5.5. - 50 MHz - May 29, 2007
6. Awards:
6.1. Certificates/Plaques (if sponsored) will be awarded as follows:

6.1.1. TOP FIVE individual scores for each of the five Sprint "band" events (Single-Op Fixed, Rover and Rookie will be considered for this ranking).
6.1.2. TOP FIVE cumulative Single-Op Fixed scores (adding scores together by callsign used from each of the events, up to 5, for which valid logs are received).
6.1.3. TOP FIVE cumulative Rover scores (adding scores together by callsign used from each of the events, up to 5, for which valid logs are received).
6.1.4. TOP FIVE cumulative Rookie scores (adding scores together by callsign used from each of the events, up to 5, for which valid logs are received).
6.1.5. If a plaque is not sponsored for a particular finish above, a certificate (similar to what other VHF Contest sponsors provide) will be sent. "Specialty" plaques will also be considered (such as for best finish in a region) if anyone wants to sponsor such (and can provide a clear criteria). Please contact John or Steve regarding that. To view what plaques have been sponsored (and criteria) for 2007, click here.
6.2. Prizes: As they are sponsored, prizes will be awarded based on criteria of the sponsor. As an example, the simplest criteria will be "random drawing from all logs received." To view what prizes have been sponsored (and criteria) for 2007, click here.
7. Submission of Logs:
7.1. By submitting a log, participants confirm that they have observed all contest rules, as well as all regulations established for amateur radio in their country and that their log submission is true and accurate to the best of their knowledge. Participants further agree to be bound by the decisions of the Spring Sprint sponsors.
7.2. Electronic Logs:
7.2.1. The "Cabrillo" log format is now the standard for the Spring Sprints.
7.2.1.1. Use the following names for the Cabrillo "CONTEST:" field:
For 144 MHz, use CONTEST: VHF-SPRINT-144MHZ-SPRING
For 222 MHz, use CONTEST: VHF-SPRINT-222MHZ-SPRING
For 432 MHz, use CONTEST: VHF-SPRINT-432MHZ-SPRING
For "Microwave" (902 MHz & Up), use CONTEST: VHF-SPRINT-MICROWAVE-SPRING
For 50 MHz, use CONTEST: VHF-SPRINT-50MHZ-SPRING
7.2.1.2. Until logging programs with 'official' support for these events become more available, the closest format is probably for the June or September ARRL VHF QSO Parties (as long as the logging program knows how to handle SIX-Character Grid Square input and can properly 'ignore' the 5th and 6th characters for Multiplier counting). It may be necessary to manually edit the "CONTEST:" line in the file and Claimed Score may be incorrect for bands 222 MHz and above but the QSO data should be correct.
7.2.1.3. E-mail logs to: springvhfsprints@... preferably using a "Plain Text" e-mail format, with ONLY "your call" and the "band" in the subject line (W4SHG 144 -or- K9JK MICROWAVE for example) and with the log file as an attachment named "<your call>.LOG" (e.g. W4SHG.LOG)
7.2.2. "Web-to-Cabrillo": Bruce Horn, WA7BNM, has graciously agreed to provide 'web forms' to facilitate generation and AUTOMATIC SUBMISSION of Cabrillo-formatted logs for the Spring VHF & Up Sprints at the http://b4h.net/cabforms web site that he maintains. You may have to scroll down the homepage a bit to the "Other Contests" area to find the ones for the Spring VHF Sprints and they may not be there until just before the actual contests. PLEASE consider using these to generate and submit electronically instead of submitting a paper log. Our thanks to Bruce!
7.3. Paper logs:
7.3.1. Paper logs must include a Summary sheet and the log sheets themselves should include the following information:
Band (in MHz, e.g. 50, 144, 222, 432, 902. For above 902, change to GHz, e.g. 1.2, 2.3,

3.4, etc.)
Mode (e.g. CW, PH, DIG)
Date/Time (PLEASE indicate whether the dates & times are "local" or UTC)
Callsign SENT (can be listed at the top of a page OR on each line)
Grid Locator SENT (PLEASE give your SIX-character locator when known)
Other Station's Callsign
Other Station's Grid Locator (PLEASE ask for and record SIX-character when the other station provides it)
7.3.2. "Snail Mail" paper logs to:
Steve Gilmore – W4SHG
11 Ryan Way
Stafford, VA 22554

2872. Scarborough Reef

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-05-01 02:36:21 UTC
From: Hank Greeb
Topic: 2872 Message: 2872

BS7H IS NOW QRV
The first QSO was made at 13:47 UTC 29 April.
11:00 UTC 30 April

As the day sets on Scarborough Reef they finished operating position 2 and made good progress on the third operating position. As a result they are now able to man two stations during the darkness. AND, it is pitch black out there. After daybreak tomorrow they can finish a third station and increase operations further. Both stations have SteppIR verticals and no 80 or 160 mtr antennas have been erected yet. The reef is extremely hazardous making the setup slow and the heat is oppressive further tiring the team. At low tide the rocks are unreachable by the skiffs. We get a daily update and are not in constant contact with the team. If we don't answer your emails it is because we know nothing further than what we publish.

To All,

Someone once told me that as we get older it becomes easier deal with the loss of loved ones. Well in the last two years I've endured the passing of four people whom I've thought a great deal of. Now I don't see it getting any easier, if anything it seems to be getting more difficult.

With Elmer we could go into a many ways on how he touched my life and that of my children. But right now it has become a big blur. Not to mention how difficult it has become to type.

Godspeed my dear freind Elmer K8ROH you are already truely missed as well as our other recently passed freinds.

Received the evening....
Jim, K8COP

All:

I just received word that Russ, W8BXS passed along news, on this
evening's Teenage Net, that Elmer, K8ROH passed away this morning,
April 30. It's too early to have any more details.

We grieve for our friend and we pray for his family, both in the
community of amateur radio and his wife, children, and extended family.

I'm sure details about the coming day's arrangements will be posted as
they are available.

With a heavy heart,

73

Bill, AB8SC

2875. Tulip Time Parade 2007

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-05-01 18:24:56 UTC
From: Steve Vander Hill
Topic: 2875 Message: 2875

Hello, the purpose of this email is to request your assistance in filling the remaining open spots for this year's Tulip Time Festival parades.

Currently we are one person short for both the Wednesday and Thursday parades, and five short for the large Saturday parade.

Hams pride themselves on being good emergency communicators. Public service events like Tulip Time are a great way to sharpen our skills, and test our equipment, and operating procedures. Working such an event is also a great way to meet, and spend time with other hams in the area.

For those that are new to the hobby or those that have sat on the sidelines in the past years, please consider giving it a try. It is fun, and is a great way to brush up on your net operating procedures while providing a highly visible community service.

If you?re interested in volunteering, please provide me with you full name, call sign, physical limitations or special needs, contact phone number, email address, and any special assignments you would like to cover.

Thank you in advance!

Best regards,

Steve - N8UJD

2876. Special Notice From Don Meyer -KB8ODB

Special Notice From Don Meyer -KB8ODB

Hello Everyone .. There is a option in the reflector that allows the Moderators to send out Special Notices Members can set there e-mail forwards to only receive the Special Notices by editing there membership I want Special Notices to only be sent for requests for help on ham events, notice of changes to the website and notice of a Silent Key.

This will allow the ones that come here to the reflector to read messages to be notified by a e-mail in a timely manner of these Items.

I am open to anything that will make the website a better place ..just drop me a e-mail and we will look at what you would like .

Thank you all for participating in West Michigan Hams 73 Don Meyer KB8ODB

- Legislative Action Program
- Code Proficiency Field Test Program Approved
- Division Gathering Spot at Hamvention(r)
- RM-11306 Withdrawn
- ARRL Licensing Activity
- A Poll for GLD Members
- New Official ARRL Badges
- HQ Goofed
- Tentative Travel Schedule

++ Legislative Action Program

I apparently didn't do a good job of explaining what I meant last month when I talked about the separation of Section and Division legislative action programs. What I intended to say is that the Board of Director's Legislative Action Program (LAP) and the Section Managers' Section Government Liaison legislative (SGL) program operate with differing goals and differing managements. The LAP focuses on Federal legislation and the SM SGL program focuses on State and Local legislation.

These are managerial distinctions, only. In the Great Lakes Division, the Section Managers and I can be counted on to support each other and the respective legislative programs we manage when this is called for. LAP volunteers will be encouraged to volunteer to support an SM/SGL project, and the SMs, I am sure, will encourage their SGL legislative program volunteers to support the LAP.

++ Code Proficiency Field Test Program Approved

The ARRL Programs & Services Committee approved field testing of the ARRL Code Proficiency Program in the Great Lakes Division at its April 21 meeting. This means that four ARRL VE teams in the Division will soon be offering code proficiency testing at locations in their areas. If successful, the program may be adopted nationwide.

People who achieve solid copy of text for one minute may obtain a certificate or an upgrade sticker for proficiency at the speed they copied. Code speeds range from 10-40 wpm in the on-air program, but speeds in the field test will be from 5-40 wpm.

The field program, as is true of the W1AW broadcasts, will be run once a month. There is no charge for participating in these code runs. There is a processing fee for successful candidates only if they want to obtain a certificate or upgrade sticker. The trial run will be performed by ARRL VE teams headed for this purpose by Fernie Williams, III, KE4MAI, (Lexington, KY), Gary Kline, WC8W (Akron-Canton-Massillon, OH), Bob Johnson, K3RC (Toledo, OH) and Jim Kvochick, WB8AZP (Brighton, MI).

During discussions with the VEC manager at HQ, I learned that a number of countries still require applicants for Amateur Radio exams to pass code proficiency exams. With the FCC having gone out of the Morse code testing business, non-coded US hams who want to obtain reciprocal licenses in these countries are out of luck unless they pass code test in the foreign country. Did you ever consider taking a Morse code test in Japanese?

By running our Code Proficiency field testing program with ARRL VEs, could it be possible that passing one of our code field tests would be acceptable proof of code proficiency for these countries?

++ Division Gathering Spot at Hamvention(r)

Most of you know there will be another ARRL Expo at the Dayton Hamvention(r) this year. One feature of the Expo will be a Great Lakes Division come-and-visit booth. Division members, Division appointees, Section Managers and Section appointees are invited to "come and sit a spell" or stand around and chat with each other. It'll be a good time to get to know each other as well as to ask questions and offer suggestions.

While at the Division booth, feel free to check around the other booths at the Expo. You just might find President Harrison, W5ZN, CEO Sumner, K1ZZ and a few others in the area would like to meet you and talk.

Check the schedule of ARRL forums in the program book.

++ RM-11306 Withdrawn

By now, everyone has probably heard that the ARRL Board of Directors has withdrawn RM-11306 from consideration by the FCC. This action was a well thought-out move. There was, and is, no sinister motive behind the withdrawal. The fact is that we did a poor job of explaining the benefits of the proposal to you and other amateurs. I realize our mistake and pledge to each of you we won't make this mistake again if there is anything I can do about it.

++ ARRL Licensing Activity

Maria Somma, AB1FM who manages the ARRL VEC program, estimates there has been a 35% increase in new license applications since February 23. There has also been an estimated 50% increase in upgrade applications.

++ A Poll for Great Lakes Division ARRL Members

I'm trying to get a tentative idea of what you think about the following questions. Please answer the following question "yes" or "no," only. As always, you can expand on these very brief answers, but put any discussions at the bottom of your e-mail.

Please do not mix a brief answer with a discussion. I don't have staff that can digest discussions, quickly. Reading and understanding your discussion will occur over following weeks.

The questions:

1. Do you think you understand what ARRL's Regulation by Bandwidth petition would have accomplished?

2. Do you favor changing our band assignments so that any legal mode can operate anywhere in each band (i.e. there would be no subbands for voice, data, etc.)?

3. Do you favor having amateur licenses issued for the life of the license holder (i.e. never expire during the life of the licensee)?

4. Are you happy with the way ARRL has communicated the content of its petitions to FCC with you? (The question is not about how you feel about the content of the petitions; just about the quality of the way in which ARRL informed you of them and the value of them to Amateur Radio.)

5. Are you in favor of separating our bands into segments for wide-band transmissions (e.g. up to about 4 kHz), mid-band transmissions (e.g. about 1.5 kHz to 300 Hz) and narrow-band (less than about 300 Hz).

I will let you know the results of this yea or nay poll.

++ New Official ARRL Badges

In January, the Board of Directors authorized two new badges for ARRL volunteers. These are for the Legislative Action Program's volunteer Legislative Action Coordinator (light blue) and Legislative Action Assistant (rust). You can expect to begin to see these badges at the Hamvention(r).

++ HQ Goofed

At least one person at HQ goofed, anyway, and I apologize for this happening.

Gail Iannone who handles many of the services to Affiliated Clubs was out of the office for a few weeks for medical leave. During this time, other members of staff took over her duties. With the cross-training in jobs that has been done at HQ during recent months, there should have been no problem.

Unfortunately, the person who took over the responsibility for having us directors review and approve (or disapprove) sanctioning of hamfests wasn't up to the task. Gail has returned to work and is uncovering a

number of applications for sanctioning that either were not forwarded to the respective director or that had received director approval, but this approval was not passed on to the hamfest sponsor. ARRL "goodies" that were available to sanctioned hamfests were not sent in these instances.

Gail nearly has the situation back in hand. For example, during the last few days before writing this note, I've "re-approved" or approved about six hamfests that had somehow fallen into a black hole initially.

I regret this happened and have made the appropriate manager at HQ vividly aware of the foul up. I've strongly encouraged that corrective measures be taken to prevent this from occurring again in the future. If you've been the unwitting victim of this gaff, please be kind to Gail. She is the person who discovered the problem and knows all too painfully what has happened. She is working vigorously to get everything caught back up to date.

++ Tentative Travel Schedule for KI4LA and K8JE.

2007

May 18-20: Dayton Hamvention, Dayton, OH. - Gary & Jim
Jul 12: Mahoning Valley ARA, Youngstown, OH - Gary
Jun 17: Monroe Hamfest, Monroe, MI - Jim
Jul 19: Programs & Services Committee Meeting, Newington, CT - Jim
Jul 20-21: Board of Directors Meeting, Newington, CT - Gary & Jim
Jul 28: UP Hamfest, Escanaba, MI - Jim
Aug 18-19: ARRL National Convention, Huntsville, AL - Jim
Sep 8: GRAHamfest, Grand Rapids, MI - Jim
Sep 9: Findlay Hamfest, Findlay, OH - Jim
Sep 16: Cincinnati Hamfest, Cincinnati, OH - Jim
Sep 22: Great Lakes Division Convention, Cleveland, OH - Gary & Jim
Sep 23: Cleveland Hamfest, Cleveland, OH - Jim
Oct 2: OH-KY-IN ARRL Night, Cincinnati, OH - Jim
Oct 8: Portage County ARS, Kent, OH - Jim
Nov 19: Southern Ohio ARA Christmas Dinner, Russell, KY - Jim
Dec 1: Motor City RC 75th Ann., Wyandotte, MI - Jim

2008

Jan 17: Programs & Services Committee Meeting, Newington, CT - Jim
Jan 18-20: Board of Directors Meeting, Newington, CT - Gary & Jim

From: Joe Veldhuis
Topic: 2881 Message: 2881

Well, the spring/summer propagation is back in force, at least here, so as I said in my previous post, we should restart the net.

So, I want to know 2 things:
1. What sort of modes should we use, and should we try using some bands besides 2 meters?
2. As I asked before, is there anyone in the upper midwest/Great Lakes region with a good VHF/UHF station that would want to be the net control station? I've only got a single 13 element beam at 30 feet for 2m and a single 25 element beam at 35 feet for 432 MHz, both going into a barefoot Yaesu 857, so my effective range is quite limited.

Opinions?
-Joe, N8FQ

2882. Do Something Nice for a Ham?

FYI- It works on many repeaters, but some repeaters don't transmit the tone. Grand Haven didn't until a few years ago. Just so you know if you try it somewhere and it doesn't work.

1. Tulip Time Parade 2007
Posted by: "Steve Vander Hill" svanderhill@...
steve_vanderhill
Date: Tue May 1, 2007 11:32 am ((PDT))

Hello, the purpose of this email is to request your assistance in filling the remaining open spots for this year's Tulip Time Festival parades.

Currently we are one person short for both the Wednesday and Thursday parades, and five short for the large Saturday parade.

Hams pride themselves on being good emergency communicators. Public service events like Tulip Time are a great way to sharpen our skills, and test our equipment, and operating procedures. Working such an event is also a great way to meet, and spend time with other hams in the area.

For those that are new to the hobby or those that have sat on the sidelines in the past years, please consider giving it a try. It is fun, and is a great way to brush up on your net operating procedures while providing a highly visible community service.

If you're interested in volunteering, please provide me with you full name, call sign, physical limitations or special needs, contact phone number, email address, and any special assignments you would like to cover.

Thank you in advance!

Best regards,

Steve - N8UJD

Special Notice From Don Meyer -KB8ODB

Hello Everyone ... There is a option in the reflector that allows the Moderators to send out Special Notices . Members can set there e-mail forwards to only receive the Special Notices by editing there membership I want Special Notices to only be sent for requests for help on ham events, notice of changes to the website and notice of a Silent Key.

This will allow the ones that come here to the reflector to read messages to be notified by a e-mail in a timely manner of these Items.

I am open to anything that will make the website a better place ..just drop me a e-mail and we will look at what you would like ..

Thank you all for participating in West Michigan Hams . 73 Don Meyer KB8ODB

3. Tone squelch
Posted by: "k8mhz@..." k8mhz@... k8mhz

Date: Tue May 1, 2007 4:47 pm ((PDT))

We are now getting into the season of 2 meter tropo.

If you want to only hear your local repeater, try setting the tone squelch.

How it works, using our 94.8 PL as an example:

In addition to setting a 94.8 tone to open the repeater, you can set your radio not to open the squelch until it hears the 94.8 tone. I was hearing a repeater on the '94 frequency that had a 100.0 tone. It was so strong that it came through no matter where I set the squelch. Once I set the tone squelch the problem was gone and my radio only opens up when a 94.8 freq is heard.

It works the other way too. If I only want to hear the distant repeater that uses the 100.0 PL tone, I can set my radio to only open the squelch when that tone is heard.

Ain't technology wonderful?

Date: Tue May 1, 2007 5:04 pm ((PDT))

[As always, send replies to k8je@.... Do not click on REPLY. The
ARRL reflector that gets this newsletter to you is one-way, only.]

- Legislative Action Program
- Code Proficiency Field Test Program Approved
- Division Gathering Spot at Hamvention(r)
- RM-11306 Withdrawn
- ARRL Licensing Activity
- A Poll for GLD Members
- New Official ARRL Badges
- HQ Goofed
- Tentative Travel Schedule

++ Legislative Action Program

I apparently didn't do a good job of explaining what I meant last month
when I talked about the separation of Section and Division legislative
action programs. What I intended to say is that the Board of
Director's Legislative Action Program (LAP) and the Section Managers'
Section Government Liaison legislative (SGL) program operate with
differing goals and differing managements. The LAP focuses on Federal
legislation and the SM SGL program focuses on State and Local
legislation.

These are managerial distinctions, only. In the Great Lakes Division,
the Section Managers and I can be counted on to support each other and
the respective legislative programs we manage when this is called for.
LAP volunteers will be encouraged to volunteer to support an SM/SGL
project, and the SMs, I am sure, will encourage their SGL legislative
program volunteers to support the LAP.

++ Code Proficiency Field Test Program Approved

The ARRL Programs & Services Committee approved field testing of the ARRL Code Proficiency Program in the Great Lakes Division at its April 21 meeting. This means that four ARRL VE teams in the Division will soon be offering code proficiency testing at locations in their areas. If successful, the program may be adopted nationwide.

People who achieve solid copy of text for one minute may obtain a certificate or an upgrade sticker for proficiency at the speed they copied. Code speeds range from 10-40 wpm in the on-air program, but speeds in the field test will be from 5-40 wpm.

The field program, as is true of the W1AW broadcasts, will be run once a month. There is no charge for participating in these code runs. There is a processing fee for successful candidates only if they want to obtain a certificate or upgrade sticker. The trial run will be performed by ARRL VE teams headed for this purpose by Fernie Williams, III, KE4MAI, (Lexington, KY), Gary Kline, WC8W (Akron-Canton-Massillon, OH), Bob Johnson, K3RC (Toledo, OH) and Jim Kvochick, WB8AZP (Brighton, MI).

During discussions with the VEC manager at HQ, I learned that a number of countries still require applicants for Amateur Radio exams to pass code proficiency exams. With the FCC having gone out of the Morse code testing business, non-coded US hams who want to obtain reciprocal licenses in these countries are out of luck unless they pass code test in the foreign country. Did you ever consider taking a Morse code test in Japanese?

By running our Code Proficiency field testing program with ARRL VEs, could it be possible that passing one of our code field tests would be acceptable proof of code proficiency for these countries?

++ Division Gathering Spot at Hamvention(r)

Most of you know there will be another ARRL Expo at the Dayton Hamvention(r) this year. One feature of the Expo will be a Great Lakes Division come-and-visit booth. Division members, Division appointees, Section Managers and Section appointees are invited to "come and sit a spell" or stand around and chat with each other. It'll be a good time to get to know each other as well as to ask questions and offer suggestions.

While at the Division booth, feel free to check around the other booths at the Expo. You just might find President Harrison, W5ZN, CEO Sumner, K1ZZ and a few others in the area would like to meet you and talk.

Check the schedule of ARRL forums in the program book.

++ RM-11306 Withdrawn

By now, everyone has probably heard that the ARRL Board of Directors has withdrawn RM-11306 from consideration by the FCC. This action was a well thought-out move. There was, and is, no sinister motive behind the withdrawal. The fact is that we did a poor job of explaining the

benefits of the proposal to you and other amateurs. I realize our mistake and pledge to each of you we won't make this mistake again if there is anything I can do about it.

++ ARRL Licensing Activity

Maria Somma, AB1FM who manages the ARRL VEC program, estimates there has been a 35% increase in new license applications since February 23. There has also been an estimated 50% increase in upgrade applications.

++ A Poll for Great Lakes Division ARRL Members

I'm trying to get a tentative idea of what you think about the following questions. Please answer the following question "yes" or "no," only. As always, you can expand on these very brief answers, but put any discussions at the bottom of your e-mail.

Please do not mix a brief answer with a discussion. I don't have staff that can digest discussions, quickly. Reading and understanding your discussion will occur over following weeks.

The questions:

1. Do you think you understand what ARRL's Regulation by Bandwidth petition would have accomplished?

2. Do you favor changing our band assignments so that any legal mode can operate anywhere in each band (i.e. there would be no subbands for voice, data, etc.)?

3. Do you favor having amateur licenses issued for the life of the license holder (i.e. never expire during the life of the licensee)?

4. Are you happy with the way ARRL has communicated the content of its petitions to FCC with you? (The question is not about how you feel about the content of the petitions; just about the quality of the way in which ARRL informed you of them and the value of them to Amateur Radio.)

5. Are you in favor of separating our bands into segments for wide-band transmissions (e.g. up to about 4 kHz), mid-band transmissions (e.g. about 1.5 kHz to 300 Hz) and narrow-band (less than about 300 Hz).

I will let you know the results of this yea or nay poll.

++ New Official ARRL Badges

In January, the Board of Directors authorized two new badges for ARRL volunteers. These are for the Legislative Action Program's volunteer Legislative Action Coordinator (light blue) and Legislative Action Assistant (rust). You can expect to begin to see these badges at the Hamvention(r).

++ HQ Goofed

At least one person at HQ goofed, anyway, and I apologize for this happening.

Gail Iannone who handles many of the services to Affiliated Clubs was out of the office for a few weeks for medical leave. During this time, other members of staff took over her duties. With the cross-training in jobs that has been done at HQ during recent months, there should have been no problem.

Unfortunately, the person who took over the responsibility for having us directors review and approve (or disapprove) sanctioning of hamfests wasn't up to the task. Gail has returned to work and is uncovering a number of applications for sanctioning that either were not forwarded to the respective director or that had received director approval, but this approval was not passed on to the hamfest sponsor. ARRL "goodies" that were available to sanctioned hamfests were not sent in these instances.

Gail nearly has the situation back in hand. For example, during the last few days before writing this note, I've "re-approved" or approved about six hamfests that had somehow fallen into a black hole initially.

I regret this happened and have made the appropriate manager at HQ vividly aware of the foul up. I've strongly encouraged that corrective measures be taken to prevent this from occurring again in the future. If you've been the unwitting victim of this gaff, please be kind to Gail. She is the person who discovered the problem and knows all too painfully what has happened. She is working vigorously to get everything caught back up to date.

Message from Tom Porritt forwarded from MAARC list:

All,
As you may know Jean, KC8WSE, was recently appointed to the position of net manager for the West Michigan Traffic Net (WMTN). I have been informed that there will be a net meeting at the IRA Hamfest in Hudsonville on June 2 and she needs transportation to be able to attend the meeting. Feel free to call her directly if you can provide a ride, even if just one way. Her number is 893-3341, or catch her on the link system.
Tom

PS: I believe the meeting time is 9 or 9:30AM and will be done by noon.

2885. Scarborough Reef BS7H Operation Shutting Down Soon

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-05-03 18:34:17 UTC
From: Hank Greeb
Topic: 2885 Message: 2885

Scarborough Reef BS7H Operation Shutting Down Soon

NEWINGTON, CT, May 3, 2007 -- If you haven't already snagged BS7H on Scarborough Reef <http://www.scarboroughreef.com/>, there's not much time left to put the world's most-wanted DXCC entity into the log. Word from the BS7H DXpedition is that operation will cease at 0000 UTC on May 6. /The Daily DX <http://www.dailydx.com>/ reports the BS7H team plans to keep two stations on 20 meters around the clock. Earlier today Wolf Harranth, OE1WHC, of Documentary Archives Radio Communications in Vienna interviewed BS7H team member James Brooks, 9V1YC, via satellite telephone. Brooks explained that the team operates from wooden platforms on each of the reef's four rocks that are exposed during high tide.

"Basically, we're like little birds perched on a small rock in the middle of the ocean," Brooks told Harranth. "It's a very dangerous reef," he went on to say. "There's lots of hazards. There's rain, there's wind, there's lightning, there's piracy."

The coral is also very sharp, and most of the team members have suffered cuts and scrapes. Changing shifts three times a day has been difficult and time consuming, and Brooks says the individual stations can barely see each other during daylight.

Brooks said the DXpedition team has been visited by several fishermen from the Philippines who have asked for fuel and water. Visit the Dokufunk Web site <http://www.dokufunk.org/index.php?ID=2094> and click on the "BS7H Scarborough Reef 2007 - Interview" link. The entire .mp3 clip runs 8:45. The interview also is available from the BS7H DXpedition Web site <http://www.scarboroughreef.com/>.

The most difficult path from BS7H is to the US Northeast, although many stations have been successful in the past few days in working the DXpedition on 30, 20 and 17 meters, and signals have been reasonably strong. Pileups have been extremely large, on 20 meter SSB extending 50 kHz or more up the band from the BS7H transmitting frequency.

Stations attempting to work BS7H are advised to exercise courtesy and make sure they have a clear frequency before transmitting, to avoid interfering with ongoing communications unrelated to the DXpedition.

Judging from anecdotal information, stations in the Eastern US should start listening around 1100 UTC. One station in Florida reported hearing BS7H on 20 meter CW from 1130 until 1630 UTC, /The Daily DX/ reported. Brooks explained to Harranth that Europe, Japan and Oceania are easy to work most any time of the day, however.

The first QSO was made on April 29. As of 1400 on May 2, BS7H was operating four stations from four separate rocks, with two stations dedicated to 20 meters. All stations now are running 800 W, and activity has been on 10 through 40 meters. Substantial QRN on 40 and 30 has prevented the operators from hearing most stateside signals, however.

In part because of high winds, the team has yet to launch the helium-filled weather balloon that will support an antenna for 80 and 160 meters. On the other bands, BS7H is using vertical antennas and taking advantage of the salt water for a ground plane.

Tom, Linda, and all:

Since my XYL, Sue, and I live in the Big Rapids area, and probably won't make it to the IRA swap this year, we obviously aren't in a position to help Jean out with a ride to the meeting.

However, I did want to tell everyone interested in Jean's situation that I might have a lead on a possible used computer for Jean. She and my XYL talked on the phone for quite a while the other night, and I have been doing some checking at Ferris, where I teach. I may be able to get access to a used computer that is being replaced in one of the offices at the University, and I will make sure Jean gets it. I have a copy of Jaws, the speach screen reader for the blind that I use, and will make sure it gets installed on the machine for her. I also know that Handihams provides tutorials for people who are new to computers and Jaws, and I'll work to get access to that material as well. I'll even tutor Jean as much as I can from a distance.

I think we need to do everything we can to encourage Jean. ... She has come a very long way over the past 2 years, and I am extremely pleased at her new appointment as WMTN net manager.

I also applaud the Muskegon club for taking her under their wing and helping her as much as they have.

If someone wants to work with me directly on the computer access issue for Jean, please e-mail me privately at:

tbehler@...

Thanks, and 73 from Tom Behler: KB8TYJ, Big Rapids, MI

Message from Tom Porritt forwarded from MAARC list:

All,
As you may know Jean, KC8WSE, was recently appointed to the position of net manager for the West Michigan Traffic Net (WMTN). I have been informed that there will be a net meeting at the IRA Hamfest in Hudsonville on June 2 and she needs transportation to be able to attend the meeting. Feel free to call her directly if you can provide a ride, even if just one way. Her number is 893-3341, or catch her on the link

system.
Tom

PS: I believe the meeting time is 9 or 9:30AM and will be done by noon.

Thanks for the welcome Bill. I'm sure I will have many questions about these green machines. I have always been intrigued by tube radios, whether they were the old AM/Shortwave Zenith floor model receivers, or Ham radios. The glow of the tubes, and the smell of the warm tubes is rather unique, along with the lights and knobs. They seemed to have "personalities" if you know what I mean. I guess you could compare it to the difference between wood boats and fiberglass boats, or fine wooden furniture and chrome and glass furniture. Don't get me wrong, I like the latest bells and whistles radios, and will be getting some of those also, but I do like those tube radios.

Hi Tom,

I met the EBay Seller of my HW-101 at the Michigan/Indiana border, and transported the Heathkit HA-10 1KW amp, and the Heathkit SA-2060 antenna tuner to my house. The Seller is a Ham and a pilot, and lives in south central Illinois. His mom lives near South Bend, Illinois, and he makes the trip to visit her. Both units were from his friend's father's radio shack. The friend's father is a recent SK. He kept his radio equipment in excellent condition. I didn't find out about the amp and tuner until after the HW-101 was shipped. Otherwise, I would have transported it also. (I didn't buy the amp and tuner via EBay). The SK was a P-38 pilot during WWII, and shot down a couple of Japanese planes during the war.
A couple of days after I made the drive to the border for the amp and tuner, the HW-101 with HP-23 power supply, Shure 444 mic, and manuals arrived. These items were in extremely excellent condition. They WERE, until the USPS goons, probably in the Chicago terminal, got their hands on it. The items were packaged and cushioned very well, (but not double boxed). The left rear corner of the HW-101 cabinet was badly caved in. Two tubes came out of their sockets, and there were many pieces of broken tube glass rattling around inside. When I placed the radio on a rug and removed the top of the cabinet to see inside, a lot of very fine glass tube particles fell out the bottom. It looked like fine glitter on the rug. The Postal goons didn't just drop it, they must have slammed it to the ground, as their response to the writing on the outside of the box, "Fragile, Do Not Drop". The Seller packed it well, and was going to send it Priority. He gave it to his wife to mail at the Post Office. She screwed up and sent it Parcel Post with only $100 of insurance. Duhhhhhhhhh!!!! I would have paid extra to have it shipped Express. Parcel Post is NOT the way to ship something you like. If it absolutely has to be destroyed, send it USPS Parcel Post. I raged the whole day after discovering the damage to this once pristine HW-101. What a waste. The Seller was as upset or more upset than I. He appologized, and immediately offered to refund my purchase price and shipping. I want to keep the HW-101 and restore it back to as close to what it was before being damaged. I'm sure all the filaments in the tubes are compromised after an impact that hard. So, I will be buying new tubes. If that's all that's damaged, the radio will have to be re-aligned after the new tubes are installed. I will also attempt to work the bent aluminum cabinet back to a close proximity of what it should be. The Heath green paint split at the impact/bend point. I think the Heath green paint colors are available in spray cans. I talked to the Postmaster and picked up some damage claim forms to submit. If I can get some insurance money out of the Post Office ($100) to help defray the cost

of replacement tubes, that will help. I do not want to give up the radio. Luckily it got hit on the back corner and not the front. The front is flawless.
I tried to get a similar condition HW-101 that ended tonight on EBay, but a couple of bidders went crazy bidding against each other. For just the HW-101, the winning bidder got it for $305 !!! I guess he wanted it pretty badly. He definitely "got" it! So, I am still looking for another nice HW-101.

73's,

>
> Hi Scott,
>
> I do indeed have an HA-10. I got real lucky, I had been looking for one for a long time in good condition. This one it turned out the original owner Had built it in the early sixties along with the matching RX-1 receiver and transmitter HX-10. When he finished building it and read about the high voltages inside he said he got scared of it and never plugged it in. Instead he boxed it up, and there it sat till last year. I will tell you it looks like it was just built yesterday. I would recommend a better match to the HW-101 (Hot Water -101) would be A Heathkit SB-200. Same power lighter weight and all parts are readily available and can also be used with all the newer modern rigs as well. the HA-10 does not have tunned inputs. So it has to be connected with older tube rigs with pie network on the outputs. Plus it's about 3-4 times the size of the hw-101. Good luck,

Hi Greg,

Thanks for the words of welcome. I have a lot to learn about the "Warrior" before I fire it up. I don't want to release the "magic smoke". That HA-10 is about the max weight limit that I want to pick up and carry. It is HEAVY! But it's pretty! If "Bigger is Better," than this is one of the BEST! :>)

Jamestown, VA is celebrating four hundred years since the settlement. There will be a huge party on the site in SE Virginia. I seem to remember a crowd prediction of 30k folks. That might have been the total number for the weekend. At least I'm hopeful as the line in front of the portable facilities will be HUGE or is that too long? Hi

This is the same place the Queen of England visited yesterday. Those intrepid settlers bailed out of England to find life in rural Virginia such a challenge.

K4J will be the call sign for the event we have asked to guest operate. Details are in QST and below. The folks handling the radio portion of this event will be on the radio Friday, Saturday, and Sunday. Propagation from Michigan might favor forty meters during the day. Also twenty meters. I don't think they will operate past ten or eleven o'clock pm local time. You can visit their web site: http://www.ddxg.net/

An unusual aspect of this Special Event is the organizers have somehow arranged for stations in the log to download the wallpaper and print the certificate at their home. This saves a bit of time swapping a card for wallpaper. Unusual.

Yorktown, Williamsburg, and Jamestown are located quite close to each other. There is tons of history in all three places. Another Special Event station (I don't know the call) will have shacks in each of these towns. You can earn a special certificate (a trifecta?) (did you watch the Kentucky Derby today?) by working each of these shacks. This event is not a part of the K4J station.

Linda, AB8QH and I, AB8SC will guest operate on Saturday morning basically before noon. The Dominion DX Group has some thirty or so folks committed to operating and supporting this event.

I encourage you to watch the DX spots. They'll surely be spotted. Should be possible for you to get into the station log. I have worked the Hairnet on seventy-five meters from Annapolis. Speaking of Annapolis, we drive to that town in Maryland on Thursday and ride the sailing vessel "Cracker Jack" to Yorktown. We return the same way on Monday and Tuesday. We'll certainly try to check into the Bathrobe Net one of those mornings during the trip.

From the ARRL's Special Events page:

May 11-May 13, 0100Z-2359Z, Jamestown Island, VA. Dominion DX Group, K4J. Jamestown 400th Anniversary Official State Partner Station. 21.325 14.325 7.225 3.855. Certificate. DDXG, PO Box 29334, Richmond,

VA 23242

Good Luck!

U.S. law requires the Secretary of State to provide Congress, by April 30 of each year, a full and complete report on terrorism with regard to those countries and groups meeting criteria set forth in the legislation. This annual report is entitled Country Reports on Terrorism. Beginning with the report for 2004, it replaced the previously published Patterns of Global Terrorism.

Hey mark, I have a Radio Shack pro - 94. and I love it. the neat
thing is that has dual trunking capablity, which from what I hear, is
what the police dept will be moving to. It also has weather scan and
weather alert which has come in handy while camping.

This is a list of some of the contests this coming weekend:

Armed Forces Amateur/Military Crossband Communications Test -- the Army, Air Force, Navy, Marine Corps and Coast Guard are co-sponsoring the annual military/Amateur Radio communications tests in celebration of Armed Forces Day the following weekend (the test is held earlier to avoid the Dayton Hamvention). Various military stations will be listening for amateurs from 1200Z May 12-2400Z May 13. For complete information, including call signs, operating schedules and frequency/mode lists: www.netcom.army.mil/mars.

Mid-Atlantic QSO Party -- SSB/FM/CW, sponsored by the Independent Mid-Atlantic QSO Party Committee from 1600Z May 12-0400Z May 13. Mid-Atlantic States include DE, MD-DC, NJ, NY, PA, VA and WV. Frequencies: 160-10 meters, 50 kHz from bottom of band segment for operating mode; 50, 144, 222 and 432 MHz. Categories: Standard (SO < 200 W), QRP, MO, Mobile. Exchange: serial number and QTH (Mid-Atlantic stations send 3-letter county and 2-letter state, US/VE send S/P, DX send DX). QSO points: Phone -- 1 point, CW -- 2 points, Mobile -- 3 points. Score: QSO points × Mid-Atlantic counties (Mid-Atlantic stations count S/P + 1 DX) counted only once. For more information: www.maqp.info. Logs due 30 days after the contest to logs@... or Mid-Atlantic QSO Party, Attn: Walter O'Brien, W2WJO, PO Box 4922, Clinton, NJ 08809.

2 GHz and Up World Wide Club Contest -- sponsored by the San Bernardino Microwave Society from 6 AM local May 12- 8 PM May 13. Frequencies: 2.4 GHz and higher. Exchange: 6 character grid locator. QSO points: 1 point/km. Score: QSO points × band multiplier (2.4 GHz-10 GHz ×1, 24 GHz ×2, 47 GHz ×4, 76 GHz and up ×8), sum scores from all bands. 100 bonus points for each unique call on each band; 1000 bonus points for each band activated. For more information: www.ham-radio.com/sbms. Logs due 60 days after the contest to SBMS Contest Committee, Pat Coker, N6RMJ, 40916 179th St, Lancaster, CA 93535.

FISTS Spring Sprint -- CW, sponsored by the FISTS CW Club from 1700Z-2100Z May 12 (see Feb QST, p 100, or www.fists.org/sprints.html).

Nevada QSO Party -- CW/SSB/RTTY -- sponsored by the Area 51 Contest Club from 0001Z May 12 - 2359Z May 12. Frequencies: 160 - 6 meters, CW 15 kHz and SSB 25 kHz above General class band edge. Categories: SO-LP/HP, MO-LP/HP, and Portable-SO/MO. Exchange: RST and S/P/C or NV county. QSO Points: 1 pt/QSO. Score is QSO Points × NV counties or S/P/C counted only once. For more information: nv.arrl.org/NQP. Logs due Jun 15 to w7gk_1@... or Nevada Mustang Roundup 2007, Elko Amateur Radio Club, PO Box 5607, Elko NV 89802.

2905. Last Call

2906. Dayton Room Available!

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-05-10 03:45:20 UTC
From: Laryn Lohman
Topic: 2906 Message: 2906

Ever wish you could just go to the Dayton Hamvention and not worry about where to find a room to stay?? I have one! Two nights, arriving Thursday the 17th, leaving Saturday the 19th. Just minutes from the Arena, this is a fine non-smoking room among many local hams at the motel, and a great view of I-75!

I just want to get my cost out of this, and keep it available to someone that needs a room. This item will go fast, so let me know ASAP! My call at a r r l d o t n e t. If no takers, it gets cancelled :(

Laryn K8TVZ

2907. This week at Tool Max Ham Store

2909. Need Two Additional Amateur Operators

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-05-11 14:53:15 UTC
From: Steve Vander Hill
Topic: 2909 Message: 2909

Hello, a last minute request, we're looking for two additional amateur radio operators for this year's Tulip Time grand parade which is being held tomorrow in downtown Holland, MI.

One operator will be assigned a one block area of the parade route with a EMT, and the other operator will be assigned to ride on a SAG golf cart delivering water, ice, supplies, and picking up those that can't make it to the end of the parade, etc.

If anyone is interested, please email me your name, call sign, and contact number as soon as possible, thank you!

Best regards,

Steve - N8UJD

2910. Mid-Atlantic QSO Party (MAQP) Today

2922. Dayon 2008?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-05-15 13:25:21 UTC
From: Hank Greeb
Topic: 2922 Message: 2922

There was a discussion at a local club the other day about the fact that perhaps there would be people willing to spend money (about $60 to $70) for a bus ride to The Daytown Hamvention. With gas prices as they are, it probably would cost that much to drive.

We decided that it was much too close to the event to try to organize it for 2007, but figured it might be something to try for 2008.

The kicker is that we'd need 29 people to share the co$t, and we'd have to leave here around 2:30 on Saturday morning to arrive when the arena opens, and we'd not get back until 11 p.m, or midnight.

It would be a long day, but we wouldn't need to drive, so we could either sleep, or have a party, or both, on the way down and back.

Please think about this for 2008.

2923. AMATEUR RADIO VENTURE CREW 9050

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-05-15 15:24:53 UTC
From: ravennaelectronics
Topic: 2923 Message: 2923

Good day everyone.
The Muskegon Area Amateur Radio Council has started a Boy Scouts of America Venture Crew. The Crew number is 9050 and it specializes in amateur radio. Thus the "50" in the crew number. That represents ARL 50 or "Greetings by Amateur Radio."

To date the crew has conducted an open house, participated in the Michigan QSO party, helped provide communication for the Holland Tulip Festival's 2007 Muziekparade Parade of Bands, conducted several meetings and they just begun their Technician license class. The youth are very eager to learn and get involved with amateur radio and scouting. The crew is also running the GOTA station at MAARC's Field Day next month. The crew has several outings planned during the summer too.

The crew is coed and is open to all youth that have completed the 8th grade and are between 14 adn 20 years old. Currently we have five registered youth. This is a great way to get youth involved in amateur radio. If you have a niece, nephew, son, daughter, grandchild, etc. that you feel would be interested in joining or just seeing what it is about, please contact the Crew Advisor Karen Strait. Her email is sarjenka47 at aol.com.. If you are an adult and want to be involved as well, please contact me at kd8bgq at arrl.net

Best Regards
Doc, KD8BGQ

All:

We hope you had the chance to work K4J. Or the other Special Event Station associated with the four hundredth anniversary of Jamestown.

Unfortunately you did not get a chance to work AB8SC operating portable and helping the K4J folks. I want to give you a bit of background.

The Sunday before we were scheduled to leave for Virgina I managed to severely cut my left thumb. The surgery to fix the nerve damage was successfully done on Wednesday morning. We left for Annapolis and the sailboat transit to Yorktown too early on Thursday.

We got into Annapolis in the early evening to find the boat's skipper headed off for emergency root canal surgery. Three folks on the boat and two of them seriously wounded. We left Annapolis Thursday evening only to suffer equipment problems with the boat's systems. This forced our retreat to Annapolis for repairs and a cancellation of the boat trip to Yorktown and the Special Event.

We made it back to Michigan in good shape. Disappointed about the circumstances.

The folks in Jamestown were set up and working three bands for a big part of the weekend birthday party. Their shack was right next to some really healthy poison ivy. I saw the pictures. And the Secret Service folks cut the locks on their equipment trailer at two o'clock in the morning searching for anything threatening the President's Sunday visit. The radio operators managed fifteen hundred or more QSOs. A success. I hope you were successful, too.

A fun trip. A bit of disappointment, too.

2927. Monthly Michigan Section News Summary

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-05-16 22:24:05 UTC
From: Tom VanderMel
Topic: 37 Message: 2927

All
Please pass on to your local groups. Thanks Tom KB8VEE

Greeting Michigan hams

Governor Granholm declares the week of June 23 as Amateur Radio Awareness Week. The official proclamation marking the week of June 23 has been released by the Governor's Office and sent to all Michigan Section Public Information Officers. Additionally, a downloadable copy is posted on the Michigan Section Web Page http://www.arrl-mi.org/ Clubs and FD teams are encouraged to incorporate this document into their publicity arrangements for
Field Day next month. Our thanks go to PIC Bobby N8CY for making these arrangements well in advance so everyone has the material for PR purposes.

With severe weather season upon us and with a few storm events already in our recent past, we are reminded to evaluate our ability to operate under a prolonged power outage. Last fall's Simulated Emergency Test called for operating without the use of repeaters and to make use of alternate frequencies. We found that many operators were not prepared for simplex operating and had not become familiar with the range and capabilities of either their home stations or their mobile units in this mode. We all need to maintain our operating abilities to that highest levels and practice to insure that we can react on a timely basis in the event of prolonged outage.
Your local Emergency Coordinator can assist you with a set of guidelines for
preparedness and will welcome you to participate in tests and exercises to keep your operating skills honed. Visit http://www.mi-arpsc.org/ for more details.

Local VHF & UHF Net Managers should consider reporting their net activities
to WB8RCR. There appears to be a large number of nets that are not getting credit for all of their dedication and service to their communities. Take a
look at http://www.mi-nts.org/index.php for information on Michigan Nets and
their activities. Consider adding you net to the roster of active and reporting nets.

The presentation of the Marinette & Menominee ARC 2006 Ham of the Year Award highlighted the Charter Night Banquet held at the Best Western Riverfront Inn in Marinette on Sunday April 15th. Ed Engleman, KG8CX became the first two-time winner of the award for his work on the DAR Boys and Girls

Club Radio Project, as well as his many other contributions to club activities throughout the year. Ed also serves as Net Control for the Sunday
night M&M ARC net, and as SKYWARN coordinator for Marinette, Menominee, and Oconto Counties.

Newly elected club officers for the River Raisin Repeater Assn. are Pres KC8SKP, VP WB8FBG, Sec-Treas N8KUF, Dirs W8PI & WA8EFK.

Station Activity Reports (SAR) for April, 2007 WB9JSR 546, KC8WSE 520, AB8SY 227, W8RIT 166, KD8AAD 113, K8AE 102, N8FPN 101, KC8MLD 83, K8RDN 73, K8AMR 67, W8RNQ 52, WB8RCR 38, AB8WF 23, K8ZJU 12, KC8BMV 12, WD8USA 10, WA8OOH 3, KC8ZGB 2.

Public Service Honor Roll Reports (PSHRs) for April, 2007: KD8BGQ 874, K8MFK 193, WB9JSR 185, WB8RCR 183, K8RDN 145, KB8UIH 124, WU8Y 119, K8AMR 102, N8FPN 100, KC8WSE 90, K8ZJU 84, W8RIT 80, AB8SY 80, K8AE 78, K8VFZ 61.

SARs are reports of all the radiogram traffic you have handled in the past
month. PSHRs include your net and public service activities for the month. PSHRs and SARs should be filed monthly with WB8RCR. You can access a simple
reporting form at: http://www.mi-nts.org/PSHR_entry.shtml to provide your reports to WB8RCR.

April Official Emergency Station reports came in from K8COP, KC8ULE, WU8Y,
and W8WRB. Your OES reports should be filed with WA8EFK. In all cases, reporting by radiograms encouraged. Packet messages can be routed to wb8rcr@... and wa8efk@...

73,
Dale WA8EFK

Hello Everyone .I am still looking for help this weekend and yes it is the 19th (so much for proof reading..) I have 7 that have contacted me and there are 20 places we should have radio help at so please come out and help if you can .... 73 Don KB8ODB

Again this year we are looking for volunteers to help with the May 19th 5k event for Girls on the Run.

We will be working with Grand Haven Public Safety If you can assist with the event this Saturday please contact me by e-mail kb8odb@sbcglobal. net or phone 616-846-7307 .. Let me know your shirt size and phone # Please remember this is Dayton week and we need all the hams that are not going to Dayton to please help out if you can.

This a morning event and will be over by noon. We will meet in the GHPS parking lot at 8:30 and go to positions from there Hope to see you there 73 Don Meyer

Nah! That's kinda wimpy. A while back I saw pictures from some guy in South Africa. Two Icom IC-7800s and a few other rigs. Also pictures of his private plane, his helicopter, his Rolls-Royce, and his huge mansion with acres (Ooops! I mean "hectares" -- they've already transitioned to sensible units there) of land.

I got back last night.

Items:

To me the IC-7700 is a yawner. Too much of the same style ans substance of the IC-7800. Not that I wouldn't use it if given to me! The Star Wars Robo-girls were cute though.

The Europeans are coming on strong. Some really nice stuff coming out, and they used a high and open tent to isolate themselves. Very nice stuff

I was in the door and at the Elecraft booth at 9:00am Friday. They were jammed all day. I came to see what the radio K8AJ bought for me looks like. It is very sharp looking, but, the one display model had a whip antenna on it, and the receive audio was just gorgeous. They ran out of brochures Friday, and had to have more printed up Saturday morning.

The weather was the best I've seen in some 35 years.

The GRARA group took advantage of a special deal of a 4 flea market slots for $ 100. I am thinking of getting another four for the Holland group, and see if we can get them the two clubs to be side by side

There was a huge line up for the VE exams.

The ARRL area was different, and much better.

Amsat had a most impressive setup, and very helpful people..

Best eyeball? I talked to a chap from Britain for some 30 minutes about ham radio in the "mother land".

Next year? Of course..

Hello Everyone . Summer events seem to line up one after another and there are 2 coming up this long weekend one in Grand Haven and one in Spring Lake.

The first is the YMCA Snug Harbor kick off to summer Race in Grand Haven this Saturday May 26th in the morning . We have helped with this race for the last 10 years. We will meet at the Grand Haven Public Safety lot at 7:30 so we can be on the race course by 8:05. This is only a 5K race so it will be over by 10:30. If you can help out with this Race please send me a e-mail at kb8odb@... or call me at 616-846-7307

The second event is on Memorial Day Monday May28th in the morning for the Spring Lake parade and we will be meeting at the Spring Lake EOC. I will post the meeting time as soon as I have it. If you can help out with this Race please send me a e-mail at kb8odb@... or call me at 616-846-7307

Thanks for all your help 73 Don Meyer - KB8ODB

2952. 12 meter beacon on the air

Yahoo group: WestMichiganHams (2006 — 2008)

From: Joe Veldhuis
Topic: 2952 Message: 2952

N8FQ/B is now running on 24.927 MHz, putting 5 watts into my 240 foot inverted vee. For now, it's just running on my Yaesu 857 with its built-in beacon mode, so if I am using the rig for something else, it'll be QRT, but it should be running most of the time. Plans are in the works to put together a dedicated rig.

SOLON TOWNSHIP -- Joyce VanderMey is blazing a trail for women who make a living putting out fires.
Township Board members on Monday made the 35-year-old Rockford native their new fire chief -- the first woman in Kent County to hold the title.
"We can now refer to you as madam chief," joked Township Supervisor Bob Ellick following the board's unanimous vote.
For more than two years, VanderMey has served as the Solon Township Fire Department's rescue captain while juggling a full-time, third shift lab job with Spectrum Health in Grand Rapids.
With the added responsibility of chief, she will oversee 26 paid on-call volunteers who serve an area of 5,400 residents spanning 36 square miles.
"I'm not in it for the glory, I'm in it for the gratitude that comes from helping people," VanderMey said.
She's not in it for the money either, with a salary set at $8,800 annually.
Even in the 21st century, firefighting is a male-dominated vocation.
According to Women in the Fire Service -- a nonprofit networking organization based in Madison, Wis. -- the U.S. boasts 24 female fire chiefs and around 6,500 female firefighters. Another 40,000 are active in volunteer departments.
Considering there are roughly 1.5 million firefighters nationwide, women comprise just 3 percent of the work force.
Several hundred women hold the rank of lieutenant or captain, and about 150 are district chiefs, battalion chiefs, division chiefs, or assistant chiefs.
Few, however, make it to the top because of the physical and emotional demands of the job, Michigan Association of Fire Chiefs Executive Director Suzy Carter said.
Until now, Michigan has had only two female fire chiefs.
Merilyn McGee was the first, serving the community of Groveland Township in Oakland County from 1984 until her retirement in 2001.
The second, Janet Sikes, has been head of the Woodhaven Fire Department in Wayne County since 1998.
"When I started as a firefighter in 1974 they didn't even have gear to fit women. Thankfully, the world has changed to the point where they're being given the chance to prove themselves," McGee said. "We may be the weaker sex, but as far as organizational and leadership skills, we tend to be better at pulling people together as a team."
Don Hamblin, chairman of the township's fire committee, said VanderMey is "a lady wise beyond her years" who has "warmed the hearts of everyone."
She assumes the spot that had been held for 12 years by Mitch Havens, who resigned March 15 amid allegations he tried to cover up his brother's criminal record.
The brother and former township fire captain, Michael Owen Havens, resigned March 13 after it was learned he was accused of providing a minor with pornographic materials.
On April 10, fire Lt. Rich Hayes was promoted to captain, replacing him.

I have a Peachtree (by Sage) 2007 Complete Accounting Software program for Sale. It was $179 new 3 months ago and is complete. We are going to use QuickBooks not the Peachtree Software. If anybody wants it we will sell it for $125 or best offer. Call me at 231 206-0422 or 231 798-7898 from 9-5. Thanks Tom KB8VEE

2956. D-Star repeater system for Ottawa County?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-05-23 13:27:41 UTC
From: Alan NV8A
Topic: 2956 Message: 2956

John Fischer KC8UNY of Grand Haven was the winner of the top prize at Dayton this year, a complete Icom D-Star repeater system consisting of

ID-RP2C 06
ID-RP2000V
ID-RP4000V
ID-RP2D
ID-RP2V

See http://hamvention.org/prizes2007.htm

Hope John has a good location for it and a suitable antenna system.

Now we'll all have to go out and buy Icom D-Star rigs. Icom couldn't possibly have had this in mind, could they?

Alan NV8A

Sweet.. Congrats to John..

We use Dstar in Kent for the Hoscom program and have several units we can deploy. We have only been using it on simplex and we love it!

Jeff - N8JSN

2958. WQ8RP during CQ WPX Contest

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-05-23 20:54:30 UTC
From: Hank Greeb
Topic: 2958 Message: 2958

Anyone working CQ WPX CW contest this weekend?

If so, please listen for WQ8RP, the Michigan QRP Club call, during the upcoming CQ WPX CW contest this coming weekend. May 26-27, 2007. 0000 GMT Saturday to 2359 GMT Sunday (8 p.m. Friday EDST to 8 p.m. Sunday EDST).

I'll be the operator, and trying to work the world with 4.9 watts. (wish me luck) The objective is to work as many prefixes as possible, and WQ is a rare prefix according to some of my contest friends. (But, there were 800+ separate prefixes amongst the 2200+ entries in 2006, so a "rare" prefix doesn't add that much!) It's permissible to work stations in the U.S. so give me a call if you hear WQ8RP calling CQ.

I'm not much of a DXer, and only a mediocre contester, but it should be fun, if WQ8 is a truly rare prefix.

The last time I experienced being rare was during the CQ WPX SSB contest in 1978, when "N" prefixes had just been issued, and suffixes beginning with "X" were first issued. Members of a club to which I belonged borrowed N8XX and worked DXCC, I was told. I only responded to QSLs - so I didn't get the wall paper.

Details of the contest may be found at http://www.cqwpx.com/rules.htm

73 de n8xx (WQ8RP during CQ WPX Contest this weekend)

2961. What's New at Dayton 2007

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-05-24 16:35:09 UTC
From: Mark Thompson
Topic: 2961 Message: 2961

What's New at Dayton 2007?

Elecraft’s new K3 HF and 6 meter transceiver and its many options created quite a stir at Dayton.

Gerald Youngblood, K5SDR, lead developer of the FlexRadio series looks justifiably proud of his newest model.

Inside view of one side of the Flex-5000.

The new Hilberling PT-8000 HF and VHF transceiver. This is available in your choice of colors.

Inside view of the Hilberling PT-8000.

The new ICOM IC-7700, think IC-7800 with a single receiver.

Yaesu FT-450 HF and 6 meter transceiver, shown with optional internal antenna tuner.

Kenwood’s new TM-710 V/UHF dual band transceiver.

Yaesu’s new FTM-10 V/UHF dual band transceiver – designed for the open road.

New legal limit autio tuner from MFJ, the MFJ-998.

DSP noise reduction speaker from West Mountain Radio.

West Mountain Radio also offers their audio DSP in a stand alone board version.

Paul Hrivnak, N8PH, President, CEO and Chief Engineer of Palstar is justifiably proud of his new antenna tuner.

Joel R. Hallas, W1ZR
It always a treat when we get to see a new HF transceiver at Dayton -- it is usually the star of the show! Last year's show stealer was the Yaesu FT-2000; the year before it was the ICOM IC-7000. This year we had the good fortune of having no fewer than six to look over. In alphabetical order:

HF Transceivers
Elecraft announced their new K3 HF and 6 meter transceiver. Perhaps transceivers would be a better word. There are so many options (all upgradeable later if you choose) that you can configure anything from a kit-built 10 W portable QRP radio to a fully-featured, contest-ready 100 W rig with two high performance receivers. It is scheduled to ship starting in July.

FlexRadio Systems, well known for their line of high-performance software defined radios, introduced the Flex-5000 HF and 6 meter transceiver series promising higher performance and more features. Included are the Flex-5000C, a fully integrated system in a single box, and the Flex-5000D with a second receiver.

Hilberling, the first Amateur Radio manufacturer from across the Atlantic for some years, announced their PT-8000 transceiver. This is offered as a full-featured HF and VHF transceiver available in 10, 100 or 600 W versions and promises top performance. It is distributed in North America by Array Solutions.

ICOM unveiled their new IC-7700 HF and 6 meter transceiver. This appears to be a single receiver version of their top of the line IC-7800, sharing the 200 W transmitter, high performance receiver and 7 inch display of its sibling. It is being marketed for the "contester," but should be of interest to anyone who coveted the features of the deluxe IC-7800, but didn't need two receivers, or its price tag.

Ten-Tec displayed their new Omni-VII HF and 6 meter transceiver. Their new "distributed roofing filter architecture" promises ham-band only receive performance with a general coverage receiver. See our Product Review in this issue.

Finally, Yaesu showed their new FT-450 HF and 6 meter transceiver. Just as last year's FT-2000 arguably had its roots in their top of the line FT-9000, inheriting a substantial number of its features, the FT-450 has a similar relationship to the FT-2000, at a correspondingly lower price.

The SPE Expert 1K-FA HF and 6 meter 1000 W linear distributed in North America by ARRAY Solutions.

Dishtronix legal limit 100% duty cycle solid-state amplifier.

Linear power supply for Dishtronix legal limit 100% duty cycle solid-state amplifier.

Tokyo High Power showed its new 750 W output HF and 6 meter linear.

Tokyo High Power also showed its new 1000 W output HF and 6 meter linear.

Tokyo High Power moved up the spectrum with its new 2 meter linear.
What else did Dayton-goers find this year? Quite a bit!

HF Power Amplifiers
Also distributed in North America by Array Solutions is the SPE Expert 1K-FA solid state linear amplifier. It is a compact light weight (44 pounds) fully automated, full break-in capable amplifier that puts out 1000 W PEP on 160 through 6 meters. An internal 120 or 240 V ac power supply and antenna tuner add to the handiness if this convenient amplifier.

Dishtronix showed off their 100% duty cycle, 1500 W PEP as well as 1500 W CW, RTTY, FM output solid-state linear. This is a serious amplifier at 65 pounds with a separate 120 pound linear power supply, or choose their 54 pound switching supply. It was just sitting there, quietly heating up a dummy load at the legal limit, key down.

Tokyo Hy-Power had a great debut at Dayton this year, bringing their collection of three HF amplifiers newly introduced to the US market. They showed their HL-1.2KFX 750 W output, their HL-1.5KFX 1 kW output and HL-2.5KFX legal limit amplifier as well as the HL-500V 2 meter linear. All are completely solid state and the HF units offer automatic band decoding when used with many popular transceiver lines. They also offer a new legal limit automatic antenna tuner.

Moving Up the Bands
Kenwood announced a new V/UHF mobile transceiver, the TM-710. It offers many new features. Of particular note is free software that allows downloading repeater data from Travel Plus directly into radio memories -- a real boon for those who travel and have grown tired of manually storing all that repeater data for your trip. Other features include crossband repeater functionality and an innovative reversible control head that allows the radio's speaker to end up either on the top or bottom of the unit.

Yaesu introduced a new V/UHF transceiver especially for hams on the go! The FTM-10 is designed to mount on the handlebars of your bike or motorcycle so that you don't even need a mic -- just talk into the front panel and you're on the air! For those times when you don't have handlebars in front of you, it can also be configured as a traditional transceiver.

Accessories
Radio accessories are always popular at Dayton and MFJ can always be counted on to have new products anywhere you see them. Topping their list this year is the MFJ-998 1500 W Intellituner. This legal limit auto tuner is designed to handle loads from 12 to 1600 ohms from 160 to 10 meters and includes two outputs and sophisticated memory, protection and control features.

MFJ also introduced a stereo version of its speech intelligibility enhancer for receive audio, the MFJ-618. This provides sound field expansion and allows independent compensation for each ear. There is also a new battery booster, the MFJ-4416. It is a dc to dc converter that allows your partially discharged battery, as low as 9 V, system to provide up to 25 A at 13.8 V -- a great asset form EmComm users, particularly since PowerPole connectors are provided as well as screw terminals. They also offer a new Super-strong Telescopic Mast, the MFJ-1906/8 in either 33 or 43 foot lengths. This fiberglass mast has a wall thickness of 0.125 inches for rigidity and is offered with either snap clamps or stainless hose clamps.

West Mountain Radio, the RigBlaster and RigRunner folk, have branched out into the audio side of your radios. They introduced a DSP-equipped speaker designed for the HF operator who would like more signal and less noise. They also have a new DSP module to use with your speaker and a speaker that will sound good and can sit next to your computer monitor without causing distortion in either direction.

Antenna Tuners
In addition to the MFJ-998 above, I noticed a few other antenna tuners in my travels. Palstar has a new version of their AT1 series. The AT1KP covers 160 through 6 meters. By switching in the 160 meter inductance only when needed, the AT1KP reduces the minimum capacitance of the tuner so it can cover 6 meters. One touch of the front panel button and "top band," 160 meters, is back on without sacrificing performance on the higher bands.

The Swiss Antenna Matching System from Heinz-Bolli is a legal-limit remote-controlled tuner designed for outdoor mounting. It can be manually tuned by remote control or auto tuning can be used to select the best tuner configuration or adjust the parameters. It is distributed in North America by Array Solutions.

2962. 2007 ARRL June VHF QSO Party, June 9 - 11

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-05-24 16:44:05 UTC
From: Mark Thompson
Topic: 2962 Message: 2962

2007 ARRL June VHF QSO Party Rules
General Rules
1. Object: To work as many amateur stations in as many different 2 degrees by 1 degree grid squares as possible using authorized frequencies above 50 MHz. Foreign stations work W/VE amateurs only.
2. Date and Contest Period: The second full weekend in June. Begins 1800 UTC Saturday, ends 0300 UTC Monday (June 9-11, 2007).
3. Entry Categories:
3.1 Single Operator.
3.1.1. Low Power
3.1.2. High Power
3.2 Single Operator Portable.
3.3. Rover.
3.4. Multioperator.
3.5. Limited Multioperator.
4. Exchange: Grid-square locator (see April 1994 QST, p 86).
4.1. Exchange of signal report is optional.
5. Scoring:
5.1. QSO points:
5.1.1. Count one point for each complete 50- or 144-MHz QSO.
5.1.2. Count two points for each 222- or 432-MHz QSO.
5.1.3. Count three points for each 902- or 1296-MHz QSO.
5.1.4. Count four points for each 2.3 GHz (or higher) QSO.
5.2. Multiplier: The total number of different grid squares worked per band. Each 2 degrees by 1 degree grid square counts as one multiplier on each band it is worked.
5.3. Final score: Multiply the total number of QSO points from all bands operated by the total number of multipliers for final score.
5.4. Rovers only: The final score consists of the total number of QSO points from all bands times the sum of unique multipliers (grid squares) worked per band (regardless of which grid square they were made in) plus one additional multiplier for every grid square from which they successfully completed a contact.
5.4.1. Rovers are listed in the contest score listings under the Division from which the most QSOs were made.
6. Reporting:
6.1. Entries may be submitted as follows:
6.1.1. Electronic submissions in the Cabrillo format may be emailed to JuneVHF@...
6.1.2. Hand written paper logs or diskettes mailed to June VHF, ARRL, 225 Main St, Newington, CT 06111.
6.1.3. Web entries submitted via the web-based applet at: http://www.b4h.net/cabforms/
6.2. Entries that have been electronically generated must submit their log file in the Cabrillo file format. Paper print outs of electronic files are not acceptable substitutes.
6.3. Entries must be emailed or postmarked no later than July 11, 2007. Late logs may be designated as checklogs only.
7. Miscellaneous:
7.1. Stations may be worked for credit only once per band from any given grid square,

regardless of mode. This does not prohibit working a station from more than one grid square with the same call sign (such as a Rover).
7.2. Only permitted one signal per band (6, 2, 11/4, etc) at any given time is permitted, regardless of mode.
7.3. Multi-operator stations may not include QSOs with their own operators except on frequencies higher than 2.3 GHz. Even then, a complete, different station (transmitter, receiver and antenna) must exist for each QSO made under these conditions.
7.4. Forms may be obtained by:
7.4.1. Downloading from the Internet at the Contest Branch Website: http://www.arrl.org/contests/forms.
7.4.2. Sending an SASE with 2 units of postage to June VHF Form Request, ARRL, 225 Main St, Newington, CT 06111.
8. Awards: Certificates will be awarded in the following categories:
8.1. Single operator.
8.1.1. Top Single Operator Low and High power entry in each ARRL/RAC Section.
8.1.2. Top Single Operator Low and High power on each band (50, 144, 222, 432, 902, 1296 and 2304-and-up categories) in each ARRL/RAC Section where significant effort or competition is evident. (Note: Since the highest score per band will be the award winner for that band, an entrant may win a certificate with additional single-band endorsements.) For example, if W1INF has the highest Single-Operator all-band score in the CT Section and his 50- and 222-MHz scores are higher than any other CT single operator's, he will earn a certificate for being the single-operator Section leader and endorsements for 50 and 222 MHz.
8.2. Top Single-Operator Portable in each ARRL/RAC Section where significant effort or competition is evident. (Single-operator Portable entries are not eligible for single-band awards.)
8.3. Top Rover in each ARRL Division and Canada where significant effort or competition is evident. (Rover entries are not eligible for single-band awards.)
8.4. Top Multioperator score in each ARRL/RAC Section where significant effort or competition is evident. (Multioperator entries are not eligible for single-band awards.)
8.5. Top Limited Multioperator in each ARRL/RAC Section where significant effort or competition is evident. (Limited multioperator entries are not eligible for single-band awards.)
8.6. Plaques, if sponsored, will be awarded in the following categories:
8.6.1. Top 10 Single Operator (both High and Low Power) scorers.
8.6.2. Top 5 Single Operator Portable scorers.
8.6.3. Top 5 Rover scorers.
8.6.4. Top 10 Multi-Operator scorers.
8.6.5. Top 5 Limited Multi-Operator scorers.
9. Other:
9.1. See "General Rules for All ARRL Contests" and "General Rules for ARRL Contests on bands above 50 MHz (VHF)" at www.arrl.org/contests/forms
9.2. For more information, queries or questions contact contests@... or (860) 594-0232.

2963. Still looking for help this weekend ...please come out if you can

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-05-24 20:59:31 UTC
From: Don Meyer - KB8ODB
Topic: 2963 Message: 2963

Hello Everyone . Summer events seem to line up one after another and there are 2 coming up this long weekend one in Grand Haven and one in Spring Lake.

The first is the YMCA Snug Harbor kick off to summer Race in Grand Haven this Saturday May 26th in the morning . We have helped with this
race for the last 10 years. We will meet at the Grand Haven Public Safety lot at 7:30 so we can be on the race course by 8:05. This is only a 5K race so it will be over by 10:30. If you can help out with this Race please send me a e-mail at kb8odb@sbcglobal. net or call me at
616-846-7307

The second event is on Memorial Day Monday May28th in the morning for the Spring Lake parade and we will be meeting at the Spring Lake EOC. I
will post the meeting time as soon as I have it. If you can help out with this Race please send me a e-mail at kb8odb@sbcglobal. net or call
me at 616-846-7307

Thanks for all your help 73 Don Meyer - KB8ODB

2964. Needed 10 or 12 uH choke/coil

Yahoo group: WestMichiganHams (2006 — 2008)

From: Hank Greeb
Topic: 2964 Message: 2964

I'm in need of a 10 or 12 uH choke/coil for a project. I've been told that this is a "common molded unit." I suppose I could wind a coil with this value, but perhaps someone has one of these in their junk box?

Let me know.

I'll be glad to pick it up and give a donation to your bank account or to your charity of choice.

Reminds me of the "Wilderness protocol" on the call frequencies in the ham bands. Take 146.52 on 2 mtrs. Here in Grand Rapids there is unfortunately much local chit chat primarily base to base which in it's self is not illegal but in my opinion not good amateur practice because it discourages monitoring by many that don't want to listen to general trivia but would monitor for emergencies if the freq was quiet. There is nothing wrong with calling another station and moving off of 652 to another simplex freq. As it is I have to lock out 146.52 from the scan list due to heavy local use and as such probably will not be listening for that emergency call. DE WD8USA ...-.-

Indeed. This is a nuisance even out here in Grand Haven; the GR-area ops on .52 are S2-S6 here, so it's not just a problem in Kent county: those hour-plus ragchews are hogging the call frequency for a sizable chunk of the whole west MI region...

Didn't 146.445 used to be chit-chat channel in that area?

My vote is to let them stay. If they are there they will here a call. If they move to another freq than that is that many ears not listening to the calling freq. Chances are that when they are not talking they are still listening. If it came to CB, 19 would be my first try.

FYI calling freq list from my 2004 HANDBOOK (I thing its time for a new book, oh how time flies)

Band Calling Frequency
50 50.125 SSB
50.620 (packet)
52.525 National FM simplex

144 144.010 EME
144.100, 144.110 CW
146.520 National FM simplex

432 432.010 EME
432.100 CW/SSB
446.000 National FM simplex

Interesting that you have brought that up. I have mixed emotions about it. I agree that chit chat on the calling frequency is not good amateur practice, but on the other hand having a handful of hams frequent the frequency may keep it monitored more than if they hung out on a different frequency. Case in point, if you had an emergency and only had CB, would you bet your life on Ch 9, or on Ch 19?

I can hear some of the ops here in Muskegon and have met a few of them. They are not renegades by any means. If they agreed to move off '52 do you really think more people would monitor it? I don't know the answer to that. I would bet that if the guys were asked to move, they would, but would it help keep the frequency monitored if they did? Food for thought, to be assured.

Has anyone ever asked any of the ops why they are chit chatting on the calling frequency? Maybe they don't know that there is a gentleman's agreement for the '52. Maybe they feel as long as they always give way to any breaking station they are not in violation of the agreement. It would indeed be interesting to hear their side of the story before we pass judgment on them.

2978. Tower move, upcoming hamfests

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-05-29 02:31:45 UTC
From: Jack Amelar
Topic: 2978 Message: 2978

So many thanks go to those who helped move a donated 100 ft tower on Saturday, May 19. A 100
foot self supporting tower was donated to the Lowell Amateur Radio Club to hopefully be erected at the new club shack location in Lowell. We still need to do the site plan, get township approval, and fundraising for the cost of cement, etc.

In order to paint and renovate the tower, it needed to be moved from where it was stored near Moline to where it can be worked on. This tower is huge and would need a flat bed truck
to move. This is where special kudos go to Ken KC8YTC and his co-worker Gary that arranged to bring out a flat bed tractor-trailer and a boom truck. With about 200 total hams on the various area e-mail lists, when the call goes out for looking for someone with skills or access to specialty equipment, all too often there is no response when you know someone out there could but won't have any involvement. That's why I want to highlight Ken and Gary and the High Grade Material Company for donating time and vehicles to get the job done. Others, besides Ken KC8YTC and Gary who gave a good chunk of their Saturday: Frank N8UVI, Stu KA8WGF, Doug KC8EGM, Chuck KC8REH and daughter Ashley, Ann KB8ZSX, and myself Jack NY8D. The
tower was donated to LARC by Dave Tubergen, T&W Electronics.

The annual IRA Hamfestival is this Saturday, June 2, at the Hudsonville Fairgrounds. http://www.w8hvg.org/IRAfest2k.htm Friday evening (1st) will be the annual "Road Kill Chili" potluck. TI 147.16+(94.8Hz). The June Grand Rapids Amateur Radio Association (GRARA)
meeting will follow at the fairgrounds. As in the past I will be setting up outside tables along side my motorhome for GRARA and LARC displays and members with items to peddle. Who ever has the respective club banners, be sure they are at the Hamfestival.

On the subject of hamfests, here are other Grand Rapids swaps (all Saturdays):
July 14, Mini-Swap, circle drive in front of LARC ham shack, HWY M-21 East end of Lowell. TI: 145.27-(94.8Hz) http://www.w8lrc.org
August 11, another LARC Mini-Swap
September 8, GRAHamfest (Grand Rapids Area Hamfest), Kent County Fairgrounds, Lowell. TI: 147.26+(94.8Hz) sponsor: GRARA http://www.grahamfest.org
December 15, Year End Hamfest, Lowell High School. Sponsor: Amateur Radio Group of Youth in Lowell (ARGYL) http://www.argyl.org

Hamfests for the rest of the state and continent: http://www.arrl.org/hamfests.html

2986. MS-150 Bike Tour help requested

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-05-30 03:30:20 UTC
From: Rick, N8GGO
Topic: 2986 Message: 2986

We are in urgent need of hams to help out with this years Multiple Sclerosis 150 mile bike tour.
This event takes place on June 9 and 10, starting at 7:00am at the Byron Center school on Saturday and ending at the Hope College campus around 5:00pm.
On Sunday, the event starts at Hope College at 7:00am and finishes around 5:00pm at Byron Center School.

Our needs are (each day):
(7) operators for SAG vehicles (vehicle picks up and assist bike riders and operator radios in concerns regarding riders, the route, medical, etc.).
(5) Med vehicle riders (operators receive and report any medical related information regarding injuries or accidents on the bike route).
(1) Staff vehicle rider (operator receives and reports any information of importance to Staff member to facilitate the operations of the days events).
(1) Backup Net Control Operator to assist the primary NCS operator as needed.

Equipment requirements: a mobile or 5 watt handheld (mobile prefered) with cigarette lighter plug (a "Y" adapter is helpfull), a mag mount antenna, and paper and writing utensils (a clipboard is helpful).
Maps will be provided.
If you are only able to participate for a half day, we can use your participation as well.
Free food and drink is provided each day on the course. Supper is provided to the volunteers at the end of the days events on Saturday and Breakfast is provided at 6:00am on Sunday morning at Hope College.

If you are able to assist, please e-mail me at richarde_97@yahoo.com and give me your full name, call sign, days and times of operation, any special needs, and a phone number, including area code, that you can be reached during the evening.

Our sincerest appreciation for any assistance you may offer,
Rick Elushik, N8GGO.

2988. MS-150 Bike Tour

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-05-31 02:25:21 UTC
From: John Bok
Topic: 2986 Message: 2988

Greetings West Michigan Hams

It is again time for the West Michigan MS 150 Bike Tour. As in past years the
Amateur Radio community will assist the Bike Tour with communications during the 2 day event. Primary radio comms will be net control, medical vehicles, and
support (SAG) vehicles. If personal is available we also have some radio operators
at some of the rest stops on the route. Why? Because Amateur Radio works, and cell
phones are marginal at best! When all else fails......Amateur Radio works!

This is a 2 day event, but if you can't work both days that is fine. We appreciate
what you can offer in time. 1 day is good or part of a day to monitor a rest stop.
These are long days, but the satisfaction of working a large event with a long
history of success is also fun. You get to work with many hams from West Michigan,
and enjoy a "warm fuzzy" feeling of working in a close knit group with a common goal
of a safe ride for all the participants.

For those not familiar with the Bike Tour, it starts at Byron Center High School on
Saturday June 9, 2007, and ends at Hope College in Holland. Sunday June 10, 2007
starts at Hope College, and ends back at Byron Center High School. Meals are provided at the end of each day, and food is available during the day at various
rest stops.

The following is taken from the MS-150 web page, and it applys somewhat to the hams
that participate in a long 2-day event.

"While many of us will never kinow what it's like to live with MS, we can do something
for those who do. Willpower vs. fatigue. Training vs. excuses. You vs. yourself. It
really doesn't matter where you start, because we all share a common finish. So let's
ride...and together, we can "START TO FINISH MS".

If you are interested send an email to n8wvn@... or call me at
616-748-1348.
If you have a preference of where to work it is first come first choice.
Thanks in
advance for your participation in this very worthwhile event.

What do I need to help? A mag mount antenna (rubber duck will not work), a
radio
capable of 5 wattss or more, a 12 volt setup to connect to the vehicle
power, and
patience!

Topic: 2990 Message: 2990

All Hams

We are going to take this Saturday's off for the Hudsonville Hamfest. Greg will be in the Store but I will be in Hudsonville Friday night and Saturday.

I still need some more items for Sale. Bring your consignment items in today

New this week
Used like New FT-100 Yaesu Radio HF/VHF/UHF Radio $474

HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock
More Connectors in Stock
SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30

We are now the only Dealer in Michigan for Jetstream Products Check out the items available http://www.jetstream-usa.com/index.shtml
14 Amp Jetstream Power Supply (28Amp and 45Amp),Antennas, Switches, and lighting arresters are in today

Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other items in Stock

The Te-Ne-Ke code key by the North Ottawa Club $35.00
We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's
300 ohm twin lead 100Ft $10.00
RG-8 .60 per Foot
RG-8X Coax Cable .35 per Foot
PL-259 Connectors $2.50 ea adadapters for RG-8X $1 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $12
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

The only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.
Technician Class $18.95
General Class $17.95 Get yours NOW and upgrade before the changes on July 1, 2007
Extra Class $21.95
FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Other Used Equipment on Consignment

Rocky Mountain Radar Detector $175
LED Emergency Light Taking orders $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50
MFJ-722 Notch Filter $30.00
B23G Mirage 30 watt VHF Power Amp $40
MFJ 407C keyer $15
Code Key $15
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
HF Tuner $40
Sharp SF7320 working Copy Machine $50
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40

Heathkit items in stock

Model HD-19 Hybrid Phone Patch for $5
1 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40
Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Keychain LED lights $1.50 and up
Other items coming in Daily

The POP machine is working, with cold sodas of your choice. Snacks are in. Have one of your favorer candies crackers, beef jerky or snacks.

Tool Max Industrial Supply is the new retail store on Schamber Dr just off Pontaluna Rd and US-31 behind the old Hob Knob or Michael's Restaurant in Muskegon . We have tools, industrial suppliers and Ham radios for sale.For more information call me at 231 798-7898 I am in the Store from 9:00AM-4:30PM Monday-Friday. Stop by and see me for all your Ham needs.

2993. Fw: [MIDSTAR] Glen Arbor - Empire 145.36 DStar on the air

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-05-31 15:48:29 UTC
From: Mark Thompson
Topic: 2993 Message: 2993

----- Forwarded Message ----
From: John Martin <odd1@...>

Sent: Wednesday, May 30, 2007 10:26:11 PM
Subject: [MIDSTAR] Glen Arbor - Empire 145.36 DStar on the air

Greetings!

I'm pleased to report that this evening the WI0OK__C 145.36 DStar repeater was placed in service. (the call is 'doubleyew eye zero oh kaye'--- see http://iook. org)

The repeater hails with 25w from an antenna 330' up a commercial radio tower (Shared with WGFN-FM) that is atop a hill just south of Glen Arbor and east of Empire (about 20 miles west of Traverse City, looming over the Sleeping Bear Dunes).

At the moment it's a standalone 2m DStar system, which will be crosslinked (via a 'remote base' type setup) to the co-located 444.725 and 52.92 repeaters in about three weeks. When linked to the analog sytem, it will also be accessible via links from the W8TVC-R Echolink node (node #56464)(145. 27 local RF).

Sadly, a DStar internet gateway is a long ways off, as would be adding other bands to the mix. DPRS to APRS interoperability, on the other hand will likely be implemented in the fall or next spring (there is considerable packet activity at the site).

I expect to post online some photos and commentary on the project in the next week or so (first week of June). I have taken numerous photographs of the gear including it's internals. I also will post a rudimentary cheat-sheet for getting on the air with the ID-800, IC2200h, and the IC-2820 (also with photos). These will be posted on http://kf8kk. com on or before June 10th and hopefully will be helpful (be patient-- no dstar info has been posted yet, I wanted to get the machine on the air first-- and then post online).

73,
John KF8KK

2994. Congressman Ehlers' Address

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-05-31 18:20:49 UTC
From: Hank Greeb
Topic: 2994 Message: 2994

The first attempt to send this didn't work. Sorry if some delay results in this being a duplicate.....

Many readers of the West Michigan Hams yahoo group live within Congressman Vernon J Ehlers' District.

Full info on him is:

The Honorable Vernon J Ehlers

Grand Rapids Office
Gerald R. Ford Federal Building
110 Michigan Street
Grand Rapids, MI 49503-2313
voice: (616) 451-8383
fax: (616) 454-5630

Washington Office
2182 Rayburn House Office Building
Washington, DC 20515
voice: (202) 225-3831
fax: (202) 225-5144

A written letter is always better than an e-Mail. It doesn't seem to matter whether it's a FAX or by US Postal Service.

An e-Mail is fine as an alternative.

But, ANY form of communications is MUCH BETTER than none. I urge everyone to send a letter of support as requested by Jim, K8JE.

Readers in other Congressional districts are encouraged to post information for their Representatives.

Asparagus or Spargel is very popular in Germany. I've been to Germany serveral times at this time of year and you'll see Spargel signs along the road where you can buy it.

Some restaurants even offer an all Spargel menu. Soup, Appetizer, Entree & Desert all with Spargel.

From: Hank Greeb
Topic: 2995 Message: 2997

Most volunteer and professional groups to which I belong have similar provisions for opting in and opting out. Some of them have a box to check if you don't mind getting such mailings, rather than a box to opt out.

When you join, the membership form states:

Please provide the following information when you apply:

Name
Date
Call Sign (if any)
Full Mailing Address
and indicate if you do not wish your name and address made available for non-ARRL-related mailings.

Send your dues and membership application to:

The American Radio Relay League
225 Main St
Newington, CT 06111 USA
or phone (860) 594-0200
or fax (860) 594-0303
or e-mail circulation@...
or complete and submit our online membership form.

I'm not sure how a membership renewal form reads, as I've not paid dues of ages - $130 for a Charter Life Membership was one of the better investments I've made in my lifetime. :)

I gather you'd prefer that you'd check a box so that you'd receive information from afiliated entities rather than having to opt out? I trust you informed K8JE in your note to him.

Actually, the GRARA Monthly meeting will be held at the Hudssonville Hamfest Site, in Hudsonville, immediately after the Road Kill Chili supper.

See: http://www.w8hvg.org/IRAfest2k.htm for details and directions.

Folks who show up at the Red Cross Building will find a dark building.

Sorry I didn't tell the robot of the changed location.

See you in Hudsonville!

3001. National 24 Hour Challenge, hams needed, June 16

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-06-03 01:43:58 UTC
From: Jack Amelar
Topic: 3001 Message: 3001

To all Amateur Radio Operators

The National 24 Hour Challenge (N24HC) http://www.n24hc.org is a 126 1/2 mile bicycle route through Barry County that takes place on the day / Saturday before Fathers Day that attracts
about 500 riders plus their support crews. Amateur Radio communications is an important part
of the logistics of this annual event taking place this year on June 16.
As I type this, the following communications positions are in need of volunteers:
CHECK POINT 2, Baseline UM Church, south end of Barry County, 10:45 AM to 1:45PM - Reports to net control passing traffic from the check point to ground zero.
CHECK POINT 3, Delton Library, Delton, 11:00 AM to 3:35 PM - Reports to net control passing traffic from the check point to ground zero.
CHECK POINT 5, near Yankee Springs State Park (NOT in the park, no permit required), 1:30 PM
to 4:45 PM first shift - Reports to net control passing traffic from the check point to ground zero.

OTHER ASSIGNMENTS

The event coordinators provide shirts, limited refreshments, and Friday evening spaghetti dinner. Please contact the Ham Radio Communications Director if you are willing to help.

Hello Everyone ?
This past Saturday was the first training day for CERTs in the Tri-Citys area with six Amateur Radio Operator and four Civil Air Patrol members participating. Train was by Sergeant Bo of Grand Haven Public Safety we were also given the opportunity to try out the extinguisher training trailer. I want to thank all the members that participated . If you are interested there will be more opportunity?s for training as the program grows.

Congrat's!

I believe class #14 in Kent County is finishing up this coming week with our final exercise on Wed night. If anyone wants to be a victim, drop me a note.

Jeff

Subject: [WestMichiganHams] CERTs Training started in the Tri-Citys

Hello Everyone .
This past Saturday was the first training day for CERTs in the Tri-Citys area with six Amateur Radio Operator and four Civil Air Patrol members participating. Train was by Sergeant Bo of Grand Haven Public Safety we were also given the opportunity to try out the extinguisher training trailer. I want to thank all the members that participated . If you are interested there will be more opportunity's for training as the program grows.

Donald Meyer - KB8ODB

From: Linda
Topic: 3008 Message: 3008

Hello Hams:

On Thursday, June 7th, at the Muskegon Area Amateur Radio Council Clubhouse, 2888 Scenic Drive, Muskegon, we'll be holding our monthly meeting. The subject matter for the program will be presented by Larry Kozal, K8PUJ. It is a program which he calls: "Forum on Towers - Growing Them and Keeping Them Healthy". Larry is an excellent presenter with a great sense of humor. Should be fun, ya'all come down near the lake shore and join us. We welcome anyone and everyone, stop in. Oh, yes, the time for the meeting is 7:00 p.m.. If you get lost, call for help on the 146.94 repeater. And, Larry's program is first on our agenda, so if you want to come just for that and then split before the general meeting, you are welcome to do that, too.

73,
Linda, AB8QH
Vice-President, MAARC

3009. MS-150 Bike Tour needs you!

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-06-05 03:03:17 UTC
From: John Bok
Topic: 3008 Message: 3009

Greetings West Michigan Hams

It is again time for the West Michigan MS 150 Bike Tour. As in past years the
Amateur Radio community will assist the Bike Tour with communications during the 2 day event. Primary radio comms will be net control, medical vehicles, and
support (SAG) vehicles. If personal is available we also have some radio operators
at some of the rest stops on the route. Why? Because Amateur Radio works, and cell
phones are marginal at best! When all else fails......Amateur Radio works!

This is a 2 day event, but if you can't work both days that is fine. We appreciate
what you can offer in time. 1 day is good or part of a day to monitor a rest stop.
These are long days, but the satisfaction of working a large event with a long
history of success is also fun. You get to work with many hams from West Michigan,
and enjoy a "warm fuzzy" feeling of working in a close knit group with a common goal
of a safe ride for all the participants.

For those not familiar with the Bike Tour, it starts at Byron Center High School on
Saturday June 9, 2007, and ends at Hope College in Holland. Sunday June 10, 2007
starts at Hope College, and ends back at Byron Center High School. Meals are provided at the end of each day, and food is available during the day at various
rest stops.

Byron Center High School is located on the corner of 84th (Byron Road), and Burlingame.
For the extremely geographically challanged talk-ins are available on that morning.
Hey, we are HAMs right? That is what that radio is for. The location for Hope College
can be had on the Holland 147.060 94.8pl repeater. Just sound lost and forlorn, and
someone will help you find the place.

The following is taken from the MS-150 web page, and it applys somewhat to the hams

that participate in a long 2-day event.

"While many of us will never kinow what it's like to live with MS, we can do something
for those who do. Willpower vs. fatigue. Training vs. excuses. You vs. yourself. It
really doesn't matter where you start, because we all share a common finish. So let's
ride...and together, we can "START TO FINISH MS".

If you are interested send an email to n8wvn@... or call me at 616-748-1348.
If you have a preference of where to work it is first come first choice. Thanks in
advance for your participation in this very worthwhile event.

What do I need to help? A mag mount antenna (rubber duck will not work), a radio
capable of 5 wattss or more (mobile preferred), a 12 volt setup to connect to the
vehicle power, a Y-adapter for 12volt (if others need power for cell),and patience!

3010. Are You Ready to Upgrade?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-06-05 11:16:21 UTC
From: Bill
Topic: 3010 Message: 3010

All:

Your next opportunity to upgrade your license is coming to a location near you. Yes, the folks administering the license exams are offering another opportunity this weekend. Near you, too!

The Volunteer Examiners are doing their proctoring on Saturday, June 9, at the Muskegon American Red Cross Building in downtown Muskegon. The session starts at 9:00 am.

Candidates will bring along their identification, a copy of their current license (unless you're a newbie and are entering the hobby), $14 cash (we cannot accept checks), and a calculator.

There is no longer a code test. That impediment has been removed. Take this opportunity to take that first step into the amazing world of HF.

We are looking forward to helping you get over this small hurdle and enjoying more radio privileges. We wish you well this Saturday.

3011. Hams @ Grant Tower?

N.O.A.R.C.

The North Ottawa Amateur Radio Club

News Release

Ham Radio Operators Demonstrate Modern Emergency Capabilities

75th Public Demo of Emergency Communications June 23-24

Newington, CT - For 75 years, Amateur Radio operators across the country have been providing emergency communications when other systems failed or overloaded in a crisis. Each year they take their equipment into unusual locations to test and make sure Ham Radio will always be there to get the message through. This year, is their the 75th "Field Day" as thousands of Ham Radio operators will be showing off their emergency capabilities this weekend.

Over the past year, the news has been full of reports of ham radio operators providing critical communications in emergencies world-wide. During Hurricane Katrina, Amateur Radio - often called "Ham radio" - was often the ONLY way people could communicate, and hundreds of volunteer "hams" traveled south to save lives and property. When trouble is brewing, ham radio people are often the first to provide critical information and communications. On the weekend of June 23-24, the public will have a chance to meet and talk with these ham radio operators and see for themselves what the Amateur Radio Service is about. Showing the newest digital and satellite capabilities, voice communications and even historical Morse code, hams from across the USA will be holding public demonstrations of emergency communications abilities.

This annual event, called "Field Day" is the climax of the week long "Amateur Radio Week" sponsored by the ARRL, the national association for Amateur Radio. Using only emergency power supplies, ham operators will construct emergency stations in parks, shopping malls, schools and back yards around the country. Their slogan, "Ham radio works when other systems don't! " is more than just words to the hams as they prove they can send messages in many forms without the use of phone systems, internet or any other infrastructure that can be compromised in a crisis. More than 30,000 amateur radio operators across the country participated in last year's event.

"We hope that people will come and see for themselves, this is not your grandfather's radio anymore," said Allen Pitts of the ARRL. "The communications networks that ham radio people can quickly create have saved many lives in the past months when other systems failed or were overloaded."

In the Tri-Cites area, the North Ottawa Amateur Radio Club will be demonstrating Amateur Radio at Rycenga Park on June 23-24 They invite the public to come and see ham radio's capabilities and learn how to get their own FCC radio license before the next disaster strikes.

There are 660,000 Amateur Radio operators in the US, and more than 2.5 million around the world. Through the ARRL, ham volunteers provide emergency communications for the DHS Citizens' Corps, Red Cross, Salvation Army, FEMA and thousands of state and local agencies, all for free.

To learn more about Amateur Radio, go to www.emergency-radio.org. The public is most cordially invited to come, meet and talk with the hams. See what modern Amateur Radio can do. They can even help you get on the air!

Subject: WEAVER'S WORDS -- PLEASE WRITE YOUR REPRESENTATIVE

Dear ARRL member,

Please don't forget to write your US Representative!

All amateurs are urgently requested to write to their US Representative. Ask them to cosponsor HR 462, the current bill in the US House of Representatives that would protect Amateur Radio from interference from unlicensed devices -- e.g. various Part 15 devices and BPL. Your letter will help move the bill to the floor of the House.

Your letter when added to those of many others will be the first critical step in getting this bill passed. Your letter counts. As few as 10-15 letters in support of a non-controversial bill of this type is often enough to get a Representative to co-sponsor it. Obviously, the more letters the better.

To learn the name and address of your US Representative, you can go to www.arrl.org and click on "Members Only" at the top of the screen. If you have already registered (free) to access Members Only, you will see the names and addresses of your US Representative and US Senators on the left of the Members Only screen. If Members Only does not fully open for you, simply register on the opening screen to use. This will give you access to it.

You may also go to http://www.house.gov/. Type your ZIP+4 in the boxes in the upper left corner and the ID of your Representative will come up. In most instances, you can click on his/her name to get to his web site. At the web site, click on CONTACT and you will get to an area where you can send an e-mail.

After adding the identification information the site requests, you can paste a copy of the message you wish to send to him. Have your message prepared before getting to the CONTACT site, copy it from the program you used to prepare it and paste it in the CONTACt area.

Please send a copy of the letter to Janet Janet.Worthington@... and one to me. Janet is our contact person at the Government Relations firm we retain. It is very useful to this firm to have copies of letters we send to Congressmen during visits to their DC offices.

Mail your letter only to your US Representative. Do not mail it to either of your US Senators. The bill is only in the US House of Representatives and not in the US Senate. We are working to have a

bill introduced in the Senate, later.

I have pasted a draft letter for you to use, below. It is a shorter version of the letter I distributed earlier and will add a bit more variety to the mail our Congressmen receive.

If you send the letter by US Mail, please copy add the name and address of your Representative. Also add your name and address.

Modify the letter to personalize it if you have time, sign it and send it -- soon.

The draft letter is:

The Honorable _____
United States House of Representatives
_____ House Office Building
Washington, DC 20515

Dear Congressman/woman _____:

On behalf of nearly 700,000 federally licensed Amateur Radio operators across the nation, I wish to bring to your attention an issue that affects emergency communication operations. As a voter in your district, I request that you become a cosponsor and support passage within the House Energy and Commerce Committee, Telecommunications and the Internet Subcommittee, of H.R. 462, the "Emergency Amateur Radio Interference Protection Act." This bill urges the Federal Communications Commission (FCC) to conduct a very targeted but comprehensive evaluation of "broadband over power line" (BPL) systems that may interfere with public safety and other licensed radio services.

BPL utilizes electric power lines to serve as conductors of broadband signals. Unfortunately, because the power lines are not shielded, they also act as antennas and radiate signals into the air. These radiated signals interfere with radio receivers tuned to the same frequency range. BPL has only been deployed to a very limited extent, but amateur radio operators and several state public safety commissions report they are already experiencing severe interference that the FCC has been unable or unwilling to correct.

Because no infrastructure is needed for it to communicate, the amateur radio service is the only 100 percent fail-safe emergency communication system in the world. Interference from BPL emissions is significantly disrupting this capability. The impact on emergency communications extends beyond amateur radio operations. Fourteen states utilize a similar frequency range for state police operations, and nine of these states use it as their primary radio band. The interference concern has also been echoed by the National Association of Broadcasters (NAB), the Association of Public-Safety Communications

Officials-International (APCO), and the National Public Safety Telecommunications Council (NPSTC).

In deploying broadband, it is vital that further understanding and causation of interference be studied by the FCC. H.R. 462 will accomplish this goal, by allowing the FCC to ascertain what additional rules governing BPL systems, if any, should be adopted by the FCC in order to reduce the interference potential to a reasonably low level. The FCC has authority to study this issue, as it is the primary agency responsible for adopting rules in BPL systems. Unfortunately, the 2004 rules governing BPL are not sufficient to reduce the probability of harmful interference to reasonable levels. This non-controversial study language was included as part of H.R. 5252, the Communications Opportunity, Promotion and Enhancement Act (COPE) of 2006.

Amateur radio operators, like myself, are not opposed to broadband services. On the contrary, we usually tend to be early adopters of new technology. However, BPL represents a significant potential interference source for radio services using certain frequency ranges. Unlike BPL, other methods of providing broadband Internet services to consumers, such as cable, DSL, wireless and Fiber to the Home, do not pollute the radio spectrum.

It is imperative that there is a comprehensive evaluation of the interference potential of BPL to public safety services and other licensed radio services. The potential impact on public safety communications must be taken into consideration. Please cosponsor and support passage of H.R. 462, or support its inclusion in a comprehensive broadband bill. Thank you for your attention to this matter.

Sincerely,

Name, Title, Contact Information

A question: Can non-ARRL members and non-hams write to their US Representatives? Certainly. Just be certain the letter reads appropriately.

Thanks for your help. Please feel free to ask any questions.

LACs and LAAs please help spread this letter and encourage all amateurs to send it to their US Representatives. Tnx to everyone who has taken this step. Tnx to everyone who has written.

73,

Jim

Subject: [WestMichiganHams] Asparagus Festival 5K Run

Okay, We finally got in touch with the guy that runs the 5k. I guess
he was trying to get in touch with us. The race starts at
9 a.m., so if everyone can be there at 8 a.m. that would be great! The
event is in silver lake. Here is a mapquest map of the location that
they start at: http://www.mapquest.com/maps/map.adp?
formtype=address&country=US&popflag=0&latitude=&longitude=&name=&phone=&
level=&addtohistory=&cat=&address=8239+W+Hazel+rd&city=&state=&zipcode=4
9436
It's next to the Yogi Bear Campground. The address is 8239 W Hazel Rd.
Mears, MI 49436. If you are coming from Mears, go past the campground
and it will be the next place on the left. If you are coming from
Shelby, it will be before the campground on the right.
Thank you, Rob H (KC8ZSU) and Marsha H. (KD8BGO)

From: Hank Greeb
Topic: 3023 Message: 3023

Reminder to look for N8XX and other SP-1 Buildathon users on 7030 KHz ?
during the Buildathon/SP-1 Sprint between 2300Z on 9 June 2007 to 0300Z
on 10 June 2007.

I haven't actually made a contact with mine, yet, but I noted today that
I only have 2 daze left to get it running. So, if you hear a weak
signal on or about 7030 ? signing N8XX in the next couple daze, please
try to dig me out of the QRN, etc.

I can't find rules, et. cetera, any more on the QRP-ARCI website. I do
have them in an e-mail from VA3JFF, so if you don't have the details,
please send me a message, and I'll forward his e-mail to you.

Lettuce hope the gods of thunder and lightning don't invade the
ionosphere on Saturday evening, because a puny 800 MW or so isn't the
best way to fight QRN!

3025. Antenna rotors needed

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-06-08 19:45:54 UTC
From: Joe Veldhuis
Topic: 3025 Message: 3025

It seems masts and towers are growing like weeds here, and each one needs a rotor. Right now I need two azimuth rotors and one elevation rotor. I won't be using them for huge 16x30 EME arrays (yet), so light-duty TV rotors are good enough. So, if anyone has any collecting dust at the bottom of their junk pile, let me know what you have and what you want for it.

Contact me off-list at jvn8fq@....

3026. MS-150 still needs help for this weekend

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-06-08 23:30:49 UTC
From: John Bok
Topic: 3026 Message: 3026

Greetings West Michigan Hams

It is again time for the West Michigan MS 150 Bike Tour. As in past years the Amateur Radio community will assist the Bike Tour with communications during the 2 day event. Primary radio comms will be net control, medical vehicles, and support (SAG) vehicles using the Holland 147.060 94.8 pl repeater. If personal is available we also have some radio operators at some of the rest stops on the route. Why? Because Amateur Radio works, and cell phones are marginal at best! When all else fails......Amateur Radio works!

This is a 2 day event, but if you can't work both days that is fine. We appreciate what you can offer in time. 1 day is good or part of a day to monitor a rest stop. These are long days, but the satisfaction of working a large event with a long history of success is also fun. You get to work with many hams from West Michigan, and enjoy a "warm fuzzy" feeling of working in a close knit group with a common goal of a safe ride for all the participants.

For those not familiar with the Bike Tour, it starts at Byron Center High School (8500 Burlingame SW - corner of 84ty, and Burlingame east of Byron Center) on Saturday June 9, 2007 at 7:00 AM, and ends at Hope College in Holland about 5:00 PM. Sunday June 10, 2007 starts at Hope College at 7:00 AM, and ends back at Byron Center High School about 5:00 PM. For the geographically challanged talk-ins are available.

Meals are provided at the end of each day, and food is available during the day at various rest stops. It would not hurt to bring some water with you as sometimes you are on the go for long periods of time.

If you are interested send an email to n8wvn@... or call me at 616-748-1348. If you have a preference of where to work it is first come first choice. Thanks in advance for your participation in this very worth while event.

What do I need to help? A mag mount antenna (rubber duck will not work), a radio capable of 5 wattss or more (mobile preferred), a 12 volt setup to connect to the vehicle power, a Y-adapter for 12volt (if others need power for cell), and patience!

3039. HamRadio/GeoCaching Exercise

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-06-10 18:24:45 UTC
From: Tom Porritt
Topic: 3039 Message: 3039

All,
This is to let you know about a HamRadio/GeoCaching exercise (event? field trial?, experience?, or whatever?) one week from today at the MAARC clubhouse on Scenic Drive between Muskegon and Whitehall (info below). This event is designed to educate and test. This is the first time we have tried this format so we will be expecting to learn things that will improve the event for the next time. Teams of 2 or 3 with at least one ham and ability to communicate with net control on 147.435 MHz is suggested (although a lone ham could probably do it, it certainly would be more fun with some help). A typical 2 meter mobile installation is probably adequate.

A list of about 80 caches with-in 10 miles, with scoring information, will be included in your packet. No maps will be provided. This exercise can be done without a GPS unit if you have maps from which you can interpret latitude and longitude coordinates.

HamRadio/GeoCaching Exercise
June 17, 2007
1PM to 5PM
MAARC Clubhouse
2888 Scenic drive

Operating Frequency: 147.435MHz
Goals:

Develop greater understanding of maps, mapping, coordinates, and GPS.
Incorporate ham radio communications
Try to eliminate time as a factor to eliminate the hurry-up factor.
Have fun
Rules or parameters:

Must follow all Geocaching conventions and protocols (see below)
Four hours will be allotted to find three caches
Option: May find more than three and keep the best three
Report each cache by radio as it is found, must match with log when returned to Net Control
Return to NCS with trinket from each cache claimed, must account for all caches claimed
May not claim any cache that any team member has previously found or visited. (You are on your honor here)
5 points for reporting a missing cache
10 points for finding a cache
Multiply 7 or 8 by product of Difficulty and Terrain (this will be on the handout at the time you sign-in)

Timing:
12:30 PM Team Check-in (get your packets)
1PM Kick off and Net start
5PM Net end, all stations report in
5:30PM All teams return to clubhouse

5:30 PM Picnic
5:45PM Award ceremony
5:50PM Continue picnic

P.S. We will not start until 1PM. But anyone who arrives late will have the same goal, three caches by 5PM.

Geocaching Guidelines for SEEKING Caches From www.mi-geocaching.org
DO: It's easy to get so caught up in the "hunt", that all of your attention gets focused on the screen of your GPS receiver and you forget to take much notice of the very thing that the cache hider was hoping to share, the beauty or uniqueness of the surroundings, including the walk into the final destination. Make a point on each cache hunt to enjoy the journey as much as the destination. (I think we will all agree that the trinket at the end is never the really the true prize that we walk away with.) Speaking of trinkets, when you choose to trade something from a cache, make a habit of leaving items that are of equal or better quality than those that you take. There is a perception that the quality of caches typically degrades over time. Let's prove to the skeptics that, in Michigan, that's an exception rather than a rule. (If there is nothing in the cache that appeals to you in a particular cache, it is also acceptable to simply log the book without trading any items at all.) As a courtesy to the cache owner, and to express your appreciation of the time and effort that they have put into placing the cache for your enjoyment, take a few moments to sign both the physical log book contained in the cache, as well as the online log on the corresponding cache webpage. Not only is this appreciated by the cache owner, but it is also useful for monitoring the ongoing state of a cache. (This is helpful to both cache owners as well as other seekers. For example, if a person has searched for a cache, and wasn't able to find it, the online logs will give him an idea of whether the cache has disappeared or if he was looking in the wrong places.) When seeking, logging, and replacing a cache, be aware of others in the area who may be observing you. Take care to be discreet so as to not attract any attention that could result in non-cachers returning to the site, and taking or disturbing the cache after you are gone. When you have finished logging your find, return the cache to its original location, and leave it in a similar state of camouflage that you found it (i.e. if there was bark or a stone covering the container, replace it afterwards). Remember that other people will be searching for the cache after you, and we want to maintain the fun for everyone. Due to our common interest in enjoying the natural areas that lend themselves to hiding caches, and in the spirit of "giving back" something in return for the enjoyment we get from the places we visit during our caching activities, the geocaching community has established a "Cache In/Trash Out" practice. If you have pictures of your Cache In/Trash Out activities, please email them or your stories to info@.... DO NOT: When searching for a cache, do not take shortcuts that could cause harm or distress to the surrounding natural areas or wildlife, and do not trespass on private land, or areas marked as restricted. Even if something is not explicitly marked, always use common sense, and consider things such as erosion, sensitive foliage, nesting areas, etc. (Tip: Most caches are fairly close to marked trails. Unless a cache is rated as very having very difficult terrain, following the obvious path is usually the best route. Remember, the shortest distance between to points may be a straight line, but that's not always the fastest route.) When choosing items to place in a cache, please refrain from leaving anything that could be dangerous, offensive, or illegal (such as explosives, pornography, or drugs). Remember that geocaching is a family activity. Do not place food or scented items in caches. Animals have a much greater sense of smell than our own, and have been known to destroy caches that contain these items. (Also, avoid placing candles, liquids, or other items that may melt or freeze in a cache, depending on the

season.) BOTTOM LINE (for both hiding and finding caches): Use common sense, and treat the caches and the areas they are hidden in as you would want your own property to be treated.

3043. Anderson Knock Offs

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-06-11 18:50:59 UTC
From: Bill
Topic: 3043 Message: 3043

All:

I received the following from a good friend in the MAARC. Take a minute to check your power poles. Sounds like we should insist on the "real McCoy," er, Anderson. Or is it Andersen? Maybe there is a knock off spelled that way, too.

Stole this from the Elecraft list server:

"Do not try and substitute the "Chinese copies" of the Anderson Power Pole connectors marketed by TYCO under the AMP name, for the "real thing"!!! They fit together terribly, the contacts are inferior to the Anderson ones. Maybe the "what's his name" CEO wanted more profits to buy more $6500 shower curtains!

I have been meaning to pass this along some time ago. I got a sample package from TYCO for possible use for an "engineering project" I was involved in. I was putting some of these on some ham stuff a few days ago and didn't think I'd still had any of the samples left! They LOOK identical, but the housings do not nest together neatly like the originals. They are not compatible with the originals. The dovetails in the nesting lugs are slightly bigger. Only "ID" on them is the word "China" molded into the rear edge (as opposed to Anderson on the originals). Also the contacts mate with the Anderson connectors but not really reliably.

Anyway, these things are crap! They "look" OK, but they are not carefully made. Steer clear of them. I think Allied Electronics has them in their line, and possibly others. DON'T USE THEM, YOU WILL BE DISAPPOINTED AND FRUSTRATED! Stick to the original Anderson Power Poles!"
-

3044. Latest ARRL Survey

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-06-12 01:54:32 UTC
From: Hank Greeb
Topic: 3044 Message: 3044

There's a survey on the main ARRL web page

http://www.arrl.org/

which asks whether your hamming has been affected by Codes, Covenants, or Restrictions (either home owners association rules, or local zoning rules). Please view this, vote, so the results can be as general as possible.

Before moving up here to Michigan we attempted to find a suitable home for us, with the restriction that it had to be on property with no CC&R's which could prohibit putting up my 60' tower. We very quickly found that most subdivisions are Site Condominiums - with CC&R's which specifically prohibit amateur radio and other towers. It took us 6 months to find a place with acreage and no restrictions other than the township zoning restrictions. I looked through the zoning ordinance, and found that this Township (Courtland, Kent County) was cognizant of PRB-1, and allow Amatuer Radio Towers up to 100 feet.

It amazes me that hams will buy property in a site condo and then complain that they can't put up an antenna. The purchase agreement specifically says that the buyer must agree with the condo association agreements, so no one should be surprized.

3045. MS-150 comment

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-06-12 01:58:17 UTC
From: Hank Greeb
Topic: 3045 Message: 3045

If you didn't help with the MS-150 support this weekend, you missed a very great event! The MS folks were well organized, and the Holland repeater worked like a charm - full coverage almost everywhere with a mag mount antenna and 5 watts, and hand held coverage for much of the route. The net worked quite well, was never overloaded. There were only a few cuts and scrapes, no major injuries.

Please look for the event about this time next year, and volunteer!

From: Bill
Topic: 3051 Message: 3051

All:

Dawn, K8DMD died this past Wednesday evening as a result of a stroke suffered earlier in the week. She was a member of the MAARC and wife of Matt, K8MLD. A son and daughter, husband, and stepchildren survive her. She was forty-five years old. Her health had been failing as of late.

Several of her organs were donated to the benefit of four others. You can investigate memorial opportunities hosted by your local Fifth Third Bank. There may not be a local memorial service. Details are still developing.

We send our condolences to her friends, family, and the ham community.

Bill, AB8SC
MAARC guy

3052. 6m Open This Weekend

I've been hearing reports that 6m has been open this weekend.

It's Sporadic-E season and may make 6m a lot of fun on Field Day!

Tom, you forgot to mention what fun we had in our attempts! It was a great afternoon followed by a DELICIOUS spread put out by Ingrid! And of course enjoyable talk all along with ham friends. I could only wish that more had come out to join in the fun. A huge thanks to both you and Ingrid for the great intro to ham geocaching.

73,
Barb
KD8FBY

All,
We had a very success full HamRadio/Geocaching Exercise today. Two teams of three people each learned a lot about the sport of Geocaching with a ham radio flavor. The event was won by the team of KD8YL, KD8CBG, and KD8FBY with 70 points. As a result of the exercise, the rules we used have been slightly modified. Attached.

Hope you can join us next time.

Tom, N8YJT

Subject: [MIDSTAR] Off Topic but Amateur Radio Relevant: Special Event Station This Thursday Morning

This is slightly off the normal subjects but ... it is appropriate.

Barring really ugly weather or some other event out of our control, Thursday morning the Big Rapids Area Amateur Radio Club is doing a field day preview for the Morning Show on 9&10 News (CBS). We will be on the air from 5:30 AM to about 8:00 AM. We will be at the field day site, running on generator power, parked in front of my camper. I understand we will be featured several times during the show along with teasers through out the show (I take that as we are going to be operating for 2 1/2 hours solid).

My plan is to be near 3875 unless it goes dead. I think we will use the call sign N8OE, if that becomes a problem it will be KB8QOI. We will be keeping people posted on the Big Rapids 146.74 machine and if it isn't busy we will be on Link system for anyone that can hit that.

I don't know if it will get carried on any other stations, 9&10 News covers a major chunk of Northern Michigan and the Easter UP.

If anyone wants to work us, we would appreciate the company, especially at 5:30 in the morning.

Tom

3060. EZ-NEC User?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-06-18 20:47:23 UTC
From: Hank Greeb
Topic: 3060 Message: 3060

Does there happen to be anyone in the conference who uses EZ-NEC antenna modelling programme? I downloaded the demo/free version of it, but am fuzzy enough on how to use it.

I also have a Disc from the ARRL antenna book which I believe has a version, which may or may not have more features than the demo version.

In any event, if someone within this conference has used it, perhaps I could bend his/her ear and learn something about how to use it. I want to model a variation of a W8JK beam antenna which I've successfully used for Field Day several years, just to see what it is supposed to do from a theoretical basis vs what I've seen in practice.

Private or public responses would be appreciated.

Al:

Thanks for the very informative reply. I don't know that I'd be considered "serious", but I've built several working antennas which have done me well in Field Day, and would like to see if I could figure out the theoretical gain of them to see how many dB resulted in the improved score that I achieved with them vs an ordinary dipole.

Please give me a link to the course by W4RNL. That would be a way to start learning the modelling techniques.

Thought I'd drop a note that Mark K8MHZ is in Mercy Hospital, having open heart surgery today. Actually, the surgery was scheduled to start at 12 noon today, so he may well be out of surgery or pretty close to it at the time I am posting this message. If there are no hitches, he will be released from the hospital on Saturday.
Keep in in your thoughts and prayers for a successful and speedy recovery.

Civil Air Patrol Mission Announcement
Posted by: "Don West" Don-West@... w9dew
Date: Tue Jun 19, 2007 6:11 pm ((PDT))

Indiana Hams,
As part of an emergency exercise, SONS 07 (Spills of National Significance) related to the New Madrid Seismic Zone, amateur radio and the Civil Air Patrol will be launching a simplex repeater on a balloon expected to reach 75,000 feet. You must register to participate. It will be launched from Mo. at 0830 tomorrow morning. It will cover a circle approximately 676 miles in diameter. You should be able to work it if you are in the circle with an HT and 2 watts.

Find the details at:
http://kcnorthares.org/arhab/

I hope to work it from the Indiana Government Center if the wind is right.

73,
Don, W9DEW

3071. Field Day Caution

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-06-20 23:43:48 UTC
From: Tom VanderMel KB8VEE
Topic: 3071 Message: 3071

All
Please pass on to all Hams about field day. Thanks Tom KB8VEE

As FD is upon us, Jim K8SIW offers this reminder:

With Field Day rapidly approaching, I have run across several
on-line discussions suggesting the use of railroad tracks as part of a
field-station antenna system. On the surface, a big, long piece of
steel rail looks like the ideal counterpoise or experimental antenna,
and the idea of using it as such is rather tempting. However, there
are very good reasons for avoiding this practice.

In many cases, railroad tracks carry a variety of life-critical
train control information intended to control important signal
apparatus. This information may range from basic DC track circuits or
audio frequency overlays controlling highway grade crossing signals, to
complex coded systems, which indicate to a dispatcher where a train is
located, or which control approach signals designed to indicate whether
it is safe for a train or other on-track equipment to enter a portion
of track.

Some systems, such as "elctrocode" use the rails as conductors to
transfer signals between critical control points, and are therefore an
integral part of train control networks and train dispatching.
Insulated joints are often present throughout rail systems, which
isolate track circuits operating within critical tolerances. Such
circuits must NOT be bypassed. Shunts, track-diodes, and similar
equipment are often hidden from view along a rail line, all of which
selectively pass critical train control signals around circuits or
operate vital relays and the like. Defect detectors, Automatic
Equipment Identifiers, and similar devices use specialized IR sensors
and RF ID to track rail cars and identify dangerous conditions, such as
overheated wheel bearings and similar defects. These systems likewise
require track circuits to detect train presence....and the list goes
on.

I can not say this strongly enough. When one fools with railroad
tracks by connecting antennas, transmitters, grounds, and the like, one
is potentially placing lives at risk.

In most cases, one may simply ruin some poor signal maintainer's
weekend (or provide some needed overtime income) by causing a trouble
call. However, the rare case exists in which such an action may kill
someone. I for one would not want to be responsible for either, and
Amateur Radio's reputation could be permanently harmed if such clowning
around ever caused a fatal train wreck, a hazmat release due to

derailment, or a similar disaster.

On a final note; it should be noted that railroad tracks are private property. True, the railroads often fall short of the mark by failing to adequately enforce trespassing provisions. However, such right-of-way should never be confused with a public highway, city street, or nature trail. One should stay clear of railroad property and treat it in the same way they would their neighbor's yard or a private business. Most importantly, one definitely should not fool with life critical train control systems. In many cases, there is far more there than meets the eye!

Thanks!
Jim Wades, K8SIW

2007 K6KPH Field Day Bulletin Schedule

Day Mode Pacific Mountain Central Eastern

SATURDAY CW 7:30 AM 8:30 AM 9:30 AM 10:30 AM
CW 5:30 PM 6:30 PM 7:30 PM 8:30 PM
Teleprinter 6:30 PM 7:30 PM 8:30 PM 9:30 PM

SUNDAY CW 7:30 AM 8:30 AM 9:30 AM 10:30 AM
Teleprinter 9:30 AM 10:30 AM 11:30 AM 12:30 PM

W1AW will operate on the regularly published frequencies.

The special PSK31 bulletin will be transmitted on the regular W1AW
teleprinter frequencies.

CW frequencies are 1.8175, 3.5815, 7.0475, 14.0475, 18.0975,
21.0675, 28.0675 and 147.555 MHz.

Teleprinter frequencies are 3.5975, 7.095, 14.095, 18.1025, 21.095,
28.095 and 147.555 MHz (includes PSK31).

Phone frequencies are 1.855, 3.990, 7.290, 14.290, 18.160, 21.390,
28.590 and 147.555 MHz.

W1AW will transmit the bulletin in 45.45-baud Baudot RTTY, 100-baud
AMTOR FEC Mode B, and 110-baud ASCII.

The Maritime Radio Historical Society's K6KPH will transmit the
''W1AW'' Field Day 2007 message for the benefit of West Coast stations
on 3.5815, 7.0475, 14.0475 and 21.0675 MHz, CW only. The
K6KPH schedule is accurate as of June 21, 2007.

K6KPH will be transmitting Baudot RTTY and FEC AMTOR on 7.095 and
14.095 MHz during Teleprinter transmissions.

Any additional transmissions or changes in the schedule will be
posted on the web at,
http://www2.arrl.org/contests/forms/fd-2007-w1aw-sked.html .

3076. 2 meter SSTV on field day

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-06-22 06:20:24 UTC
From: Joe Veldhuis
Topic: 3076 Message: 3076

As we all know already, exchanging pictures via SSTV is worth a one-time 100 point bonus for Field Day. However, doing so on the HF bands is difficult. Any phone contest will render 20 meters unusable, but the level of activity on Field Day will push the other bands to critical mass as well.

So, to make this substantial bonus easier for everyone in the area to put in the log, I propose we try running SSTV on 2 meters. All you need is a laptop running SSTV software (google for MMSSTV) and a radio; preferably one that supports SSB, but FM might work too. You don't really need a soundcard interface, holding your mic up to the laptop's speaker will work.

If anyone wants to give it a shot, call me on the Grand Haven 145.490 repeater and we'll pick out a frequency.

-Joe, N8FQ

3078. DX is OK for Field Day

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-06-22 21:32:52 UTC
From: Hank Greeb
Topic: 3078 Message: 3078

In another reflector to which I belong, the question came up about working DX during Field Day.

This is okay, fine, there's nothing against it, in fact, it lends to the "international good will" part of the definition of Amateur Radio.

> Bob, WB4APR

I will be running APRS from the NOARC GOTA/digital/packet station, and have put up an object, 'MI-1', according to Bob's suggested procedure. He suggests that the following be done as an APRS demo:

1. Copy 20 APRS stations
2. Exchange text messages with three other APRS stations
3. Optionally, set up digipeaters that respond to the 'TEMPn-n' alias

The first objective is a piece of cake, one must only leave an APRS client running for an hour and the map will be populated with dozens of stations. The second requires the active participation of some other stations. The suggested procedure is to look for 'MI-#' objects and send a message to them, hoping for a reply.

The third just requires software or TNCs capable of APRS-style digipeating.

3082. Fox Hunt This Tuesday, and iti's rules

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-06-24 19:04:22 UTC
From: K8TB
Topic: 3082 Message: 3082

A Post-Field Day reminder, that the Holland Club will be having a
hidden transmitter hunt on Tuesday, June 26.

The hidden transmitter operator will be ACE DF'r himself, Laryn.

Laryn's first keyup will be at 7:00:00PM, and we will start from the club
house located on East 8th Avenue, right nest to the Holland chamber of
Commerce.
I would advise that we should be there at least 15 to 20 minutes
ahead of time to untangle cables, try to remember how to operate the
equipment, and lie to each other.

It was mentioned that there should be some rules.

This is Beta Version 0.51b

The hidden transmitter will be within 6.28 miles of the tech center
The hidden transmitter will key up for 30 seconds every 3 minutes.
Huntee, please have a digital watch or timer.
The hidden transmitter signal must be readable from the tech center.
The hidden transmitter cannot transmit with more than 250 watts ERP.
The power level and antenna gain and pattern direction will stay
stable during the hunt.
The hidden transmitter must be on publicly accessible land, hunters
will not have to trespass or ask permission or have to pay to gain access.
Private parking lots are OK, as long as there are no "No Trespassing"
signs.
For now, the hidden transmitter, the fox and the antenna must be in/on a
car.
As the hidden transmitter is found, the huntee will acknowledge
them in person, and not on the air, log their time and mileage. Once
this is done, the hunters should
leave, so as to not draw undue attention.
For now, we will award two winners, one for who drove the fewest
numbers of miles, and one for who found the fox first.
The next hidden transmitter will be one of the two winners, to be
determined by the HARC Hidden Transmitter Hunt Committee.
This offer not valid in Wisconsin.

As the unofficial committee of one for the Hidden Transmitter Hunt,
I am very open to changes in the rules. We just have to know what they
are before the hunt.

If you do not have equipment for the hunt, please show up and those with
equipment can always make room in their cars for more "guessers"!

Laryn, please measure the distance from the club house to your hidden site.

See you the Tuesday the 26th!

Tom Bosscher K8TB

From: Jeff's Lists
Topic: 3085 Message: 3085

We are looking for about 35 to 40 people. We will be doing more than just manning aid stations/checkpoints.
We have been asked to performing the fallowing duties:

Setup
Registration
manning checkpoints
traffic control
Directing event participants
lap counting

Along with this we will need a net control station and most likely a shadow for the event coordinator. Please remember that most of this event will be outside so dress for the weather. All for you CERT people don't worry if you are not a radio operator. Many of these positions do not require a radio. All you radio people that don't have a handheld radio we have a number of radios that can be loaned out. If you do need to use one of our radios, please bring along AA batteries for the radio. CERT and RACES have been asked to play a significant role in this event, and as of this point there are only 10 people signed up for this event. If you have any questions about this event contact either myself or Jeff Nawrot.

3091. Help needed at the lakeshore on Sunday July 8th

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-06-28 02:12:46 UTC
From: Don Meyer - KB8ODB
Topic: 3091 Message: 3091

Hello Everyone We are looking for help with the
Grand Haven Triathlon Festival
1.2mi swim, 56mi. bike, 13.1mi. run
1.5k swim, 40k bike, 10k run
500m swim, 20k bike, 5k run
July 8, 7:30am

This event runs in the City of Grand Haven and down the lake shore to
Holland, So we are looking for some people from the Holland area to
help at that end. Runs will be in the GH area and we will be working
with GHPS and OCS. I will post more information as it comes available
routes and maps are on this website
http://www.3disciplines.com/index.php?
option=com_events&task=view_detail&agid=3&year=2007&month=7&day=8&Item
id=0

This event is a early one it starts at 7:00 am I will post a
meeting time for us as this will be different times for the positions
this is Sunday July 8th
Please let me know if you can help out .73 Don Meyer 616-846-7307 or
kb8odb@sbcglobal.net

3092. Tool Max open this Saturday 9-12

Yahoo group: WestMichiganHams (2006 — 2008)

Topic: 3092 Message: 3092

All Hams

We are going to be OPEN this Saturday.

I still need some more items for Sale. Bring your consignment items in today

New this week Test Equipment slightly used.

B&K Model 4011 Precision function Generator $60
B&K Model 2140 Oscilloscope $175
GW Model GDM-8135 Digital Multimeter $40

HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock
Connectors in Stock
SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30

We are the only Dealer in Michigan for Jetstream Products Check out the items available
http://www.jetstream-usa.com/index.shtml
14 Amp Jetstream Power Supply (28Amp and 45Amp),Antennas, Switches, and lighting arresters are in.

Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other items in Stock
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's
300 ohm twin lead 100Ft $10.00
RG-8 .60 per Foot
RG-8X Coax Cable .35 per Foot
PL-259 Connectors $2.50 ea adadapters for RG-8X $1 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $12
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

The only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.
Technician Class $18.95
General Class $17.95 Get yours NOW and upgrade before the changes on July 1, 2007
Extra Class $21.95
FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Other Used Equipment on Consignment

B & W Antenna Tuner VS-300A $40
AT-11MP Auto Tuner by LDG works on IC-706 Radio $75
RCA Volt Ohm Meter $25
Swan SWR-2A Meter $5
Johnson SWR Meter $2
Barket & Williamson Low Pass Filter $5
Speakers $2 - $10
Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
DB 1015 10/15 meter High Gain Beam $50
Center Insulator for HF antenna $5
Icom ICP2AT HT $50
Rocky Mountain Radar Detector $175
LED Emergency Light Taking orders $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50
MFJ-722 Notch Filter $30.00
B23G Mirage 30 watt VHF Power Amp $40
MFJ 407C keyer $15
Code Key $15
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
HF Tuner $40
Sharp SF7320 working Copy Machine $50
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40

Heathkit items in stock

Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40
Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Keychain LED lights $1.50 and up
Other items coming in Daily

The POP machine is working, with cold sodas of your choice. Snacks are in. Have one of your favorer candies crackers, beef jerky or snacks.

Tool Max Industrial Supply is the new retail store on Schamber Dr just off Pontaluna Rd and US-31 behind the old Hob Knob or Michael's Restaurant in Muskegon . > [As always, please reply only to k8je@....]
>
> - Ham radio offers too many operating options?
> - Coming soon.
> - Congratulations Blossomland Youth ARC.
> - US House and Senate bills would kill Amateur Radio.
> - Division Convention.
> - HR 462 alive; needs support.
> - One of the many ARRL services to members.
> - Got a patch?
> - Our letter writing campaign is showing success.
> - FCC dismisses RM 11306 without prejudice.
> - Tentative Travel Schedule.
>
> ++ Ham radio offers too many Options? ++
>
> It can be argued that the most major problem facing Amateur Radio is
> that we have been too successful. We have been too successful at
> obtaining and developing frequency bands, and in developing and using a
> wide variety of modes to use in our operating.
>
> To follow the logic, take a moment from reading this e-letter and think
> of the many operating options we hams have. Think, too, about the wide
> range of frequency bands from 160M through those that are miniscule in
> length. To name just a few, there are Morse code, AM, FM, RTTY, a
> variety of digital modes, FSK, AFSK, variations of TV, facsimile and
> then we have frequencies that range through much of the wide world of
> spectra. The bottom line is that each of us, if we wish, has many
> modes of operation and many frequency choices we can use and enjoy.
> So, what is wrong with this?
>
> The problem is that in our nearsightedness, we have become extremely
> fragmented as hams instead of remaining a cohesive group. During the
> past few decades we have allowed ourselves in many instances to think
> our personal choices of operating styles, modes and frequency ranges
> are the only choices "real" amateurs could possibly make. We have, for
> example, many VHF aficionados who see no value in HF. We have many
> devotees of cutting-edge digital modes who see no value in CW or AM --
> the older modes of communication.
>
> There are SSBers who are so infuriated with AMers they would nearly
> commit murder to clear the bands of the AM clutter. But, it isn't
> always new mode vs. old mode. Some of our devoted CW ops think
> broadband digital should be banned because it is nothing more than a
> nuisance. Yes, indeed, we are equal prejudice individuals.

>
> I could name additional ham-to-ham prejudices, but I think you get the
> idea.
>
> So, who or what is hurt by these prejudices? Amateur Radio is. These
> prejudices divide us into splinter groups. We have become VHF hams,
> digital hams, anti-CW hams, anti-AM hams. We are Contesters or
> anti-Contesters. We are "its my frequency" ragchewers Instead of
> pulling together for the benefit of all of hamming, all too many
> amateurs feel they hold no stake when "the other guy's" idea of ham
> radio is threatened by attacks from the government or industry. As one
> example, many HSMM-hams couldn't care less if the FCC proposed
> abolishing all privileges for Morse code operating. Conversely, many
> CW ops would do little more than smile if broadband digital was ruled
> illegal on ham frequencies.
>
> Regardless of the misconception by one "side" or another, all of
> Amateur Radio loses any time the FCC begins to withdraw privileges --
> modes or frequencies -- from another phase. Clearly, I won't now or in
> the future vote in favor of any proposals to have the FCC "modernize"
> Amateur Radio (as some hams would view it) by banning AM or by limiting
> the privileges of Morse or other forms of operation preferred by
> anyone.
>
> Unfortunately, Amateur Radio has become a marginally functioning, if
> not nonfunctioning, family in many instances. We find brother ham
> fighting brother ham, and sister ham bad mouthing sister ham merely
> because their operating preferences are different. This is no way to
> develop a winning team whether it is baseball, football, doubles
> tennis, an army . . . or a strong lobbying (advocacy) team.
>
> Actually, I will correct my initial supposition. We hams don't have
> too many choices. Worse than this, we have too little maturity in
> thought to manage the privileges we have been given for our common
> good.
>
> The real question is, "Why don't we all act like emotionally stable
> people and work together to our mutual benefit?" Just think what a
> formidable force for each other's good we would make if we would speak
> and act in unison.
>
> ++ Coming soon ++
>
> In a few days, I will send you a "proper" questionnaire. I hope you
> will take the few minutes required to answer it. It will provide me
> with information on topics that may be discussed while I am in
> Newington for the Board of Directors meeting later this month. This
> questionnaire is "proper" because it is a click-on-your-answer,
> automatically-tabulated one. This questionnaire is being sent to three
> Divisions.

>
> While the new questionnaire is open, I will be working to review the
> previous, low-tech one sent you a few weeks ago.
>
> ++ Congratulations Blossomland Youth ARC ++
>
> Congratulations to the Blossomland Youth ARC, W8BYC, of Berrien County,
> MI. A relatively new club, it is formed of young amateurs who largely
> came into Amateur Radio through the fine efforts of Matt Severin, N8MS.
> Matt, a teacher at Coloma Junior High School in Coloma MI, has
> incorporated Amateur Radio into his classes thanks to his personal
> drive and the support of his principal and a grant through the ARRL
> Victor C. Clark Youth Incentive program.
>
> As of June 20, Matt had 17 students who had participated in ham club
> and Amateur Radio activities. Ten of these students had become
> Technician licensees through the school program. Six of the Techs are
> working toward upgrading to General.
>
> Matt, in turn, is planning for a new freshman class this fall and the
> challenge of introducing it to the wonderful world of hamming.
>
> Great job, Matt. Thanks and continued success with your program.
>
> ++ US House and Senate bills would kill Amateur Radio ++
>
> This is what lead stories in QST back in 1910-12 would have read, if
> there had been a QST back then. It was in these years that some dozen
> and a half bills were presented in the US House and the US Senate to
> outlaw Amateur Radio. These bills were backed by the US Navy. The
> Navy wanted full charge over the use of ham-free radio waves. Hams and
> their spark gap transmitters caused disruptive QRM to military and
> important civilian communication. One 1912 bill would have placed the
> ownership and control of all transmitting stations under the Navy.
>
> With such a political force behind ban-the-ham legislation, why didn't
> one of the bills make it through Congress and become signed by the
> President?
>
> Hams, themselves, came together to lobby their US Representatives and
> Senators so heavily and successfully that each of the bills died. Even
> back in the early days of Amateur Radio, individual amateurs, banded
> together in advocacy (lobby) efforts successfully to beat overwhelming
> odds against them.
>
> There was no ARRL in 1912, but there were a few relatively large local
> organizations. Among these were the Harvard Wireless Club, Rhode
> Island Wireless Association, Wireless Association of Pennsylvania and
> Junior Wireless Club which became better known as the Radio Club of
> America. The clubs in their individual ways worked nearly as one to

> lobby successfully against anti-ham legislation. No "no-ham" bills
> made it through Congress thanks to the lobbying effort of the
> burgeoning Amateur Radio fraternity.
>
> Finally, a modified bill passed Congress and was signed by President
> Taft who signed it into law. This first US radio law became best known
> for making frequencies longer than 200 meters off-limits to hams. The
> phrase, "200 meters and down" grew out of this feature of the law. The
> feature also relegated amateurs to supposedly-useless frequencies --
> frequencies that subsequently proved to be the most useful on and
> surrounding earth.
>
> ++ Division Convention ++
>
> Don't forget the Great Lakes Division Convention on September 22 in
> Cleveland. This is the day before the Cleveland Hamfest. For full
> information, go to http://www.2007gldc.com/. One can even make
> reservations for a hotel room from this site.
>
> One feature of these biannual conventions is the special awards that
> are made to Division amateurs. Topping the list is the George S.
> Wilson, III, W4OYI, Lifetime Achievement Award. For you who don't
> recall, George is the only ARRL President to come from our Division.
> He continues to live in Owensville, KY and is a strong support of ARRL.
> The Convention features interesting and informative seminars on
> several aspects of Amateur Radio topics. These are given by top-notch
> hams in the respective areas. ARRL President Joel Harrison, W5ZN will
> speak at the Convention dinner on Saturday evening. At other times, he
> will be available for casual discussion. Watch for further
> information. Remaining, prestigious awards that will be given are the
> Amateur of the Year Award, the Technical Achievement Award and the
> Newsletter of the Year Award.
>
> Nominations for all but the newsletter award are made by GLD ARRL
> members. Nominations need to reach the Awards Committee no later than
> 5 PM, August 17. They may be e-mailed or sent by US Mail. The
> addresses are on the nomination forms. If you know of a deserving
> nominee, please go to the Convention web site and print out or complete
> the nominating form. The winning newsletter is selected by an
> independent member of the press from among the winners of each
> Section's newsletter contest.
>
> ++ HR 462 alive; needs support ++
>
> There is still time to write your US Representative urging his or her
> support of HR 462. If you haven't done this, yet, please write, soon.
> If you need me to send the boilerplate draft letter to you, again, just
> send me an e-mail and I'll get it to you right away. We cannot afford
> the luxury of remaining mostly an indifferent group if we want the FCC,
> Congress and the public to respect Amateur Radio and support its

> legitimate needs. Each of us who are concerned about Amateur Radio
> needs to demonstrate this concern and do what we can to support it. As
> I see it, the least we each can do is to send a letter, an e-mail or a
> FAX.
>
> Just a reminder: Do not write to your US Senator at this time. The
> time to urge support for the Senate version of HR 462 will come in the
> future. Don't write to a US Senator about Hr 462, either. This bill
> is in the House, only. Generally, Senators are not even aware of bills
> that are in the house.
>
> ++ One of the many ARRL services to members ++
>
> George A. Guerin, K8GG, of Ceresco, MI, reminded me of one of the fine
> services ARRL offers to members. Members are eligible to receive
> notices when it is time to renew their ham licenses. The notice also
> give direction on a quick and easy way to renew them online.
>
> George said it took only 12 minutes for him to renew, even though he
> uses dial up. George is all set for 10 more years.
>
> If you haven't signed up for this free ARRL member service, go to the
> Membership Modification Form (Member Data Page) in Members Only on
> www.ARRL.org. Make certain the box in front of "Notification of
> license expiration" is checked. Just as George received an e-mail
> reminding of his pending license expiration, HQ will e-mail a reminder
> of this to you.
>
> Thanks for the fine comment, George.
>
> ++ Got a Patch? ++
>
> A police department shoulder patch is the type being discussed. It
> seems that the head of the ARRL DX Department, Bill Moore, NC1L was a
> military police officer. In his life-after-the-military he collects
> patches from police departments around the US.
> Retired-but-still-consulting Blue Ash, OH detective Rick Burdick, K8WWA
> recently learned this and sent a Blue Ash patch to Bill for his
> collection.
>
> I am fairly certain we have still additional police officers among the
> GLD membership. I am more certain that Bill would appreciate receiving
> a patch from each of your departments. If you can come up with a
> patch, please mail it to Bill Moore, NC1L, ARRL, 225 Main St.,
> Newington, CT 06111. Bill is a great guy, a top-notch ham; an
> excellent worker devoted to Amateur Radio and fires-up a mean grill at
> cook outs.
>
> ++ Our Letter Writing Campaign is Showing Success ++
>

> We haven't won the war, yet, but our letter writing campaign on HR 462
> is showing success. Success, of course, can be judged in many ways.
> The ultimate in success in this instance is to have a Congressman/woman
> pony up and co-sponsor the bill. The next level is to receive a reply
> to your letter that demonstrates the Congressman read, understood and
> supports the basic premise that licensed radio services -- including
> Amateur Radio -- must be protected from callous QRM from unlicensed
> services (Part 15).
>
> I haven't seen that any of our Division's Congressmen have become
> co-signers, yet, but feedback from Janet Worthington of Chwat & Company
> is there are a few who are considering becoming co-sponsors. In
> addition to these Representatives, others are replying to Chwat and to
> Division members with quite intelligent comments that show they are
> pro-Amateur Radio. This is all good, of course.
>
> Even the Representatives who reply with "bonehead" letters help us.
> They help when you share their replies with Chwat and me. In these
> situations, Janet Worthington and John Chwat are able to forearm
> themselves with the knowledge they need in making calls to
> Congressional offices on Capitol Hill most effectively. They know
> before they walk into the offices just what form of information will
> likely be most effective in bringing our legislators on board with us.
> In terms of tennis scoring, this means -- advantage, Amateur Radio.
>
> To the many of you who haven't yet written to your US Representative on
> behalf of HR 462 . . . why not? Even if you take a pessimistic point
> of view, there is nothing to lose by writing and their certainly is
> potentially a lot to gain.
>
> ++ FCC Dismisses RM 11306 without Prejudice ++
>
> The FCC announced it was dismissing ARRL's RM 11306 petition as we
> Directors had requested. This was done "without prejudice," which
> means someone could review the petition and re-file all or part of it
> at some future time.
>
> Interestingly enough, before ARRL requested the Commission to dismiss
> RM 11306, nearly everyone who commented on it expressed strong
> opposition. However, just as soon as we requested the dismissal, we
> began to hear from significant numbers of members who strongly favored
> it.
>
> This raises the question, "Where were these "fors" when they may have
> made a difference?
>
>
> ++ Tentative Travel Schedule ++

3096. MAARC Meeting & Program - KB8IFE on the MIARC & How Repeaters are Coordinated

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-07-02 12:56:38 UTC
From: Linda
Topic: 3096 Message: 3096

Hello, All:

Thursday, July 5th, come on over to the Muskegon Area Amateur Radio Council, 2888 Scenic Drive, Muskegon, and listen to the program beginning at 7:00 P.M. KB8IFE, Jim Maike, who is vice-president of the Michigan Area Repeater Council, Inc., will be giving the program on the Council and how repeaters get coordinated. Jim also owns the 145.45 repeater in White Cloud. Come on down, all are welcome to our clubhouse cabin near the lakeshore.

73,
Linda, AB8QH
Vice-President, MAARC

3097. ride needed for club meeting

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-07-02 16:13:53 UTC
From: Chris Schulte
Topic: 3097 Message: 3097

Hi all,
I'd love to go to the club meeting on thursday. Is it possible that I can get a ride to the meeting from someone?

You can e-mail me off list, or catch me on the 94 repeater.

Thanks, and 73,
Chris, w8cjs

3099. THIS SAT -Next MINI-SWAP at HARC's T&T center.

3101. radar-man

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-07-04 00:53:32 UTC
From: Frank
Topic: 3101 Message: 3101

I first saw this in "Popular Electronics" Magazine about 50 years ago,
when "radar" was still a magic word. Not too long ago I ran across it
again in an old "QST". I don't know who wrotem it originally, but it may
have been authored by the submitter, named below:

The Radar Man With the Micro-mind

If you should see upon the street
A man who walks with dipole feet,
With a train of pips trailing behind
He's the radar man with a micro-mind.

With micro-seconds and micro-waves
And micro-volts he spends his days.
And we find with passing time
His brain has shrunk to a micro-mind.

This man attains with passing years
Infinite impedance between the ears.
As he chews his molars oscillate,
And his heart pumps blood at a video rate.

Finally he succumbs to a heavy jolt,
Of what he thinks is a micro-volt.

The doc looks up from his microscope
and says to the nurse,
"Behold this dope, not a brain cell can I find.
For he's the Radar man with the micro-mind."

Melvin Hamilton, N4DYI (?)

73, N8WUR.

This is a hoax, just by virtue of the fact, that State police would not use email or email list for that matter,
when looking for someone. for the fact that person might be on the said list....73

Paul,

This is FALSE.

http://www.snopes.com/crime/warnings/stallings.asp

Please stop this. I know your intentions are good but you just don't seem to get it. Since this is the second time I have had to verify your posts I am going to moderate you. If this happens again you will be removed from our group. I just don't have the time to baby sit you or anyone else.

Subject: [WestMichiganHams] State Police Warning NOT A JOKE

MICHIGAN STATE POLICE WARNING

State police warning for online: Please read this "very carefully"..then
send it out to all the people online that you know. Something like this is
nothi ng to be taken casually; this is something you DO want to pay attention
to. If a person with the screen-name of Rockhard abs or goes by his name
Jason Stallings contacts you, do not reply. DO NOT talk to this person; do
not answer any of his instant messages or e-mail. Whoever this person may
be, he is a suspect for murder in the death of 3 women (so far) contacted
through the Internet. He is a suspect in a shooting and is known for raping
and beating young women.
He is located in the MID-MICHIGAN area. Please send this to all the women on
your buddy list and ask them to pass this on, as well. This screen-name was
seen on Yahoo and AOL so far. This is not a joke!

Please send this to men too...just in case! Send to everyone you know!
Ladies, this is serious!

IF WE CAN PASS ON JOKES, SURELY WE CAN PASS ON A WARNING THAT MAY SAVE A
FRIENDS LIFE.

Thank You

Subject: Re: [WestMichiganHams] Re: [W8CSO] State Police Warning NOT A JOKE

Hi Mick,

Paul removed himself from WestMichiganHams reflector when he found out I found out turned off his ability to post messages to the group. I also sent an apology to Ms. Jackson, the lady who supposedly wrote the hoax and whose name and contact information was included in Paul's post.

Can you believe that Paul is an assistant fire chief in Edmore?. I find it to be very unnerving to think that someone so gullible has such a responsibility to the public and as such charged with their safety. I am hoping that Andrew N8ARY, the owner of the W8CSO reflector will respond in kind and remove him as well or at the very least turn off his ability to post to the group.

My apologies for not dealing with Paul strictly in the first place. I was lenient with him at the request of Don Meyer, the owner of WestMichiganHams the last time he forwarded a hoax to our list and let him off with a just warning. FWIW the last time Paul forwarded a hoax to our list I put him on moderated status and at the request of the list owner Don Meyer, KB8ODB I removed his restriction. Please be aware that Don is a really nice guy and thought that a warning was sufficient for what at that time seemed to be a relatively minor infraction.

Paul will no longer be sending hoaxes the WestMichiganHams reflector. It will be up to Andrew if the same is true for the W8CSO reflector. Knowing Andrew I suspect he will respond in kind.

Sorry Mick for the inconvenience and any subsequent frustrations. I am doing all I can to make sure that this does not happen again. I beg you, please do not remove yourself from our group.

73 my friend,

Mark K8MHZ

PLEASE REMOVE THIS PERSON FROM THE LIST IMMEDIATELY.

In these times, none of us can afford inattention to serious matters as it effects family, home, and Country.

PLEASE REMOVE THIS PERSON FROM THE LIST IMMEDIATELY.

I'd rather NOT be a member of this group, if this sort of dangerous "misinformation" is allowed to exist.

Thanks Marc ... Your remarks are appropriate.

3114. Hoaxes

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-07-05 10:17:32 UTC
From: Andrew Young
Topic: 3114 Message: 3114

I think we can at least look at the hoaxes that were recently posted here as a learning experience for all. I know these e-mails look legit, but they almost always are not. I could never believe that the State Police would use "spam" as a way to disseminate information like this.

These e-mails are chain letters and contain information that many people will, at first glance, will feel an urgency to forward.

Just my $0.02. I know everyone on this list probably already knew that but I felt like it needed to be said.

Andrew

Paul:

I thought that the question surrounding the frequency a ham was using was the ham's responsibility. I, too, am interested in why a VFO took so long to develop or encourage. We do encourage experimentation in the ham bands.

The really old timers will tell you that the Novice licensee was required to only work with a crystal determining the frequency. And they were not able to deviate much from that frequency. I guess it kept them in the proper place, within their own group of other Novices, and having fun while reinforcing the admonition to stay in the band. They were "rock bound."

And you can ask Leo, WD8DCA about this "pink slip" for being way out of the band. The folks in the FCC monitoring facility seemed to have taken their responsibility seriously.

A bit different from today?

Bill, AB8SC

Okay, when was the VFO first used? My father knew of VFO's and made one back in the 50's - maybe even earlier, I don't remember his earlier daze in the 30's, I was too young.

I never thought about the "invention" of the VFO, I assumed that folks figured out the VFO before the advent of crystal controlled radios. I do know that it was very difficult, even in the 50's to get a reasonably stable VFO (drift with changes in temperature was the biggest culprit).

Importance: High

Hi Everyone, if you are interested in getting your ham license we are
hosting a Ham in a day on July 22nd 2007 at the Grand Rapids Red Cross
Chapter house.

For more information please look below and to sign up please go to the link
listed! This is an easy way to get started in ham radio and then we will
put you in touch with your local clubs / organizations for more in-depth
information.

Ham in a day!
Get your Amateur Radio License in just one day!
Sponsored by the:
Kent County Radio Amateur Civil Emergency
Service
No Techno-Babble needed, this class is for anyone who wants their amateur
radio license
Date: Sunday July 22nd 2007
Cost: 30.00 Includes license Fee
Location: Red Cross 1050 Fuller Ave NE
Pre-Registration is required to reserve a spot in the class
Time: 1:00 PM - 7:00 PM
Testing will start at 6:00 PM
To register: http://www.kcraces.net/hiad.php
Questions: jnawrot@...
Under 16 must be accompanied by an adult!
Bring either drivers license or 2 pieces of identification
Coffee and Treats will be provided! Dress comfortably!
Small Print: This class uses memory retention, everyone learns differently.
Class is not a guarantee to getting your
license.

3124. Help needed for this Sunday

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-07-06 01:21:41 UTC
From: Don Meyer
Topic: 3124 Message: 3124

Hello Everyone ? We are looking for help with the
Grand Haven Triathlon Festival
1.2mi swim, 56mi. bike, 13.1mi. run
1.5k swim, 40k bike, 10k run
500m swim, 20k bike, 5k run
July 8, 7:30am
This event runs in the City of Grand Haven and down the lake shore to Holland, So we are looking for some people from the Holland area to help at that end. Runs will be in the GH area and we will be working with GHPS and OCS. I will post more information as it comes available routes and maps are on this website ? http://www.3disciplines.com/index.php?option=com_events&task=view_detail&agid=3&year=2007&month=7&day=8&Itemid=0
This event is a early one ? it starts at 7:00 am ? I will post a meeting time for us as this will be different times for the positions ? this is Sunday July 8th
Please let me know if you can help out ?.73 Don Meyer 616-846-7307 or kb8odb@...
We will be meeting at Grand Haven Public Safety at 6:15 am on Sunday for the swim event at 7:00 and be in place for the run by 8:30 ?. We could use 6 hams in the Holland / West Olive area on Lakeshore dr?just South of Lincoln / Sprint turnaround ?? just south of Lake Michigan dr / Olympic turnaround ?. Just east on New Holland /Half turnaround ?. Also on the three turns Lakeshore / Perry ? Perry / 168th ? 168th / New Holland ? these positions need to be filled by 8:00am and will be assisting the OCSD and at this time I have no help for these positions so if you can help email me at kb8odb@... or call ? you would not have to come up to Grand Haven and we will get shirts for those that help out ?..
Everything was done by 1:30 last year ? Thanks for your help 73 Don

3125. Asphalt Adventure mini-hamfests, hamfest-lite

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-07-06 01:03:05 UTC
From: Jack Amelar
Topic: 3125 Message: 3125

START SPREADING THE NEWS!

Mini-Swaps coming back in the Grand Rapids area!

The Lowell Amateur Radio Club http://www.w8lrc.org/ is pleased to continue the summer 2007 series of , whatever you want to call it.

Next one SATURDAY, July 14. Setup 9AM, begin 10AM "until it ends", figure sometime past noon.

Here's the deal. The monthly LARC meeting will begin at 9, the swap immediately follows at 10. (Visitors always welcome at our meetings)
Location, just outside the new shack, 11535 Fulton St E (Hwy-M21), West end of Lowell, between Cumberland Dr and Alden Nash Dr. About ? mile west of Meijer. Same location as the FLAT RIVER OUTREACH MINISTRIES THRIFT STORE.
Former location of Cumberland Manor.
Yahoo Map:
http://maps.yahoo.com/maps_result?addr=11535+Fulton+St+E&csz=49331&country=us&new=1&name=&qt
y=

What is a mini-swap? It's a small version of a Hamfest. Not nearly the planning or advertising that goes into a full fledged Hamfest, you don't have a variety of commercial vendors. But their cheep to put on and fun.

Advantages of a mini-swap at this location, besides being where the LARC Ham shack is located:
Lots of traffic passing by on Hwy M-21. Signs will be placed to attract spectators.
Co-located with the Thrift Store, which also opens at 10.
Set-up is on a circle drive in front of the building, out of the way of other building traffic on main driveway, yet easily seen from the main driveway as well as Hwy M-21.
Just outside the windows of the LARC ham shack. If you need electricity, bring your own extention cord.

What's the catch? Sure we'd like to raise a couple bucks with this FUNdraiser, but we certainly don't have grandeurs of cleaning up either.
ADMISSION IS FREE.
Sellers are asked for a donation of any amount they choose. (Please read statement * at bottom) Considering the location, with no admission fee, lots of drive by traffic, potential
shoppers from the Thrift Store, that's really a good deal.
Coffee, pop, and donuts available.
TALK-IN: 145.27-(94.8Hz) Lowell (naturally) repeater.

The next one is Saturday, August 11
September - NO mini-swap, enjoy GRARA's GRAHamfest 2??7 at Kent County Fairgrounds, Lowell, Saturday, September 8. http://www.grahamfest.org/

Maybe Saturday, October 13, we?ll see how the upcoming two go.

*SETUP: WHAT TO SELL. In respect to the co-located Thrift Store, who's owners have granted us permission to pursue our mini-swaps (its their property after all), LARC must insist that
items offered for sale be radio, electronics, computer, and related items only. General household items sold at the Thrift Store should not be sold at our swap meet (however, TVs radios stereos computers, anything electronics is OK). If you have good general household items to dispose of, please consider donating to the Flat River Outreach Ministries Thrift Store. F.R.O.M. is a 501c3 organization.

Let's have fun, see you there.

Mark,

That would be awesome. If you have a flier send it to me. I'll be happy to print it off and hand it out. While yes I have turned out 200 some odd ham's in the last 18 months I do encourage them to get involved in club's, ares / races programs and generally just hammin it up. If anyone else has info or would be willing to "elmer" some new ham's from my HIAD program please drop me a note @ jnawrot@...

Subject: [WestMichiganHams] After training

Hi All,

Please let the folks know that even if they pass their test at Ham-in-a-Day they are welcome to come to my ham class for additional study. That way the 'pressure' is off as they passed their test and are welcome to join us to learn about ham radio.

Our class is still small and we are looking for more students. I teach all levels from apprentice (no license) to Extra. The Extras are also encouraged to join my class as I am always looking for new things to learn and the Extras can help teach the Generals.

Anyone interested please feel free to contact me at k8mhz@...

Most of our classes are held at the MAARC clubhouse but I have also had class in other places like Ross Park and the Muskegon EOC. Besides licensing I teach varying levels of radio operation, technical stuff, net control operation, emcomm, etc. I am also open to suggestion from any of you as to what we should cover. I also feel it is important to have fun in class and so far have managed to do so.

73

3129. Memorial for K8DMD, Details

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-07-06 10:34:14 UTC
From: Bill
Topic: 3129 Message: 3129

All:

I have been asked by Matt, K8MLD to get you details regarding the upcoming memorial service for his deceased wife, Dawn, K8DMD. From his email, I quote the following:

Dawn David--K8DMD,SK,died June 13 at Mercy Hospital in Muskegon.Dawn had a pulmonary embolism break off and lodge in her heart.She was 45 years old.
Although this is sad what happened,some good did come out of the situation. Through the"Gift of Life"and the Michigan Eye-Bank out of Ann Arbor,Dawn was able to help out 5 people through organ donation.Dawn helped 2 people see,helped 2 people get off dialysis and 1 with her healthy liver.
There will be a Special ceremony,presentation and a Memorial service on July 14,2007 at 1 PM at Muskegon State Park. We're going to meet at the corner of Memorial Dr. and Scenic Dr. We'll then proceed about 300 yds.into the south part of the park. There will also be dignitaries present-- 91st District State Representative Mary Valentine and also the "Gift of Life"people from Ann Arbor, to make presentations. Afterwards, all of us who are there, will be able to say a few words about Dawn; with Myself speaking last.
Everyone is invited and encouraged to attend, including Amateur Radio Operators from Newaygo County and surrounding Counties who knew Dawn and Me.
Please contact Bill--AB8SC or Myself at:K8MLD1@... and let us know. We'd be very honored if you could show up for this.

O I C! When could Novices use Variable Frequency Oscillators? I can't answer that question, but, I have another question.

How many of you have legally contacted Australia on 11 Metres? (NOT illegally on CB!) I have, and I believe my father did, along with many of his contemporaries.

Before the FCC invented the Citizens Radio Service (CB), hams had 26.96 to 27.23 MHz as a band shared with Institutional, Scientific, and Medical (ISM). The main thing on the band was diathermy, with large, unshielded machines which supposedly heated up sore spots on the human anatomy and helped with healing.

But, I digress. Novices HF privileges were 80 and 11 metres - I'm not sure the 15 metre band existed at the time, and we definitely did NOT have 40 metre privileges. I had one crystal on 3723.9 KHz, and my father had one crystal which when quadrupled, was within the 11 metre band. (don't remember the exact frequency). My rig was a war surplus, single band, converted from VFO to crystal control, so I was stuck on 3723.9 KHz. However, occasionally I'd fire up my father's homebrew rig, make sure I wasn't running more than 75 watts (the power limit for Novices at the time) and try 11 metres. There was very little activity on the band, and one would occasionally get wiped out by diathermy, but I do remember working a VK3 once. That was quite a thrill for a new ham!

I remember that CB came along in 1953. The hams weren't happy that their 11 metre band was taken from them, but Novices got 40 metres (and I believe we also had the 15 metre band by then.)

So, that's another story of the early daze of Novices.

From: "Ward Silver" <hwardsil@...>
Subject: [CQ-Contest] IARU - July 14-15 - NOT July 7-8
To: "CQ-Contest Reflector" <cq-contest@...>

Folks,

The ARRL DX Bulletin is in error - the IARU HF Championship is on 14-15
July. It is NOT on July 7-8. I apologize for the error in Contest
Corral. The Web version of Contest Corral is correct as was the original
contest announcement in the April issue of QST. The DX Bulletin editor
apparently - and innocently - used information from July QST, not
realizing the information was incorrect. The fault is entirely that of
the Contest Corral editor, namely me.

Please relay this information to your local clubs, friends, neighbors, and
associates.

73, Ward N0AX
Editor, QST Contest Corral

Grand Rapids officer shot and killed

Updated: July 8, 2007 08:14 AM EDT

By PATRICK CENTER

GRAND RAPIDS - A Grand Rapids police officer was shot and killed early Sunday morning on the northeast side of the city.

A new release from Grand Rapids Police Chief Harry Dolan said the officer was killed in the line of duty. A press conference is scheduled for 2 p.m. Sunday.

The officer was shot in the area of Diamond and Leonard NE around 1:30 a.m. He was taken to Spectrum Butterworth Hospital.

Unconfirmed reports from various sources told 24 Hour News 8 the officer was responding to a domestic disturbance in the area around Emerald NE.

That intersection was closed for a while as police investigated, but it has now re-opened.

No other information is available at this writing. 24 Hour News 8 will have more details as they develop.

Like Old Time Marine Radio, and morse code? Listen in to how it used to be done with the Marine Shore stations:

http://www.radiomarine.org/non8.html

The mainpage of this group is at:

http://www.radiomarine.org/

As licensed as amateur radio operators, we may not transmit back to the shore stations on the frequencies they normally listen to, however, K6KPH will be on the air, taking reception reports. Details in the link.

Topic: 3143 Message: 3143

Hello Everyone ?. The Grand Haven Coast Guard Events are coming up the end of this month and I am looking for help on Saturday July 28th from about 7:30 am to 12:00 noon with the YMCA run and the Family Parade and would love to see you out to help. Then on August 4th from 8:00am to around 4:00 pm with the Grand parade line-up and parade safety. I will be meeting soon with the parade committee and have the event times that as a volunteer you will be able to get into free and find out what time the breakfast is on August 4th which you are invited too for helping either weekend. Please try and keep one or both of these weekends open and come and help out ? I would like to have enough help that we can change people out and also give them a chance to enjoy the parade. GHPS has something to eat after the parade for us ?.. I will keep you update as I get exact times ?. Don Meyer - KB8ODB
If you can help please send me a email with your call shirt size and phone number or give me a call at 616-846-7307 leave a message if you get the machine. Kb8odb@...
If you have a family that will be coming with you we can make your assignment in the area they will be in watching the parade.
This is sponsored by the NOARC with help from OCEC and Hams from all over the USA coming to Grand Haven to join in the events to honor the United States Coast Guard.

3147. Re: [WestMichiganHams] Hamfest in NOT Ionia, mini-swap Lowell

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-07-11 12:56:21 UTC
From: Jack Amelar
Topic: 3145 Message: 3147

TOM KB8VEE: "Isn't there a Hamfest this Saturday 7-14 in Ionia?"
CHRIS: W8CJS: "I don't think it's a fest so much as it's a miniswap."

And it's in Lowell, not Ionia.

The Lowell Amateur Radio Club http://www.w8lrc.org/ is pleased to
continue the summer 2007 series of Asphalt Adventure mini-hamfests,
hamfest-lite, whatever you want to call it.

Next one SATURDAY, July 14. Setup 9AM, begin 10AM "until it ends",
figure sometime past noon.

Here's the deal. The monthly LARC meeting will begin at 9, the swap
immediately follows at 10. (Visitors always welcome at our meetings)
Location, just outside the new shack, 11535 Fulton St E (Hwy-M21), West
end of Lowell, between Cumberland Dr and Alden Nash Dr. About 1/2 mile
west of Meijer. Same location as the FLAT RIVER OUTREACH MINISTRIES
THRIFT STORE.
Former location of Cumberland Manor.
Yahoo Map:
http://maps.yahoo.com/maps_result?addr=11535+Fulton+St+E&csz=49331&country=us&new=1&name=&
qty=

What is a mini-swap? It's a small version of a Hamfest. Not nearly the
planning or advertising that goes into a full fledged Hamfest, you
don't have a variety of commercial vendors. But their cheep to put on
and fun.

Advantages of a mini-swap at this location, besides being where the
LARC Ham shack is located:
Lots of traffic passing by on Hwy M-21. Signs will be placed to attract
spectators.
Co-located with the Thrift Store, which also opens at 10.
Set-up is on a circle drive in front of the building, out of the way of
other building traffic on main driveway, yet easily seen from the main
driveway as well as Hwy M-21. Just outside the windows of the LARC ham
shack. If you need electricity, bring your own extention cord.

What's the catch? Sure we'd like to raise a couple bucks with this
FUNdraiser, but we certainly don't have grandeurs of cleaning up either.
ADMISSION IS FREE.
Sellers are asked for a donation of any amount they choose. (Please
read statement * at bottom) Considering the location, with no admission
fee, lots of drive by traffic, potential shoppers from the Thrift
Store, that's really a good deal.
Coffee, pop, and donuts available.

TALK-IN: 145.27-(94.8Hz) Lowell (naturally) repeater.

The next one is Saturday, August 11
September - NO mini-swap, enjoy GRARA's GRAHamfest 2ØØ7 at Kent County Fairgrounds, Lowell, Saturday, September 8. http://www.grahamfest.org/

Maybe Saturday, October 13, we'll see how the upcoming two go.

*SETUP: WHAT TO SELL. In respect to the co-located Thrift Store, who's owners have granted us permission to pursue our mini-swaps (its their property after all), LARC must insist that items offered for sale be radio, electronics, computer, and related items only. General household items sold at the Thrift Store should not be sold at our swap meet (however, TVs radios stereos computers, anything electronics is OK). If you have good general household items to dispose of, please consider donating to the Flat River Outreach Ministries Thrift Store. F.R.O.M. is a 501c3 organization.

Let's have fun, see you there.

3149. Helping Out.

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-07-12 01:46:42 UTC
From: jason mackay
Topic: 3149 Message: 3149

Hi all,

I am sitting here wondering to myself why it is that I help out.
Help out with runs.
Help out with parades.
Help out with Skywarn.
Help out with traffic control, search and rescue, walks and every other possible thing.

I love to help other people. That is what this hobby is all about to me. If I can get someone in a run help if they are injured, a lost child reunited with their parent at a parade.
Possibly help identify a severe storm for the people of our county to keep them safe.
Help with traffic control if the sheriffs department is overwhelmed with other calls of higher priority.
It doesn't matter if it is 90 degrees with 100% humidity. 25 degrees with a bitter north wind. 9:00 in the morning or 2:00 in the morning.
If we make it to all the meetings and make it to none of the call outs or events what is the point. I know that it is hard to help out all the time.
I myself have a lot going on with my wife and kids especially during the summer months. It is also hard to go to other parts of the county now with gas prices the way they are. We don't get paid for the things we do. To do the things that we do for other people you really have to have a strong desire to help other in their time of need. Even if it is not a true emergency.
I sure don't want it to sound like I'm on some soap box because I'm not perfect, but I just wanted to get my feelings off my chest. I just wish that we could come together as a group (OCEC/ARES) to show how much we care for the people of our communities and the visitors that show up all times of the year.

If you made it this far thanks for reading my ramblings. I love this hobby and hope to help my friends and neighbors for a long time to come.

Thanks Again Jason MacKay KC8OVS kc8ovs@...

3155. Mini-Swap reminder, Saturday July 14, Lowell

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-07-13 14:19:48 UTC
From: Jack Amelar
Topic: 3155 Message: 3155

The Lowell Amateur Radio Club http://www.w8lrc.org/ is pleased to continue the summer 2007 series of Asphalt Adventure mini-hamfests, hamfest-lite, whatever you want to call it.

Next one SATURDAY, July 14. Setup 9AM, begin 10AM "until it ends", figure sometime past noon.
The monthly LARC meeting will begin at 9, the swap immediately follows at 10. (Visitors always welcome at our meetings)
Location, just outside the new shack, 11535 Fulton St E (Hwy-M21), West end of Lowell, between Cumberland Dr and Alden Nash Dr. About 1/2 mile west of Meijer. Same location as the
FLAT RIVER OUTREACH MINISTRIES THRIFT STORE.
Former location of Cumberland Manor.
Yahoo Map:
http://maps.yahoo.com/maps_result?addr=11535+Fulton+St+E&csz=49331&country=us&new=1&name=&qt
y=

Hope you can make it

3156. Thursday 7-12-07 waterspout pics needed

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-07-13 21:33:34 UTC
From: John Bok
Topic: 3155 Message: 3156

Greetings weather watchers...

Mike Heathfield from the NWS was curious if anyone got any pics of
the waterspouts on Thursday 7-12-07 that occurred near Grand Haven.
If you have any, or know of any email me n8wvn@... or the
NWS in Grand Rapids.

John Bok N8WVN

3159. Re: [WestMichiganHams] Thursday 7-12-07 waterspout pics needed

Yahoo group: WestMichiganHams (2006 — 2008)

From: (Skip) K8RRA
Topic: 3155 Message: 3159

We missed photo opportunity for the spout(s) John.
As I reported I can confirm one - one person in my party said three...
Strong rotation - perhaps a diameter of 150ft at the water.
Able to take tops of the chop up to maybe 600/800ft before it
evaporated.

However - if Mike doesn't get high quality images of the not-roll cloud,
We *might* be able to provide a couple from a cell phone camera.
(low quality).
The visual on the cloud looked a lot like sheep's wool.
No rotation. Good wind shift and temp drop.

It's not that we were watching - we were out in it.
We remained pretty dry.
In any case - let me know...

3160. [fpqrp] July RFTB (Run for the Bacon)

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-07-15 16:57:41 UTC
From: Hank Greeb
Topic: 3160 Message: 3160

Here's a "fun" contest for those who want to unwind from the IARU World Championship Contest, or just want to have some fun. The average speed of the QRPers is <20 WPM, many send with straight keys, and 99.44% of them will QRS to whatever speed you're sending.

Join the fun es 72 de n8xx Hg (yes 72 is the QRP version of 73!)

-------- Original Message --------
Subject: [fpqrp] July RFTB
Date: Sat, 14 Jul 2007 17:19:09 -0400
From: Larry Makoski <Makos327@...>
To: Flying Pigs <fpqrp-l@...>

This Sunday evening the Flying Pigs Amateur Radio Club International will be holding its monthly Run For The Bacon. This is a friendly, two hour QRP CW Sprint, which is open to ALL radio amateurs, will last from 9:00 - 11:00PM EDT (0100-0300 UTC Monday).

You may work stations once per band on 160, 80, 40, 20, 15 or 10 Meters. Suggested starting frequencies are 1.812, 3.562, 7.044, 14.062, 21.062, and 28.062 MHz.

The exchange is RST, S/P/C (State, Province, Country) and Flying Pigs membership number. If you're not a member of the Flying Pigs, and would like to be; then please click on the "membership" hyperlink on .http://www.gentzow.com/fpqrp/ Otherwise, non-members can just use their output power figure.

You can report your score via the Autolog page which can be found at : http://gentzow.com/fpqrp/autolog.asp or you can mail your logs to the address given on the Autolog page. The deadline for logs is July 22nd at 2400 UTC.

Hope to catch you on the air Sunday evening!

From: Hank Greeb
Topic: 3168 Message: 3168

There will be an antenna party at the Grand Rapids Red Cross

1050 Fuller Ave NE
Grand Rapids, MI 49503
1/2 Block South of Leonard on Fuller NE

9:00 a.m. EDT, Saturday 21 July 2007.

Anyone and everyone interested are welcome. Hams, and would be hams, or friends of hams, or anyone who wants to know about hamming are welcome.

Just show up, with a hard hat (there will be tower work, so you wouldn't want to get hit in the head with a wrench or a bolt. :)

From: Hank Greeb
Topic: 3169 Message: 3169

Help is needed during the Mackinac Bridge 50th Anniversary Celebration,
July 28 and 29.

There's a small cadre of hams who have signed up to help, but there are
still gaps in the operational plan. W8M special event call is planned
to be activated with 4 transmitters on 80 thru 2 metres, and an ATV
station is being set up on 440 MHz.

Please look at http://www.macbridge50.info/

for general info,

http://www.macbridge50.info/activities.html

for setup and basic operating schedule

and

http://www.macbridge50.info/opsked.html

for detailed list of operators and times.

If you can spare a few hours, please contact John, KC8ULE, at
kc8ule@... to sign up. I'm sure he'll appreciate any help he can get.

3176. ARRL August UHF Contest, August 4 & 5

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-07-22 22:42:31 UTC
From: Mark Thompson
Topic: 3176 Message: 3176

2007 ARRL August UHF Contest Rules

General Rules

Rules – 2007 ARRL August UHF Contest
Object: To work as many amateur stations in as many 2 degrees by 1 degrees grid squares as possible using authorized amateur frequencies above 222 MHz and all authorized modes of emission.
Date and Contest Period: First full weekend of August. Begins 1800 UTC Saturday, ends 1800 UTC Sunday (August 4-5, 2007). Entrants may use as much of this time as they wish.
Entry Categories:
3.1 Single Operator – Low Power
3.2 Single Operator – High Power
3.3 Rover.
3.3 Multioperator.
Exchange: Grid-square locator (see April 1994 QST, page 86 or www.arrl.org/locate/gridinto.html).
4.1 Exchange of signal report is optional.
Scoring:
5.1 QSO points:
5.1.1 Count three points for each complete 222- or 432-MHz QSO.
5.1.2 Count six points for each complete 902- or 1296-MHz QSO.
5.1.3 Count 12 points for each 2.3-GHz (or higher) QSO.
5.2 Multiplier: The total number of different grid squares worked per band. Each 2 degree by 1 degree grid square counts as one multiplier on each band it is worked.
5.3 Final score: Multiply the total number of QSO points from all bands operated by the total number of multipliers for final score. Example: W1AW works W3CCX in FN20 on 222, 432 and 1296 MHz. This gives W1AW 12 QSO points (3 + 3 + 6) and also three grid-square multipliers. Final score is 12 QSO points X 3 multipliers, or 36.
5.4 Rovers only: The final score consists of the total number of QSO points from all bands times the sum of unique multipliers (grid squares) worked per band (regardless of which grid square they were made in) plus one additional multiplier for every grid square activated (made a contact from).
5.4.1 Rovers are listed in the contest score listings under the Division from which the most QSOs were made.
Miscellaneous:
6.1 Partial QSOs do not count. Both callsigns, full exchanges and acknowledgment must be sent and received.
6.2 A transmitter, receiver or antenna used to contact one or more stations under one call sign may not be used subsequently during the contest period under any other call sign (with the exception of family stations). The intent of this rule is to accommodate family members who must share a rig, not to manufacture artificial contacts.
6.3 All equipment and antennas used by entrants must be owned and operated by amateurs. Use of non-amateur owned gear is not prohibited, but use of such equipment places the entrant in a separate category, ineligible for awards.

6.4 Contacts made by re-transmitting either or both stations, whether by satellite or terrestrial means, are prohibited. Frequencies regularly occupied by a repeater in a locality may not be used for contest work, even if the repeater is turned off.
Awards: Certificates will be awarded in the following categories:
7.1 Top single-operator High and Low power score in each ARRL Division.
7.2 Top single operator High and Low power score on each band (222, 432, 902, 1296 and 2304-and-up categories) in each ARRL Division where significant effort or competition is evidenced. (Note: Since the highest score per band will be the award winner for that band, an entrant may win a certificate with additional single-band achievement stickers.) For example, if W1AW has the highest single-operator multi-band score in the Atlantic Division and his 432-MHz score is higher than any other Atlantic Division single-operator's, he will earn both a certificate for being the single-operator Division leader and an endorsement sticker for 432 MHz.
7.3 Top multi-operator score in each ARRL Division where significant effort or competition is evidenced. (Multioperator entries are not eligible for single-band awards.)
Additional certificates may be awarded where significant effort or competition is evidenced.
Submission: Deadline for submission of entries for this contest is September 6, 2007.
8.1 Paper logs and properly completed summary sheets should be mailed to: August UHF Contest, ARRL. 225 Main Street, Newington, CT 06111.
8.2 Cabrillo formatter logs should be emailed to AugustUHF@...
8.3 Participants may submit using the Web Applet at www.b4h.net/cabforms .
8.4 Entries postmarked or email dated after the deadline may only be considered checklogs.
Other: See "General Rules for All ARRL Contests" and "General Rules for ARRL Contests on bands above 50 MHz (VHF)" November 2001 QST. These are also available at the Contest Branch Website at: http://www.arrl.org/contests .Questions regarding this contest should be emailed to contests@... . Only use the contest-name email for submission of entries. All contest forms and rules may be downloaded at: http://www.arrl.org/contests/forms/

3181. ride for the club meeting

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-07-25 23:39:30 UTC
From: Chris Schulte
Topic: 3181 Message: 3181

Hi list:

I was wondering if anyone is available to give me a ride to the club meeting for the MAARC club meeting on thursday night august 2nd.

If it's necessary, I can put a little bit of gas in someone's tank for their trouble. If someone can help me out with that, please contact me off list at:
w8cjs@...
Or you can call me at 231-206-5464

Thanks and 73,
chris, w8cjs

3183. J-Pole Portable antenna system

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-07-26 05:17:24 UTC
From: Jeff's Lists
Topic: 3183 Message: 3183

I dont usually get excited about DIY antenna stuff since most looks very cobbled and when it comes to being in the field I like it to look pretty.. Yes I'm picky..

http://hometown.aol.com/alonestaryank/VHFDeploy.html

This guy has a super cool idea here.

I'm so geeked I'll be at lowe's in the morning buying the peices part's to build this at work when I have time!

Now if I could just figure out how to incorporate a jpole into my walking stick.. Anyone have ideas?

3184. Re: [WestMichiganHams] RE: Lightning information

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-07-26 10:52:25 UTC
From: Don LaBrenz
Topic: 3182 Message: 3184

Thanks for the Info Mark,

You saved me a lot of typing. (I talk about a lot of the same stuff in my electrical safety class)

It is true that a vast majority of all electrocutions in this county occur at under 600 volts.

To put it in prospective, that 100 milliamps of electric current that can kill you is 1/10 of an amperes of electric current. The smallest overcurrent device (fuse or circuit breaker) you will find in a home is typically 15 amperes and in an industrial setting is 20 amperes. The human body exhibits more resistance than a 100 watt light bulb and that device does not trip a circuit breaker or open a fuse.

Just some more food for thought

All Hams

Mark your calendars for Saturday August 18 at Tool Max RADIO EXPO 2007 Parking Lot Sale

TRUNK SALES, $5 a spot
Car Wash, for church youth group
Old Cars and Stock Cars,
Bounce Room for the Kids,
Food and much more with all of us from West Michigan Hams

New e mail address at Tool Max is toolmax@... or toolmax@...

We are going to be OPEN this Saturday.

I still need some more items for Sale. Bring your consignment items in today

New this week
AL-80A Ameritron 1KW HF Amplifier $950
MFJ 945D 100W Antenna Tuner
Model 500 Palomar 100 Watt SWR/ Watt Meter $25

HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock
Connectors in Stock
SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30

We are the only Dealer in Michigan for Jetstream Products Check out the items available
http://www.jetstream-usa.com/index.shtml
14 Amp Jetstream Power Supply (28Amp and 45Amp),Antennas, Switches, and lighting arresters are in.

Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other items in Stock
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's
300 ohm twin lead 100Ft $10.00
RG-8 .60 per Foot
RG-8X Coax Cable .35 per Foot
PL-259 Connectors $2.50 ea adadapters for RG-8X $1 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $12
Digital Volt Meters $5.00

Heavy duty 12 Volt Socket to Cigarette lighter plug

The only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.
Technician Class $18.95
General Class New as of July 1 $20.95 Old General Study books (6) SALE $8.00 each
Extra Class $21.95
FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Other Used Equipment on Consignment

Bearcat BC 560XLT 16 Ch Scanner $40
Yaesu FT-890 HF Radio needs new Finals for transmit $225
B&K Model 4011 Precision function Generator $60
B&K Model 2140 Oscilloscope $175
GW Model GDM-8135 Digital Multimeter $40
B & W Antenna Tuner VS-300A $40
RCA Volt Ohm Meter $25
Johnson SWR Meter $2
Barket & Williamson Low Pass Filter $5
Speakers $2 - $10
Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
DB 1015 10/15 meter High Gain Beam $50
Center Insulator for HF antenna $5
Rocky Mountain Radar Detector $175
LED Emergency Light Taking orders $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50
MFJ-722 Notch Filter $30.00
MFJ 407C keyer $15
Code Key $15
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
Sharp SF7320 working Copy Machine $50
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40

Heathkit items in stock

Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40
Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Keychain LED lights $1.50 and up
Other items coming in Daily

The POP machine is working, with cold sodas of your choice. Snacks are in. Have one of your favorer candies crackers, beef jerky or snacks.

Tool Max Industrial Supply is the new retail store on Schamber Dr just off Pontaluna Rd and US-31 behind the old Hob Knob or Michael's Restaurant in Muskegon . We have tools,

industrial suppliers and Ham radios for sale.For more information call me at 231 798-7898 I am in the Store from 9:00AM-4:30PM Monday-Friday. Stop by and see me for all your Ham needs.

3193. Ham Truck for sale

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-07-27 22:22:40 UTC
From: Jeff's Lists
Topic: 3193 Message: 3193

All:

I have a 1996 GMC suburban that was purchased a month ago to make a "ham command" truck I'm just not financially motivated to pursue building of the truck.

I am selling the truck for 3200.00

For 3200.00 you get the following:

The truck GMC Suburban 1500 series, 4x4 works, blows cold air, front and rear air.

4 Motorola NMO Antenna Mounts 3 are run to the front of the truck to the center console, 1 to the back by the rear doors

2 Comet Dual band antennas
1 Generic 38 inch dual band
1 VHF Motorola whip

The following Power has been run

8 Gauge Marine power wire to the center console terminated into a blue sea 12 place fuse box
12 Volt Power run to the rear of the truck
Currently the 12 Volt power in rear is terminated into a Kenwood TMV7A that is in perfect working order, screen is the newer unit so it does not have the lines like some of the older ones did

I had planned to order a center console to mount all my radios in front and a few other goodies.

If you buy it I'll be happy to give you plenty of ideas as to what I was going to do.

Its in Wyoming, Michigan and is available most days to test drive.

Truck drives very nice and I hate to give up on this project I just have decided to go in a different direction.

Of course, how do you get a hold of me? 616 889 7101 9AM - 9PM or email jnawrot@kcvrm.net and we can make arrangements. If you happen to be someone I know or you know someone I know who will vouch for you, I may even be willing to do a couple of payments if the DP is big enough. I have some pictures that I'll send you if you ask. Email me direct, please do not reply to the list on this and please email the above email addy if you want a quick reply.

Tnx

Jeff

All:

Yes, it was fun listening to the Mackinac Bridge Special Event. They seemed to be primarily on forty meters. While hanging around seventy-five meters I learned that Leo, WD8DCA went up north and worked the shack, twenty meters, on Friday. He filled a page and a half with contacts. When he pulled the plug (lost his voice) the Lowell ARGYL group was there to run the show. They had two shacks. The antennas were supported with a Tall tower mounted on a trailer!

I thought their use of forty meters was about perfect for our Michigan. A nice distance band. Before getting W8Mackinac I got a QSO with a guy over at the HUGE air show in Oshkosh, WI. A nice plus.

Would anyone like to pool our QSL cards and get our wallpaper sent back together? I'm game.

Maybe we should try to get a few special event stations next Saturday at the new ham orientation at the MAARC clubhouse? Stop out and lend a hand!

3199. August meeting for the MAARC - Radio Controlled Aircraft with Ron Hayward

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-07-30 17:14:34 UTC
From: Linda
Topic: 3199 Message: 3199

Hello, All:

This Thursday, August 2nd, at 7:00 p.m., we will be holding our monthly meeting of the Muskegon Area Amateur Radio Council. Our clubhouse is located at 2888 Scenic Drive, Muskegon. Ron Hayward, from the Port City Radio Control Club, will present this month's program. He's a builder, adviser, and instructor in the hobby of radio controlled aircraft. Ron is not a ham, but after the presentation, perhaps we can talk him into it with the lure of that added frequency space for ham radio control ops. The program is held before the general business meeting. If you wish, bring along a young person who might be interested in this program, it'll be fun.

Linda Rosenthal, AB8QH
Vice-President, MAARC

I'd like to find a ride to this meeting if I could. For that matter, if someone or some people can set up a possible rotating schedule of rides for the monthly meetings, I wouldn't have a problem helping out with cash for gas.

3201. Mackinac Bridge Special event station W8B from an operator's perspective

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-07-30 19:39:04 UTC
From: Hank Greeb
Topic: 3196 Message: 3201

View from W8M, Mackinac Bridge 50th Annivesary station

I had a blast! I got to the site a few minutes after 3 p.m. Saturday (july 28) and plopped down on 20 metre CW. Band conditions were "so-so", and antoher station (on 15 metres?) was occupying the beam antenna, so I had a tough time fighting the mob who were working the Islands on the Air (IOTA) contest. I did get into the fray for a few contacts, but didn't know the exchange, so I may have messed a few contesters up. After a few exchanges, the band went dead - nothing, nada, nil - I thought the rig might have blown something. But, within 5 minutes Europe started rolling it. They were loud enough, but the 100 watts to a wire antenna wouldn't hack the distance. East coast stations were still booming it, but not much from the other directions.

After a while another op wanted to experiment with Slow Scan TV, so I relinquished the rig to him. I found a "facility" and then looked over the general site - there were two BIG tents and several vendors tents. And, the iron workers union had a huge setup made of iron - to show off their abilities. The people at W8M told me that prior to my arrival the iron workers would periodically start up a riveting machine or some other piece of heavy equipment, which would make use of headphones a necessity.

W8M had three rigs, two in a tent, and the third in the State Police Emergency Operating center located on site. It had a 75' crank up tower, which was mounted on a trailer. On top the the tower was a "screwdriver beam antenna" which sensed the operating frequency and adjusted the length of the three elements for proper match. (Nice beam - the organizer of the event said he didn't know the cost of the array plus the antenna, but though it was "about the price of a small automobile." :) Two wire antennae were strung from the tower for two rigs. The major downside of this array was that the antenna were so close to each other than we couldn't operate CW on a band where phone was being used, so the chioces were limited.

When I got back another station had occupied 20 metres (on phone) so I found the Upper Peninsula Phone Net on 3921 KHz, checked into the "pre net" and worked a few of the stations. When the net started I advised NCS that I was moving to 3850, and had a run of about 75 stations in about 30 minutes. The major limitation in working this pileup was local noise - QRN was s9 at the start, after I figured out that an APRS station was creating some of the noise it went down to S5 to S7, but it was hard to pull stations out of the noise unless they were "booming in." I moved to 80 CW on 3550 KHz for a short

while at the request of KK8I, but it was too early for the casual operator to think of working 80 metres.

Generally, the number of contacts and the speed of making contacts were a function of

1. The number of stations who knew about the event, and therefore were listening on the band of choice.

2. Whether someone out there in radio land had put the call and frequency into a DX cluster. (Activity picked up for several minutes after I suggested that someone listening to 3850 put my whereabouts on the DX clusters.)

3. The amount of local RFI interference - working through s-5 through s-9 broadband hash was not a very pleasant experience.

4. The operator's inclination to "work a run" or "ragchew" for each contact. 100 or more Q's per minute were easy on a fresh band where there was a pileup waiting to happen, as happened on 75 metres phone when I announced my presence on the UP net. (And, I'm not much of a phone operator - I prefer CW.)

The organizing crew, headed by John, KC8ULE, should be given much credit for setting this up. This was one of the better events of its nature in which I've participated. The 75' tower was awesome! And, three stations, capable of operating simultaneously, was a big plus.

The only distraction was that antenna for the stations weren't physically separated - so SSB and CW couldn't be operated at the same time on the same band at the same time. It would have been a logistical nightmare to separate the stations, so we "did the best we could with what we had!"

For those who haven't inquired, QSL info:

Attractive QSL Card OR a QSL Certificate are available to hams who work the special event station and to SWL's. QSL packet includes Card OR Certificate plus information about the Mackinac Bridge. Specify Card or Certificate; enclose $1 and SASE of appropriate size. Send your QSL card/QSL request to

3206. National American Red Cross Communications Vehicle

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-07-31 19:02:11 UTC
From: Steve Vander Hill
Topic: 3206 Message: 3206

Hello, passing on some information from Sindee Maxwell (Executive Director, Ottawa ARC), that this Friday night, at 7:00pm, at the Ottawa County Red Cross Chapter (270 James St.Holland), one of the National American Red Cross Communications vehicles will be setup for local HAMS to view and talk with the crew.

This also might be a great photo opportunity for the HAM community with the Sentinel or Lakeshore Press if anyone has those connections.

Best regards,

Steve Vander Hill - N8UJD

3207. 1.2 ghz activity in the area?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-07-31 23:38:34 UTC
From: Chris Schulte
Topic: 3207 Message: 3207

Hi List:

I was wondering if there is any activity around the west Michigan area on 1.2 ghz? I'm asking this because as more funds become available to me, I'm considering purchasing some d-star stuff. I know that it would be easier for me to get a coordinated pair on 1.2 ghz, but I don't want to put up a repeater up there if there's not going to be anyone using it.

Thanks and 73,
Chris, w8cjs

Often it is easier to just ask the question, "Hey, why doesn't the press love ham radio?" When the statement might better be, "Wow, an opportunity to showcase ham radio!"

Yes, getting a reporter for the event would help encourage the paper to publish the ham friendly material. I also suggest that taking a ham friendly photograph and combining the picture with some ham friendly text featuring a contemporary ham related event would also encourage the newspapers to use the material in their publication.

One is a bit more proactive than the other? Imagine the newspaper's editor trying to manage his tiny staff. Through the door walks a great people friendly story that is fully developed and ready to publish. Through that same door the editor must dispatch his lean staff to cover an event. Where might success be more likely?

An idea to consider.

From: Jim KC8PCJ
Topic: 3215 Message: 3215

The training portion of the MCECS meeting on Monday August 13 will be a field station demo/expo. Anyone with a field station please bring it along. We will be setting up at a nearby park right after the business part of the meeting. This is a great time to get new ideas from other hams and show the ideas you have setup in your station. Last year there were stations as simply as 2M FM voice in a tool box to stations with HF/vhf/uhf and packet capabilities. The more stations we have setup, the more we can all learn from each other and be better prepared for the needs of our community in the event of an emergency. Even if you don't have a field station please feel free to tag along. This is a fun event.

The MCECS General meeting on the 2nd Monday of each month is open to anyone who would like to attend. It is a 7:00PM at the Muskegon County emergency operations center on the corner of Harvey and Oak. It is across the steet from Mercy/General Hospital. From US31 go east on Apple AVe. Turn left at first light(plumbs on corner) follow around behind plumbs store. Road will turn back to right building is on right. Park in south lot lower level. Look for antennas on cars. We will also be monitoring the 146.820 repeater. Hope to see you there.

3222. Beware the Mars Hoax

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-08-04 22:42:07 UTC
From: Frank
Topic: 3222 Message: 3222

Space Weather News for August 4, 2007
http://spaceweather.com

BEWARE THE MARS HOAX: It's August, which means it's time for the annual Mars Hoax. An email is going around claiming that Mars will approach Earth on August 27th; the encounter will be so close, the email states, that Mars will rival the full Moon in size and brightness. (Imagine the tides!) Don't believe it. The Mars Hoax email first appeared in 2003. On August 27th of that year, Mars really did come historically close to Earth. But the email's claim that Mars would rival the Moon was grossly exaggerated. Every August since 2003, the email has staged a revival.

Here's something that is true: Mars is having a close encounter with the Pleiades star cluster, easily seen in the eastern sky before sunrise. Especially good mornings to look are August 6th and 7th when the crescent Moon joins the planet and the cluster to form a pretty celestial triangle. Set your alarm!

MANMADE NOCTILUCENT CLOUDS: This morning in Florida, NASA's Phoenix Mars lander blasted off from Cape Canaveral aboard a Delta II rocket. The rocket's exhaust created a beautiful display of luminous, night-shining clouds. See the photos at http://spaceweather.com.

--... ...-- ..-. .-. .- -. -.- -. ---.. ..- ...- ..

Man is still the most extraordinary computer of all.

Hello Everyone ... This is an interesting article and we found the samething true in Grand Haven at the Saturday parade ... shortly before is started comunicating with nextel was very unlikely ..I had a good signal at Central Dispatch but was told to try later every time I tryed to call Tom or John at the comunications trailer and that was with just a parade in town and that was never a problem with my ham radio ..it worked every time . ..73 Don Meyer KB8ODB

3231. Mini-Swap, Lowell/Grand Rapids

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-08-08 01:03:35 UTC
From: Jack Amelar
Topic: 3231 Message: 3231

The Lowell Amateur Radio Club http://www.w8lrc.org/ is pleased to continue the summer 2007 series of Asphalt Adventure mini-hamfests, hamfest-lite, whatever you want to call it.

Next and final one for the season is this SATURDAY, August 11. Setup 9AM, begin 10AM "until it ends", figure sometime past noon.

Here's the deal. The monthly LARC meeting will begin at 9, the swap immediately follows at 10. (Visitors always welcome at our meetings)
Location, just outside the new shack, 11535 Fulton St E (Hwy-M21), West end of Lowell, between Cumberland Dr and Alden Nash Dr. About 1/2 mile west of Meijer. Same location as the
FLAT RIVER OUTREACH MINISTRIES THRIFT STORE.
Former location of Cumberland Manor.
Yahoo Map:
http://maps.yahoo.com/maps_result?addr=11535+Fulton+St+E&csz=49331&country=us&new=1&name=&qt
y=

What is a mini-swap? It's a small version of a Hamfest. Not nearly the planning or advertising that goes into a full fledged Hamfest, you don't have a variety of commercial vendors. But their cheep to put on and fun.

Advantages of a mini-swap at this location, besides being where the LARC Ham shack is located:
Lots of traffic passing by on Hwy M-21. Signs will be placed to attract spectators.
Co-located with the Thrift Store, which also opens at 10.
Set-up is on a circle drive in front of the building, out of the way of other building traffic on main driveway, yet easily seen from the main driveway as well as Hwy M-21.
Just outside the windows of the LARC ham shack. If you need electricity, bring your own extention cord.

What's the catch? Sure we'd like to raise a couple bucks with this FUNdraiser, but we certainly don't have grandeurs of "cashing in" either.
ADMISSION IS FREE.
Sellers are asked for a donation of any amount they choose. (Please read statement * at bottom) Considering the location, with no admission fee, lots of drive by traffic, potential
shoppers from the Thrift Store, that's really a good deal.
Coffee, pop, and donuts available.
TALK-IN: 145.27-(94.8Hz) Lowell (naturally) repeater.

The next area major hamfest: enjoy GRARA's GRAHamfest 2??7 at Kent County Fairgrounds, Lowell, Saturday, September 8. http://www.grahamfest.org/

*SETUP: WHAT TO SELL. In respect to the co-located Thrift Store, who's owners have granted us permission to pursue our mini-swaps (its their property after all), LARC must insist that

items offered for sale be radio, electronics, computer, and related items only. General household items sold at the Thrift Store should not be sold at our swap meet (however, TVs radios stereos computers, anything electronics is OK). If you have good general household items to dispose of, please consider donating to the Flat River Outreach Ministries Thrift Store. F.R.O.M. is a 501c3 organization.

Let's have fun, see you there.

3235. DC milliammeter and voltmeter needed

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-08-09 22:10:16 UTC
From: Joe Veldhuis
Topic: 3235 Message: 3235

Hey all. I have been playing around with adding some solar power to the shack here, after I was given some solar panels at NOARC field day. I stuck the panels to the south side of the roof and connected them to a 10.8v NiMH battery pack. On a sunny day they put out enough current to smoke an LED (or would that be SED?), so they're definitely accomplishing something.

Anyway, I want to put together a box with a regulator (I'd like to have 13.8 or 15v but I've only been able to find a 12v one) and some meters. I am wondering if anyone has some suitable meters sitting in their junk pile. Here's what I'd need:

* a DC milliammeter with a 500ma scale
* a DC voltmeter with a ~25v scale

If you have any that you want to get rid of, let me know!
-Joe, N8FQ

3238. MCECS Meeting Monday Night

The monthly meeting of Muskegon County Emergency Communications Service (RACES/ARES) Will be Monday at 7:00 PM. Location it the Muskegon County Emergency Operation Center on the corner of Oak and Harvey. Training for the evening will be a field station demo. All are invited. If you have a field station that you would like to set up and display please bring it along. After a short business part of our meeting we will be, going down the street to a local park to set up field stations so we all can learn and get ideas from each other. Talk in will be on the 146.820 repeater.

See you there

Hello Everyone . On Saturday August 18th to kicks off the
Hudsonville Fair they are having a 5k run and Dave Dahl (Deputy
Director, Emergency Management) is looking for hams to help with
traffic control and safety for the run. There will be a briefing at
the fairgrounds (at the MCOM trailer) at 0715, start the run at 0800,
and probably be done around 0900 or so. We have about 20 positions to
cover, so we'd appreciate it if you could help. Hams from Hudsonville
have helped us a lot for events in the Tri-Citys.
Please contact Dave by phone or email in the information below

Thanks for all your help on events in Ottawa County 73 Don Meyer

From: Bill
Topic: 3244 Message: 3244

All:

As some of you know another of my hobbies is being a Scoutmaster. I work with youth aged eleven to eighteen and the best adults a guy could wish for. Occasionally my Scout and radio paths cross. One such opportunity was a QSO with the International Jamboree in England. I had a brief and memorable QSO using twenty meters HF. Wow!

In this week's edition of the ARRL Letter there was a paragraph about the International Jamboree and the International Space Station. The paragraph is duplicated here:

* 100th Anniversary of Scouting Celebrated with ARISS Contact: On Saturday, August 4, an Amateur Radio on the International Space Station (ARISS) contact took place between scouts attending the 21st World Scout Jamboree in Chelmsford, England and Clay Anderson, KD5PLA, aboard the ISS. Ten scouts were able to ask two questions each of the astronaut using the special event station call sign GB100J. Approximately 40,000 scouts from 200 countries attended the Jamboree. Audio was broadcast on the Jamboree FM radio station and was webcast on the radio station's Web site. The audio was also fed into the EchoLink JK1ZRW (277 208) server and received 50 connections from stations in 12 countries, including 6 repeaters nodes. Video and audio may be found on this site <http://www.g6lvb.com/GB100JISS.wmv>.

You might find this interesting. I've been hearing of NA1SS working schools around the world. This is my first video of such an event and it has that Scouting background. By the way, don't try this using dial-up. The file is over twenty megs in size.

Subject: [WestMichiganHams] Last night's storm

Greetings,

Last night (or early morning, I don't recall the time) we had a wild hail storm here. I have a 1" hail stone in the freezer as a souvenier.

The funny thing is that my SAME radio never went off, or at least I didn't hear it go off. Were there any warnings issued? Usually the thing goes off when the sun is shining and it is merely humid, so I am surprised that I didn't hear it squawk last night.

Wow!!! Were you tuned in to the 82? There was a skywarn net going. I only got pea size hail, and as far as I could tell, I was the only one checked in. When I went to bed, the storms that were going off shore in Wisconsin were falling apart very quickly. When the water of lake Michigan is very warm, and the land temperature falls below the water temp, then an offshore breeze sets up. When the outflow boundry from the dying storms hit mid lake and intersected with the offshore lake breeze.... BOOM. Almost identical to the derecheo of 98. Only a little less intense. :-)

We got hale, but I didn't get any idea of how big it was, if we got some, it was only like one or two pieces, there was nothing consistant.

Chris,

I had my antennas disconnected and on the grounding block....call me chicken but the lightning was pretty intense here and I really didn't want to be near my metal rigs, solidly grounded or not.

Did you get any hail? I don't ever recall hail the size we had last night (this morning) here. I wonder if it was just a local thing trying to make up for the fact that gravity hasn't brought my dipoles down yet. :)

Mark:

How big was the hail you got?

I may have missed it in your earlier post.

Certainly, you will want to let the Weather Service know if you haven't already.

We had some heavy rain and a bit of thunder and lightning here in Big Rapids, but nothing serious.

Being the weather geek I am, I'm just curious about situations like you experienced.

No SAME tones here either. There was a power flash as my APC units sounded throughout the house. Highest wind was 21 from the west at 4:43 am. I got home late last night from Indiana so I was tired and went right back to sleep so I can't comment on the hail.

Wow, Mark, that's interesting.

Something like that happened last summer in the Big Rapids area. ... We had what I call a normal "garden variety" thunderstorm at our house one afternoon, but about 2 miles away, just north of town on route 131, hail was piled up all along the side of the road. I didn't hear about it until about an hour after the event, and my wife and I drove there and sent pictures to the weather service. My wife got out of the car, and picked up a handful of the hail stones so that I could check them out, and over an hour later, some of them were at least marble sized.

In this particular situation, though, our county had been under a severe thunderstorm warning.

Shows you what mother nature can do to us sometimes with very isolated severe thunderstorm cells.

Hi Tom,

The stone in the freezer looks to be about an inch....it was the biggest one I could reach without going out on the deck and getting pummelled. The rest were 3/8 to 1/2 inch in diameter. I plan on photographing it. When I do I will put the photos here.

All,
Somebody in this thread said it, the storm popped up right over us. The storm you are refering too popped up out ahead of the main line of storms that the weather service in Wisconsin apparently used for the open waters SPECIAL MARINE WARNING at 3:04 AM. We were in GREEN net as of 4:06AM because of this SMW and the fact that I was wondering where those 30,000 foot tops were coming from. No watch or warning was issued for any county "upstream" to us in Muskegon however there was a SWM for near shore waters at 4:30AM.

So.. I think I need to replace the my in-line discharge device (LAC-4). It might be something else, though, too, like, water in the fittings or maybe a crack in the old coax. Today I got a couple bad reports. I can hear fine, but one loud stateside station couldn't make out anything but my call - he thought RF feedback. Later, a TG station gave me 59 with distortion. I don't have a replacement, but I think this justifies ordering a new one. Or, maybe just a replacement gas chamber. I've never taken one of them apart. Might try that.

`Can't squak about it. It was only doing its job.

>
> You were better prepared than I. I still had the big tower up from yesterday's Ohio balloon launch, and equipment still attached. I wondered how come I didn't hear the storm roll in ?? When I replayed the animated radar history, I learned why. This cell didn't roll in from anywhere, hence no warning. This storm cell popped up right on top of us...and blossomed into a full fledged thunder storm in minutes. Liken it to a Warthog A-10....It's on top of you before you ever hear it coming. But there was no wind to speak of, just a lot of lightning. It mushroomed way too fast for me to get anything disconnected or the tower lowered. I was lucky this time..... Nothing damaged, but I sure did a lot of sweating for an

hour or so. Moral of the story???? Complacency and mother nature don't mix. It's a real pain to disconnect all that stuff "jusin case".. But this morning the thought of an all mode V/U rig going up in smoke because of my complacency was a good wake up call.

All:

A friendly local ham could use a base for his heavy duty HBX Rohn tower. This self-supporting (does not use guy wires) tower was moved from another location. That's why the base is missing. Would you have a suggestion for a base?

Thanks in advance for your consideration.

Bill, AB8SC

3270. Weather Spotting

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-08-13 12:17:09 UTC
From: wingerham
Topic: 3270 Message: 3270

I received this e-mail from the ham that writes the logging software I use. I thought this would be of interest.

Subject: [N3FJP_Software] WX Spotting Log 0.2 - BETA Testers Needed!

Hi All,

In addition to Amateur Radio, I've always been very interested in weather. I've had an idea for a while now (I think I may have mentioned it before) about a WX Spots server that would function very much like DX Spotting. It would give everyone the opportunity to monitor and post, real time weather information along the lines of SkyWarn protocols.

We continue to hear that with all the automated data available today, there is no substitute for real time observations during severe weather. On Monday July the 16th, we had a very minimal tornado touch down a couple miles from our home. The damage wasn't too bad, but it did wind up closing a major roadway for over a day due to trees and power lines down. Watching that process unfold on the news, it became obvious how necessary visual reports really are to quickly assess the extent of storm damage, and it got me thinking about
this idea again.

In a nutshell, here is the idea:

- Everyone (the clients) connect to a server, which relays real time observations back to
all clients

- The clients have the option to display all data, or screen by state or county

- Audio alerts can be specified by the user based on the location

- A messaging feature is available to allow for communication with other members of your
organization (and any other connected users).

I shared this idea on the N3FJP_Software_Users group a few weeks ago and the response was enthusiastic, so between the code that I have already written for the WOTA server and modules for the logging software, I've cobbled together the basic client and server to perform the described functions.

We've been beta testing for about two weeks, and I'd like to get more users on the server to give it a good run through. You won't

find it on the website yet, but if you have an interest in this project, please download the installation file by clicking on this link:

http://n3fjp.ky1v.com/WXSpot.exe

If you are involved in Skywarn or something similar, right now is a great opportunity to have the other members of your group to also give it a try since, while in BETA testing, reports are assumed to be fictitious. Everyone is encouraged to try sending reports and other features to get comfortable with the software. Please try all the features and let me know of any bugs that may come to light.

Since this project is a little different than my "regular" logging software, I have set up a separate e-mail group for this project:

3272. Drive over mast stand?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-08-13 15:19:35 UTC
From: Jeff's Lists
Topic: 3272 Message: 3272

Does anyone have a metal drive over mast stand they would like to part with or know of someone who can make one / two for a reasonable price?

tnx
Jeff - N8JSN

Topic: 3272 Message: 3274

Mark,

I'd say 50-100? I guess I am not sure what they are worth and what reasonable is either :). I know one of my friends bought one at dayton like 10 years back (used of course) for .50 hehe.. But i'm sure that I wont ever see a deal like that again.

What do you consider reasonable? I have a friend that owns a small sheet metal shop that builds stuff for me. He is REALLY good and doesn't charge much. I have no idea what these things are worth but you are the second person in less than a week that has asked about one.

Subject: [WestMichiganHams] Rohn HBX Base, Anyone?

All:

A friendly local ham could use a base for his heavy duty HBX Rohn tower. This self-supporting (does not use guy wires) tower was moved from another location. That's why the base is missing. Would you have a suggestion for a base?

Thanks in advance for your consideration.

Bill, AB8SC

Subject: Re: [WestMichiganHams] Drive over mast stand?

Hi Jeff,

I will ask Tom what he needs to put one together. I am sure he can make one for less than 50 bucks. I can get the plate steel from the son of an SK ham that owns a safe making factory. What ID do you need for the support? I used a 1 1/2" pipe for my bucket stand and it supports TV masts just fine. If you can come up with the ideal sizes I will ask him to make up 3 or 4 of these things and I am sure the price will be right. 100 bucks is WAY too much money for us cash strapped servants of the public at large. :)

BTW, if Tom makes it the thing will outlive you and your kids and your kid's kids. He has been a Journeyman Sheet Metal worker for something like 30 years. He builds race car frames and stuff like that....works at power plants with me sometimes. Our stuff CAN'T fail or people get hurt....or worse. They sue us :)

3282. Re: Electrical Storm: LAC-4

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-08-14 03:43:03 UTC
From: Daniel B. Mills
Topic: 3246 Message: 3282

Hi Al,

Boy, you get up *early*.

Thanks for the note back. It's funny that I didn't even consider replacing the B-bug with a barrel connector until you mentioned it. Even then, I figured it had to be either that device, or maybe water in the fittings or in the coax. It was none of those things. I had just upgraded to Vista and I guess that changed my settings for the I/O ports in a way to cause the distortion. I haven't taken the time to check it out yet, I just unplugged the Aux cable - now I get good reports. (I did check out the RTTY programs earlier and got them to work. I thought I was ok. .. but then, there's been a lot of Window patching since then. They probably got reset somehow.)

Thanks again!

Dan

From: (Skip) K8RRA
Topic: 3272 Message: 3283

This thread has loads of valid options in it Jeff.
Before you build - consider:

On Mon, 2007-08-13 at 11:19 -0400, Jeff's Lists wrote:
> Does anyone have a metal drive over mast stand
How about an option that is one more component in the fabrication?
Consider a 10ft tubular tower plus a (maybe?) 3ft by 5ft plywood base to
park on?
The tower will transport a little harder than the drive over base.
But it will get you 10ft higher before you mount the mast...
> they would like to part with or know of someone who can make one / two
> for a reasonable price?
The price should be *right*.
One of my ham friends is looking for a new home for the short no-guy
tower.

All:

The folks from Market Reef are on the air now. I just got a QSO with Martti, OH2BH at the microphone. He was listening in the General portion of twenty meters. This is a semi rare one.

Remember, you can also check the spots for the latest frequencies.

3290. Double Spaceship Sightings

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-08-18 18:08:16 UTC
From: Tom VanderMel KB8VEE
Topic: 3290 Message: 3290

All Hams FYI

Space Weather News for Aug. 18, 2007
http://spaceweather.com

DOUBLE SPACESHIP FLYBYS: Space shuttle Endeavour is scheduled to undock from the International Space Station on Monday, August 20th. If that happens as planned, sky watchers across North America may be able to witness
something rare and beautiful: a double-spaceship transit across the night sky. US cities favored for flybys on Aug. 20th or 21st include Atlanta, Boston, Chicago, Denver, Detroit, Las Vegas, New York and Phoenix. The space station and shuttle will appear as separate, bright points of light moving in tandem. Flyby times depend on where you live. Subscribers to Spaceweather PHONE (http://spaceweatherphone.com) will receive phone and email alerts when the pair are about to appear. Flyby timetables are also available from Heavens Above (http://heavens-above.com).

BONUS: The International Space Station is under construction, and with each new addition the sprawling complex becomes easier to see from the ground. To the naked eye, the space station now resembles a super-bright star gliding slowly across the sky. Backyard telescopes reveal much more: solar panels, laboratories and living modules, a robotic arm and docked supply vessels. Photos and videos are featured on this weekend's edition of http://spaceweather.com.

A big THANK YOU to all the attended the Tool Max first Annual Parking Lot Trunk Sale Radio Expo 2007 We think it was a BIG success and will plan one for next year. If anybody has any ideas for next year please let me know. I will post some pictures this week. If anybody took any more pictures please send them to me. Thanks again Tom KB8VEE

Subject: MUSKEGON-OCEANA-NEWAYGO RED CROSS AMATEUR RADIO UPDATE

Good day Steve.
I just wanted to let you know that our chapter's amateur radio station is now registered and validated with EchoLink. The chapter's amateur radio callsign is W8NVY.

Best Regards,
"Doc" Strait, KD8BGQ
Volunteer RTT Manager
Muskegon-Oceana-Newaygo Red Cross

3294. Looking for TNC's

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-08-22 02:18:57 UTC
From: Don Meyer - KB8ODB
Topic: 3294 Message: 3294

Hello Everyone ...
I am looking for 2 tnc's to setup up stations on the DRG packet network one in Grand Haven at GHPS and one in Spring Lake at the SLEOC. they can be older models as long as they will go into kiss mode ... so if you have one sitting on the shelf collecting dust and would like to send it to a good home please send me a email at kb8odb@sbcglobal.net ... these are going on the air for all to use on the network so let me know if you are willing to donate to the stations or what you would need for it .... 73 Don Meyer KB8ODB

3295. Re: [WestMichiganHams] Looking for TNC's

If the computers they're being hooked up to have soundcards, you may not need TNCs. Since you mention putting them on the DRG network, I assume they will be running JNOS. This won't work for JNOS/DOS, but for JNOS/Linux you can just run 'soundmodem', then set up JNOS as if you had a KISS TNC on /dev/soundmodem0. This is how my station is set up.

I have some soundcards I could spare, both ISA and PCI flavors.

Your point is well taken Joe, but maybe a marginal application...

On these nodes, it is expected they
a) will support more radios than one
b) will also serve as router/firewall
c) starve for CPU cycles & interrupt response when audio is added to processor load at busy times.

It would be interesting to see if two(+) sound cards could be supported simultaneously, so perhaps we might work out a loan a bit later for the experiment? PCI real estate is available on the motherboard.

Two new shiny pennies Al?

Maybe I can raise you maybe two more...?
In the early 1990's I applied Digital Audio Delivery [DAD] software to program preparation for GH Musical Fountain. The software was developed for radio production industry - probably quite usable for what you are doing. The platform was a 100mhz processor with DOS 6.22 without general windows running. It blew my socks off. And the company response was "NEVER would this software be ported to W-95 or any like product!". The company was true to that until lately on W-2k.

Anyway - it used a broadcast grade sound card plus data compression built into the card so the processor could handle the stream fast enough. Still hard drive conflicts happened from time to time requiring defrag and other restrictions on use of the box. All-in-all it was a fine choice if we did not also want to stream RS-232 out of the box. Now we had a problem that restricted our ascii stream to about 900B on a 9600B link. The next years were a disappointing compromise...

What I did not say earlier is that the target boxes are old - they have small memory and only 600mhz speed. And for the application the choice of older (and I want you to say: CHEAP) hardware is a good thing. And with linux having it's Bell Labs pedigree it will handle interrupts about as well as can be expected short of a "real time" op sys.

You (and Joe) are on sound footing (pun intended) if we had a powerhouse platform. We can't think that way - darn it... But the experiment of switching out the TNCs for sound cards is something I'd like to try on these platforms followed by testing it to find how much traffic it will support. The comparison of TNC-vs-soundcard is something I have not seen published to allow us to design a site with one of the two options. Experimentation is our only option in this moment? Can you help and be a part of that?

As a footnote:
I've enjoyed watching the migration of audio applications from analog toward digital hardware as I presume you have. Some day I intend to install some synth stuff and really play. The migration toward D-STAR is also quite interesting - I have not seen that stuff use an audio device (sound card) in the modulation chain and I expect we won't as that technology matures. I hope the next step is for a TCP/IP driven equivalent to the TNC to replace RS-232/USB/etc. The box we are building would work nicely in that architecture if it were available.

SO - are we up to 4Cents?

Wouldn't Linux b e able to support the two cards a bit better because you can to a degree modify or write your own drivers for the sound cards? You could theoretically set one sound card driver for the standard interupt and the other driver for a different one could you not? For instance, if the linux system isn't currently and will never use a printer, couldn't you theoretically assign the second sound card to the irq for the printer and have it run the two devices that way?

Just a thought, keep in mind that I'm no where near versed in linux, I just have dabbled in it a bit, but that was my two cents worth, now we're up to six cents?

From: (Skip) K8RRA
Topic: 3294 Message: 3300

Yes Chris - we can tailor to sound cards.

I'm not comfortable thinking audio would be better.
Sound processing is much more demanding than ascii processing.
It makes little difference what op sys is used for that consideration.
For example I had a 66mhz machine supporting 11 ascii terminals nicely.
That is many terminals on a really slow platform. That is also ancient
unix history that is still OK today?

The basic application is multiple ascii streams over tcp/ip and radio.
To use an audio link to one radio may work as Joe has demonstrated for
his use. I can confirm his site is pretty good to interface to from our
experience. Still - TNCs have some advantage in having things like
transmitter lock-out timers to avoid constant radio keying when the
computer locks up as it does from time to time. TNCs have a real-time
design well suited to the task.

Our consideration is not if sound cards could work, it is a choice of
what seems better after all the design details are put on the table. So
far the humble old TNC seems to hold favor.

I assume that the 600 MHz machines you are referring to here are the machines that will be set up for packet at the EOCs, rather than the ones running the Musical Fountain that you were talking about earlier. Anyway, that will be more than enough computing power to handle packet using multiple soundcards, while handling countless other tasks simultaneously. My JNOS box is a 166 MHz P-MMX laptop, which runs one instance of soundmodem for my 145.07 port (the 446.925 port uses a real TNC). At the same time, the same box also acts as my router, NTP server and mail filter. Load average over the last 24 hour period is less than 1 percent.

All
I talked to Jim Wades K8SIW today, that put the DIGI at Grand Haven CD for the QMN net. He has no problem with a Freq. Change to support the MI DIGI group. Add a computer with JNOS and maybe change the Muskegon one at the Red Cross too. Make the System work so it can talk to Lansing.
Thanks for all you guys do.Tom KB8VEE DEC-6

We are going to be OPEN this Saturday 9AM-12PM with Cookies.

I still need some more items for Sale. Bring your consignment items in today

New this week

3 Icom Ic-V8 2 meter HT radios with extra batteries, headset with VOX,speaker/Mic,Battery case, and DTMF Decode unit. All Like NEW $210, $235,and $260
1 Icom IC-T90 2 meter/440 HT in box like NEW $290.00
1 Icom HS-51 Headset $20
95 Ft RG-8 9096 Coax Cable .45 per foot
RG-58 Cable .25 per foot
75 ohm Cable 9040 International Wire and Cable .35per foot

HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $15 each
Connectors in Stock
SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30

We are the only Dealer in Michigan for Jetstream Products Check out the items available http://www.jetstream-usa.com/index.shtml
14 Amp Jetstream Power Supply (28Amp and 45Amp),Antennas, Switches, and lighting arresters are in.

Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other items in Stock
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's
300 ohm twin lead 50Ft $10.00

3305. Quite a bit of ham gear for sale

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-08-24 14:43:02 UTC
From: Joe Veldhuis
Topic: 3305 Message: 3305

I LOST MY JOB!!! :(

I have no idea how long it's going to take to land another one but it's almost certainly going to be more than 2 weeks (took 6 years to get this one), so I need to come up with some cash to make the payments on my car. If anyone's looking for some gear to add to their shack, here's what I could part with:

* Yaesu FT-817 - $350
No shoulder strap, one tab of battery cover broken. When powered up after being shut off in memory mode, comes up in QMB mode, press V/M twice to straighten it out. Includes 3-piece 6/2/440 rubber duck antenna, good NiMH battery, and copy of manual.

* Yaesu FT-857 - $600
Been using it in my car lately, was using it at the base station before. Recently had factory repair for VHF parasitics. Has optional DSP and 0.5 ppm TCXO modules. TX opened for 60m operation via software. Includes CAT cable and homebrew remote head cable.

* SST T-4 HF antenna tuner - $20
Has 3 SO-239 jacks and a binding post for a wire antenna, and a directional power meter.

* Jetstream JTPS28 switching power supply - $50
5-way binding posts and cigarette lighter plug on front, wire terminals on back.

* Kenwood TM-201B - $40
45 watt 2 meter mobile rig. Includes microphone and manual. I removed the mic's plug at one point, so it needs to be soldered back on. PL is set at 94.8 for VFO mode, memory mode is set to something else and is configured via a diode array.

* Holux GR-213 GPS - $40
Magnet base (though I put it on my dash with velcro), connects to USB port, doesn't have a display of its own. SiRFstarIII chipset, supports WAAS. Plug this into your laptop and run Xastir or UI-View32 and you've got an APRS tracker.

* Western Digital 80GB IDE hard drive - $40
Bought brand new a week ago, never took it out of the OEM packaging. 8MB cache.

* Jetstream JTB1 (same as Comet/Diamond) 2m/70cm collinear vertical antenna - $70
17 feet tall! Fiberglass outer body, SO-239 connector at base. Had a little trouble with it on 440 but works GREAT on 2 meters.

* Create CLP5130-2N log periodic antenna - $250
SWR <2:1 from 105 to 1300 MHz continuous, thus this one antenna covers 2 meters, 222, 440, 902 and 1260. Manufacturer claims 10-12 dBd gain. Was going to use this as a satellite antenna.

* Dell Latitude CPx J650GT laptop with C-Dock 2 docking station - $400
650 MHz Pentium 3 CPU, drops to 500 MHz on battery power. Includes CD-RW/DVD-ROM drive, floppy drive, 802.11g WiFi card, USB2.0/Firewire card and one weak but usable Li-Ion

battery (holds a charge but only lasts about 90 minutes under load).

I also have quite a bit of miscellaneous radio and computer parts, so if you need some little, relatively common item, I just might have it. Make offers if the prices seem unreasonable.

-Joe, N8FQ

3307. Re: [WestMichiganHams] Looking for TNC's

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-08-25 19:44:37 UTC
From: (Skip) K8RRA
Topic: 3294 Message: 3307

Maybe even two bits Al...:-)

The tried-and-true approach I am using is with jnos2 on a linux platform with a TNC to each radio. I'm eager to try out the multiple audio approach to radios -- even though I know I have some issues to build around like multi-TR controls. The CPU horsepower vs multi-track-audio decoding issue interests me.

MixW is new to me -- I'll look it over in detail prior to our test. There is a Linux/jnos/audio solution to a single radio up and running successfully on multi-sites, I don't know now how MixW plays with that approach.

SDR - I agree totally. The down side is this project can't get to SDR with the resources available... However: I'm tiring of the P-25/D-star/etc debates and am looking for someone to say "quit bitching about what doesn't get offered to purchase and apply your same energy to make it work on your SDR then share the proceeds with the rest of humanity using GPL". But then I'm maybe lighting a flame? I do hope SDR rekindles the experimentation aspect of ham radio...

Have you opted for Flex or another? We might want to abandon this thread for further off-topic stuff? Glad to see ya back on the air...

From: Joe Veldhuis
Topic: 3308 Message: 3308

Well, the good stuff all sold the first night! I still have the following available:

* Jetstream JTB1 antenna (17 feet tall, covers 2m/70cm) $70
* Holux GR-213 USB GPS receiver $40
* SST T-4 antenna tuner $20

I also left a big box of tubes at Tool Max if anyone wants to look through it. There are some good 6LQ6's and other rare and expensive tubes in there for $4 a piece, as well as smaller ones like 12AX7's for $1 each.

At one point the GFI in my closet (to which my air conditioner is connected) often would trip whenever I transmitted on 40 meters. Simply moving my radio seemed to alleviate the issue. This was long ago of course, back when I was using my coax-fed OCF dipole and had no meaningful ground whatsoever.

3317. "stop" along southbound US-131 just south of Cadillac

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-08-28 15:05:31 UTC
From: Hank Greeb
Topic: 3317 Message: 3317

Anyone on this reflector have any info on the primitive rest stop along southbound US-131 a few miles south of MI-115 and just a few miles south of Cadillac? It has pit toilets, and (I think) a well with a hand pump, plus an observation platform several feet higher than the main pulloff.

It says it's a scenic viewpoint. I didn't have a GPS with me, so I don't know the elevation, but at the top, on the small observation platform, one can see several (many?) miles in all directions. Is it the high point in the lower peninsula, or something? It has a plaque dedicated to a long time administrator of the M-DOT, but no explanation of the geographical significance.

It might be a neat place for setting up field day, if someone knew whom to contact to get permission to stay overnight at the place.

It's probably pretty close to the highest point in the lower peninsula, on top of Grove Hill. The 'summit' has several towers, including that of WWTV-9 (which, with anything better than rabbit ears, comes in perfect all summer here). I have long wanted to take some mobile gear up there and work a VHF/UHF contest some time, seems like a good place for it.

The area you describe seems quite a ways north of Cadillac. The are you're talking about is closer to Fife Lake? There is a dip just south of that rest area?

If you folks are looking for the best/highest places in Michigan to go to, look at where the high level rovers go:

http://www.geocities.com/wb8tgy/sites.html

The VHF/UHF rovers know where are the good sites are. Locally, Dave KF8QL and Bob K8DOG are the top dogs for West Michigan rovers. They do have fun.

Throw a Icom 7000 or a Yeasu 817/857 in the car, a small beam, and go to some of these sites and have fun.

This coming Monday (Labor Day) W8ZHO will be working a special event station from 9:00 AM to 2:00 PM Local time at the cars for cancer car show. The show is located at the St Thomas Church on Apple Avenue in Muskegon. We will be using the special event call sign K4C cars for cancer. Anyone wishing to operate or make a contact with the special event station are welcome. We will be operating on 14.267(20M), 7.267(40M) and the local 146.940 repeater. This is also a great car show they are expecting over 400 cars this year. QSL information is on the ARRL special event web site.

73s Hope to see you their.

From: Hank Greeb
Topic: 3317 Message: 3325

According to Google Maps, the coordinates are 44.123380, -85.473910.

There is supposed to be some way on google maps or with google earth to get the Height above mean Sea Level (HAMSL) of the place, but I can't figure it out.

This place is about 15 miles south of Cadillac, along US131, and would be a typical rest stop if there were flush toilets and running water, but it has pit toilets and a hand pump for water. There are no TV towers in the immediate vicinity. If there were any towers within 10 miles I'd probably have noticed them, but I wasn't looking for them when we stopped.

I'll ask KF8QL if he's investigated the place. It is quite high compared to the surroundings, and I know that he goes out with antlers on his van during most VHF contests.

I forgot to post the link to google maps:

http://tinyurl.com/2wxmxm

There's an interchange at "20 mile road" and a very small town of
Tustin just to the east of the 20 mile road interchange.\

What would interest me most would be info on how to contact the
goverenmental entity from which I could gain permission to operate for
24 hours during a Field Day.

I've stopped there before. I don't know about highest point in the LP, but I have often thought this would be a great location for a VHF contest. As far as how long one could operate there before being kicked out, I have no idea. MDOT has jurisdiction over highway rest areas. There are modern toilets down the hill in the main rest area parking area. If I were to do a VHF contest from there, I would do so in my motorhome.

Thanks! Just what I needed! This site has all the "high spots" in Michigan. The spot which I mentioned is at 1483', the site of the TV tower is 1700+ feet.

However, the site along US 131 is "Not really high, but a good view in most directions." It might be a good spot for a Field Day operation. I might drive up there during one of the ubiquitous QRP contests and test propagation before committing to an operation of Field Day.

From: Linda
Topic: 3329 Message: 3329

Hello, All:

I wanted everyone to know that Bill is currently recuperating from very serious eye surgery. He was experienced some vision problems, made an appointment with his regular physician because he thought it was blood pressure related. Turns out he had a detached retina and a cataract in the one eye that is not "legally blind". Two excellent surgeons later, he is at home and will be recuperating for at least two weeks. The surgeon injected a gas bubble to help hold the retina in place, so like the bubble in a carpenter's level, this necessitates that Bill keep his face/eyes pointed at the ground for the next 2 weeks. He's trying to figure out a way to hang upside down and talk to that microphone! If you'd like to call or send an e-mail that I would be glad to read to him, I know he would enjoy the contact. Needless to say, we are anxious, but very hopeful and feel that we landed in the right place - Grand Rapids Opthamology. (I think I spelled that correctly.)

From: Hank Greeb
Topic: 3330 Message: 3330

I'd like to go to the Findlay Hamfest on Sunday, September 9, but don't want to drive alone. I'd prefer to ride with someone from the Greater Grand Rapids area.

I'd be happy to pay for gasoline for the trip.

As last resort, I could drive, but would like company to keep me awake. I'll be tied up for most of the previous day (Saturday, September 9) at the Grand Rapids Hamfest.

Please advise if you're going and if you have an extra space for a rider.

Well, it's good to know that he got that taken care of. I have a lot of friends who had detached retinas and weren't able to get the treatment that they needed.

Pass along my best wishes for a speedy recovery.

All,
This announcement has been on our Wednesday night net for several weeks. I received a call from Ron's wife, Laura, today reminding me of the benefit for Ron and the family. Here's the announcement we have been running. "Amateur radio operator, Ron Minzey, KC8UWL, in need of a kidney and pancreas transplant. He will be going to Madison Wisconsin in the near future for the operation. A fundraising benefit will take place at Mick's Banquet Hall at the corner of Mill Iron and Broadway on August 31st from 6PM to 9PM".

In addition, Laura informed me today that there will be an auction at 7PM.

Many of you may know Ron from Skywarn or Seach and Rescue activities. Please consider this benefit as you plan your activites for the weekend.

Tom, N8YJT

3338. Morley cleanup / GRAHamfest / Annual meeting

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-08-31 02:40:35 UTC
From: Jack Amelar
Topic: 3338 Message: 3338

For Lowell Amateur Radio Club members and anyone else who have an interest:

Reminder, the next Morley tower receive site cleanup is this weekend, yes, Labor Day weekend. Some of us, like me, will be camping at the site for the weekend. If you want to camp there, electricity is available but you need to bring your own water. Cleanup on Saturday if you can make it just for the day. I'm heading up Friday, staying until Monday.

Most will be routine mowing and trimming, but there is one tree along the north guy wires that should be removed. Weather or not this is done on this trip depends if we get enough help. I?ll bring extra chow for Saturday help/visitors.

The Morley Tower is located on 155th Ave in Mecosta County, between 3 mile and 4 mile Roads,
East and North of Morley. For mapping purposes, use the address 3800 155th Ave, Morley, MI 49336. Hope you can make it.

And don?t forget the following Saturday, September 8, is GRAHamfest 2??7. LARC will have tables, bring something to sell, help at the table. http://www.grahamfest.org

SUNDAY, SEPTEMBER 9, is the LARC ANNUAL MEETING. This year a potluck at the club shack, 11535 E Fulton, Lowell, where the Flat River Outreach Ministries Thrift Store is at. Thrift store closed on Sunday. All are Welcome. We'll have tables and chairs outside weather permitting, or inside if not. What time? I don't know, watch your e-mail.

3343. Errata, MiQRP Club spring, 09/03/08

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-08-31 18:51:43 UTC
From: Hank Greeb
Topic: 3343 Message: 3343

Sorry folks, I copied the wrong line of the info on the MiQRP club's sprint..... Correction follows......

==========

Michigan QRP Club Sprint, Labor Day CW Sprint - 2300Z 09/03/08 to 0300Z 09/04/08 - 1900 (EDT) Mon 09/03/07 to 2300 (EDT) Report is RST, SPC, MIQRP number or power. Logs within 30 days either written or text readable format to K8NWD. With the Spartan Sprint running during the last two hours, work them and I will sort out the numbers. Details at http://www.miqrp.org/contest.html. E-Mail Logs to: k8nwd at arrl.net (Change the "at" to @). Snail mail logs to: Tim Pepper, K8NWD, 4391 Clintonville Rd, Waterford, MI 48329

The Adventure Radio Society Spartan Sprint will be held on September 4 0100Z to 0300Z (GMT) or September 3, 9PM and end at 11PM EDT. Rules are at
http://www.arsqrp.com/ars/pages/spartan_sprints/ss_rules_new.html

Note that these two events overlap, and but we can sort out the QSO's and numbers.

These are not a "hard core" contests, so if you're not a hard core contester, come and join in the fun anyway. If for nothing else think of the skill development value. All members and visitors from around the world are welcome and encouraged to join in

3344. September VHF QSO Party, 9/8 - 9/9

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-09-01 05:52:36 UTC
From: Mark Thompson
Topic: 3344 Message: 3344

2007 September VHF QSO Party Rules

General Rules

Object: To work as many amateur stations in as many different 2 degrees X 1 degree grid squares as possible using authorized frequencies above 50 MHz. Foreign stations work W/VE amateurs only.

Date and Contest Period: The second full weekend of September. Begins 1800 UTC Saturday and ends 0300 UTC Monday (September 8-10, 2007).

Entry Categories:
3.1. Single Operator.
3.1.1. Low Power
3.1.2. High Power
3.1.3. See “General Rules for all ARRL Contests Above 50 MHz” page 106 in the November 1999 issue of QST for power limits for Single Operator entries.
3.2. Single Operator Portable.
3.3. Rover.
3.4. Multioperator.
3.5. Limited Multioperator.

Exchange: Grid-square locator (see April 1994 QST, p 86).
4.1. Exchange of grid square is required. Exchange of signal report is optional.

Scoring:
5.1. QSO points:
5.1.1. Count one point for each complete 50- or 144-MHz QSO.
5.1.2. Count two points for each 222- or 432-MHz QSO.
5.1.3. Count three points for each 902- or 1296-MHz QSO.
5.1.4. Count four points for each 2.3-GHz (or higher) QSO.
5.2. Multiplier: The total number of different grid squares worked per band. Each 2 degrees X 1 degree grid square counts as one multiplier on each band it is worked.
5.3. Final score: Multiply the total number of QSO points from all bands operated by the total number of multipliers for final score.
5.4. Rovers only: The final score consists of the total number of QSO points from all bands times the sum of unique multipliers (grid squares) worked per band (regardless of which grid square they were made in) plus one additional multiplier for every grid square activated (made a contact from).
5.4.1. Rovers are listed in the contest score listings under the Division from which the most QSOs were made.
5.4.2. Rovers who submit scores for the club competition must submit a separate summary sheet and log indicating QSOs and score if they make any contacts from outside of the club territory. The summary sheet should be clearly marked “for club competition only” and must be emailed separately to contests@...

Miscellaneous:
6.1. Stations may be worked for credit only once per band from any given grid square, regardless of mode. This does not prohibit working a station from more than one grid square with the same call sign (such as a Rover).
6.2. Only one signal per band (6, 2, 1 1/4, etc) at any given time is permitted, regardless of mode.
6.3. Multioperator stations may not include QSOs with their own operators except on frequencies higher than 2.3 GHz. Even then, a complete, different station (transmitter, receiver and antenna) must exist for each QSO made under these conditions.

Awards:
7.1. Certificates will be awarded in the following categories.
7.1.1. Top Single Operator High and Single Operator Low power in each ARRL/RAC Section.
7.1.2. Top Single Operator High and Single Operator Low power on each band (50, 144, 222, 432, 902, 1296 and 2304-and-up categories) in each ARRL/RAC Section where significant effort or competition is evident. (Note: Since the highest score per band will be the award winner for that band, an entrant may win a certificate with additional single-band endorsements.) For example, if KA1RWY has the highest single-operator low-power all-band score in the CT Section and her 50- and 222-MHz scores are higher than any other CT single operator's, she will earn a certificate for being the single-operator Section leader and endorsements for 50 and 222 MHz.
7.1.3. Top Single Operator Portable in each ARRL/RAC Section where significant effort or competition is evident. (Single Operator Portable entries are not eligible for single-band awards.)
7.1.4. Top rover in each ARRL Division and Canada where significant effort or competition is evident. (Rover entries are not eligible for single-band awards.)
7.1.5. Top multi-operator score in each ARRL/RAC Section where significant effort or competition is evident. (Multioperator entries are not eligible for single-band awards.)
Top limited multi-operator in each ARRL/RAC Section where significant effort or competition is evident. (Limited multi-operator entries are not eligible for single-band awards.)
7.1.6. Top scoring club in each club competition category will be awarded a gavel.
See "General Rules for all ARRL Contests" for club competition information.

Submission:
8.1. All submissions must be emailed to SeptemberVHF@arrl.org or postmarked no later than October 10, 2007. Paper logs should be mailed to Sept VHF QSO Party, ARRL Contest Branch, 225 Main St, Newington, CT 06111. Logs mailed or emailed after the submission deadline may be designated as check logs.
8.2. Stations that use computers to log must send the electronic log in the Cabrillo file format for entry into the results. Submitted electronic files must be in ASCII / text readable format. A paper printout of an electronically created log is not an acceptable substitute for the required log file.
8.3. Electronically submitted entries are considered signed.
8.4. Logs may be submitted via the special web applet at www.b4h.net/cabforms
8.5. All paper entries must include a fully completed summary sheet and a complete log of the contacts made.

Other:
9.1. See "General Rules for All ARRL Contests" and "General Rules for ARRL Contests on bands above 50 MHz (VHF)" November 2001 QST or at the Contest Branch Website at: http://www.arrl.org/contests

9.1.1For queries contact contests@arrl.org or (860) 594-0295.
9.3. Forms may be obtained by:
9.3.1. Downloading from the Internet at the Contest Branch Website:
http://www.arrl.org/contests/forms.
9.3.2. Sending an SASE to September VHF Form Request, ARRL, 225 Main St, Newington, CT
06111.

3345. Upcoming Meteor Shower Can Be Boon for VHFers

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-09-01 06:07:48 UTC
From: Mark Thompson
Topic: 3345 Message: 3345

Upcoming Meteor Shower Can Be Boon for VHFers (Aug 28, 2007) -- VHFers, particularly those interested in meteor scatter, should be on the alert Saturday morning, September 1, for what could be a rare opportunity of excellent propagation. At 1137 UTC (+/$B!](B 20 minutes), the Earth's orbit will cross through the dust trail of long-period comet C/1911 N1 (Kiess), which is expected to provide a short but active two hour outburst of bright (-2 to +3 magnitude) meteors radiating from the constellation Auriga. Predicted rates for this particular Aurigids vary from around 100 meteors per hour to up to 1000. If high rates are achieved, the meteors could provide "open-band" conditions during the peak times. It might certainly be worth a look on 2 meters (or higher) during the hour leading up to the peak and through the peak time period. The meteor radiant is ideally placed for North Americans, so the more stations that are active, the more people can take advantage
of what might possibly happen in the sky on Saturday morning. If conditions turn out to be excellent, the best mode for information exchange will be on SSB, keeping calls and transmissions very short and exchanging minimal information, such as signal reports or grids. As usual, the best frequency on 2 meters will likely be 144.200 MHz, with stations spreading out from there if conditions warrant. More information on this rare event can be found here. -- Information provided by Steve McDonald, VE7SL

Strange Lights: The 2007 Aurigid Meteor Shower08.08.2007

August 8, 2007: Will they come, or will they not? That is the question.
On Sept. 1, 2007, a flurry of bright and oddly-colored meteors might$B!=(Bemphasis on might--come streaming out of the constellation Auriga, putting on a beautiful early morning show for sky watchers in western North America: sky map.
Right: An early morning meteor over Italy in Nov. 2006. This is what an Aurigid might look like. Photo credit: Antonio Finazzi.
The source of the putative shower is Comet Kiess (C/1911 N1), a mysterious "long-period comet" that has visited the inner solar system only twice in the past two thousand years. In 83 BC, give or take a few centuries, Comet Kiess swung by the sun and laid down a trail of dusty debris that has been drifting toward Earth's orbit ever since. On Sept. 1, 2007, the dusty trail and Earth will meet.
But will a shower actually materialize? The answer lies in the unknown contents of the debris stream.
"We have so little experience with ancient debris from long-period comets," notes Bill Cooke of NASA's Meteoroid Environment Office (MEO) at the Marshall Space Flight Center. "Almost anything could happen$B!=(Bfrom a fizzle to a beautiful meteor shower."
Astronomers were first alerted seven years ago to the possibility of a shower by Finnish astronomer Esko Lyytinen and Peter Jenniskens of the SETI Institute in Mountain View, CA$B!=(Bboth are accomplished meteor forecasters who study the dynamics of cometary dust trails. Jenniskens has since teamed with Jeremie Vaubaillon of Caltech to refine the forecast using a debris stream model developed by Vaubaillon.
"We expect the outburst to peak at 11:36 UT (4:36 a.m. PDT) +/- 20 minutes on Sept. 1st," says Jenniskens. "The whole event should last about 2 hours and be visible from California, Oregon, Hawaii and the eastern Pacific Ocean."

Above: Earth at the time of the shower's predicted peak. Darkness favors sky watchers west of the Rocky Mountains. [Larger image]
An independent model of the debris stream calculated by Danielle Moser, a colleague of Cooke at the MEO, predicts a peak time of 11:26 UT. "That's in good agreement with Jenniskens and Vaubaillon," says Cooke. "However, our model predicts a mostly empty stream and a very weak shower."
"Personally, I think the meteor rate will reach 100 per hour at best," notes Vaubaillon, "but some colleagues are more optimistic, so, suspense, suspense!!!"
Earth has had at least three encounters with the debris stream in the past century$B!=(Bin 1935, 1986, and 1994. Unfortunately, few people were outdoors paying attention. The best observed encounter was in 1994 when veteran meteor watchers Bob Lunsford and George Zay of southern California witnessed a number of bright blue-green meteors emerging from Auriga. The brief shower was remarkable both for its conspicuous lack of faint meteors and for the vivid colors--characteristics that may be repeated on Sept. 1st.

Sign up for EXPRESS SCIENCE NEWS delivery

Meteors from long-period comets are of special interest for two reasons:
#1 -- Long period comets almost always take us by surprise. They linger in the outer solar system, hiding in the dark for thousands or millions of years, until their slow orbits turn them sunward and--in they plunge! Because of this surprise factor, long period comets pose a unique impact threat. Jenniskens and others are keen to study meteor showers from long period comets because the showers could be a "tell" that a comet is out there, and the orbit of the meteoroids can reveal where.
#2 -- Meteors from long period comets may be very primitive. Consider the following: Most meteor showers (e.g., the Perseids and Leonids) are caused by short period comets, which pass through the inner solar system every few decades or, at most, centuries. Their icy surfaces are frequently heated and vaporized by intense sunlight, and the comet dust they produce is correspondingly fresh. Long period comets, on the other hand, are rarely sun-blasted, and their surfaces may retain ancient substances formed by billions of years of cosmic ray exposure in the outer solar system. Flakes from this "pristine crust" may produce odd colors when they hit Earth's atmosphere.
Is that why the Aurigid meteors of 1994 were blue-green? Were they bits of pristine crust from Comet Kiess? Again, no one knows.
Jenniskens notes that another meteor outburst, the alpha Monocerotids of 1995, also thought to hail from an unknown long-period comet, was strange: "The alpha-Monocerotids penetrated 5 km deeper in the atmosphere than other meteors of similar size and speed and they had [an unusually] low content of sodium."
Right: Flight path of Jenniskens' airborne Aurigid observing campaign. [More]
To get to the bottom of some of these mysteries, Jenniskens and colleagues from the NASA Ames Research Center, Utah State University, the USAF Academy and elsewhere will board two private jets to observe the Aurigids from the clear air of 45,000 feet. They'll use spectrometers, cameras and telescopes to measure the velocity, penetration, and chemical composition of incoming meteoroids.
Bill Cooke of the MEO won't be on board, but he wishes the flyers well. "If this shower actually happens, they data they collect may tell us new things about an important population of meteoroids in the solar system. Plus, it would be a good show for people on the ground."
Sept. 1, 2007: The answers await.

3346. New Weather Software, and it's Free!

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-09-01 21:39:57 UTC
From: K8TB
Topic: 3346 Message: 3346

K8AJ and myself use the N3FJP logging software. As such, I am subscribed to his forum on Yahoo. He made this announcement:
****

Hi All,

As you may remember, a couple of months ago I floated the idea for a program on the N3FJP_Software_
Users group that would function much like DX Spotting, except that the reports would be for observed severe weather. The response was very enthusiastic, and literally hundreds of hams and weather enthusiasts joined the WXSpots development e-mail reflector. In fact, during the beta development period, we have already had more than 850 users create login accounts!

After a couple months of hard work and lots of great suggestions from the beta development team, we are ready to move out of beta, and version 1.0 is now ready for download!

As a quick recap, WXSpots is software that runs on your PC and connects to a server. All reports of severe weather are relayed to everyone connected. Reports can be screened by State, County or a list of Counties. WXSpots is a tool in the tool chest for SkyWarn operations and those interested in severe weather observations. By it’s very nature of dependence on the Internet, it can't provide data from a severely affected area. On the other hand, WXSpots can quickly communicate data from those observers just outside it. It also provides the means to help monitor local severe weather as it unfolds with many more observers able to communicate what they are seeing.

WXSpots provides:
The ability to disseminate observations quickly and efficiently anywhere.

The ability to add the eyes of SkyWarn enthusiasts who aren't Amateur Radio Operators.

An automated, historical record of recent observations.

Audio alerts that can be specified by the user based on location.

A messaging feature to allow for communication with other members of your organization (and other connected users).

WXSpots software is free. For more information and a link to download the software, please visit www.wxspots.com.

I hope that you enjoy the software!

73, Scott
N3FJP
http://www.n3fjp.com/
****
I have no idea if this software is even worth the time loading it up,
but I figured there sure are a lot of hams in West Michigan who are into
severe weather, so this might be intersting software to play with.
73, de Tom K8TB

3347. K4C Cars for cancer spoecial event Station

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-09-02 18:31:24 UTC
From: Jim KC8PCJ
Topic: 3347 Message: 3347

Monday (Labor Day) W8ZHO will be working a special event station from 9:00 AM to 2:00 PM Local time at the cars for cancer car show. The show is located at the St Thomas Church on Apple Avenue in Muskegon. We will be using the special event call sign K4C cars for cancer. Anyone wishing to operate or make a contact with the special event station are welcome. We will be operating on 14.267(20M), 7.267(40M) and the local 146.940 repeater. This is also a great car show they are expecting over 400 cars this year. QSL information is on the ARRL special event web site.

The event is sponsored by the Different Strokes Car Club and Knights of Columbus
All proceeds from this event go to the Hackley Cancer Center.

73s Hope to see you their.
Jim Meyers

3348. K$C cars for cance

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-09-03 20:08:56 UTC
From: Jim KC8PCJ
Topic: 3348 Message: 3348

I would like to say thanks to all that showed up at the Cars for Cancer Car show special event station K4C / W8ZHO. A special Thanks Tom W8AMZ, Jon AB8RD, Bill AB8SC, Linda AB8QH for help operating at the special event station. I would also like to thank the following People for suppling materials and equipment for the station set up,
Tom W8AMZ 20M equipment and canopy, KV8X for the generator, K8MHZ antenna equipment, AB8RD gas for generator (that I forgot) Barney KC8LLN hand out materials and the members of the Club W8ZHO for their support in this event. I hope I didn't miss anybody. Being the first special event station I have operated, I learned a few things and had a great time.

It was an excellant event had to be close to 400 cars & trucks on display. We made 9 contacts on 2M 146.940 repeater, 35 contacts on 20M 14.267 and 34 contacts on 40M 14.267. 78 contacts total in 5 hours. Not bad for a first try and not the best band conditions. But had a lot of fun.

73s to all
Jim
KC8PCJ.

3352. MAARC Meeting - September 6 - KB8TYJ

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-09-04 14:01:17 UTC
From: Linda
Topic: 3352 Message: 3352

Hello:

This Thursday, September 6, KB8TYJ, Tom Behler, will give the program for the monthly club meeting. The topic of his program will be aids and adaptive technology for blind amateur radio operators. Tom, who is visually impaired, is Mecosta County's Emergency Coordinator and RACES officer (Tom, please correct me for any incorrect information). We're looking forward to hearing about the advanced technology in use for this particular segment of the amateur radio community. You know where we live: 2888 Scenic Drive, Muskegon,Michigan. He will be having dinner with members at the Red Rooster, also on Scenic Drive, north of the clubhouse location, beginning at between 5:00 and 5:30 p.m. - ya'all come on down and eat with us.

73,
Linda, AB8QH
Vice Prez, MAARC

Cadillac

According to Google Maps, the coordinates are 44.123380, -85.473910.

There is supposed to be some way on google maps or with google earth to
get the Height above mean Sea Level (HAMSL) of the place, but I can't
figure it out.

This place is about 15 miles south of Cadillac, along US131, and would
be a typical rest stop if there were flush toilets and running water,
but it has pit toilets and a hand pump for water. There are no TV
towers in the immediate vicinity. If there were any towers within 10
miles I'd probably have noticed them, but I wasn't looking for them
when we stopped.

I'll ask KF8QL if he's investigated the place. It is quite high
compared to the surroundings, and I know that he goes out with antlers
on his van during most VHF contests.

Hello all
I hope you all had a great holiday weekend. Now it's time to get back to business. I still need more ham radio operators for the Priority Health Grand Cycling classic. I currently have 6 people including myself. This is not enough to cover the posts we have. If we do not get enough people, we will have to back out of the event. That is unacceptable!! We have never had to do this before, and I hope we never have to. Please sign up at http://www.kcraces.net/signup/phgcc.php
I could also use one person who is not a ham to help out in the truck. So if you have a significant other, son, or daughter who can help let me know and sign them up. If you have never done an event with us don't worry it is easy, and we can supply a radio if you do not have one. (please bring AA batteries) So come on and sign up. The group has made a commitment lets not drop the ball on this.

This is what Karl Sent out.. He's hoping to use the mobile ham repeater in the Comm truck although at the moment the frequency escapes me.. I'll make sure he gets it out to anyone who wants to sign up.

Here is some info for Saturday's event. We need to be on scene at 11 AM. The last races is scheduled to be completed at 5 PM. The truck will be on Fulton between Ottawa and Ionia. We will have a briefing at the truck. There is parking near the corner of Fulton and Ionia. DO NOT PARK BY THE TRUCK as you will be stuck there. Please dress professionally. If you have a KC RACES uniform please wear it. If you do not have a uniform please wear a grey shirt. We have to look official. Wear a hat and sun block. I don't know if you can use a chair at your positions, but bring one just in case. I am hoping to be using the mobile repeater so if you do not have F7 in your radio please get it in there. If you have any questions please let ask me. If you haven't signed up yet do so. I need to know who is going to be there so I can make assignments.

Subject: Re: [WestMichiganHams] Fw: [KC-RACES] cycling classic

Could we get some more information, please?

Like the date and time of the event, how long it is expected to last, the number of posts that still need to be filled and where we have to go for staging?

It would also help if we knew how the communications were going to be done, like if we are using simplex or a repeater, how far the stations will be apart if simplex and how far away the repeater is if used. This will help determine the type of radio gear people need to acquire.

I agree with Karl, backing out is not an option. If you could get me the info I will put this on the MCECS list and also ask my students if they can help. I do have one student ready to test for Technician that may be interested in helping out in the truck. My other students are already licensed as Techs and Generals.

We channelize our freq list to make it easier for those of us who are appliance operators :) Sept 8th is the date for the event.

I believe the freq is 147.500 and 146.500.. I am not 100% sure as I have been working from my blackberry today due to a death in the family.

Subject: Re: [WestMichiganHams] Fw: [KC-RACES] cycling classic

Thanks Jeff,

There still is no mention of a date. Also what is F7? A frequency pair perhaps?

The sooner I can get the date, etc., the sooner I can get something on the MCECS and K8MHZ ham class lists.

If the event is this Saturday so is the GRARA Hamfest. My experience with events that compete with hamfests is that if you don't get commitments several weeks ahead of time for the event they will almost always go to the hamfests.

Karl, if you get this message here is some sage advice (I have been coordinating ham events for over 10 years). Don't bail on the event just because you can't cover all the posts. Place people where they will do the most good and move the ones that will get done early to other spots as needed. I have been in the same boat as you may be in and even with a skeleton crew the event organizers really appreciated our help. For next year, make use of all the e-mail reflectors in the area. I don't know if you are on the WestMichiganHams list or not. If you aren't I strongly recommend joining. Events posted there will get forwarded to other lists that can help get operators. Right now the list has over 100 members. If you find yourself really short of help get the best NC operator to do double duty and work a post and do NC at the same time. Have them use a non-ham as a scribe to take all the notes so the NC op can work the radio whilst manning a post. The truck, which I assume is a SAG vehicle can use a cell phone for contact if you are short hams and can't place one there. I know that this is tantamount to blasphemy, but you have to do what you have to do and make use of any resource necessary to pull the job off. Trust me, I have been there and been there many times. I have tried FRS radios but they didn't work for me. I do know that they have worked for others, though. If FRS is the only resource available, try it. At the MS-150 one year I had trouble shadowing the organizer as she would take off when I wasn't looking without telling me and I had no idea where she was when it came time to contact her. I gave her an FRS radio, an idea that she really liked. The problem was, she never answered when I called her and I still had to physically track her down. I even used the 'call' feature on the radio which made it ring like a cell phone. At the end of the event she admitted that she wondered why someone kept calling her on her cell phone and didn't

respond when she answered it.

You may be surprised at how well a small group of a half dozen dedicated hams can manage. I was planning on going to the hamfest on Saturday but if you are really that short of help I will try to talk myself into working with you. I really appreciate it when people coordinate events like this and do NOT want to see them fail or even struggle. In my decade plus of doing these events I have never had anything close to a failure. We have been short handed many, many times but ALWAYS pulled it off. We have struggled and we have prevailed. At one of our more stressful events we came up with Break Tags as a solution to an excess radio traffic issue we had at the event. I fervently believe that there is no such thing as a problem, instead I believe there are only opportunities to make improvements.

We really do need more ambitious people with licenses, skill and radios to make sure that the events we work have sufficient help. I recognized this problem a couple years ago and decided that the only solution was to actively bring more people into our craft. I started teaching Tech classes a bit over two years ago in a small classroom at Healthy Focus, my fiancé's business. I now teach all levels of amateur radio through Extra. I have had classes at the Muskegon EOC, the MAARC clubhouse and will be starting classes at the Kennedy Engineering Center at GVSU in October. I am also working on getting classes started at the Muskegon Technical Academy. My goal is to bring 100 people into the craft before I become a SK. I stress the importance of working public service events in all of my classes. We need to give back to the community for many obvious reasons.

That, and it justifies spending hundreds of dollars on what some spouses may consider to be toys. :)

This is what Karl Sent out.. He's hoping to use the mobile ham repeater in the Comm truck although at the moment the frequency escapes me.. I'll make sure he gets it out to anyone who wants to sign up.

Here is some info for Saturday's event. We need to be on scene at 11 AM. The last races is scheduled to be completed at 5 PM. The truck will be on Fulton between Ottawa and Ionia. We will have a briefing at the truck. There is parking near the corner of Fulton and Ionia. DO NOT PARK BY THE TRUCK as you will be stuck there. Please dress professionally. If you have a KC RACES uniform please wear it. If you do not have a uniform please wear a grey shirt. We have to look official. Wear a hat and sun block. I don't know if you can use a chair at your positions, but bring one just in case. I am hoping to be using the mobile repeater so if you do not have F7 in your radio please get it in there. If you have any questions please let ask me. If you haven't signed up yet do so. I need to know who is going to be there so I can make assignments.

Subject: Re: [WestMichiganHams] Fw: [KC-RACES] cycling classic

Could we get some more information, please?

Like the date and time of the event, how long it is expected to last, the number of posts that still need to be filled and where we have to go for staging?

It would also help if we knew how the communications were going to be done, like if we are using simplex or a repeater, how far the stations will be apart if simplex and how far away the repeater is if used. This will help determine the type of radio gear people need to acquire.

I agree with Karl, backing out is not an option. If you could get me the info I will put this on the MCECS list and also ask my students if they can help. I do have one student ready to test for Technician that may be interested in helping out in the truck. My other students are already licensed as Techs and Generals.

Hello all
I hope you all had a great holiday weekend. Now it's time to get back to business. I still need more ham radio operators for the Priority Health Grand Cycling classic. I currently have 6 people including myself. This is not enough to cover the posts we have. If we do not get enough people, we will have to back out of the event. That is unacceptable!! We have never had to do this before, and I hope we never have to. Please sign up at http://www.kcraces.net/signup/phgcc.php
I could also use one person who is not a ham to help out in the truck. So if you have a significant other, son, or daughter who can help let me know and sign them up. If you have never done an event with us don't worry it is easy, and we can supply a radio if you do not have one. (please bring AA batteries) So come on and sign up. The group has made a commitment lets not drop the ball on this.

3360. New IRA link in Mackinaw City

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-09-04 21:59:13 UTC
From: Tom VanderMel KB8VEE
Topic: 3360 Message: 3360

All
Please pass on to All Hams. Thanks Tom KB8VEE

MACKINAW CITY LINK REPEATER ON-LINE!

The IRA link repeater system has a new repeater on-line in Mackinaw City, Michigan operating on 146.84 MHz with a 103.5 CTCSS on receive and transmit.

Del WB8DEL, Abe, W8HVG, Dan W8BCI and Marlene KC8GXO installed it on Saturday, September 1, 2007. It is located about seven miles south of Mackinaw City, east of I-75 just north of Douglas Road.

Initial tests indicate that it will extend the IRA link system coverage to Sault Ste. Marie and most of the eastern half of the Upper Peninsula. It will provide “handie-talkie coverage” in the area around the Mackinac Bridge and Mackinac Island.

Although there are a few minor technical issues still to be worked on involving audio frequency tailoring and link RF signal level, the new repeater is working “very well.”

The Mackinaw City link repeater should be a tremendous adjunct to the IRA link system communications capability providing users with enhanced emergency communications, opportunities to meet new hams, make new friends, and learn new things about Michigan.

The IRA especially thanks Del WB8DEL for his sharing cooperation and Dan W8BCI for all his dedicated work in helping to construct the equipment.

Hello:

This Thursday, September 6, KB8TYJ, Tom Behler, will give the program for the monthly club meeting. The topic of his program will be aids and adaptive technology for blind amateur radio operators. Tom, who is visually impaired, is Mecosta County's Emergency Coordinator and RACES officer (Tom, please correct me for any incorrect information). We're looking forward to hearing about the advanced technology in use for this particular segment of the amateur radio community. You know where we live: 2888 Scenic Drive, Muskegon,Michigan. He will be having dinner with members at the Red Rooster, also on Scenic Drive, north of the clubhouse location, beginning at between 5:00 and 5:30 p.m. - ya'all come on down and eat with us.

73,
Linda, AB8QH
Vice Prez, MAARC

My condolances! also Jeff

Look in your radio menu there is an option called split then there is another option to set the split
Sorry for being so vague but menus and menu option vary from one radio to another.... Frank

My condolances Jeff.

Thanks for the info. The 1 meg split may be hard for some to program into their radios as the new ones have .600 as a default and you have to work around that. Good info to know ahead of time.

We channelize our freq list to make it easier for those of us who are appliance operators :) Sept 8th is the date for the event.

I believe the freq is 147.500 and 146.500.. I am not 100% sure as I have been working from my blackberry today due to a death in the family.

Thanks Jeff,

There still is no mention of a date. Also what is F7? A frequency pair perhaps?

The sooner I can get the date, etc., the sooner I can get something on the MCECS and K8MHZ ham class lists.

If the event is this Saturday so is the GRARA Hamfest. My experience with events that compete with hamfests is that if you don't get commitments several weeks ahead of time for the event they will almost always go to the hamfests.

Karl, if you get this message here is some sage advice (I have been coordinating ham events for over 10 years). Don't bail on the event just because you can't cover all the posts. Place people where they will do the most good and move the ones that will get done early to other spots as needed. From: Linda
Topic: 3360 Message: 3364

That's timely - the Mackinac Rendezvouz happens later this month on Mackinac Island, September 21-23rd, to be exact. That event will involve about 1200+ Boy Scouts and adult leaders roaming the Straits State Park/Mackinac Island area. Hams involved in the Rendezvouz have been encouraged to pack 2 meters along to communicate during the event. With this new IRA link, we can surely show them what ham radio can do and look forward to saying hello from the island to hams all over the state during the event.

3366. 2 Cycle Engine Question

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-09-05 19:22:39 UTC
From: Hank Greeb
Topic: 3366 Message: 3366

Anyone in this reflector who is an expert at 2 cycle engines? I've a rather fl*key one on a small generator.

I bought a Eastern Tools and Equipment 1.2 KW generator a few months before Field Day, 2006. It has a 63 cc 2 cycle engine, which used to run nicely on 50/1 gasoline/oil ratio. It ran for 24 hours straight during Field Day 2006, even though the manual said it shouldn't be run for more than 4 hours without allowing to cool off. Then, I ran it for 12 hours straight for the Ohio QSO party in August 2006.

I tried it for FYBO 2007 in Hell, Michigan, but it wouldn't start. I figured it was just too cold (-2?F when I first tried to start it), so we went to plan B and used commercial power, mainly for heat for the operator..

In May I tried to fire it up, and it wouldn't run. So, I took the sp*rk plug out, and noticed that it was crudded up. Replacement worked fine for 24 hours of Field Day 2007, again almost completely without rest.

I fired it up about a month ago, prior to the Ohio QSO party, and it ran for about 30 minutes with nary a bleep. So, I ran it dry (it has a fuel shutoff valve). I took it to Ohio for the Ohio QSO party a couple weeks ago, and it wouldn't run - the thing didn't seem to get fuel regularly, or it wasn't firing very well. So, went to plan B, using a 400' extension cord from Generator A, and brought the thing home.

Today I took out the sp*rk plug. It was really dirty - partially burned oil I drained out all the gasoline I could from the tank, thinking that it might be olde gasoline. The gasoline would have been only 2 months olde, anyway, but, whattheheck. I bought another sp*rk plug, but it runs in the same ragged fashion as during the OQP. It seems to like to run at around 4000 RPM+, but not like to run at 3600 RPM. I forced it to run for about 15 minutes by holding the throttle at about 4000 RPM, but it never settled down when I let the governor do its work.

I can't access Eastern Tools web site, it times out, so I don't know if they have any hints there.

Ideas? Suggestions? The next time I'll probably use this is during FYBO 2008, so I have some time for fiddling.

Private replies are cordially invited, unless your info might be useful to the assembled multitude.

Good info there Mark. But this 4 hour <cooling off> period has me puzzled. A small engine like this will get to it's final operating temperature in what--5, 10, even stretching, 15 minutes max? So, why the sudden need to allow the engine to cool off if it's been running for 3.75 hours at it's normal temp? (rhetorical question I suppose)

Pretty much the same thing if the reason for this cooldown period is for the generator section.

>Look at it this way, if 2 strokes were as reliable as they were fast,
>cars and trucks would use them.

Sidenote-- Detroit Diesels were, maybe still are, 2 cycle. With normal crankcase oil, of course.

Sorry, guess I didn't contribute to the answer Hank is looking for, but I had to bring it up anyway...

> In any event knowing that most people will run them for more than 4 hours it is a way to get out of the warranty. Like they would honor it anyway.

A very likely, plausible reason.

> 2 stroke Diesels rock! Bear in mind they are built to handle a compression ratio of greater than 16:1 and diesel fuel is a lubricant in itself, not a corrosive solvent like gasoline. Comparing a Detroit Diesel 2 stroke to a 65cc 2 stroke gasoline burner made in a communist country is like comparing a Cadillac SRX to a Yugo.

Agreed. Just was bringing to light for others on the list the fact that 2 stroke doesn't always mean small, cheap, and light. The very largest Diesel engine made to date is a 14 cylinder inline putting out 109,000 hp, 5,600,000 lb./ft. torque, and displacing 1,500,000 cu. in., and it's a 2 stroke.

Back to topic, is there hope for Hank's?

One reason we won't see 2 stoker's for cars and trucks is because is maybe they put out too much polution.

3374. FY 2008 Emergency Management & Homeland Security Training Opportunities

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-09-06 14:44:33 UTC
From: Steve Vander Hill
Topic: 3374 Message: 3374

The Michigan State Police - Emergency Management & Homeland Security Training Center (EMHSTC) is pleased to announce the FY 2008 Training Course Information is currently available online at www.michigan.gov/emhsd-training. Registrations are now being accepted for all of the training courses.

Additional information regarding the training courses can be found on our website. Please add our website to your list of Favorities for future reference.

If you have any questions please call 517-322-6515 or e-mail schneids@....

Thank you for your continued support of the EMHSTC and we look forward to meeting your training needs for FY 2008!

James R. Porcello, Manager
Emergency Management & Homeland Security Training Center

I hate to tell you I told you so but that is exactly why I do not monitor 652 at all because of local chatter that can be better served by moving off the call frequency after contact is made to an another simplex FREQ of which there is plenty of open spaces to go to- the exception being working a band opening and exchange of signal reports then terminate the contact or emergencies or directions to a motorist. Many do not listen because of this guy and a few chronic abusers (and you know who you are, and I know who you are) of 652 while not illegal is NOT good amateur practice! I am not suprised at all as to what happened! DE WD8USA ...-.-

I'm sad that we(?) would consider losing the right(?) to meet on 652 due to abuse by fellow hams. My experience is like Marks, and so are my resources -- I don't have power to override their squelch. I especially don't have the "bully pulpit" to override selective hearing if squelch is appropriately set.

> because of local chatter that can be better served by moving off the

As a new ham in 1959 I found lids on 40m and 15m code segments. As an old ham I find lids as you chronicle. I guess it may be human nature. On the other hand, we belong to a (more-or-less) self policing group of people who have the means to educate and enforce appropriate use of the spectrum we have been granted.

In fact, I'm tempted to ask you (USA) as Red Cross Comm Chair, to coordinate the rest of us in this effort to reclaim 625 from local lids. OK - I won't..

> (and you know who you are, and I know who you are) of 652 while not
> illegal is NOT good amateur practice! I am not suprised at all as to
> what happened! DE WD8USA ...-.-
>
>
I favor a couple of things - on the air.

First, I will take the opportunity to break in to the rag chew and discuss how their use is inappropriate and is disadvantaging us who want to guard 652 for its purpose as you have described so well. I don't know when there will be an opportunity for travel reasons.

Second, when I get their ear I will pass on this reflector to them so the opportunity is at hand to keep an eye on the pulse of the neighborhood.

My basic thought is:
There are more of *us* than there are of *them* on the bands. It seems worth being proactive at preserving our practices until our practices no longer serve our needs - then changing them in concert with the

majority.

That's my story and I'm sticking to it. I wonder if you guys here on WMH will join me?

We are going to be Closed this Saturday for the Lowell Hamfest.See you there.

New this week

Tubes A great Assortment of tested used Tubes $1-$4 each

I still need some more items for Sale. Bring your consignment items in today

HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $15 each
Connectors in Stock
SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30

We are the only Dealer in Michigan for Jetstream Products Check out the items available
http://www.jetstream-usa.com/index.shtml
14 Amp Jetstream Power Supply (28Amp and 45Amp),Antennas, Switches, and lighting arresters are in.

Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other items in Stock
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's
300 ohm twin lead 50Ft $10.00
RG-8 .$1.00 per Foot
RG-8X Coax Cable .45 per Foot
PL-259 Connectors $2.50 ea adadapters for RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $12
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

The only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.
Technician Class $18.95
General Class New as of July 1 $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Other Used Equipment on Consignment

1 Radio Shack 30 Watt Amp for 2 meters $35
95 Ft RG-8 9096 Coax Cable .45 per foot

RG-58 Cable .25 per foot
75 ohm Cable 9040 International Wire and Cable .35per foot
AL-80A Ameritron 1KW HF Amplifier $850 New lower price
Bearcat BC 560XLT 16 Ch Scanner $30 New lower Price
Yaesu FT-890 HF Radio needs new Finals for transmit $225
B&K Model 4011 Precision function Generator $60
B&K Model 2140 Oscilloscope $175
GW Model GDM-8135 Digital Multimeter $40
B & W Antenna Tuner VS-300A $40
RCA Volt Ohm Meter $25
Johnson SWR Meter $2
Barket & Williamson Low Pass Filter $5
Speakers $2 - $10
Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
DB 1015 10/15 meter High Gain Beam $50
Center Insulator for HF antenna $5
Rocky Mountain Radar Detector $175
LED Emergency Light Taking orders $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50
MFJ-722 Notch Filter $30.00
MFJ 407C keyer $15
Code Key $15
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
Sharp SF7320 working Copy Machine $50
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40

Heathkit items in stock

Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40
Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Keychain LED lights $1.50 and up
Other items coming in Daily

The POP machine is working, with cold sodas of your choice. Snacks are in. Have one of your favorer candies crackers, beef jerky or snacks.

3388. Re: 2 Cycle Engine Question

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-09-07 15:12:15 UTC
From: Hank Greeb
Topic: 3366 Message: 3388

Mark:

Thanks for the sermon. I often need more than one sermon per week to keep me on the straight and narrow.

1. Did I say I didn't realize that I was taking a risk operating the thing for more than one tank full of gasoline without shutting it down? I've take a few statistics courses over my years as an enginner, and know how to calculate probability. It turns out that 4 to 5 hours is typical length of time it takes to empty the 1 gallon fuel tank, and it's highly recommended that the engine be shut down and allowed to cool for 10 minutes minimum before refilling.
2. I've discovered that the thing is running way too rich. It gums up a sp*rk plug in 24 to 36 hours. Nothing changed between the last time it ran and now, but something may have vibrated loose. The next item on my list is to take the screw out, clean out the seat, and adjust the mixture screw to manufacturers specs.
3. There doesn't seem to be an adjustment for the float and its valve, but I've run copious quantites of gumout through the carburetor. It appears clean when I take it apart.
3. I haven't found my compression gage, but have done a "manual test" of compression, by rotating the engine slowly and noting increasing resistance until top dead center. If I hold it at top dead center I can hear a slight "hiss" from the compressed air getting past the rings.
4. I'm purchasing a platinum tipped plug, which should be less prone to crudding up.
5. I did a "decarbonizing" routine which was suggested for occasional maintenance item.
6. Folks on a boating reflector tell me there's a synethetic 2 cycle oil which burns more completely and lubricates better than a petroleum based product. I'll buy some of it - though I've used Stihl 2 cycle oil for years in my Stihl lawn and garden equipment.

As far a purchasing a Honda generator, I can buy 5 ETQ generators for the price of one Honda. If they run for a couple years and I have to throw them away, there's no great loss. The Honda is quieter, but if it generates even S-1 hash on any ham band between 1.8 MHz and daylight it's a pile of junque. I tolerate zero RFI from a generator in the field. One can carry on a conversation at normal speech levels 20 feet from the ETQ generator, which is good enough for me. Sound level is specified as 60 dB when 3 ft from the generator, vs 43 dB for the Honda. It's a bit heavier than the Honda, but light enough to be able to lug it around in my trunk.

Folks in China can make reliable equipment, if the importer (like ETQ) demands it, tests enough samples, etc. Parts are as available as the importer desires. ETQ has a reasonably complete stock of all commonly needed replacement parts for this and there larger household and industrial generators. There's two service "hot line" sites for questions, right here in the Untied States. The technicians seem to be very competent. If I can't figure out why the thing is running rich, they'll sell me a replacement carburetor for a reasonable price.

The Japanese were generally considered purveyors of junk in the 60's and earlier. Honda automobiles used a 600 cc motorcycle engine, prone to breakdown when subjected to US driving conditions. Other parts of Hondas broke down. A fellow called Deming couldn't sell US manufacturers on quality, so he moved to Japan, where Honda and other Japanese manufacturers welcomed him. Quality improved dramatically, and the rest is history.

Again, thanks for the sermon.

>
> "even though the manual said it shouldn't be run
> for more than 4 hours without allowing to cool off. "
>
> Hmm....
>
> That may be part of the problem. At the very least you have pretty much violated the warranty.
>
> 2 strokes have no lubrication other than the oil in the fuel. The first thing I would check is the compression. It also sounds like it either has been running too rich or using a poor brand of 2 cycle oil. You WERE using 2 cycle oil, weren't you? If the plugs got that dirty there is a good chance the ring grooves also got that dirty and you may have stuck a ring. If you overheated it by running it too long you may have even melted one or burned a small hole in the piston, although smoking a piston usually creates a spark plug with a burned off electrode and is gray or white in color, not black.
>
> When you say 'crudded up' exactly what were you seeing? 2 strokes will collect two kinds of 'crud'. One is from the oil not getting burned completely and the plug will have a kind of grainy oil soaked look to it, the other is a black sooty look from the air/fuel mixture being too rich. Quite commonly there can be both at the same time as a rich mixture also puts too much oil into the combustion chamber. Be advised that a too rich mixture can overheat an engine because

the 'crud' can also collect on the top of the piston, increase the compression ratio and cause pre-ignition. The next step is the piston crud hitting the cylinder head and bending the connecting rod and/or crankshaft, pretty much killing the engine.
>
> If you do a compression check and it is too low, a stuck or broken ring, a blown head gasket, loose head bolts or a hole in the piston is the culprit. If it is higher than normal deposits on the top of the piston, although not near as likely as lack of compression, are probably the culprit.
>
> When I was racing 2 stroke dirt bikes we had to tear the engines down all the time and repair them because of the way they are lubricated using an oil/fuel mixture. Look at it this way, if 2 strokes were as reliable as they were fast, cars and trucks would use them. Since they have fewer parts (no valves or valve train) they are often sold cheaply to unsuspecting consumers. Even with dirt bikes 2 strokes are getting fewer and farther between as the 4 strokes are getting faster and lighter and are much more reliable.
>
> If by some chance you have a damaged engine and with an even slimmer chance you can get it fixed somewhere the next step is to figure out how to either fix the carb or adjust it so the engine is not running too rich.
>
> You just may have to bit the bullet and buy a new $129 dollar generator to replace your old one. :)
>
> I saw one of these things for sale at Hornier's traveling tool show (NEVER buy anything there!) and the label with the starting procedure had misspelled word on it. Yep, THAT's a sure sign of a dependable piece of equipment!
>
> The only 2 stroke generators I have ever seen that were reliable were Hondas and they are not cheap. Like the man says, 'you get what you pay for'. The manual recommended not running the engine for more than 4 hours at a time for a reason. You may have learned what the reason was the hard way. (Are you sure the manual didn't say not to run it for 4 hours total? That may have explained the single use gas cap.)
>
> Sorry to be the bearer of bad news and as such, please don't shoot the messenger.
>
> 73
>
> Mark K8MHZ
>
> PS Don't expect to find parts for the engine anywhere in this hemisphere. I am quite sure the engine was made in a sweat shop in

China somewhere by slave labor and the suggestion of replacement parts is a 'velly funny joke, round-eye!'

3389. Petition for the respect of calling frequencies

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-09-07 21:20:46 UTC
From: Joe Veldhuis
Topic: 3389 Message: 3389

Much thought over the last few days has gone into possible solutions to the ongoing problem of abuse of calling frequencies, especially 146.52. Some progress has been made towards convincing the offenders to change their ways, but others are more stubborn, perhaps believing that only one or two individuals have a problem with what they are doing.

Anyway, read this initial draft petition for the respect of calling frequencies, and if you agree with it, sign it.
http://www.electroblog.com:8090/callfreq_petition/index.php

For those of you who, like me, don't think that electronic signatures are worth anything, a paper version will be available at the GRAHamfest tomorrow to sign in person.

-Joe, N8FQ

Hello .... I have worked on many 2 cycle engines and they all have said to let them cool off after 4 hours of running then they said to refill them with gas and start again this was to make sure the thing did not blow when you were filling them with gas ... one toro snowblower engine we ran for 2 weeks straight with no problems just to see if it would and them we gave up it was still running ... we did find one thing out with the engines that were on an automatic speed control and that was they needed to be held on idle and the idle jet ajusted so it was not flooding it out ... if you didn't get that set right it would flood or load up on exceleration and high speed .... this was on snowblowers and lawn mowers but they are much the same motors ....if you still have a problem I would try a carb kit ... hope this helps and for my back ground I worked for Robbins Road Hardware for 8 years repairing small engines for a liveing .... 73 Don

Subject: [WestMichiganHams] Re: 2 Cycle Engine Question

Mark:

Thanks for the sermon. I often need more than one sermon per week to
keep me on the straight and narrow.
The pleasure was all mine. Please remember to put something in the collection plate when it comes around. Folding money please, if possible.

1. Did I say I didn't realize that I was taking a risk operating the
thing for more than one tank full of gasoline without shutting it
down? I've take a few statistics courses over my years as an
enginner, and know how to calculate probability.
And you can't even spell engineer correctly? (Sorry, that was too much to resist!)
It turns out that 4
to 5 hours is typical length of time it takes to empty the 1 gallon
fuel tank, and it's highly recommended that the engine be shut down
and allowed to cool for 10 minutes minimum before refilling.
2. I've discovered that the thing is running way too rich. It gums
up a sp*rk plug in 24 to 36 hours. Nothing changed between the last
time it ran and now, but something may have vibrated loose. The next
item on my list is to take the screw out, clean out the seat, and
adjust the mixture screw to manufacturers specs.
You may also want to try a 'hotter' spark plug if you can't get the carb to cooperate but do so carefully. Only move up one step at a time and check the plug after a short time of running the engine as too hot of a plug can burn a hole in the piston.

3. There doesn't seem to be an adjustment for the float and its
valve, but I've run copious quantites of gumout through the

carburetor. It appears clean when I take it apart.
That may be by design. Engineers over the years have found that certain adjustments are better left as pre-sets to prevent loosening of the adjustments. Also, pre-sets are cheaper to manufacture.

3. I haven't found my compression gage, but have done a "manual test" of compression, by rotating the engine slowly and noting increasing resistance until top dead center. If I hold it at top dead center I can hear a slight "hiss" from the compressed air getting past the rings.
Are you sure it's the rings? 2 strokes like to blow head gaskets. Also, rings are not a perfect seal and will leak when moving slowly. 2 strokes don't have as many rings as 4 strokes and don't hold static compression anywhere near the rate a 4 stroke will.

4. I'm purchasing a platinum tipped plug, which should be less prone to crudding up.
Actually it won't. All platinum does is resist oxidation which makes them last longer when the air/fuel mixture is OK. In fact, they can be harmful when the engine runs too lean as they keep firing longer in high oxygen atmospheres and where a normal plug would fail before a hole is burned in the piston, a platinum plug won't.

5. I did a "decarbonizing" routine which was suggested for occasional maintenance item.
Yeah, but what you are describing indicates a problem. Likely, as you suggest, the engine is running to rich.

6. Folks on a boating reflector tell me there's a synethetic 2 cycle oil which burns more completely and lubricates better than a petroleum based product. I'll buy some of it - though I've used Stihl 2 cycle oil for years in my Stihl lawn and garden equipment.
That may help. Especially if there is no means to get the carb adjusted properly. I know by experience racing motorcycles that oil choice is very important. We used to use 'Blendzall' which is a vegetable based oil.

As far a purchasing a Honda generator, I can buy 5 ETQ generators for the price of one Honda. If they run for a couple years and I have to throw them away, there's no great loss. The Honda is quieter, but if it generates even S-1 hash on any ham band between 1.8 MHz and daylight it's a pile of junque. I tolerate zero RFI from a generator in the field. One can carry on a conversation at normal speech levels 20 feet from the ETQ generator, which is good enough for me. Sound level is specified as 60 dB when 3 ft from the generator, vs 43 dB for the Honda. It's a bit heavier than the Honda, but light enough to be able to lug it around in my trunk.
Good points, perhaps, but not to an environmentalist! The RFI issue would be most important to me as well.

Folks in China can make reliable equipment, if the importer (like ETQ) demands it, tests enough samples, etc. Parts are as available as the importer desires. ETQ has a reasonably complete stock of all commonly needed replacement parts for this and there larger household and industrial generators. There's two service "hot line" sites for

questions, right here in the Untied States. The technicians seem to
be very competent. If I can't figure out why the thing is running
rich, they'll sell me a replacement carburetor for a reasonable price.
Do a compression test first. If you can't find a compression tester I have one in my tool box. I would be happy to come over and do a quick check for you. I am in Muskegon and I think you are in GR so we aren't too far away. I find myself in GR from time to time. Sometimes I wonder how, but that is an entirely different story.

The Japanese were generally considered purveyors of junk in the 60's
and earlier. Honda automobiles used a 600 cc motorcycle engine,
prone to breakdown when subjected to US driving conditions. Other
parts of Hondas broke down. A fellow called Deming couldn't sell US
manufacturers on quality, so he moved to Japan, where Honda and other
Japanese manufacturers welcomed him. Quality improved dramatically,
and the rest is history.
Whilst you have somewhat of a point there, I find it hard to compare China to Japan. I am admittedly prejudiced against the Chinese for more reasons than the quality of their imported products. Probably for reasons not fit for discussion on this reflector.

Again, thanks for the sermon.
Don't forget about the collection plate!

73 de n8xx Hg

p.s. Our adopted son, born in Korea, my take offense at your ethnic
joke "'velly funny joke, round-eye!'" His father doesn't appreciate
it very much either.
OK, I do apologize. Koley was born in Guatemala so I understand completely. I don't remember the origin of 'round-eye' but if memory serves me correctly it was from an oriental's response in a movie to something stupid an American did. The term was derogatory for the American, not the Oriental.

> Hmm....
>
> That may be part of the problem. At the very least you have pretty
much violated the warranty.
>
> 2 strokes have no lubrication other than the oil in the fuel. The
first thing I would check is the compression. It also sounds like it
either has been running too rich or using a poor brand of 2 cycle
oil. You WERE using 2 cycle oil, weren't you? If the plugs got that
dirty there is a good chance the ring grooves also got that dirty and
you may have stuck a ring. If you overheated it by running it too

long you may have even melted one or burned a small hole in the piston, although smoking a piston usually creates a spark plug with a burned off electrode and is gray or white in color, not black.
>
> When you say 'crudded up' exactly what were you seeing? 2 strokes will collect two kinds of 'crud'. One is from the oil not getting burned completely and the plug will have a kind of grainy oil soaked look to it, the other is a black sooty look from the air/fuel mixture being too rich. Quite commonly there can be both at the same time as a rich mixture also puts too much oil into the combustion chamber. Be advised that a too rich mixture can overheat an engine because the 'crud' can also collect on the top of the piston, increase the compression ratio and cause pre-ignition. The next step is the piston crud hitting the cylinder head and bending the connecting rod and/or crankshaft, pretty much killing the engine.
>
> If you do a compression check and it is too low, a stuck or broken ring, a blown head gasket, loose head bolts or a hole in the piston is the culprit. If it is higher than normal deposits on the top of the piston, although not near as likely as lack of compression, are probably the culprit.
>
> When I was racing 2 stroke dirt bikes we had to tear the engines down all the time and repair them because of the way they are lubricated using an oil/fuel mixture. Look at it this way, if 2 strokes were as reliable as they were fast, cars and trucks would use them. Since they have fewer parts (no valves or valve train) they are often sold cheaply to unsuspecting consumers. Even with dirt bikes 2 strokes are getting fewer and farther between as the 4 strokes are getting faster and lighter and are much more reliable.
>
> If by some chance you have a damaged engine and with an even slimmer chance you can get it fixed somewhere the next step is to figure out how to either fix the carb or adjust it so the engine is not running too rich.
>
> You just may have to bit the bullet and buy a new $129 dollar generator to replace your old one. :)
>
> I saw one of these things for sale at Hornier's traveling tool show (NEVER buy anything there!) and the label with the starting procedure had misspelled word on it. Yep, THAT's a sure sign of a dependable piece of equipment!
>
> The only 2 stroke generators I have ever seen that were reliable were Hondas and they are not cheap. Like the man says, 'you get what you pay for'. The manual recommended not running the engine for more than 4 hours at a time for a reason. You may have learned what the reason was the hard way. (Are you sure the manual didn't say not to run it for 4 hours total? That may have explained the single use gas

cap.)
>

From: Don Meyer - KB8ODB
Topic: 3399 Message: 3399

Hello Everyone . From watching the commits and personal emails I have received plus monitoring the 146.52 calling frequency there is a problem with the respect of the gentleman's agreement on frequency use. I find this really bad coming from one of them that has his call on a Grand Rapids repeater and has digital nodes on frequencies we as gentleman stay way from as to not interrupt his fun in the hobby . I find it irresponsible that a ham would operate in a way that could possibly cause another ham harm or possibly there life when with just a turn of a dial they would clear the frequency and make 146.52 clear for calling and available for other hams to monitor. I am sure that if we went on the output frequency of that repeater and talked simplex when the repeater was not transmitting he would find it most annoying even if it was not interfering with the operation of the repeater. I would like to know the calls of the hams that are doing this just so I can make sure they are not hams I am associating myself with as if they are this way on abusing the calling frequency I would not trust them in other things I do as a ham, so if you here a ham on 146.52 just chatting and not moving off to another frequency please drop me a simple email with there callif you would please.

Hi Mark! This is Shawn KB8UFI. I just wanted you to know that I will also and even more so will be monitoring 6.52 simplex as well and will be very intent on doing my best in helping anybody that is in need of any help when they call on the frequency. I feel that all hams should be absolutely aware of their responsibility in letting any station break in when they want to.I also wanted to let you know that it was a very good day when I met you at the testing.I had a ball their.

Subject: [WestMichiganHams] 146.52

I had a nice conversation with Ed, WA8ZXZ on the phone today. He seems to be a very nice gentleman. We discussed the situation with the '52 and he said that the reason he was on there was because that has been a stand by of his for 20 years or so. He said that he always allows stations to break in and make a call and that the comment about the squelch was in jest and I have no reason to doubt him. He also said that he did not hear me try to break in. That may have been due to the station he was talking to not allowing time to listen which Ed says he tries to keep people from doing. He also said that he will try to be more cognitive about people wanting to use the frequency for a calling frequency. In one of his e-mails he did mention that he was going to change his stand by frequency. I replied that standing by on the '52 was not the issue, it was the long winded ragchews that prevented people from making calls that was the problem.

I guess some progress has been made but I still think, like others that have e-mailed me, that the frequency should not be used for general chit chat. Be aware that the assignment of 146.52 as a calling frequency is not covered in the FCC rules, instead it was originated in 1972 by an article in QST magazine.

The e-mails I have received concerning the issue have been very interesting. The lion's share have been in support of the assignment with those not in support ranging from cordial disagreement, like Ed's, to those resorting to name calling and vulgarity like the ones I received from W8ER, a ham not in Michigan that decided to take up the cause on Ed's behalf. Those e-mails also contained false accusations of me promoting violence and attempting to ruin the 2 meter band for my own personal purposes.

Also, the petition that Joe had linked to the site was vandalized by someone putting mocking comments on it along with fake call signs. Their IP address was logged when they did it and was found to be easy to trace. It came from Grand Rapids....imagine that. The person that did it knows who he is and so do we. The comments and call signs have since been deleted.

Anyway, I thought it to be prudent to mention my conversations with Ed and not to vilify him as his use of the '52 is in no way malicious and he seems to be interested in trying to make things work out.

Subject: [WestMichiganHams] Frequency

No, not the movie.

Below is a list of frequencies suggested (by the ARRL I believe, but I am not exactly sure who came up with the list) in order to minimize interference on the 2 meter FM band. The repeater frequencies all consist of a .600 MHz split and the simplex frequencies are separated by .150 MHz. They are labeled as channels but I have never heard them referred to as such on the air. There is resistance by some amateurs to refer to frequencies as channels as we are very frequency agile which differentiates us in some respect to users of Part 95 radios which are required to operate on FCC designated channels. As such, when suggesting a move to a different frequency it is best to designate the move by frequency, not by channel. I have included the channels because that is the way I found the list and it does serve to help keep it in order.

The repeater channels are used by nearly all repeaters in the US. The ones that vary from the list are usually in areas that have many repeaters and require deviation from the list in order to exist. With newer radios having the ability to store 200 or more frequencies in their memories it is possible to put the entire list in memory with plenty of room for additional frequencies. Once that is achieved, scanning the list should be able to locate any repeater in use which is especially handy when traveling in areas where we don't know which frequencies the local repeaters may be on. Once the scan stops on a repeater frequency in use, don't forget to use the tone scan feature to discover the PL tone of the repeater, if used. The frequencies listed for repeaters are for the output with the input being .600 MHz above or below the output. 'Minus' indicates that the input is below, and 'plus' indicates that the input is above.

It seems to be good operating procedure to use the suggested simplex frequencies as well. If a contact is made on the calling frequency moving up or down 10 kc may not be sufficient to ensure that we don't interfere with the calling frequency whereas moving up or down 15 should suffice.

The channels are sorted by frequency in this list and there are two groups of simplex and repeater frequencies. (There is also a space between the plus and minus offset which occurs as 147.000 MHz.

As you can see, there are 24 possible simplex frequencies listed (not 40 as I stated before, sorry!) separated so that 24 simultaneous conversations could occur with little chance of interfering with each other. There are also 74 repeater pairs.

In Muskegon we refer to 147.435 as 'ARES Simplex'. I have seen the SAR frequency list and it does not follow the list below. Bear in mind that SAR operations have different

requirements than casual use and the SAR list was probably set up in order to serve their particular practice. If any of us are on a frequency listed below and hear some splatter it may be due to an SAR frequency in use between the listed frequencies. If that happens PLEASE move away from the SAR frequency in order not to interfere with them. There is plenty of room to do so and interference with an ongoing SAR activity could hamper their efforts. I can't stress enough that we should give SAR priority over casual use for obvious reasons.

If anyone has the SAR frequency list I think it would be prudent to post it here so we can avoid using the SAR frequencies and those adjacent to them for chit chatting. 73, Mark K8MHZ

Mark, as far as the repeater frequencies between 146.000 and 148.000 mc. in Michigan, you probably realize that they are spaced at 20 kc., not 15 kc. So the frequency table as listed would not apply here...

We will be open this Saturday 9AM-12PM

I still need some more items for Sale. Bring your consignment items in today

HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $15 each
Connectors in Stock
SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30

We are the only Dealer in Michigan for Jetstream Products Check out the items available
http://www.jetstream-usa.com/index.shtml
14 Amp Jetstream Power Supply (28Amp and 45Amp),Antennas, Switches, and lighting arresters are in.

Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other items in Stock
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's
300 ohm twin lead 50Ft $10.00
RG-8 .$1.00 per Foot
RG-8X Coax Cable .45 per Foot
PL-259 Connectors $2.50 ea adadapters for RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $12
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

The only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.
Technician Class $18.95
General Class New as of July 1 $20.95
Extra Class $21.95

All:

By way of an update I offer the following:

It has been two weeks since the surgery. The bubble is slowly being reabsorbed. That bubble is encouraging my retina to reattach to the back of the eye.

The doctor is happy with the progress.
The patient is happy with the support from his friends, family, and ham community. It will be another two or more weeks before the eye is returned to "service." "Keep your head down" is the mantra each day.

The doctor expects full recovery if I can start seeing stuff in another week or two. I'm hopeful.

Thanks to everyone for your support and understanding.

Friends,
While walking down to the Chinese restaurant in town to buy lunch, I noticed that the French Lace Antique Shop had a going out of business sign in the window. Their name is a slight misnomer, the man who owns it did radio restoration work, and is interested in liquidating his entire stock on hand for a slight amount. For $5000 he will sell you 200 antique radios (some real honeys in that lot, I tell ya!), 20,000 radio tubes (most NOS), an extensive amount of test gear and a large number of repair manuals and schmatics. Here is the contact information for anyone interested in this:

Jerry and Della Stanley,
French Lace Antiques
120 N. Market Street
Paxton, Illinois 60957

Tel. 217 379-4140
Email: phonoman1960@...
Website: www.frenchlace.com .

Feel free to pass this onto other lists or anyone else, Jerry needs to vacate the building now. BTW, Downtown Paxton does have a number of empty stores downtown which the buyer can rent for storage while working out what to do with the stuff.

Subject: [frrl] ARISS Contact Monday

An International Space Station Expedition 15 ARISS school contact has
been planned with participants at Mitchell Elementary School, Ann
Arbor, Michigan USA on 17 Sep. The event is scheduled to begin at
approximately 13:39 UTC.

The contact will be a direct between stations NA1SS and N0EFT. The
contact should be audible in most of eastern North America. Interested
parties are invited to listen in on the 145.80 MHz downlink. In
addition, the audio should be available via IRLP and EchoLink. The
participants are expected to conduct the conversation in English.

Mitchell Elementary school is a NASA Explorer School located in Ann
Arbor, Michigan. Our science and math programs integrate units that
are related to NASA projects. The radio contact with the space station
will enhance and increase the relevance of our students' academic
activities. The experience will help enable our students to see
themselves as future scientists or astronauts.

73,

John - AG9D

Topic: 3427 Message: 3428

This could be taken a step further, how about sending morse code over FM frequencies. I.e. finding a simplex channel, or over a repeater for that matter and runnign code practice. Is this legal or no? Especially when the sending station identifys in morse code.

Now I'm guilty of this as well as other hams out there, but it does beg the question of just how legal is sending morse code over fm?

Subject: [WestMichiganHams] Repeaters that ID in Morse Code - A legal question

My question concerns FM repeaters that ID only in Morse Code by sending audible tones using the FM mode.

97.119 (b) outlines the way a station may ID.

(1) By a CW emission

(2) By a phone emission in the English language

(3) By an RTTY emission when the comms are RTTY

(4) By an image emission when the comms are images.

CW and Morse Code are not synonymous. CW is a specific emission type with certain standards and is not FM. Morse Code transmitted by audio tones using FM is still FM, not CW.

Given the above, is it legal to only transmit a station ID in Morse Code using FM carried audio tones? If the repeaters did switch to a true CW emission when transmitting their ID would an FM receiver be able to 'hear' it sufficiently to make the ID legible?

Of course, if the repeater ID's by phone at the required intervals, the addition of an audio Morse identifier is allowed. But if not does the Morse identifier satisfy the ID requirements of 97.119 (b)?

Inquiring minds want to know.....

Talk about splitting hairs.

Part 97.119(b)... is typical of many regulations that the FCC has in amateur radio and other services, (like broadcasting), where many of the rules are ambiguous, and the FCC relies on peoples common sense.

You make the argument that CW is not Morse. Correct. You could use the American Telegraph code to key your radio, and it would be CW. I will guarantee you that if you find a repeater that has "morse" only ID'ing, and you call Detroit to complain, that someone there will silently wish you had never called. There are several other "loosely" written rules in Part 97, and worrying about about CW vs Code vs MCW, well, glad someone else has the time to worry.

Quite frankly, I find voice ID's on repeaters to be obnoxious. Good ol MCW works for me, and when I put up the 145.41 repeater in Grand Rapids, even though it had the GR area's first ACC RC-850, I resisted the temptation to use the voice ID. It sounded really nice.

A good clean MCW ID every 9.5 minutes shows a class operation.

Additionally, I know of repeaters that DO use MCW to ID, but they are more than 20 WPM. That is illegal, per the rules. Do I care? Nope, I have grandchildren to spoil

Topic: 3427 Message: 3435

OK, it's legal when the rule was promulgated and ham license required code and code was widely understood. How about now (or in future rules) that code is no longer required? You notice neither French nor Mandarin Chinese are approved languages for signing, I'll bet CW, MCW, and the like will fall from favor as fewer (aaarg I hope to *not* see that day) hams speak English in code.

Certainly you are considering why we want to divide the band up into segments - someday by bandwidth. Various modes of modulation don't coexist nicely. Simply - When you are set up to transmit voice on SSB it is hard to converse with packet or digital encoded voice streams. Therefore we set them apart on separate frequencies and ask them to sign in their own mode (mostly). You also think in terms of the conflict between Bathrobe Net and SSTV?

Your original question is well put Mark. Perhaps the simplest practice is to sign in a mode that is understood, and be ready to change practices as our world changes... Like the band plan that puts calling frequencies on record, it seem unlikely that FCC will micro manage this aspect beyond being understood?

We could take this one step further with your approval? Consider the technology that would stream a 1200B digital CALL, GPS location, and something like the MAC number from TCP/IP to identify the hardware, plus whatever tones to open the remote receiver, at the first moment after you press the TR switch followed by your voice. If it would interrupt and repeat this each 9.5 minutes plus at the moment when you release the TR switch, maybe the requirement to sign could be satisfied and we would be relieved of this overhead responsibility? The technology exists now [this is a solution waiting for a problem], but I'm willing to bet the above paradigm will meet more opposition than government mandated ID chips worn under our skin.

It is a happy thing to see you dive deeper into ham licence than memorization of the right answers...

3436. Monthly Michigan Section News Summary

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-09-18 00:04:30 UTC
From: Tom VanderMel KB8VEE
Topic: 37 Message: 3436

All
Please pass on to your groups of all Hams. Thanks Tom KB8VEE DEC-6

Greetings everyone,

Roger Edwards WB8WJV has served as our Assistant Section Manager since August of 1997. After ten years in the position (and three of those where he
has begged to resign), your SM has finally and reluctantly relented to Roger's request. Roger is one of those people who is involved in his community and has the ability to really make things happen. He has been a most valuable asset to the Michigan ARRL Section. Fortunately for all, he will remain active in his home town of Caro and with amateur radio in Tuscola
County. Roger, thanks for everything.
The IRA link repeater system has a new repeater on-line in Mackinaw City, Michigan operating on 146.84 MHz with a 103.5 CTCSS on receive and transmit.
WB8DEL, W8HVG, W8BCI and KC8GXO installed it on September 1. It is located about seven miles south of Mackinaw City. Initial tests indicate that it will extend the IRA link system coverage to Sault Ste. Marie and most of the
eastern half of the Upper Peninsula. It will provide handie-talkie coverage
in the area around the Mackinac Bridge and Mackinac Island. Although there are a few minor technical issues still to be worked on involving audio frequency tailoring and link RF signal level, the new repeater is working very well. The Mackinaw City link repeater should be a tremendous adjunct to
the IRA link system communications capability providing users with enhanced emergency communications, opportunities to meet new hams, make new friends, and learn new things about Michigan.
The Annual election results for the Midland Amateur Radio Club:
President:
KC8ITI, Vice Pres: KB8SOE, Sectary: KC8MUD, Treasurer: N8CGP.
Congratulations to these newly elected officers.
Congratulations to Sam K8SN. Sam has been awarded the Pillars of Society Award by the Michigan DX Assn. for his many years of advancing emergency communications in the western Michigan area.
As you read this, the final preparations are being made for our ARRL Great
Lakes Division Convention in Independence, Ohio. This major event is scheduled for September 21 & 22. The banquet Keynote speaker will be ARRL President Joel Harrison W5ZN. Seminar Topics include DX, EMCOMM, ARDF and AMSAT. The seminar speakers include W3UR, K8MFO, K8YSE, K4UEE, K2DCD,

WA6EZV
and WB4GCS. Check your QST for September, page 92 for details or visit the Convention web page http://www.2007gldc.com/ for all of the latest updates.
A gathering of the Royal Order of the Wouff Hong will follow the banquet. This is a wonderful opportunity to meet with the people who are the pacesetters of ham radio, I hope I will see you there.
We are beginning to emphasize more of our local and club net activities. If your ARES/RACES group or club has a regular net that handles traffic, you
can report that activity to WB8RCR and we will be pleased to post the participation in the Monthly Section News.

And now, some comments from John WB8RCR our SEC/STM:

SET is coming soon. Be sure to mark October 6th on your calendar. Last year we learned a lot by having a lot of simplex operation. Although most emergency operation tends to be local, we sometimes need longer distance communications. HF conditions are often poor from many parts of the state to
the SEOC, so this year we want to emphasize other VHF paths. We are asking every county to route messages to the SEOC through their nearest VHF traffic
net, as well as to the SM via packet. For many of you, this will require organizing some help from adjacent counties. This will help you be prepared for the possible pitfalls should you need to do this in a real incident.
There may be some more exciting developments about SET yet to come. Keep an
eye on the SET page which can be reached by clicking on the SET link on the "Events" page of the mi-arpsc site, or by clicking on 2007 SET on the left menu of the mi-nts site. I will also post any news on the MIARPSC Yahoo group. The direct link is <http://www.mi-nts.org/txtblk.php?topic=6001>.
On August 24, the NWS confirmed six tornado touchdowns across the state. A
number of programs activated, most were clear by late in the evening. I was
particularly impressed by the response from areas that were not affected. Kent proactively offered help to Eaton, who, as it turns out, were able to handle the problem themselves. Genesee, the hardest hit, had 120 volunteers
on scene with another 60 standing by. ARES programs from all over the state responded, and Greg Allinger, the DEC for District 3 asked me to pass along a
big thank you to those that participated, and those that stood by in case they were needed.
The incident did point out to me a weakness we have. When we have an event
that may require assistance from outside the affected area, information can be quite sketchy. Generally, the EC is tied up and even if communication circuits are available, probably isn't interested in giving updates to those

from outside. I would urge you to contact your DEC any time you are activated. If you can't reach your DEC, contact me. As s minimum, we will be starting to identify who might have the skills and capacity to help should
it be needed. More and more ECs are paying attention to E-Team, so if at all
possible, please keep your SitRep up to date there. Normally this would be an EC job, but you can't always schedule a disaster for when your EC is in town, so everyone should be aware of where to go for help. Emcomm organizations are a little bit "upside-down". The DEC is there to help the EC, and the SEC is there to help the DEC. You shouldn't be afraid to contact
your section officials; it's our job to support you, not the other way around.
Unfortunately, we won't be able to organize an EC meeting before SET, but I
would like to have one shortly after. Right now I am thinking of October 27
in Lansing. This will give us an opportunity to share learnings from SET, and ideas for next year's event. Following the SET please share with your EC
anything you felt could be improved, or which worked particularly well, so (s)he can be prepared to share that with the other ECs in Lansing. The date
and location isn't cast in concrete yet, so if you can think of a better time
or venue, please share it with me. Enough rambling for this month, I'll try to keep you all posted on what is happening, both here, and on the MIARPSC group.

From: T Behler
Topic: 3427 Message: 3439

Well, my two cents worth is that it's fine. I checked once with the ARRL before starting A 12-week CW practice class on our local 2-meter repeater that was going to use modulated CW on FM, and they said it'd be fine. ... Of course, I intersperced the CW lessons with my own spoken audio teaching, and that included verbally saying my own call for ID. Our repeater also ID's in both CW and phone, so I think I was ok, but your question, Mark, is sure an interesting one.

This could be taken a step further, how about sending morse code over FM frequencies. I.e. finding a simplex channel, or over a repeater for that matter and runnign code practice. Is this legal or no? Especially when the sending station identifys in morse code.

Now I'm guilty of this as well as other hams out there, but it does beg the question of just how legal is sending morse code over fm?

Subject: [WestMichiganHams] Repeaters that ID in Morse Code - A legal question

My question concerns FM repeaters that ID only in Morse Code by sending audible tones using the FM mode.

97.119 (b) outlines the way a station may ID.

(1) By a CW emission

(2) By a phone emission in the English language

(3) By an RTTY emission when the comms are RTTY

(4) By an image emission when the comms are images.

CW and Morse Code are not synonymous. CW is a specific emission type with certain standards and is not FM. Morse Code transmitted by audio tones using FM is still FM, not CW.

Given the above, is it legal to only transmit a station ID in Morse Code using FM carried audio tones? If the repeaters did switch to a true CW emission when transmitting their ID would an FM receiver be able to 'hear' it sufficiently to make the ID legible?

Of course, if the repeater ID's by phone at the required intervals, the addition of an audio Morse identifier is allowed. But if not does the Morse identifier satisfy the ID requirements of 97.119 (b)?

Inquiring minds want to know.....

Has the wording changed? F2 (International morse code sent via audio modulation of a FM station) is legal on all the repeater bands, and repeaters have been identifying with F2 for as long as they have existed. Commercial repeaters often ID with F2.

Methinks thee seeketh an answer to a tempest in the teapot.

97.205(b) Repeaters are allowed only on the 10m and shorter bands, so technically (since we are being so here), in the context of Hank's reply, there are repeater bands. (Except, for example, 144.0-144.5 mc. and 145.5-145.8 mc.)

> The band plan is voluntary. On 2 meters the only thing that Part 97

>97.205 (repeater stations) mentions such an allowance.

No allowance needed. Is it prohibited? No.

Where is the specific allowance for IRLP, Echolink, SSTV, et. al.? Those modes are not defined in the rules. At least I haven't found them. The point is, we hams do not need specific permission from Part 97 to do something.

The first remote base in the Southern Calif. area got put up in the mid 1950s - first on a garage repeater, then on a mountaintop. The remote control was a rotary telephone dial pulsing an audio oscillator. Nobody asked "is it legal?" They just did it.

I can read the rules, and I will interpret them in their best sense. If I want to do something not specifically blessed in the rules, but can find nothing in Part 97 that says I can't do it, then I will proceed. Amateurs are known to be self-regulating, and, yes, using common sense when interpreting Part 97 is a part of that attribute.

Part 97 was written to allow experimentation and innovation. No other service is allowed those freedoms. Part 97 is the ONLY section in the FCC rules that say "You can't do X". Every other section - GMRS,

Public Safety, CB, Aircraft, etc. all say "You can only do X". That is why MCW is allowed on repeaters.

Mark, comments woven...

97.3(c)(5) [Definitions] Phone. Speech and other sound emissions having designators with A, C, D, F, G, H, J or R as the first symbol; 1, 2 or 3 as the second symbol; E as the third symbol. Also speech emissions having B as the first symbol; 7, 8 or 9 as the second symbol; E as the third symbol. MCW for the purpose of performing the station identification procedure, or for providing telegraphy practice interspersed with speech. Incidental tones for the purpose of selective calling or alerting or to control the level of a demodulated signal may also be considered phone.

97.119(b)(2) [Station Identification] By a phone emission in the English language. Use of a phonetic alphabet as an aid for correct station identification is encouraged;

In the Phone definition above , it is clear that a <phone emission> includes more than just spoken words, and indeed includes MCW. Logically, an ID "By a phone emission in the English language" includes permission to use MCW, since MCW is defined as a phone emission. A phone emission using Morse characters in the English language to ID a station then should be/is fine. (Sorry if that all sounds a bit like redundant doubletalk).

>
> I understand what you are indicating as far as 'repeater bands' is concerned and you are correct. I was thinking in terms of the segmentation of such as far as simplex vs. repeaters. Some repeaters use the generally accepted bandplan's simplex frequencies, the notorious 147.435 in Los Angeles comes to mind.
>
> You are also correct about Part 97 not being exclusive as you illustrated by SSTV, IRLP, etc. That does not address my initial question about MCW ONLY being a legal form of ID and that is not just

for repeaters.

See my comments above. :)

Join us Saturday Oct. 6 at the clubhouse for a good old-fashioned Steak Fry. That's a New York Strip steak, Baked potato, salad and beverage for only $7.00....As I said ONLY $7.00. Feel free to bring a desert to pass if you like. There will be a discount for kids of course.

Hope to see you there.

3456. Kent County 2007 ARRL ARES Simulated Emergency Test information

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-09-20 03:52:06 UTC
From: Jeff's Lists
Topic: 3456 Message: 3456

Please forward this to all amateur radio operators interested in participating. All are invited residents of Kent County or not!

2007 Simulated Emergency Test

October 6 8AM - 5PM

The ARRL Simulated Emergency Test is a nationwide exercise in emergency communications, administered by ARRL Field Organization Leaders including Emergency Coordinators, District Emergency Coordinators, Section Emergency Coordinators and Net Managers. Many other Section Leaders like the Section Manager and the Section Traffic Manager may have a hand in planning the exercises and/or reviewing the results. Amateur Radio Emergency Service (ARES), National Traffic System (NTS), Radio Amateur Civil Emergency Service (RACES) and other public-service oriented groups can be involved. The SET weekend gives communicators the opportunity to focus on the emergency-communications capability within your community while interacting with NTS nets

How to Join the SET

To participate in this year's emergency test, contact your Kent County ARRL emergency coordinator @ jnawrot@... if your interested in participating. Whether you're a new licensee or an experienced radio amateur, the SET is a golden opportunity to learn or practice useful skills in traffic handling, net operation and emergency communications protocols and management.

Purpose of SET

1. To find out the strengths and weaknesses of ARES, NTS, RACES and other groups in providing emergency communications.
2. To provide a public demonstration--to served agencies such as the American Red Cross, the emergency management agency and through the news media--of the value to the public that Amateur Radio provides, particularly in time of need.
3. To help radio amateurs gain experience in communications using standard procedures and a variety of modes under simulated-emergency conditions.

Important info

1. We will have a training program during the normal ARES / RACES meeting on September 27th at 7:00 PM at KCSD 701 Ball Ave NE

2. All Amateurs are invited to participate in the SET but need to register beforehand @ http://www.kcraces.net/signup/set.php we will update

people from this list letting them know where to go and what to do.

3. The event will happen October 6th from 8:00 am - 5:00 pm

4. You can participate in the event as much as you want

Mark:

Again, methinks thee splitteth hairs. You just can't "let go" of a particular idea, and seem to delight in continuing an otherwise dead argument. IF (and I can't emphasize "IF" strongly enough using ASCII text), if using F2 to send Morse code ID's were not sufficient to ID a voice repeater, then many repeaters have been operating illegally since the early 70's, if not before. Prior to digital voice recorders, most repeaters ID's ONLY with Morse code using F2 emission. Zero, zilch, none, NADA of them have received a pink ticket from the Friendly Candy Company for non compliance with the ID requirements. A few received notices if they didn't ID at all, but that's a totally different situation. Doesn't this tell you something?

A similar situation existed in the 80's and 90's with Packet Radio. Some folks insisted that a packet digipeater had to ID with CW. Indeed, some of the early TNC's had code written into them so that CW could be sent using unmodulated carrier of a FM rig. To do so required digging into the radio and installing a CW keying circuit. I don't remember details, but this was a "hot button" item with some of the "legalistic" hams within Packet Radio. Within a few months (less than a couple years if memory serves correct), the FCC clarified the interpretation of regs so that the digipeater could, unambiguously, ID using AX.25. I don't recall if the interpretation was written into the law, but I do know that the "so called requirement" was dropped. I was heavily into packet networking at the time, was aware of the "so called requirement" and I was amongst the 99.44% of the hams who operated packet used AX.25 for ID even before the "clarification."

3460. SSTV image server/repeater user manual rev.4

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-09-20 18:27:21 UTC
From: Joe Veldhuis
Topic: 3460 Message: 3460

Quite a bit has changed since I posted the last revision of the manual in early February, so here's an updated version:

http://www.electroblog.com:8090/sstvwx.pdf

This describes the image options that have been added since the last edition of the manual, and gives detailed instructions on how to use the new repeater mode. Feel free to give it a shot.

For those who can't or don't want to download and read the manual, here's a summary of important facts:

* The system runs on 445.125 MHz FM from a tower in northern Holland (intersection of 136th and Butternut)
* Use a DTMF pad to command it:
- 11: NWS local radar
- 15: Local radar with storm icons and lightning
- 20: NWS regional radar (MI/WI/IL/IN/OH)
- 30: Watches and warnings
- 31: Satellite image
- 70: Activate repeater mode for 1 hour (disables DTMF commands)
* To use the repeater:
- Send a 1750 Hz tone for a second
- After the repeater sends a 'K' to acknowledge, send your image
- Image will be retransmitted after a short delay

-Joe, N8FQ

KD8FXA de n8xx:

The "clear answer" to me was that folks (including me) have been legally operating repeaters using only F2 emission for ID for years. The most salient point was that none of them were cited before that. I was a trustee of a repeater for years, so I know of what I speak.

This conversation led K8TVZ to do the research, rather than just pointing to the particular rule about ID. Apparently the rules have had the provision about F2 being a voice mode (or equivalent wording) for years. Most folks just follow convention was that F2 was an okay substitute for the "CW or Voice" emission in the part of the ID rules, without researching the definition of "Voice". Laryn K8TVZ, who actually read the rules in 97.3(c)(5) is to be commended.

As for teaching, when I run into a question with which I'm unfamiliar, I tell the students of my ignorance, and either ask the assembled multitude, and/or look up the answer later. I never claim to be a "know it all" expert.

This might be a lesson to us all. If we don't understand something, read the overall context, not just a fragment.

But, it's a free country, and folks who like to comment without doing research can continue to expound.

3464. Tool Max Open this Saturday

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-09-21 16:09:53 UTC
From: Tool Max Ind. Supply
Topic: 3418 Message: 3464

We will be open this Saturday 9AM-12PM

I still need some more items for Sale. Bring your consignment items in today

HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $15 each
Connectors in Stock
SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30

We are the only Dealer in Michigan for Jetstream Products Check out the items available
http://www.jetstream-usa.com/index.shtml
14 Amp Jetstream Power Supply (28Amp and 45Amp),Antennas, Switches, and lighting arresters are in.

Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other items in Stock
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's
300 ohm twin lead 50Ft $10.00
RG-8 .$1.00 per Foot
RG-8X Coax Cable .45 per Foot
PL-259 Connectors $2.50 ea adadapters for RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $12
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

The only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.
Technician Class $18.95
General Class New as of July 1 $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Other Used Equipment on Consignment

Tubes A great Assortment of tested used Tubes $1-$4 each
95 Ft RG-8 9096 Coax Cable .45 per foot
RG-58 Cable .25 per foot
75 ohm Cable 9040 International Wire and Cable .35per foot
AL-80A Ameritron 1KW HF Amplifier $850 New lower price
Bearcat BC 560XLT 16 Ch Scanner $30 New lower Price

Yaesu FT-890 HF Radio needs new Finals for transmit $225
B&K Model 4011 Precision function Generator $60
B&K Model 2140 Oscilloscope $175
GW Model GDM-8135 Digital Multimeter $40
B & W Antenna Tuner VS-300A $40
RCA Volt Ohm Meter $25
Johnson SWR Meter $2
Barket & Williamson Low Pass Filter $5
Speakers $2 - $10
Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
DB 1015 10/15 meter High Gain Beam $50
Center Insulator for HF antenna $5
Rocky Mountain Radar Detector $175
LED Emergency Light Taking orders $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50
MFJ-722 Notch Filter $30.00
MFJ 407C keyer $15
Code Key $15
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
Sharp SF7320 working Copy Machine $50
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40

Heathkit items in stock

Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40
Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Keychain LED lights $1.50 and up
Other items coming in Daily

The POP machine is working, with cold sodas of your choice. Snacks are in. Have one of your favorer candies crackers, beef jerky or snacks.

Tool Max Industrial Supply is the retail store on Schamber Dr just off Pontaluna Rd and US-31 just north of the old Hob Knob or Michael's Restaurant (Now tore down) in Muskegon . We have tools, industrial suppliers and Ham radios for sale.For more information call me at 231 798-7898 I am in the Store from 9:00AM-4:30PM Monday-Friday. Stop by and see me for all your Ham needs.

Mark,

In my profession, I'm personally liable and the company for which I work is corporately liable, for any intentional mistook in design, fabrication, and even use (sometimes misuse) of the specification and processes which I design. That does not mean that I must be an expert in every aspect of the work, just that I must use my knowlege and practical judgement in design, and to know when to ask for help. I do not worry about every niggle, but I am concerned about the overall integrity of the processes which I design. I ask a safety engineer to work with me to make sure there are no obvious design flaws which could create a safety problem. I do not ask the general public in an open forum. The civil and criminal penalties in my profession are rather severe.

When something is so common as to become a defacto standard, it is frequently used, and has and will stand up in court if something goes awry which is totally unexpected.

My point is that, since F2 (Morse Code sent via audio over a FM carrier) was and is so common of a way to ID a repeater, then there MUST be a regulation or a FCC decision which supports its use. Due diligence by K8TVZ was the type of research that would have prevented a lengthy discourse on the subject by folks (like you and me) who aren't willing to do the research. The messages betwee your question and K8TVZ's answer, were just idle chatter. For my part, I ask forgiveness from the assembled multitude for contributing to this idle chatter.

Hank,

Here are a few reasons I don't accept "people have been doing it for years and no one has been cited" to indicate legality.

1) Kerchunking a repeater and not IDing. Do you know anyone that has been cited for doing it? Is it legal? No.

2) The use of a cross band repeater that does not correctly ID on both frequencies it transmits on. Same questions. Same answer.

3) The use of tactical call signs without using the operator's FCC assigned call to ID at the end of an exchange and/or every ten minutes. Again, same questions, and again, same answer.

4) Not related to amateur radio, but related to the FCC, making contacts on the 11 meter band in excess of 50 kilometers is also illegal and yet I know of no one that has ever been cited for it. That does not make it legal.

In all four cases I can't think of a single citation ever issued but I do know for sure that all four are illegal. The difference is that in all four of the above instances I can point out the exact FCC regulation being violated. The lack of issuance of a citation does not negate their illegality. In the case of our discussion of MCW for ID I could not locate the exact rules. Laryn either knew which section made it legal or found it where I did not think to look. Yes, he is to be commended for his efforts or knowledge as are any of us that don't rely upon unquestioned convention to guide us.

In the above 4 examples, people follow convention and in each one of those examples are operating illegally by doing so.

As for not being an expert, and not seeking to be one while assuming the role of a teacher, I feel that such practice is doing a disservice to the students and to the art in which they will become licensed to perform. Sadly, I am going against convention when I seek expertise but as you have seen, convention shall not by my guide nor my teacher. I prefer to lead rather than follow.

Bear in mind that in my profession, I must be an expert at what I do. As a licensed electrician if I am not an expert at my trade and make a mistake, other experts will be called in because of my failure. The experts I speak of are firefighters, EMTs and in a

worst case scenario, medical examiners. I prefer to carry my pursuit of expertise into amateur radio and pass my knowledge on to my students, and on to those reading discussions here on this reflector.

Is it not a common complaint among amateurs with tenure that the tests are too easy and that the newer members of our craft do not exhibit the same level of expertise that those in the past have shown? Is the situation getting worse, or is it getting better? I feel it is prudent to do my part to correct this issue by teaching above and beyond the answers to the tests, which are published with no explanation yet provide the unwashed a means to get a license and operate on our bands. Many complain, few take steps to correct.

I would like to leave you with this, the Basis and Purpose of amateur radio outlined as in 97.1 (c) "Encouragement and improvement of the amateur service through rules which provide for advancing skills in both the communications and technical phases of the art" and (d) "Expansion of the existing reservoir within the amateur radio service of trained operators, technicians, and electronics experts".

If I settle for convention as a guide, would I be fulfilling either of the above rules in my role as one that has agreed in writing to obey Part 97? Even more important, would I provide a valuable education to my students by refusing to look past convention or would I just be handing them a license on a plate by only teaching the answers to the tests and failing to seek and share anything further? Aside from my class, can you point out any which go beyond the long standing convention of 'teaching the test' and nothing more?

So, it's all about the students eh? I'll remember that specious argument for sometime later. I teach also. And at the age of 54, I am also a student. Yes, there is no such thing as stupid questions, but there sure is a case of beating dead horse 58 times.

>Bear in mind that in my profession, I must be an expert at what I do.

Geez, in just about ANY job today one has to be an expert. If that 17 year old kid delivering pizzas makes a driving mistaken, people can die. So just what does being a licensed electrician have to do with discussing the merits of F2A modulation? Oh yea, you studied for 800 hours. Well, since you are familiar with Part 97, I encourage you to read what I have to know, Parts 11,17,73 and 74. Sometimes Part 101 also. 16,789 pages (+/- 3 Db). So does that make me better than anyone else? I don't think so. And again, what does studying 800 hours have to do with F2A? This is a diversion of the discussion.

Are you a member of a club that owns a repeater? I'm guessing you are. Here is your homework. Look at Part 97, and find the part that states that a repeater has to have a control operator whenever it is on the air. It's there. So, does your club have someone at 3;15 am controlling it? I'll bet not. But now, thats a violation of the rules, just as serious as not identifying at 10.0000 minutes. So can you, as a club member, stand by and allow this purposeful violation to continue?

You state that you are just staying away from convention. I sure would like to know what your definition of convention is. I have worked with the FCC enforcement division over the years on numerous projects.

That has given me insight as to how the field people think and operate. Remember that one can never get a definitive answer from the FCC, only one that is good for that day.

So go back to your Part 97, do your homework, and when you answer about your control operators, I'll key you in on a few rules that just about every ham breaks every day. It'll make your day.

3477. Used Icom ICw32A for sale

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-09-22 01:02:14 UTC
From: T Behler
Topic: 3477 Message: 3477

Hello, everyone.

First of all, I want to say that if the following post is inappropriate for this list, please advise, and I'll not do it again. It just seems like this list is full of knowledgeable and friendly hams who might be able to help out.

I have for sale a used Icom ICW32A dual-band HT. The HT was purchased in March of 1998 for approximately $300.

The HT still transmits, and has a great receiver front end.

There are two problems with the radio that I believe someone with a bit of technological knowhow could fix, and if the problems could be fixed, this would be a perfectly good HT for someone to use.

The problems are as follows:

1. The conections on the jack panel on the top of the radio have become loose, so that the plugs for the mic, power supply, etc., do not make a sound electrical connection. and

2. The internal speaker in the radio itself has become muffled. This second problem is particularly surprising to me, since I have never dropped the radio, or done anything that should make this happen.

In all honesty, the above problems are not the reason I wish to sell the radio. My main reason for wanting to sell this radio is that I am a blind ham, and the radio simply is not the most "user friendly" radio to program. Quite simply, I'd rather put my money into buying a new more "user friendly" HT, rather than paying the costs to get the ICw32A fixed.

I have the original box, manual, and all other accessories that came with the radio when it was ordered back in 1998. I also will throw in the extra alkaline battery case for no additional charge.

I am asking $100 for the entire package, and that'll include shipping. And, this price is negotiable.

I am interested in fairness here, and would like to see this HT get repaired and go to someone who could use it.

If you have any interest in this at all, or if you have further questions, please e-mail me privately at:

kb8tyj@...

or call me at (231) 592-9854.

Thanks very much, and 73 from Tom Behler: KB8TYJ, Big Rapids

NWS Changes Severe Weather Alerts

Sep 18 03:16 PM US/Eastern
By JAY REEVES
Associated Press Writer

BIRMINGHAM, Ala. (AP) - The National Weather Service is revamping the way it has issued severe weather warnings for decades with a new system designed to mark a geographic bull's eye where a storm will hit.

The system, which goes into effect Oct. 1, switches from alerts based on county lines to notices aimed at specific communities, weather service officials said Tuesday. Using radar and computer modeling programs, the system is meant to predict the moment a storm will hit a community or even a certain crossroads.

Known as storm-based warnings, the new alerts could reduce a warning area from thousands of square miles to a few hundred square miles, experts said.

"A storm-based warning focuses on a storm itself and the geographic area that might be affected by it," said Eli Jacks, a meteorologist at weather service headquarters in suburban Washington. "We can really reduce the number of people being warned by reducing that geographic area."

The new system will initially be limited to warnings for tornadoes, severe thunderstorms, floods and marine hazards. Later, it will be expanded to include other threats like extreme heat, Jacks said.

Tornado forecasting began in the late 1940s, and the government started issuing weather warnings in the 1950s based on a network of storm spotters with radios and telephones. Warnings generally have been issued on a county-by-county basis ever since.

Under the new system, the weather service plans to issue warnings for specific storms and alert people who might be in the path. On a radar map, the warned areas appear as highlighted polygons rather than entire counties; forecasters will refer to commonly known landmarks like rivers and roads in written announcements.

Officials say the system also will make it easier to send weather warnings through cell phones and other handheld devices.

Some weather experts are concerned that radar has its limits and a fast-moving storm can change direction, suddenly taking aim at an area not mentioned in the storm warning. But Jacks said the system will be able to keep up with abrupt changes.

A report by the National Oceanic and Atmospheric Administration predicted the new system would save $100 million annually, mainly by cutting back on unneeded business closings and the amount of time people spend huddled in closets or basements during warnings.

"I think that is a very conservative estimate. It could be substantially more," said Daniel Sutter, who calculated the savings and is an associate economics professor at the University of Texas-Pan American.

The new warnings have worked well during trials in Indiana, said Dave Tucek, who coordinates severe weather warning in the agency's Indianapolis office.

"I think it has been a good system," said Tucek. "The idea behind it ... is that there is no reason to warn the northern end of a county about something that is in the southern end of a county."

The president of the Alabama Skywarn Foundation, Brian Peters, said the new system already is being used in some weather service warnings, which name a county being placed under alert and then specify a certain area that's particularly at risk.

But, he said, highlighting too narrow an area for a warning could be hazardous since storms can change direction, and radar has its limits. An undetected tilt in a twister could send it toward an area that was not under a warning if alert boxes are too small.

"That's what worries me, giving people a false sense of security," said Peters, a meteorologist with WBMA-TV in Birmingham who previously worked as the weather service's warning coordinator for Alabama.

Jacks said new warnings will be issued as storms move.

"You can issue as many storm-based warnings as you need," he said.

>As a licensed electrician if I am not an expert at my trade and make a
mistake,
>other experts will be called in because of my failure.
>The experts I speak of are firefighters, EMTs and in a worst case
scenario, medical examiners.
>I prefer to carry my pursuit of expertise into amateur radio and pass
my knowledge on
>to my students, and on to those reading discussions here on this
reflector.

Geez, in just about ANY job today one has to be an expert. If that
17 year old kid delivering pizzas makes a driving mistaken, people can die.
So just what does being a licensed electrician have to do with
discussing the merits of F2A modulation? Oh yea, you studied for 800
hours. Well, since you are familiar with Part 97, I encourage you to
read what I have to know, Parts 11,17,73 and 74. Sometimes Part 101
also. 16,789 pages (+/- 3 Db). So does that make me better than anyone
else? I don't think so. And again, what does studying 800 hours have to
do with F2A? This is a diversion of the discussion.

Are you a member of a club that owns a repeater? I'm guessing you
are. Here is your homework. Look at Part 97, and find the part that
states that a repeater has to have a control operator whenever it is on
the air. It's there. So, does your club have someone at 3;15 am

controlling it? I'll bet not. But now, thats a violation of the rules, just as serious as not identifying at 10.0000 minutes. So can you, as a club member, stand by and allow this purposeful violation to continue?

You state that you are just staying away from convention. I sure would like to know what your definition of convention is. I have worked with the FCC enforcement division over the years on numerous projects. That has given me insight as to how the field people think and operate. Remember that one can never get a definitive answer from the FCC, only one that is good for that day.

So go back to your Part 97, do your homework, and when you answer about your control operators, I'll key you in on a few rules that just about every ham breaks every day. It'll make your day.

teacher. I prefer to lead rather than follow.

So, it's all about the students eh? I'll remember that specious argument for sometime later. I teach also. And at the age of 54, I am also a student. Yes, there is no such thing as stupid questions, but there sure is a case of beating dead horse 58 times.

==> GET READY FOR THE SECOND ANNUAL ARRL ON-LINE AUCTION!

The Second Annual ARRL On-Line Auction kicks off October 24, running until November 2 on the ARRL Web site <http://www.arrl.org/auction>. This is your chance to pick up one-of-a-kind Amateur Radio items. To see what the Auction will offer this year, be sure to check out the Auction preview that begins October 17. Last year, the Auction attracted more than 4300 bidders from 36 countries. While the majority of buyers were from the USA, Canada and the UK, there were buyers from Australia, Malaysia, Grenada and Tanzania.

According to ARRL Chief Operating Officer Harold Kramer, WJ1B, "Last year's on-line auction was our first and it was a great success. When the bidding ended, we realized that we had sold 104 items and we had raised just over $37,000." Proceeds from the auction benefit ARRL education programs including activities to license new hams, strengthen Amateur Radio's emergency service training, offer continuing technical and operating education, as well as creating instructional materials.

This year's auction will include many products tested by the ARRL Lab for QST Product Review. These items include an ICOM IC-7800, a Ten-Tec Omni VII, a Palstar Auto Antenna Tuner, an MJF 974H Balanced Antenna Tuner and a Heil Traveler Headset. There will be many vintage items offered, including the antique transmitter featured in John Dilks' "Old Radio" column in the November 2007 issue of QST. Also, returning by popular demand will be five ARRL Lab unique "junque" boxes.

==> IARU REGION 2 CONFERENCE COMPLETES ITS WORK IN BRASILIA

Completing a week that included lengthy committee meetings and a half-day tour of Brazil's capital city, the delegates to the 16th IARU Region 2 General Assembly in Brasilia met in Plenary assembly on Friday, September 14 to complete their work. Members of the ARRL's delegation included President Joel Harrison, W5ZN; Vice President Kay Craigie, N3KN, and husband Carter, N3AO; CEO David Sumner, K1ZZ; Southeastern Division Director Frank Butler, W4RH; Chief Technology Officer Paul Rinaldo, W4RI, and Technical Relations Specialist Jon Siverling, WB3ERA.

Committee A, which deals with administrative matters, was chaired by Norma Leiva, HR2NL, of Honduras; the ARRL's Siverling served as secretary and interpreter. This committee presented the first report of the Conference and made a number of recommendations for Conference action, all of which were adopted. They include:

The establishment of a Region 2 Relief Fund with an initial transfer of $5000 from the general reserve of Region 2; additional contributions will be solicited. The Fund will be administered by the Executive Committee and will be available solely to assist Region 2 Member-Societies whose club stations and buildings, including antenna systems, are damaged by natural disaster.

The Executive Committee will develop a conference call process for Region 2 that includes objectives, action plans, due dates and score cards in order to improve communication among the Member-Societies and the Executive Committee

An offer by Radio Club Argentino to be responsible for the Spanish translation of the IARU Region 2 electronic bulletin was accepted.

Terms of reference for the Amateur Radio in Education Project that was adopted by the 15th General Assembly in 2004 were revised slightly to simplify the grant application process and encourage applications.

The Conference recognized Wolf Baron, TI2BY, of San Jose, Costa Rica, for his outstanding service to Amateur Radio by conducting on-the-air training on Sunday mornings for more than five years.

Several recommendations from the Region 2 Working Group on Emergency Communications were adopted. These include establishing an Emergency Communications Committee that will be responsible to the Executive Committee for carrying out planning, training and the maintenance of equipment and personnel inventories for emergency assistance deployment.

The Conference next received the report of Committee B/C, a combined technical and operational committee dealing with both HF and VHF/UHF matters. This committee was chaired by Ramon Santoyo, XE1KK, of Mexico City, Mexico; the ARRL's Rinaldo, served as secretary. The Plenary adopted all of the Committee's recommendations, including: A new Region 2 band plan for 160-10 meters was adopted, effective January 1, 2008. The new plan is modeled on one adopted previously by IARU Region 1, with regional differences taken into account; steps were taken to try to reduce interference to national emergency Nets, including establishing an inventory of such Nets and calling their importance to the attention of the radio amateur community; and an IARU Region 2 Diploma was approved, with some details remaining to be worked out by the Executive Committee.

The next report was from the Finance Committee, Committee D, chaired by Treasurer Noel Donawa, 9Y4NED, of Trinidad and Tobago. The Plenary accepted two recommendations from Committee D. The first is an effort to reach out to Member-Societies that have fallen behind in meeting their dues obligations to Region 2; they will be offered the opportunity to pay their back dues through 2006 at a 25 percent discount if they do so by January 15, 2008. The Plenary also directed the Executive Committee to study the existing dues structure, along with options and alternatives, and to report to the next General Assembly.

The Conference accepted the offer of the Club de Radio Aficionados de El Salvador (CRAS) to host the 17th General Assembly in 2010.

The Conference's last order of business was the election of officers and other Executive Committee members for the next three years. Rod Stafford, W6ROD, declined to stand for re-election as President but will remain a Director. Moving to the office of President is Secretary Reinaldo Leandro, YV5AMH, of Venezuela. Dario Jurado, HP1DJ, of Panama was re-elected Vice President, and Donawa was re-elected Treasurer and Director. Santoyo was newly elected as Secretary and joins the Executive Committee for the first time. The other Directors were re-elected: Daniel A. Lamoureux, VE2KA, of Canada; Pedro Rodriguez, CO2RP, of Cuba; Marco Tulio Gudiel, TG9AGD, of Guatemala; Gustavo de Faria Franco, PT2ADM, of Brazil, and Ron Szama, LU2AH, of Argentina. A provision of the Bylaws was amended to permit the Executive Committee to consist of 10 members rather than the customary nine.

The conferees expressed their deep appreciation to LABRE, host of the 16th General Assembly, for its outstanding hospitality. Forty delegates

and observers representing 18 countries in the Americas -- 11 in person, seven via proxy -- attended the Conference.

==> ARRL DAKOTA DIVISION VICE DIRECTOR TO RESIGN AS OF OCTOBER 1

Dakota Division Vice Director Twila Greenheck, N0JPH, announced her resignation effective Monday, October 1, due to family responsibilities; her term expires in 2008. She plans to continue serving the League as an ARRL Education Advisor and consultant to the Board of Directors' ad hoc Scouting Committee.

"Being part of the ARRL Board Family has been an incredible experience that I will always remember and cherish. The opportunity to serve with Director Jay Bellows representing the amateurs in the Dakota Division has surely been an honor," Greenheck said.

Bellows said, "Twila has been a joy to work with over the past eight years. From the first time I met her to the present she has been a tireless and effective advocate of increased ARRL efforts to reach out to youth and strengthen education in Amateur Radio. I look forward to her continued service to the League, especially as a member of the ARRL's Educational Advisory Group."

ARRL President Joel Harrison, W5ZN, will appoint a replacement.

==> ARRL ROANOKE DIVISION DIRECTOR TO BE FETED BY RADIO CLUB OF AMERICA

The Radio Club of America (RCA) has named ARRL Roanoke Division Director Dennis Bodson, PhD, PE, W4PWF, of Arlington, Virginia, as the recipient of the Sarnoff Citation. The award is given to recognize significant contributions to the advancement of electronic communications. Barry Goldwater, K7UGA (SK), was the first recipient of the Sarnoff Citation in 1973.

"I was shocked when I heard that I would receive the Sarnoff Citation," Bodson said. "I find it difficult to believe that I'll be on the dais with Walter Cronkite, KB2GSD." Bodson, Cronkite and QST and QEX author John S. "Jack" Belrose, PhD, VE2CV, are to receive the RCA's Armstrong Medal, the RCA's foremost achievement award and named for its first recipient, Major Edwin Armstrong, at the RCA's Annual Awards Banquet and Annual Meeting and Technical Symposium on November 16 in New York City. Andy Rooney of CBS's "60 Minutes" will be the keynote speaker.

Bodson, who is retired -- "Retired means different things to different people. I work, but on different things," he said -- displays an energy level that hardly anyone can match. Bodson is retired as chief of the Technology and Standards Division of the National Communications System (NCS) in 1998. In October 2005, he became a member of the executive staff of the Institute for Defense and Homeland Security where he is director of Telecommunications and Sensor Systems. Bodson is an ARRL Life Member and a member of the Institute of Electrical and Electronics Engineers (IEEE).

"Fifteen years ago, I had the opportunity [to serve on the ARRL Board of Directors]. I knew the former Division Director, and he suggested, 'get involved and run for Vice Director.' I was elected to that, and when he retired, I moved up to Director. I have enjoyed it, but everything comes to a change. I still have this year and two more years, and then I'll decide whether to run for re-election," Bodson said. He also is Vice President of the Arlington (Virginia) Amateur Radio Club (AARC).

Born in Washington, DC, Bodson always wanted to be an electrical engineer. He earned a BEE in 1961 and an MEE in 1963, both from The Catholic University of America in Washington. From 1963-1966, he served as an officer in the US Air Force assigned to the National Security Agency. From 1966-1969, he was with Vitro Laboratories, Atlantic Research Corporation and the US Army Materiel Command where he was engaged in research and development and systems engineering.

In 1970, Bodson began his long career with NCS, an interagency group of 23 federal departments and agencies managed by the Department of Homeland Security (DHS). While at NCS, Bodson continued his formal education and earned a Master's in public administration in 1976 from the University of Southern California's Washington Center for Public Affairs, and completed his PhD in electrical engineering in 1985 from California Western University. In recognition of his accomplishments in federal service, in 1999 Dennis received the IEEE's Charles Proteus Steinmetz Award. According to the IEEE's Web site, the award is "presented to an individual for exceptional contributions to the development and/or advancement of standards in the field of electrical and electronics engineering."

IEEE has seen a lot of Bodson since his beginning days as a student engineer. "My major professor said, 'Become active in your professional society.' I took him at heart and did so and never regretted it," he said. After retiring from NCS, Bodson increased his IEEE involvement, and by 2000, he was chairman of the IEEE Vehicular Technology Society (VTS) Standards Committee, reflecting his work on standards at NCS. He was a senior editor for the VTS quarterly bulletin, "News Digest," and later became its editor. "I became editor because we needed to do something, but then we got a real editor, Dr James Irvine. We went from a bulletin to a 60 page magazine," he said. Bodson is a Life Fellow of IEEE, where new Fellowships are limited to no more than one-tenth of one percent of the membership per year, making elevation to the status of Fellow in IEEE a particularly high distinction.

Soon after his retirement from NCS, Bodson served as president of the IEEE Engineering Management Society (EMS). For his service to EMS, he was given the EMS Engineering Manager of the Year Award. The IEEE Standards Association (IEEE-SA) bestowed on Bodson the IEEE-SA Distinguished Service Award in 2002. Bodson was then was elected President of VTS, where he continues on its board of governors as Junior Past President.

Bodson has written more than 60 technical articles and has published four books. He joined RCA in 1976, became a Fellow in 1981 and became an RCA Life Member in 1996.

The RCA banquet is open to members, non-members and guests. Registration is required; registration forms can be downloaded here <http://homeeverestkc.net/dbishop13322/registration_form/registration_form.doc>. To learn more about the Radio Club of America and their awards, please visit the RCA Web site <http://www.radioclubofamerica.org/>. The ARRL thanks RCA Fellow and ARRL Life Member Don Bishop, W0WO, for this information.

==> ARRL CONTINUES TO DEAL WITH DEPARTMENT OF DEFENSE OVER PAVE PAWS SITES

The ARRL participated in a teleconference call on Wednesday, September 19, with the Department of Defense (DoD) regarding Amateur Radio repeaters interfering with the Air Force's PAVE Paws radar system.

According to ARRL Regulatory Branch Manager Dan Henderson, N1ND, "The DoD acknowledges that it has seen changes at some repeater sites, but not all of them." He said the DoD has revisited the Massachusetts repeaters, located near Otis Air Force Base on Cape Cod, to "remeasure the numbers. Some Massachusetts repeater owners have volunteered to completely turn off their systems and some others have made changes, but more is needed at both PAVE Paws radar sites."

The DoD, Henderson continued, has identified additional sources of interference in Massachusetts. "This was not really unexpected and is part of what has become an ongoing project. The ARRL will begin working with these repeater owners as soon as the DoD provides us with specific information," he said.

In California, where more than 100 repeaters are being scrutinized by the DoD, Henderson said the majority of repeaters have not been mitigated: "The Air Force has not had a chance to revisit Beale Air Force Base for new measurements, but it will be happening soon."

Reports have circulated that a number of California repeater owners have decided to take no further action about mitigating the interference unless they receive official notice from the Federal Communications Commission. "If these reports are true," Henderson said, "it is unfortunate. The FCC has stayed abreast of the discussions between the League and the DoD, and they are prepared to act appropriately if they are contacted by the DoD."

He continued: "The DoD has indicated they are willing to allow the ARRL to continue its attempts to mitigate the interference; however, they have expressed a sense of urgency that this must come to a conclusion. Those waiting for FCC action may find it coming sooner rather than later."

==> FCC AMATEUR RADIO ENFORCEMENT CORRESPONDENCE POSTED

On August 23, the FCC's Enforcement Bureau released new Amateur Radio enforcement actions. Todd C. Browne, KD0PA; Keith W. Coad, KW2C; Santos

J. Rodriguez Colon, KP4DC; Jerry L. Counsellor, WE5JC; Pablo Diaz-Alequin, KP4MC, and Donald B. Flowers, NC4DF, all received letters from the Commission concerning their vanity call signs. These amateurs received their vanity call signs by stating they were former holders of these call signs, but the FCC can find no documentation substantiating their claims.

Robert C. Moldenhauer, W9CQ, also received a letter concerning his vanity call sign that he requested as a "close relative" of the former holder of that call sign. The FCC told Moldenhauer they can find no documentation of his claim.

Steve L. Wingate, K6TXH, received notice from the Commission that the recordings he had requested concerning complaints alleging his lack of station control and deliberate interference had been sent to him. Wingate was also granted an additional 30 days to respond to Commission correspondence.

The FCC Enforcement Bureau now posts Amateur Radio enforcement-related correspondence and documents -- with some exceptions -- on its own Web site <http://www.fcc.gov/eb/AmateurActions/Welcome.html>. Direct all questions concerning the Amateur Radio Service Enforcement Actions Web postings via e-mail only to Riley Hollingsworth <fccham@...> in the FCC Spectrum Enforcement Division.

==>SOLAR UPDATE

Tad "All for the Love of Sun(spots)" Cook, K7RA, this week reports: Fifteen days in a row with no sunspots, but this may change soon. Take a look at sunspot numbers compared to solar flux for the current third quarter of 2007 <http://www.sec.noaa.gov/ftpdir/indices/quar_DSD.txt>. Notice that when there are zero sunspots, the solar flux (the amount of energy we receive from the Sun at a wavelength of 10.7 cm or 2800 MHz) is always below 70. Recently, the flux value has been below 70, and for some time now the US Air Force has predicted a slight rise in solar flux to 70 for today, September 21. You can see those predictions here <http://sec.noaa.gov/ftpmenu/forecasts/45DF.html>. If we examine predictions from early September on that page, note they show a return to 70 solar flux for September 17; later forecasts show it creeping out to September 18, then 19 and finally for yesterday, the prediction for today is 70. We also see the return of sunspot group 970 set for September 21-23 in September 21 Solar Region Summary <http://www.sec.noaa.gov/ftpmenu/forecasts/SRS.html>. It would be great to have at least one sunspot when fall returns. The official autumnal equinox is this weekend, September 23 at 0951 UTC. Sunspot numbers for September 13-19 were 0, 0, 0, 0, 0, 0 and 0 with a mean of 0. The 10.7 cm flux was 66.4, 66.8, 67.7, 67, 66.9, 66.5 and 66.8 with a mean of 66.9. Estimated planetary A indices were 2, 4, 4, 2, 2, 3 and 4 with a mean of 3. Estimated mid-latitude A indices were 1, 3, 3, 2, 1, 2 and 2 with a mean of 2. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page

<http://www.arrl.org/tis/info/propagation.html>.

==>IN BRIEF:

* This weekend on the radio: This weekend, the NCCC Sprint (CW) is September 21, while the AGCW VHF/UHF Contest is September 22. The Scandinavian Activity Contest (SSB) and CIS DX Contest are September 22-23. The SKCC Weekend Sprint is September 23 and the 222 MHz Fall Sprint is September 25. Next week, look for the ARRL EME Competition on September 29-30. The NCCC Sprint (CW) is September 28. On September 29-30, look for the CQ Worldwide DX Contest (RTTY), CQIR - Ireland Calling, the Texas QSO Party, FISTS Coast to Coast Contest and the UBA ON Contest (CW). The ARS Spartan Sprint is October 2. The YLRL Anniversary Party (CW) is October 2-4, the German Telegraphy Contest and the 432 MHz Fall Sprint are October 3. The SARL 80 Meter QSO Party is October 4. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contester's Rate Sheet <http://www.arrl.org/contests/rate-sheet/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, October 7, 2007 for these online courses beginning on Friday October 19, 2007: Amateur Radio Emergency Communications Level 2 (EC-002); Amateur Radio Emergency Communications Level 3 (EC-003R2); Antenna Modeling (EC-004); HF Digital Communications (EC-005); VHF/UHF - Life Beyond the Repeater (EC-008), and Radio Frequency Propagation (EC-011). To learn more, visit the CCE Course Listing page <http://www.arrl.org/cce/courses.html> or contact the Continuing Education Program Coordinator <cce@...>.

* Carl Gardenias, WU6D, Files Appeal with ARRL Executive Committee: Carl Gardenias, WU6D, who was disqualified last week as a candidate in the race for Director of the ARRL Southwestern Division, filed an appeal with the ARRL Executive Committee on Monday, September 17. Gardenias was disqualified by the League's Ethics and Elections Committee for not acting promptly in response to communications from that committee requesting he correct misinformation sent out on his behalf concerning other candidates. The Executive Board is currently considering Gardenias' appeal.

* ICOM Returns as November Sweepstakes Principal Awards Sponsor: ICOM has generously agreed to serve for a third year as principal awards sponsor for the 2007 ARRL November Sweepstakes. The Amateur Radio equipment manufacturer's first such sponsorship was for the 2005 events. The 2007 CW Sweeps takes place November 3-4, while the phone Sweeps is November 17-18. Under its agreement with ARRL, ICOM will be the principal sponsor for nearly 150 unsponsored contest plaques that recognize various levels of operating achievement in the popular annual competition. "Competitive operating events are the proving grounds for equipment, operators and antenna systems," said ARRL Membership and

Volunteer Programs Manager Dave Patton, NN1N. "ICOM Amateur Radio Products National Sales Manager Ray Novak, N9JA, and ICOM recognize the importance of these testing grounds, as well as the high levels of achievement in contests that deserve to have 'some wood on the wall.' The Amateur Radio industry has been terrific in supporting many contests and activities run by ARRL, and we know first hand that participants appreciate the attention and devotion shown to these pursuits." Patton predicts nearly 3000 entries will be received for the November Sweepstakes this fall.

* Thomas B. J. Atkins, VE3CDM (SK): Former ARRL Canadian Division Director and IARU Region 2 President Tom Atkins, VE3CDM, passed away Tuesday, September 18. He was 81. Atkins was the last Director of the ARRL's Canadian Division before the Canadian Radio Relay League (CRRL), a predecessor to the Radio Amateurs of Canada (RAC), began to operate independently in 1988. He served as ARRL Director from September 20, 1982 to January 1, 1988. Atkins also served as President of IARU Region 2 for two three-year terms, 1995-2001, after holding every other office in Region 2 -- Treasurer, Secretary and Vice President -- in succession between 1983 and 1995. He also served on the IARU Administrative Council and as an IARU Expert Consultant

* ARRL Receives MARS Call Sign: The ARRL now has a new Emergency Communications tool in its toolbox -- MARS call sign AAN1ARL. According to W1AW Station Manager Joe Carcia, NJ1Q, "The call sign was requested to reflect both the holder of the license (ARRL) and the various MARS services (Army, Air Force and Navy)." The MARS station will be housed at W1AW, the Hiram Percy Maxim Memorial Station. ARRL Emergency Preparedness and Response Manager Dennis Dura, K2DCD, said, "The establishment of an ARMY MARS call sign for W1AW begins a relationship with the Military Affiliate Radio System and the ARRL. Our two organizations are working toward the near-term establishment of a Memorandum of Understanding. Additionally, the League and MARS will utilize each other's personnel and technical capabilities to further enhance our emergency preparedness and response capabilities." The MARS program consists of licensed Amateur Radio operators who are interested in military communications on a local, national and international basis as an adjunct to normal communications. MARS has a long and proud history of providing worldwide auxiliary emergency communications during times of need. The combined three service MARS programs (Army, Air Force, and Navy-Marine Corps) volunteer force of more than 5000 dedicated and skilled Amateur Radio operators is the backbone of the MARS program. There are Army MARS stations in Japan, Korea, Hawaii, Panama, the Virgin Islands, Puerto Rico, Alaska, Central America, Africa, Germany and the continental United States. MARS responders operate on specially assigned military radio frequencies in voice, teletype and packet modes of communications.

* North Carolina Ham Celebrates 100th Birthday: Harry Mills, K4HU, of Hendersonville, North Carolina, celebrated his 100th birthday September 19. In 1922, when Mills was first licensed, there was no Federal

Communications Commission; communications were regulated under the Department of Commerce with Herbert Hoover as Secretary of Commerce. Mills has been a member of the League since February 1, 1936 - more than 71 years; he is also a member of QCWA. Still active on the air, Mills can be heard twice weekly checking into the AM net on 3810 kHz, as well as the Chapter 76 QCWA SSB net on Saturday mornings on 3930 kHz. Mills credits a crystal receiver project from the Boy Scout handbook in 1919 for his interest in wireless and radio. ARRL Membership Manager Katie Breen, W1KRB, passed along birthday wishes: "On behalf of the Board, Staff and 152,000 members of ARRL -- we all wish a hearty Happy Birthday to Harry, K4HU. It's not too often that we have the opportunity to wish a Happy Birthday to someone who has been a member for 71 years -- yes, 71 years! I knew when I started here that we have thousands of dedicated members, but Harry exemplifies our long-time members. We are so pleased for Harry and wish him a very Happy 100th Birthday." -- Tnx John Dilks, K2TQN, and Harold Kinley, WA4GIB

* L. B. Cebik, W4RNL, Wins August QST Cover Plaque Award: The winner of the QST Cover Plaque Award for August is L. B. Cebik, W4RNL, for his article "A Short Boom, Wideband 3 Element Yagi for 6 Meters." Congratulations, L. B.! The winner of the QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/members-only/qstvote.html>. Cast a ballot for your favorite article in the September issue by Sunday, September 30.

* Hams Named to Key NASA Positions: Veteran astronaut Ellen Ochoa, KB5TZZ, has been named Deputy Director of NASA's Johnson Space Center. Ochoa has served as Director of Flight Crew Operations at Johnson. She will succeed Bob Cabana, KC5HBV, who was named Director of NASA's Stennis Space Center in Mississippi. Ochoa and Cabana have each flown in space four times. Ochoa flew on space shuttle missions STS-56 on Discovery in 1993, STS-66 on Atlantis in 1994, STS-96 on Discovery in 1999 and STS-110 on Atlantis in 2002, logging a total of 978 hours in space. She became Deputy Director of Flight Crew Operations at Johnson in December 2002 and Director of Flight Crew Operations in September 2006. Cabana has logged more than 1010 hours in space. He served as pilot on STS-41 in 1990 and STS-53 in 1992, both on Discovery. He was mission commander on STS-65 on Columbia in 1994 and STS-88 on Endeavour in 1998, the first International Space Station assembly mission. "Having friends in high places is always a good thing," said ARRL ARISS Program Manager Rosalie White, K1STO. "It is a great thing for the Amateur Radio on the International Space Station program to have Ellen and Bob in these high-level positions at important NASA facilities. They are familiar with Shuttle Amateur Radio Experiment (SAREX) and ARISS; recalling good experiences the two programs have provided students over the years can be very helpful to the future of Amateur Radio in space."

* Oklahoma Hams Assist with Accident Scene: On September 8, Myrna Cobb, KE5IAD, of Bethany, Oklahoma, and Victor Stillman, KE5LQU, of Edmond, Oklahoma, were driving home from an ARES exercise and talking with

friends on the K5EOK EARS repeater in Edmond. As they were talking, a car about 150 yards ahead of them on the highway started hydroplaning. The car skidded into a tractor-trailer, causing caused both vehicles to wreck. Still on the radio, Cobb and Stillman told Frankie Tassone, KE5KQL, about the accident, giving him the accident details. Tassone then contacted the Oklahoma Highway Patrol. Cobb and Stillman were able to immediately respond when they pulled up on the scene. Stillman, a volunteer fire fighter and EMT, supplied first aid to the victims while Cobb directed traffic, keeping the scene clear for more than 20 minutes before the Highway Patrol arrived. - Tnx Mark D. Conklin, N7XYO

* Dayton ARA Looking to Honor Silent Keys: If you know of a ham who has died in service during the conflicts in Afghanistan or Iraq, the Dayton Amateur Radio Association would like to honor them. DARA is looking to publish a memorial page in the Hamvention 2008 program listing these SKs, with their name, call sign, branch of service, rank and unit. For more information, please contact Ed Collins, N8NUY <n8nuy@...>.

* Let Us Know What You Think: What's your favorite part of The ARRL Letter? What kind of stories would you like to see in the Letter? Would you prefer the Letter in an HTML format? This is your Letter and your chance to let your voice be heard. Please send your suggestions to ARRL News Editor S. Khrystyne Keane, K1SFA, at k1sfa@..., with the subject line "ARRL Letter Suggestions." All messages will be read and discussed, and we look forward to implementing positive suggestions into the ARRL Letter.

========== The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the National Association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

Jim:

In my opinion, this is probably a good thing, although I do echo the concern of some that making warning areas too narrow could bring problems if a storm suddenly changes direction or characteristics. I've always been an advocate of thinking that suggests more warning is better than not enough.

I did ask Mike Heathfield from the NWS Grand Rapids office whether this would affect how our current public alert warning radios work, and he indicated there'd be no basic change. In other words, the radio would be activated for Mecosta County, even if the warning specifically only covered the eastern end of the county. Obviously, we'll see as time progresses, but this is where I think things stand now.

Will be interested in what others have to say.

NWS Changes Severe Weather Alerts

Sep 18 03:16 PM US/Eastern
By JAY REEVES
Associated Press Writer

BIRMINGHAM, Ala. (AP) - The National Weather Service is revamping the way it has issued severe weather warnings for decades with a new system designed to mark a geographic bull's eye where a storm will hit.

The system, which goes into effect Oct. 1, switches from alerts based on county lines to notices aimed at specific communities, weather service officials said Tuesday. Using radar and computer modeling programs, the system is meant to predict the moment a storm will hit a community or even a certain crossroads.

Known as storm-based warnings, the new alerts could reduce a warning area from thousands of square miles to a few hundred square miles, experts said.

"A storm-based warning focuses on a storm itself and the geographic area that might be affected by it," said Eli Jacks, a meteorologist at weather service headquarters in suburban Washington. "We can really reduce the number of people being warned by reducing that geographic area."

The new system will initially be limited to warnings for tornadoes, severe thunderstorms, floods and marine hazards. Later, it will be expanded to include other threats like extreme heat, Jacks said.

Tornado forecasting began in the late 1940s, and the government started issuing weather warnings in the 1950s based on a network of storm spotters with radios and telephones. Warnings generally have been issued on a county-by-county basis ever since.

Under the new system, the weather service plans to issue warnings for specific storms and alert people who might be in the path. On a radar map, the warned areas appear as highlighted polygons rather than entire counties; forecasters will refer to commonly known landmarks like rivers and roads in written announcements.

Officials say the system also will make it easier to send weather warnings through cell phones and other handheld devices.

Some weather experts are concerned that radar has its limits and a fast-moving storm can change direction, suddenly taking aim at an area not mentioned in the storm warning. But Jacks said the system will be able to keep up with abrupt changes.

A report by the National Oceanic and Atmospheric Administration predicted the new system would save $100 million annually, mainly by cutting back on unneeded business closings and the amount of time people spend huddled in closets or basements during warnings.

"I think that is a very conservative estimate. It could be substantially more," said Daniel Sutter, who calculated the savings and is an associate economics professor at the University of Texas-Pan American.

The new warnings have worked well during trials in Indiana, said Dave Tucek, who coordinates severe weather warning in the agency's Indianapolis office.

"I think it has been a good system," said Tucek. "The idea behind it ... is that there is no reason to warn the northern end of a county about something that is in the southern end of a county."

The president of the Alabama Skywarn Foundation, Brian Peters, said the new system already is being used in some weather service warnings, which name a county being placed under alert and then

specify a certain area that's particularly at risk.

But, he said, highlighting too narrow an area for a warning could be hazardous since storms can change direction, and radar has its limits. An undetected tilt in a twister could send it toward an area that was not under a warning if alert boxes are too small.

"That's what worries me, giving people a false sense of security," said Peters, a meteorologist with WBMA-TV in Birmingham who previously worked as the weather service's warning coordinator for Alabama.

Jacks said new warnings will be issued as storms move.

"You can issue as many storm-based warnings as you need," he said.

Back in 1999 when I got my first SAME radio, it was my understanding that the NWS can subdivide each county into 9 possible segments from which they tone out alerts. In other words, whatever the FIPS code happens to be for any given county, one of the digits within that code can be changed from 1-9 which will alert a county but then only those radios for those who have them subprogrammed for their given location; Muskegon County then i.e. Norton Shores, Fruitport Township, Whitehall, ect. They have then never fully utilized to its potential the SAME purpose of the system's design until now if they were to start going this route which it doesn't sound like they will if they still plan to tone an entire county.

All:

I'm taking lessons from the Jim, KC8PCJ school of typing. Lots of back spacing and word spell checks. Ugly.

The air bubble's size has been slowly decreasing in my eye. Today there is a line through the center of my vision. Above the line is clearly beautiful eyesight of my surroundings. Beautiful, too, because I had been wearing glasses for the previous forty years and now the view is more or less in focus. (cataract surgery implanted the eye correction, I'm told) Below is the stuff distorted by the air bubble. Above the lines are straight, parallel, and quite bright. Below stuff is equally bright and really only visible in close. There are no fishes swimming below the surface of the line, although the view there is clearly like seeing under water.

The doctor said I'd be looking under the bubble by about this time. I guess the image in your eye is upside down and the brain puts the world together back upright. That's why it looks like I'm seeing the world over the bubble instead of from under the bubble.

It is amazing the reality, in all its glory. Amazing and humbling.

73 to all.

Bill, AB8SC
MAARC guy

Jeff,
I'm honestly interested in both items, but I don't get payed until the third of october, if you can hold on to them for that long, I'd gladly take them off of your hands. Not sure how you want payment to be made, but I'll be able to get you money however you'd like it.

If you can get them sold before then, I will understand, but if not, I'm definitely interested.

Hi, all.

Here's a quick note from Mike Heathfield of the Grand Rapids NWS office, confirming what I said earlier about the new NWS storm-based warning system not affecting the functioning of our current public alert radios.

>>> NWS Changes Severe Weather Alerts
>>>
>>> Sep 18 03:16 PM US/Eastern
>>> By JAY REEVES
>>> Associated Press Writer
>>>
>>> BIRMINGHAM, Ala. (AP) - The National Weather Service is revamping the
>>> way it has issued severe weather warnings for decades with a new
>>> system designed to mark a geographic bull's eye where a storm will
>>> hit.
>>>
>>> The system, which goes into effect Oct. 1, switches from alerts based
>>> on county lines to notices aimed at specific communities, weather
>>> service officials said Tuesday. Using radar and computer modeling
>>> programs, the system is meant to predict the moment a storm will hit
>>> a community or even a certain crossroads.
>>>
>>> Known as storm-based warnings, the new alerts could reduce a warning
>>> area from thousands of square miles to a few hundred square miles,
>>> experts said.
>>>
>>> "A storm-based warning focuses on a storm itself and the geographic
>>> area that might be affected by it," said Eli Jacks, a meteorologist
>>> at weather service headquarters in suburban Washington. "We can
>>> really reduce the number of people being warned by reducing that
>>> geographic area."
>>>
>>> The new system will initially be limited to warnings for tornadoes,
>>> severe thunderstorms, floods and marine hazards. Later, it will be
>>> expanded to include other threats like extreme heat, Jacks said.
>>>
>>> Tornado forecasting began in the late 1940s, and the government
>>> started issuing weather warnings in the 1950s based on a network of
>>> storm spotters with radios and telephones. Warnings generally have
>>> been issued on a county-by-county basis ever since.
>>>
>>> Under the new system, the weather service plans to issue warnings for
>>> specific storms and alert people who might be in the path. On a radar
>>> map, the warned areas appear as highlighted polygons rather than
>>> entire counties; forecasters will refer to commonly known landmarks
>>> like rivers and roads in written announcements.
>>>
>>> Officials say the system also will make it easier to send weather

>>> warnings through cell phones and other handheld devices.
>>>
>>> Some weather experts are concerned that radar has its limits and a
>>> fast-moving storm can change direction, suddenly taking aim at an
>>> area not mentioned in the storm warning. But Jacks said the system
>>> will be able to keep up with abrupt changes.
>>>
>>> A report by the National Oceanic and Atmospheric Administration
>>> predicted the new system would save $100 million annually, mainly by
>>> cutting back on unneeded business closings and the amount of time
>>> people spend huddled in closets or basements during warnings.
>>>
>>> "I think that is a very conservative estimate. It could be
>>> substantially more," said Daniel Sutter, who calculated the savings
>>> and is an associate economics professor at the University of Texas-
>>> Pan American.
>>>
>>> The new warnings have worked well during trials in Indiana, said Dave
>>> Tucek, who coordinates severe weather warning in the agency's
>>> Indianapolis office.
>>>
>>> "I think it has been a good system," said Tucek. "The idea behind
>>> it ... is that there is no reason to warn the northern end of a
>>> county about something that is in the southern end of a county."
>>>
>>> The president of the Alabama Skywarn Foundation, Brian Peters, said
>>> the new system already is being used in some weather service
>>> warnings, which name a county being placed under alert and then
>>> specify a certain area that's particularly at risk.
>>>
>>> But, he said, highlighting too narrow an area for a warning could be
>>> hazardous since storms can change direction, and radar has its
>>> limits. An undetected tilt in a twister could send it toward an area
>>> that was not under a warning if alert boxes are too small.
>>>
>>> "That's what worries me, giving people a false sense of security,"
>>> said Peters, a meteorologist with WBMA-TV in Birmingham who
>>> previously worked as the weather service's warning coordinator for
>>> Alabama.
>>>
>>> Jacks said new warnings will be issued as storms move.
>>>
>>> "You can issue as many storm-based warnings as you need," he said.
>>>

I still need some more items for Sale. Bring your consignment items in today

We will be open this Saturday 9AM-12PM

New this week
Heathkit SA-2040 1KW Tuner $160
JT776SMA HT Antenna $19
Signalcrafter SW-77C SWR meter $5
Headphone/Mike Ear Headset $5
Radio Shack Woodgrain Speaker $5
IC-255A 2 meter Radio with no tone board Like New from 1982 Good Packet Radio $45

14 Amp Jetstream Power Supply $55
28Amp Power Supply $90 With Meters $110
45Amp Power Supply $170
Lighting Arresters $21.50 ea

We have Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other New items in Stock

HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $15 each
New SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
300 ohm twin lead 50Ft $10.00
RG-58 Cable .25 per foot
RG-8 .$1.00 per Foot
RG-8X Coax Cable .45 per Foot
95 Ft RG-8 9096 Coax Cable .45 per foot
75 ohm Cable 9040 International Wire and Cable .35per foot
PL-259 Connectors $2.50 ea adadapters for RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $12
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's

We are the only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.
Technician Class $18.95
General Class New as of July 1 $20.95
Extra Class $21.95

FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Other Used Equipment on Consignment

Tubes A great Assortment of tested used Tubes $1-$4 each
AL-80A Ameritron 1KW HF Amplifier $850 New lower price
Bearcat BC 560XLT 16 Ch Scanner $30 New lower Price
B&K Model 4011 Precision function Generator $60
B&K Model 2140 Oscilloscope $175
GW Model GDM-8135 Digital Multimeter $40
B & W Antenna Tuner VS-300A $40
RCA Volt Ohm Meter $25
Barket & Williamson Low Pass Filter $5
Speakers $2 - $10
Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
Center Insulator for HF antenna $5
Rocky Mountain Radar Detector $175
LED Emergency Light $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50
MFJ-722 Notch Filter $30.00
MFJ 407C keyer $15
Code Key $15
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
Sharp SF7320 working Copy Machine $50
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40

Heathkit items in stock

Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40
Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Keychain LED lights $1.50 and up
Other items coming in Daily

The POP machine is working, with cold sodas of your choice. Snacks are in. Have one of your favorer candies crackers, beef jerky or snacks.

Tool Max Industrial Supply is the retail store on Schamber Dr just off Pontaluna Rd and US-31 just north of the old Hob Knob or Michael's Restaurant (Now tore down) in Muskegon . We have tools, industrial suppliers and Ham radios for sale.For more information call me at 231 798-7898 I am in the Store from 9:00AM-4:30PM Monday-Friday. Stop by and see me for all your Ham needs.

3501. The Signal From Hell

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-09-30 11:33:14 UTC
From: Mark Thompson
Topic: 3501 Message: 3501

The Signal From Hell
Hank Greeb, N8XX
n8xx@...
September 28, 2007

A FYBO QRP contest way up north? Not 'til Hell freezes over! (PS: It did.)

This is an outbuilding typically used as a woodshed, but we found it open and used it as the 40 meter operating shack. We had to close a wide gap that was used as a window so that wind wouldn't blow snow in and goof up the electronics. [Hank Greeb, N8XX, Photo]

Ed Kwik, AB8DF, and I warm up over at the 40 meter operating shack. [Cortland Richmond, KA5S, Photo]

Cortland, KA5S, works 15 meter CW in a building normally used as a wedding chapel. Actually, he found his rig wasn't transmitting enough to make a contact, but he tried. [Hank Greeb, N8XX, Photo]

Have you been so perturbed at your buddy that you wanted to tell him or her to "go to you know where"? Well, there's a place in Michigan where that's very common -- a "wide spot in the road" with the name of Hell, Michigan, about 20 miles from Ann Arbor. When the Arizona ScQRPions QRP Club announced the 2007 "Freeze Your Buns Off" contest for February 3, the logical place to do that seemed to be where "Hell was frozen over."

The object of this contest is to take your QRP rig out into the field and make as many contacts as possible before you either give up or freeze a certain part of your anatomy. The scoring gives a multiplier of 1 if the operating temperature is greater than 65 degrees, 2 if you're operating between 55 and 64, down to a multiplier of 6 if the temperature is less than 20. Another multiplier of 4 is if you're operating outside, a multiplier of 2 if you're operating independent of ac mains power. It's relatively easy to get an overall multiplier of 48. Plus, a multiplier is given for each state, province or country you work. Wow!

It Froze!

So, the idea of a "Hellxpedition" was born. With Hell freezing over at that time of year, we figured the temperature multiplier of 6 was a snap! The next step was to figure out a logical call that might attract a few more contacts. Why not N8H -- so we applied for it and received it!

As someone said, "All the rest is history." I advertised this idea on several reflectors, and very soon Ed, AB8DF, from Waterford (near Detroit), and Cortland, KA5S, from Ada (near Grand Rapids) volunteered to join the effort. We decided that we'd each bring a rig and determine choice of bands by lottery.

As predicted, Hell was really frozen. When I arrived on Friday, the 2nd, the temperature was in the low teens, and the wind was brisk. After a few tries two halyards were strung over two trees, at about 50 feet, and the third point for ends of two antennae were chosen, but, because of the wind, I figured the antenna might blow down overnight. WRONG IDEA.

Murphy Visits

The next morning, the temperature was 2 degrees, and wind blew one of the halyards into the tree, where it was hopelessly tangled on a branch about 30 feet high. After just a little

bit of thought, it was determined that 30 feet would have to do, because the wind and snow was just too much to attempt a launch of another halyard. Then the 40 meter rig wouldn't put power to the tuner -- it turned out to be broken coax, which was found and fixed. Also, alternate power from a generator wouldn't start at such a cold temperature, so we gave up and plugged into the ac mains, losing an “independence of ac mains" multiplier. Overall, we didn't start operations until after 1700Z. Signals on 40 were okay, but 20 was weak until 1900Z. Fifteen was non-existent -- or the rig was having problems.

We commandeered two unheated outbuildings for two of the three stations, and Ed operated from his van. The 40 meter station was in a woodshed with an open window -- so we scrounged around and found a garbage bag from which we made a “temporary window.” This kept out most of the wind and snow, until the wedges holding it gave way and the entire frame landed on top of the operating table and toppled a propane lantern which was being used for light and a bit of heat. Fortunately the only damage was a couple broken mantles to the lantern, and a broken cable between the computer and the rig.

We tried Feld-Hell on 40 meters at 1900Z and 2100Z with no takers. (We had advertised the mode, since this seemed very appropriate for the venue!)

Dancing with the Devil

The temperature never got above 13 degrees during the operation. You might say it was a cold day in Hell. The weather was getting blustery and snowy around 2100Z, so we decided to close up at 2200Z while it was still light. We made 45 contacts in 28 different states and provinces, so you might say we had a “helluva good time” in Hell.

Thanks to the Arizona ScQRPions for running a great contest. Folks who worked us were delighted to work the “Devil” -- a nom de plume used by the 40 meter op, and seemed to appreciate the contact with the special event call N8H. We hope to see everyone again during FYBO 2008. Unless things change drastically, we'll be in Hell again, and will have a much better idea of what is needed for such an operation.

Hank Greeb, N8XX, was first licensed in 1951. After graduating from the University of Denver, Hank and his wife Jeanette moved to Cincinnati, Ohio, where he became quite involved with organized Amateur Radio, serving as vice president and president of the Queen City Emergency Net. Hank joined the Buckeye Net, the Eighth Region Net and the Eastern Area Net, maintaining the EAN/PAN schedule in the Transcontinental Corps with W6EOT for many years. In the 1970s, he was elected Section Communications Manager for the Ohio Section for two terms. Hank is currently a Volunteer Consulting Engineer, Assistant Director for the Great Lakes Division, and Local Government Liaison for the Michigan Section, as well as a Charter Life Member of the ARRL. Technically, he is interested in mainly digital modes: CW, packet radio and more recently Feld Hell (Hellschreiber). Hank has built several Heathkit radios, including an HW-9 QRP rig, sparking a renewed interest in low
power operation. His other hobbies include photography and computers. Hank and Jeannette live Rockford, Michigan.

3507. D-STAR Overview/Introduction, Kalamazoo Hamfest, Sunday, October 14th @ 11am

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-10-01 20:11:20 UTC
From: Mark Thompson
Topic: 3507 Message: 3507

I will be presenting a D-STAR Introduction/Overview presentation at the Kalamazoo hamfest on Sunday, October 14th at 11 am.

I am anticipating that many Michigan D-STAR repeater owners & operators can attend the D-STAR forum so that they can describe their systems after my presentation and meet hams from their areas.

You can get more details about the hamfest at:

http://www.kalamazoohamfest.com/

At the hamfest I will be monitoring 145.67 D-STAR simplex & 147.435 MHz (107.2 Hz decode) FM simplex and you can also reach at my mobile # 847-867-2774.

I look foward to seeing you at the fest & the forum.

73, Mark, WB9QZB
Chicago, IL

For more information about D-STAR and ALL the other digital modes:

Jeff and all:

Here in Mecosta County, about 4 of us will be at the County EOC, with a number of other folks on stand-by for relaying traffic messages, etc..

I won't speak directly for them, but I know also that Osceola County will be up and running at their EOC as well, with a number of hams at their EOC, and others on stand-by.

One of our Mecosta County RACES members is even going to activate the ARES/RACES station at the Ferris State University EOC for a while.

Sputnik Special Event Station Scheduled

On Wednesday evening, October 3, AMSAT will host a Special Event Station commemorating the 50th anniversary of the launch of Sputnik I. Listen in on satellite AO-51 as it passes over North America to hear original Sputnik telemetry. On October 3, listen between 2350-2358 UTC; on October 4, listen at 0127-0145 UTC, 0308-0326 UTC and 0452-0503 UTC (all times approximate). The downlink frequency will be 435.300 MHz (plus or minus Doppler shift); the downlink power will be higher than the normal repeater levels. For those who send in reception reports, AMSAT will return a QSL certificate. Please send a 9 ? 12 self-addressed, stamped envelope to Kevin Schuchmann, WA6FWF, 3375 Taper Ave, San Jose, CA 95124. Please allow several weeks for processing. -- Drew Glasbrenner, KO4MA

From: Charlie Chapman
Topic: 3515 Message: 3515

As you know, the 5th district usually participates in a big way. A few ways to contact us will 3.932SSB, on packet we will be W8VY, and since the 444.650 repeater reaches from Saint Joseph County to the south, north to Big Rapids, west to the lake, and I'm not sure about the east, but I would love to see a bunch of people on that. For those that are not familiar with it, it has a + 5MHz offset (of course), and a little different PL tone of 186.2.

We have also secured the use of the MPSCS zone H, event 16 talkgroup for the weekend. Anyone with MPSCS access is welcome to use that talkgroup to contact each other. Last year I think a few of us made contact on Red Cross frequencies, and I think John, WB8RCR was planning to set-up an eTeam event. Oh yeah, the west Michigan traffic net will be active too!

We have a meeting tonight to go over some of the other objectives for Kalamazoo County and I expect to have more information with specific times that I will post her and on the MIARPSC Yahoo group.

Charlie, KB8SFR

3516. MTX-9000's anyone need one - I have a group of them available

Yahoo group: WestMichiganHams (2006 — 2008)

From: Michael J. Wolthuis
Topic: 3516 Message: 3516

Everyone,

I have access to a large batch (10-20) of Motorola MTX-9000 radios. These are easily programmed onto the ham bands.

The batch I have access to has full keypads, antenna, battery included (some great some okay status wise), antenna and heavy duty speaker MICs.

I have used several of these radios for personal projects, but have upgraded to MTX 9250's and other models to play with.

If anyone is interested I am looking to get $200.00 each for them. If you are interested in a batch please let me know and we may be able to work out a slightly better price.

I am willing to ship them (buyer pays shipping), but would like to keep them in Michigan instead of ebaying them and grow our 900Mhz access.

These are nice radios and a great way to quickly get into 900Mhz, many of us use these around the Grand Rapids and Dansville areas.

If interested please contact me via email.

I still need some more items on consignment. Bring your items in today

We will be open this Saturday 9AM-12PM

New this week

High Gain DB-1015 3 Element HF beam for 10/15 meters $50 GREAT BUY
Channel Master light duty Rotor with control box and cable $20
SAS-1 Amp Supply HF wire antenna with control box $10
Mixed box of short length coax cable with PL-259 Connectors on end $1 each

14 Amp Jetstream Power Supply $55
28Amp Power Supply $90 With Meters $110
45Amp Power Supply $170
Lighting Arresters $21.50 ea

We have Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other New items in Stock

HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $15 each
New SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
300 ohm twin lead 50Ft $10.00
RG-58 Cable .25 per foot
RG-8 .$1.00 per Foot
RG-8X Coax Cable .45 per Foot
95 Ft RG-8 9096 Coax Cable .45 per foot
75 ohm Cable 9040 International Wire and Cable .35per foot
PL-259 Connectors $2.50 ea adadapters for RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $12
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's

We are the only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.
Technician Class $18.95
General Class New as of July 1 $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95

ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Other Used Equipment on Consignment

JT776SMA HT Antenna $19
Signalcrafter SW-77C SWR meter $5
Headphone/Mike Ear Headset $5
Radio Shack Woodgrain Speaker $5
IC-255A 2 meter Radio with no tone board Like New from 1982 Good Packet Radio $45
Tubes A great Assortment of tested used Tubes $1-$4 each
AL-80A Ameritron 1KW HF Amplifier $850
Bearcat BC 560XLT 16 Ch Scanner $30 Great Buy
B&K Model 4011 Precision function Generator $60
B&K Model 2140 Oscilloscope $175
GW Model GDM-8135 Digital Multimeter $40
B & W Antenna Tuner VS-300A $40
RCA Volt Ohm Meter $25
Barket & Williamson Low Pass Filter $5
Speakers $2 - $10
Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
Center Insulator for HF antenna $5
Rocky Mountain Radar Detector $175
LED Emergency Light $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50
MFJ-722 Notch Filter $30.00
MFJ 407C keyer $15
Code Key $15
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
Sharp SF7320 working Copy Machine $50
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40

Heathkit items in stock

Heathkit SA-2040 1KW Tuner $160
Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40
Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Keychain LED lights $1.50 and up
Other items coming in Daily

Tool Max Industrial Supply is the Tool and Ham Radio retail store on Schamber Dr just off Pontaluna Rd and US-31 just north of the old Hob Knob or Michael's Restaurant (Now tore down) in Muskegon . We have tools, industrial suppliers and Ham radios and parts for sale. For more information call or e mail Tom KB8VEE at 231 798-7898 I am in the Store from 9:00AM-4:30PM Monday-Friday. Stop by and see me for all your Ham needs.

Michigan

Department of Environmental Quality
Waste and Hazardous Materials Division

http://deq.state.mi.us/documents/deq-ead-tas-eleclamp.pdf

State Lamp Disposal Policies
Disposing of your lamps
Most states do not have special requirements for the disposal of regular household mercury-containing fluorescent lamps (including compact fluorescents), although a few states and localities ban homeowners from disposing of such lamps in normal household trash.

Recycling your lamps
Many towns and cities offer recycling opportunities at local recycling centers or transfer stations. There may also be household hazardous waste collection days when fluorescent lamps are collected along with paints, pesticides, used motor oil, etc. Contact your local waste disposal officials for details. State requirements and recycling opportunities vary.

For more information, including a list of companies that recycle lamps, visit www.lamprecycle.org.

From: Hank Greeb
Topic: 3525 Message: 3525

Thanks I'll check the place I generally buy lamps and see if they recycle them. If not, it appears that I can send them to normal trash, since "Households are exempt from the hazardous waste regulations"

Note that the rules do not differential between linear fluorescent bulbs or the newer compact fluorescent lamps. They all contain mercury, which is my concern.

But, before any "Rabid Environmentalists" get on my case, I remind you to read the regulations, which clearly state "Households are exempt from the hazardous waste regulations"

And, lest a "Rabid Environmentalist" still gets on my case, I refer that person to his/her 4th grade Englyshe Instructor for a refresher course in reading and understanding the Queen's Englyshe.

I intend to follow these regulations, and even go beyond them to inquire whether Kent County has a place to actually recycle them.

73 de n8xx Hg

p.s. I note that there's a lot of circular references to recycling organizations in the regulations and FAQ's presented in the DEQ's literature.

Tomorrow morning, at 9:30 AM EDT, I will call up a session of QMN from
the Kalamazoo Army National Guard Armory.

The primary frequency will be 3563 KHz, alternate 7068 KHz.

Please pass the word and try to be there.

If for some reason I can not call up the net, due to technical problems
or otherwise, do not leave the scheduled net unguarded. Please take the
initiative to activate the net.

Bulletin for QMN tonight (My station at home is disassembled due to
moving, so someone else please transmit):

Saturday, November 3rd, 2007
Check out the …
Milwaukee Repeater Club SWAPFEST
… then, come across the street to:

• 8:30 A.M. to 3:00 P.M. – Meet the AES gang and see the Latest Equipment on display.

• 10:00 A.M. to 2:00 P.M. – Attend the first annual Great Lakes Area D-STAR* Forum presented by AES.

Hear about D-STAR New and User projects in other areas from our Special Guests:

Ray Novak, N9JA (D-STAR Introduction) • Kermit Carlson, W9XA; Chicago, IL
ICOM National Amateur Radio Sales Manager

Jim McClellan, N5MIJ; Dallas, TX • Tim Barret, K6BIV; Mt. Diablo, CA

*D-STAR (Digital Smart Technologies for Amateur Radio)
A Digital Voice and Data protocol specification developed for use in amateur radio. D-Star compatible radios are available on VHF and UHF amateur radio bands. In addition to the over-the-air protocol, D-Star also provides specifications for network connectivity, enabling D-Star radios to be connected to the Internet or other networks. D-STAR is the result of research by the Japan Amateur Radio League to investigate digital technologies for amateur radio.

Milwaukee Repeater Club • 23rd Annual Swapfest
AMATEUR RADIO Fest2007
HAM RADIO, COMPUTERS & ELECTRONICS
Saturday, November 3rd, 2007
8:00 A.M to 2:00 P.M.
New LOCATION for 2007!!!

ELKS Lodge
5555 W Good Hope Road • Milwaukee, Wl 53223
Across the street from AES!

Admission: $6.00 • Extra Raffle tickets: $3.00 or (2) for $5.00
Table: $10.00 per 8 ft. table • Electricity: $5.00
Vendor Loading: 5:00 A.M.

AMATEUR RADIO & ELECTRONICS
New and Used Ham radios, CB radios, batteries, antennas, scanners, test equipment, parts, connectors, electronic components, tubes, wire, coax cable, switches, computers, software, and more.

RAFFLE/DOOR PRIZES, VE TESTING, SEMINARS
Raffle with $$$ prizes (need not be present to win). VE Testing by the MRAC testing group will be conducted at AES during the fest between 8:30 A.M. and 11:30 A.M. The MRC may be presenting additional seminars during the fest; a time schedule will be available at the Elk's Lodge location.

TALK-IN: MRC Repeater, 146.910 (- offset, 127.3 PL)

All:

It sure is fun getting together to share a meal, conversation, and fun. Tonight's steak dinner was outstanding. The socializing was above average. We had a tremendous time.

Tom, W8AMZ and his helpers did a wonderful job on the dinner.

I also want to thank the folks attending for the fun we had with the fifty-fifty drawing. And thanks to Jim, KC8PCJ for purchasing the popcorn from the Boy Scouts. I have an awfully good time helping with these things.

Thanks to everyone who made this meal a success. Let's do it again, soon!

Bill, AB8SC

3531. Weather Radios Recalled by Oregon Scientific

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-10-07 10:49:51 UTC
From: Jim Miller
Topic: 3531 Message: 3531

The U.S. Consumer Product Safety Commission, in cooperation with Oregon Scientific, announced a voluntary recall of 4 NOAA Weather Radio models.

These NOAA Weather Radios are being recalled as they could fail to receive National Weather Service alert signals in certain areas of the country. In the event of severe weather, this failure could put a consumer's life and property at risk.

The models affected by this recall are

WR103NX
WR108
WRB308
WRB308J
Additional information on this recall, including photographs of the affected models and information on contacting the manufacturer can be found on the Consumer Products Safety Commission's website at http://www.cpsc.gov/cpscpub/prerel/prhtml07/07292.html

I have a coworker looking for a digital trunk tracking scanner.
Anybody have any suggestions or recomendations?
He is a deputy with the Allegan County Sheriff's Office and wants to
listen to police calls when away from work, but they changed to a
mostly digital system.

Thanks.

I would suggest either the Uniden 396t d with computer programming
software called butel.
Also Gre the company that makes scanners for radio shack has just
come out with their own digital scanner the psr 500.

All:

By way of an update on the results of the eye surgery and recovery. I am very grateful for all your kind thoughts, prayers, and encouraging notes and comments. This recovery time has been much longer than I expected. To keep my spirits up I've been noticing small improvements each day.

The doctor injected an air bubble into my right eye. That bubble has been supporting the retina up until the past three or so weeks. Then the bubble's size has been slowly getting smaller to the point where it is just "in there" and not doing any supporting. It sits up high in the eyeball and scatters the incoming light to dazzle the "world" I see through my "new" eye.

To demonstrate the doctor's observation that the retina has, indeed, been reattached the optometrist has been letting me read their eye chart with that fancy eye testing machine with lots of lenses and the endless question, "which one is better, one or two." If you've ever had your eyes tested you know the drill. Any rate, even with lots of eye drops, a dilated iris, and all the complications I can get my eyesight corrected to 20/40 or thereabouts. This means that if I were to have the lenses ground I could return to driving a vehicle.

I'm still keeping my head down and taking time off of work. The eye is still recovering and is fragile. The process will take at least another two weeks before the doctor sees this patient again.

I thank each of you very much for the continued encouragement and prayers. You should know that the process is boring, frightening, and stressful. As you might know, the reserve eye is blind and not useful except for limited reading. This creates the stressful part as a failure in this recovery will leave my eyesight compromised.

My attitude is still positive. And it is still interesting to look upon the world each day and marvel at the small improving steps along the new path.

Each of you in my spheres of community help me keep my attitude positive, my outlook bright, and the future so full of promise. Are those the same thing? Hmmmmm

My favorite digital one so far is the Uniden BCD396. Small, but loaded with features. The programming software is Free from Uniden and it comes with the programming cable.

The Radio Shack (GRE) Pro96 and Pro2096 are also both great scanners.

You can view one of my Uniden scanners at http://www.tdats.net/scanner .

3540. Upcoming CERT full training course

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-10-12 17:28:24 UTC
From: Jeff's Lists
Topic: 3540 Message: 3540

If anyone is interested and you do not live in Kent County. Your still welcome to take the training. You just do not get the back pack at the end of the class.

The following class's have been scheduled for the Kent County Community Emergency Response Team. These are free to all citizens. We are looking to get an operational team going starting in January so if you have an interest this is the time to take the training! These class's will run from 6-10 PM PLEASE sign up on the provided web sites if you have questions or If you have already taken the training and want to be a victim during Triage or the final exercise email me direct @ jnawrot@... subject victim.

October Classes:
Oct 15: Introduction to CERT - KCSD 701 Ball Ave
Oct 17: Fire Suppression (TC)
Oct 22: Disaster Triage/Medical Response - Red Cross 1050 Fuller
Oct 24: Urban Search and Rescue (TC)
Oct 30: Final Exercise (TC)
*Note: (TC) indicates training will be located at the GRFD Training Facility. (1101 Monroe Ave. NW, 49503).
Locations not identified are to be determined.

http://www.kcraces.net/signup/cert_class.php

November classes:
Nov 9: Introduction to CERT - KCSD 701 Ball Ave NE
Nov 13:
Nov 16:
Nov 20:
Nov 26: Final Exercise

http://www.kcraces.net/signup/cert_class_nov.php

We will need victims on the night of the Triage class and final exercise. If you know someone or you want to come play please let us know!

3541. Tool Max open this Saturday 9AM-12PM

I still need some more items on consignment. Bring your items in today

We will be open this Saturday 9AM-12PM The Next 2 weeks I will not be in the Store on Saturday so I can be at the Holland Hamfest and a State ARPSC ARRL meeting in Lansing on Oct 27.

New this week

Ramsey Kits for Kids (or Adults)
300 in 1 Electronic Lab $70
Electronic Crystal Radio Kit $10
Bell Action Kit $9
Motor Action Kit $8
LED Binky Kit $8
Police Siren Kit $8
Electronic Dripping Faucet $10
LED Strobe Light with Case $45
AM Broadcast Transmitter Kit with Case $35
Tri-Field Meter $64

14 Amp Jetstream Power Supply $55
28Amp Power Supply $90 With Meters $110
45Amp Power Supply $170
Lighting Arresters $21.50 ea

We have Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other items in Stock

HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $15 each
New SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
300 ohm twin lead 50Ft $10.00
RG-58 Cable .25 per foot
RG-8 .$1.00 per Foot
RG-8X Coax Cable .45 per Foot
75 ohm Cable 9040 International Wire and Cable .35per foot
PL-259 Connectors $2.50 ea adadapters for RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $12
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's

We are the only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.
Technician Class $18.95
General Class New as of July 1 $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Other Used Equipment on Consignment

High Gain DB-1015 3 Element HF beam for 10/15 meters $50 Must Sell GREAT BUY
Channel Master light duty Rotor with control box and cable $20
SAS-1 Amp Supply HF wire antenna with control box $10
Mixed box of short length coax cable with PL-259 Connectors on end $1 each
JT776SMA HT Antenna $19
Signalcrafter SW-77C SWR meter $5
Headphone/Mike Ear Headset $5
Radio Shack Woodgrain Speaker $5
IC-255A 2 meter Radio with no tone board Like New from 1982 Good Packet Radio $45
Tubes A great Assortment of tested used Tubes $1-$4 each
AL-80A Ameritron 1KW HF Amplifier $850
Bearcat BC 560XLT 16 Ch Scanner $30 Great Buy
B&K Model 4011 Precision function Generator $60
B&K Model 2140 Oscilloscope $175
GW Model GDM-8135 Digital Multimeter $40
B & W Antenna Tuner VS-300A $40
RCA Volt Ohm Meter $25
Barket & Williamson Low Pass Filter $5
Speakers $2 - $10
Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
Center Insulator for HF antenna $5
Rocky Mountain Radar Detector $175
LED Emergency Light $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50
MFJ-722 Notch Filter $30.00
MFJ 407C keyer $15
Code Key $15
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
Sharp SF7320 working Copy Machine $50
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40

Heathkit items in stock

Heathkit SA-2040 1KW Tuner $160
Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40

Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Keychain LED lights $1.50 and up
Other items coming in Daily

Tool Max Industrial Supply is the Tool and Ham Radio retail store on Schamber Dr just off Pontaluna Rd and US-31 just north of the old Hob Knob or Michael's Restaurant (Now tore down) in Muskegon . We have tools, industrial suppliers and Ham radios and parts for sale. For more information call or e mail Tom KB8VEE at 231 798-7898 I am in the Store from 9:00AM-4:30PM Monday-Friday. Stop by and see me for all your Ham needs.

- Neat Idea
- International Humanitarian Award
- Head of Global Government Agency becomes a Ham
- Great Lakes Division Members at the Top

++ Your ARRL ++

You who followed along as I discussed the operations of the ARRL Field Organization (e.g. the SMs, SEC's, etc.), it's policy-making branch (the Board of Directors, Executive Committee, Officers) and it's staff (e.g. the CEO, levels of management at HQ) should have a good idea as to who is responsible for respective activities in the League. In this issue, I will discuss aspects of ethical and fairness in the ARRL election process.

There are three positions in League governance that are filled by vote of the members. These are the Section Manager, who manages the Field Organization in the Section and the two members of the Board of Directors "family" from each Division. These two members are the Director and the Vice Director. The 15 Directors establish ARRL policy.

The minimum eligibility to run for the office of Section Manager (SM) is to be a licensed amateur, to be a full member of ARRL for a minimum period of 2 continuous years and to agree to observe the rules and regulations of candidacy and, if elected, the of the post.

Candidates for Director and Vice Director must maintain full ARRL membership for a minimum of 4 years prior to their nomination and must also agree to observe all rules and regulations that pertain to the respective offices.

The rules and times for nominations and periods for campaigning are defined in the ARRL By-Laws.

Not only do the ARRL Articles of Association, By-Laws and Standing Orders spell out the rules for elections, but they outline the minimum conduct expected of candidates for election and elected officials.

The rules governing candidacy for office are nothing more than common sense as applied to ethics and conduct. Writer Erma Bombeck put it this way in the title of one of her successful books which is "All I Really Need to Know I Learned in Kindergarten."

Everything needed to satisfy the requirements of ethics and behavior in ARRL elections was learned on our parent's knees when we learned to play fair, not to lie and not to cheat.

So, how do ARRL elections rules work?

Each year at the "annual" (January) Board meeting, the President appoints an Ethics and Elections (E&E) Committee consisting of three Directors who are not on the Executive Committee. All questions or complaints regarding violations of League ethics and elections rules are considered thoroughly by this Committee which advises of any remedial action it concludes is needed. The committee also reviews the petitions for candidacy of each person who wishes to run for an ARRL elected office. This review is to ensure the candidate satisfies the rules of eligibility to run for office. These rules are published for anyone to read.

Relative to this point, the ARRL elections and ethics rules are being attacked by the followers of a candidate who was found to be ineligible because of failure to correct erroneous material sent out in his favor. E&E initially found this candidate met the requirements to run for Director. Later, the candidate acknowledged errors in an e-mail campaign distribution. He agreed to correct these, promptly, according to a plan proposed by E&E. The possibility of punitive action in case the correction was not made was discussed with him.

The issue would have been resolved and the election would have proceeded without difficulty if the candidate had issues issued the correction. Unfortunately, after about two weeks, the promised correction had not been sent. After further warning and an additional wait for action, E&E concluded that continuing violation of the rules of fairness had become unacceptable. The incorrect information that may have started as a simple mistake was escalated by the candidate into a serious ethical blunder when he repeatedly failed to take the needed corrective action.

In some people's minds, the ARRL Board is guilty of taking the right to vote from them. Never mind it was the seemingly unethical action of the candidate that caused him to be disqualified.

But of course, few people are responsible for their actions these days.

The ARRL Constitution and By-Laws clearly define the rules that govern League elections. These and the ARRL Standing Orders may be found at www.arrl.org/aabl.html.

++ Great Lakes Division Award Winners ++

The Great Lakes Division Convention is the scene for special awards given for outstanding service to the amateur community. Great Lakes Division awards given this year were:

- George S. Wilson, III, W4OYI, Lifetime Achievement Award: Fred Jones, WA4SWF, Louisa, Kentucky.
- Amateur of the Year Award: Bob Check, W8GC, Independence, OH.
- DXer's Achievement Award: Ted Pauck, Jr., K8NA, Troy, MI.
- Newsletter of the Year: West Chester (Ohio) ARA "HF Chronicles," Mike Ashley, N8XW, editor.
- Director's Outstanding Achievement: Thomas L. Mansfield, KG4TND, Lexington, KY.
- Director's Outstanding Achievement: Bill Carpenter, AA8EY, Westerville, OH.

Congratulations to the award recipients. More importantly, thanks to them for their hard work and unselfishness in supporting Amateur Radio and their communities through our great radio service.

++ Division Convention -- Postlude ++

The Great Lakes Division Convention on Saturday, September 22 is over. It was a great event, involved tremendous internationally-known speakers, located in very neat and comfortable surroundings, featured good food and was coordinated by a tremendous committee headed by Bob Check, W8GC.

Bob, et al, thanks for putting together such an outstanding Convention. A special thanks to Vice Director Gary Johnston, KI4LA, who was a very successful General Chairman of this and the two previous Division Conventions. Similarly, Ohio SM Joe Phillips, K8QOE, has managed the exemplification of the Royal Order of the Wouff Hong at each of these conventions. A hearty well done to everyone.

++ Automatic Survey -- Some additional Results ++

I shared a couple of results of this online survey with you a few weeks ago. Here is quite a bit more from it.

To review the situation, 2,453 members took the survey with 1004 being from the Great Lakes Division. The two additional Divisions that participated were the Atlantic and the Delta Divisions.

Please note that some questions could receive multiple answers.

Of the 1270 who say they operate digital modes:
- 303 operate APRS.
- 51 operate D-Star.
- 132 operate Digital Voice.
- 1086 operate modes using keyboards.

Of the 1086 who use keyboard modes,
- 904 use PSK-31.
- 598 use RTTY.

- All remaining selections were used rather minimally.
- 171 use store and forward.
- 136 use Packet with TNC.
- 58 use Packet with sound card.
- 47 use PacTOR.
- 193 use Winlink.
- 137 of these use Winlink for emergency communications.
- 139 use Winlink on VHF; 111 use it on HF.
- Winlink was used most often (in descending order of use) on 20M, 40M, 80M, 10M, 15M and light use on 12M NS 160m.
- 15 operate a PMBO.

++ Walberg Sponsors HR 462 ++

Representative Timothy Walberg, 7th District of Michigan, has signed on to co-sponsor HR 462. This is the bill that would require the FCC to review and justify its rules concerning BPL and other Part 15 devices. Included in the FCC rules to be reviewed will be the one that gives unlicensed, Part 15 incidental emitters favorite status over licensed operations including police, fire and Amateur Radio services.

Thanks to the members in Michigan Congressional District 7 who wrote to Mr. Walberg and achieved his co-sponsorship. Good job.

++ Vanity Call Fee Drops ++

In case you missed it, the FCC reduced the fee for Vanity Call Signs effective September 17. The previous fee of $20.80 dropped to $11.70. This new fee is the lowest that has been charged since 11 years ago when the original fee was set at $12. The Commission expects about 14,700 applications to be received during its coming fiscal year.

++ Neat Idea ++

When the River Cities ARA had a special event operation in Ashland, KY, they anticipated a substantial number of visitors from the general public. They got them . . . and the ham station they operated kept them.

To help the visitors understand what was going on, the club set up a large US map and put pins in it to mark the locations of other ham stations they had contacted. The map with scores of pins in it became the stimulus for many discussions about Amateur Radio.

The event? It was the Summer Motion Festival. The River Cities ARA used special event call sign K4S throughout the festival.

++ International Humanitarian Award ++

Nominations are open for the 2007 ARRL International Humanitarian Award. The award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international understanding through Amateur Radio. The League established the annual

prize to recognize Amateur Radio operators who have used ham radio to provide extraordinary service to others in times of crisis or disaster. Full details of the award are at http://www.arrl.org/FandES/field/awards/humanitarian.html.

If you know of a ham who has provided extraordinary service to others and this service has involved Amateur Radio on an International basis, please submit a nomination by December 31 to ARRL International Humanitarian Award, 225 Main St. Newington, CT 06111.

++ Head of Global Government Agency becomes a Ham ++

Dr. Hamadoun Toure who is Secretary General of the International Telecommunications Union (ITU) became a licensed Radio Amateur on October 8. The Secretary General is from Mali. He is licensed from Switzerland as HB9EHT.

Not to be confused with the International Amateur Radio Union (IARU) which is an International association of national Amateur Radio organizations, the ITU is a formal treaty organization of most governments around the world. The Department of State represents the US in the ITU treaty negotiations. Two members of the ARRL technical staff have been appointed to the delegation.

++ Great Lakes Division Members at the Top ++

Information compiled by Chwat & Company show that members of the Great Lakes Division have a substantial lead over other ARRL Divisions when it comes to writing to support Federal legislation. This is true whether we are writing our US Representatives or US Senators. This can truly be termed democracy in action. It is a keystone to representative government.

Although I thank and congratulate everyone who has chosen to exercise their democratic freedom and obligation when it comes to supporting Amateur Radio, we must and can do better. The total number of members who have written during the current session of Congress is only somewhat above 200. This is a far cry from the thousands of ham letter writers in the Division.

The question I ask each of you is simple. Isn't the enjoyment you have received from Amateur Radio worth writing at least two or three letters a year to support hamming?

What's an electronic dripping faucet?

Is that something a plumber or an electrician should come out and fix?

I still need some more items on consignment. Bring your items in today

We will be open this Saturday 9AM-12PM The Next 2 weeks I will not be in the Store on Saturday so I can be at the Holland Hamfest and a State ARPSC ARRL meeting in Lansing on Oct 27.

New this week

Ramsey Kits for Kids (or Adults)
300 in 1 Electronic Lab $70
Electronic Crystal Radio Kit $10
Bell Action Kit $9
Motor Action Kit $8
LED Binky Kit $8
Police Siren Kit $8
Electronic Dripping Faucet $10
LED Strobe Light with Case $45
AM Broadcast Transmitter Kit with Case $35
Tri-Field Meter $64

14 Amp Jetstream Power Supply $55
28Amp Power Supply $90 With Meters $110
45Amp Power Supply $170
Lighting Arresters $21.50 ea

We have Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other items in Stock

HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $15 each
New SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
300 ohm twin lead 50Ft $10.00
RG-58 Cable .25 per foot
RG-8 .$1.00 per Foot
RG-8X Coax Cable .45 per Foot
75 ohm Cable 9040 International Wire and Cable .35per foot
PL-259 Connectors $2.50 ea adadapters for RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $12
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's

We are the only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.
Technician Class $18.95
General Class New as of July 1 $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Other Used Equipment on Consignment

High Gain DB-1015 3 Element HF beam for 10/15 meters $50 Must Sell GREAT BUY
Channel Master light duty Rotor with control box and cable $20
SAS-1 Amp Supply HF wire antenna with control box $10
Mixed box of short length coax cable with PL-259 Connectors on end $1 each
JT776SMA HT Antenna $19
Signalcrafter SW-77C SWR meter $5
Headphone/Mike Ear Headset $5
Radio Shack Woodgrain Speaker $5
IC-255A 2 meter Radio with no tone board Like New from 1982 Good Packet Radio $45
Tubes A great Assortment of tested used Tubes $1-$4 each
AL-80A Ameritron 1KW HF Amplifier $850
Bearcat BC 560XLT 16 Ch Scanner $30 Great Buy
B&K Model 4011 Precision function Generator $60
B&K Model 2140 Oscilloscope $175
GW Model GDM-8135 Digital Multimeter $40
B & W Antenna Tuner VS-300A $40
RCA Volt Ohm Meter $25
Barket & Williamson Low Pass Filter $5
Speakers $2 - $10

Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
Center Insulator for HF antenna $5
Rocky Mountain Radar Detector $175
LED Emergency Light $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50
MFJ-722 Notch Filter $30.00
MFJ 407C keyer $15
Code Key $15
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
Sharp SF7320 working Copy Machine $50
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40

Heathkit items in stock

Heathkit SA-2040 1KW Tuner $160
Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40
Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Keychain LED lights $1.50 and up
Other items coming in Daily

Tool Max Industrial Supply is the Tool and Ham Radio retail store on Schamber Dr just off Pontaluna Rd and US-31 just north of the old Hob Knob or Michael's Restaurant (Now tore down) in Muskegon . We have tools, industrial suppliers and Ham radios and parts for sale. For more information call or e mail Tom KB8VEE at 231 798-7898 I am in the Store from 9:00AM-4:30PM Monday-Friday. Stop by and see me for all your Ham needs.

From: Hank Greeb
Topic: 3565 Message: 3565

ARBONET-2 High Altitude Balloon Flight Set for an October 20th Launch

Members of the ARBONET (Amateur Radio Balloons Over NorthEast Texas) organization are making final preparations for the October 20th launch of ARBONET-2. Originally scheduled for launch last spring, ARBONET-2 is being dedicated to the memory of Kim R. Miles, N9IS SK, a long time contributor to the central Indiana Windtrax Amateur Radio High Altitude Balloon team who passed away March 27th at the age of 51.

ARBONET-2 will be launched from the JD Trissell Airport in Clarksville, TX which is located in the northeast corner of the Lone Star State. Launch time is scheduled for 9:30 AM CDT on Saturday October 20th. Current winds aloft forecasts indicate the ground track of the flight will carry the amateur payloads towards the Texas - Louisiana state line. If ARBONET-2 reaches its expected altitude of 96,000 ft, radio amateurs in parts of as many as seven states should be able to monitor the beacons and communicate through the cross band repeater onboard the near space vehicle.

The compliment of payloads aboard ARBONET-2 include:

A plain language homing beacon that will transmit navigation data to the ground on 146.560 MHz in plain English thus allowing anyone with a scanner or 2 meter hand-held in the coverage zone to follow the progress of the flight without the need for additional equipment to process the data.

An APRS beacon operating on 144.390 MHz to report vehicle location data throughout the duration of the flight and to aid in the recovery of the packages following descent.

A 70 cm Up / 2 meter Down Cross band FM repeater (445.800MHz Up 147.560 MHz Down) will support two way communications during the duration of the ARBONET-2 flight.

A 10 meter CW beacon experiment produced by the Richardson Wireless Klub, K5RWK will transmit a 500 milliwatt signal on 28.061 MHZ.

In addition, ARBONET-2 will carry a number of secondary payloads that will perform remote data collection functions for analysis once the payloads are recovered. These payloads include a 4 mega pixel digital camera configured to capture images every 30 seconds through the duration of the flight, a self contained balloon burst video system designed to capture images of the balloon burst event and other environmental data loggers.

Operators are encouraged to submit reception reports from the ARBONET-2 flight to team members via the ARBONET web site: www.arbonet.net. A

special commemorative QSL card will be made available to everyone who submits reception reports to the ARBONET team.

An ARBONET Launch Information HF net will be held on 3.910 MHz (+/- 10 KHz) beginning at 9:00 AM CDT to report the progress of flight preparations and to provide real time coverage of the expected two and a half hour flight.

The ARBONET team encourages radio amateurs throughout the flight?s coverage zone to make use of the payloads aboard ARBONET-2.

Additional updates will be posted to the ARBONET web site in the days leading up to the mission. In the event weather conditions cause a postponement of the launch, the next launch attempt is scheduled for the following Saturday, October 27th.

Actually, it surprised me to hear an actual promotional ad for amateur radio on the local sports station here in Muskegon. I heard it once before on an early saturday morning, but thought that I was just hearing things as I had left my radio on and went to sleep, but this morning, I heard it again. It's only been twice that I've heard it, and it was about a month or so between airings, but every little bit helps.

Greetings everyone,

Here is a special message from John KC8ULE, Chairman of the recently completed Mac50: The Mac50 Special Event was organized and operated as an element of the official celebration of the 50th anniversary of the Mackinac Bridge sponsored by the Mackinac Bridge Authority Celebration Committee. The idea of a special event with this theme came up in several locations around the state. This was a natural theme -- nothing says "Michigan" around the world like the Mackinac Bridge. The Bridge View park is a good operating location, and there was a Mac40 event ten years earlier.

Mac50 had three principle objectives: Help the Bridge Authority Celebration Committee promote awareness of the 50th Anniversary of the Bridge. Achieved.O ver a thousand on-air contacts, plus an awareness multiplier for shortwave listeners and hams who could not make direct contact. Contacts always included a comment about the theme of the event, and most included a fact or two about the bridge.

Goals: Put on a radio event that would attract operators and club support from around the state as with all similar radio events. Achieved. We attracted operators from the Detroit area, Grand Rapids, Lowell, Charlevoix, the Soo, Marquette and St. Ignace as well as other locations. Five clubs made major contributions to production and operations and the Michigan ARRL section promoted the event strongly. Practice our disaster preparedness skills in terms of being able to deploy to a field location, equip ourselves using our own equipment and conduct effective radio operations. Achieved. The event design effort was played in public via the web; many Michigan hams worked together to get equipment and supplies on site, get them assembled, powered and tested and on the air. Everything worked. Outstanding!

The Mac50 event was a wild success from all possible perspectives. There were plenty of things that we might have done better or more completely, but we made a lot of contacts, we had a lot of amateur radio operators involved in operating and event logistics and we had just incredible response from the amateur radio community in terms of sending in for QSL materials. I think it likely that those of us involved in the event will carry our memories of it around with us for a long time.

Scoreboard: Total QSO's 1,012. Operators/on site helpers 39, Participating clubs, 5. More importantly, we had zero rigs damaged, zero injuries and an abundance of just feeling good about how everything went.

Final Thoughts: Speaking as a career project manager, this was probably the single most satisfying project I've ever taken on. There were enough irritations to keep it on our minds and there were times when there were just too many details to get done, too many hands to shake, not enough

hours in the day to cover the bases. Many things came together in the last two weeks. We were on the air when we said we'd be on the air and had terrific resultsalong the way. And a great time was had by all.

Special thanks are in order to the Mackinac Bridge Authority Celebration Committee, the St. Ignace Post of the Michigan State Police, Michigan Section -- ARRL and the five clubs that put in tremendous levels of energy, technical skill and cash and resource donations: Eastern UP ARC, Motor City ARC, ARGYL, Lake Effect ARC and Midwewst Contesters and Traffikers. I wish also to extend my personal thanks to my planning and admin colleague, Marv DeWitt, KC8MLD, our PIO, Diane Scalzi, KI8F and our web guy Hank Greeb, N8XX for theirdiligenceand expertise. 73,
John Forslin, KC8ULE,
Marquette, Michigan,
25 September,2007.

The heart of ham radio lies in our radio clubs. The opportunity to meet, share ideas, find help and learn are all soundly based in these organizations. We recognize these new club leaders: Newly elected for the Big Rapids Area ARC are Pres WB8COX, VP KD8DHZ, Treas KC8IFP and Sec KD8DIB. Blossomland ARA's new Officers are: President KC8TSE, 1st VP N8KBG, 2nd VP KD8ZB, 3rd VP KF8Z, Sec W8JBA, Treas KB8VIM, Trustee KE4PM. For the Marinett and Menominee ARC, these officers were elected: Pres K8IR. VP KC8WAI, Sec KD8ESH, Treas WC9E. Lapeer County ARA has elected these officers: Pres N8NE, VP KC8TWL, Sec KC8CAB and Treas KD8VP. Congratulations to all of these new officers.

Stan K8SB Chairman of the Motor City Amateur Radio Club 75th Anniversary Celebration (December 1)is attempting to contact former MCRC members including those who have moved away from the area. Stan has asked that all former members drop him a note or call. Stan can be reached at k8sb@... or at 734-676-6248.

A Special Event worth noting: Nov 3-Nov 4, 1300Z-0100Z, Muskegon, MI. Muskegon County Emergency Communication Services, Inc. K8WNJ will be celebrating the completion of Muskegon County's new ECOMM Center. Operating on 146.820 Mhz (-600 94.8hz), 14.267 MHz 7.267 MHz. For a commemorative Certificate of your contact, send a SASE to Muskegon County Sheriff's Dept, Emergency Services Division (MCECS), 1611 Oak Ave, Muskegon, MI 49442.

Michigan Nets reporting for September: MiTN, OMN, MACS, WMTN, GLETN, TMMTN, SEMTN, NLEUPN, Motor City, Hiawatha, Benzie County, MIARPSC, and Branch County. Total Operator-hours for September: 2,158.

Station Activity Reports (SAR) for September, 2007: WB9JSR 883, KC8WSE 342, K8KV 276, AB8SY 194, K8LJG 137, K8AMR 116, KD8AAD 93, K8RDN 81, K8AE 60, WB8RCR 36, KC8MLD 30, W8RNQ 27, WD8USA 12, KC8BMV 12, KD8BGQ 12, AB8WF 12, K8ZJU 10, WA8OOH 10, KC8ZGB 10.

Public Service Honor Roll Reports (PSHR) for September, 2007: WB8RCR 256, K8MFK 209, KD8BGQ 159, WB9JSR 135, K8RDN 128, WD8USA 122, K8AMR 118, KC8WSE 115, AB8SY 115, K8KV 80, K8AE 80, K8ZJU 73, K8VFZ 67.

SARs are reports of all the radiogram traffic you have handled in the past month. PSHRs include your net and public service activities for the month. PSHRs and SARs should be filed monthly with WB8RCR. You can access a simple reporting form at: http://www.mi-nts.org/PSHR_entry.shtml to provide your reports to WB8RCR.

September Official Emergency Station reports came in from K8COP, K8DD, and N8HA. Your OES reports should be filed with WA8EFK with a copy to your EC. In all cases, reporting by radiogram is encouraged. Packet messages can berouted to wb8rcr@... and wa8efk@...

73 until next month,
Dale WA8EFK

3569. N9Q/N8XX during Illinois QSO Party, Sunday, October 21

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-10-16 22:02:15 UTC
From: Hank Greeb
Topic: 3569 Message: 3569

I'll be operating as N9Q during the upcoming Illinois QSO party this Sunday, October 21, 2007, from a four county line of Boone, Dekalb, Winnebago & Ogle Counties. I'll be operating portable, hopefully with a "reasonable" signal from a portable operation.

The ILQP runs from 1700Z October 21 until 0100Z October 22, 2007 (that's 1 p.m. EDT to 9 p.m. EDT Sunday, October 21.)

Look for me on or around 7.05 MHz CW, 7.290 MHz SSB in the afternoon, and around 3.55 MHz CW, 3.890 MHz Phone after about 2200Z.

Rules and other info can be found at http://www.w9awe.org/ILQP2007.html

One of the more interesting things is that the closest "reasonably sized city" to where I'll be operating is Rockford, IL. So, I'm driving from Rockford (Michigan) to Rockford (Illinois) for the event!

A little Snag has came to my attention tonight as I am filling out my WAS form. Seems that one of my Cards with a big MINNESOTA on the front was actualy operating mobile in North Dakota. Looks like I am back to needing one more state, MN. I have 3 MN contacts that have not sent cards.
:-(
Back to it.

Subject: [WestMichiganHams] Congratulations, KC8PCJ

All:

Jim, KC8PCJ has been chasing his Worked All States. He needs a QSL card from Hawaii. He also needed a QSO with Alaska. While tuning twenty meters yesterday, Sunday, I stumbled upon an Alaska station calling CQ. Linda, AB8QH got Jim's landline number and Jim got into the DX's log. Now Jim needs two cards for his WAS wallpaper.

Good going, Jim!

Bill, AB8SC

From: Scott Pawlowski
Topic: 3573 Message: 3573

SPC AC 170600

DAY 2 CONVECTIVE OUTLOOK
NWS STORM PREDICTION CENTER NORMAN OK
0100 AM CDT WED OCT 17 2007

VALID 181200Z - 191200Z

...THERE IS A MDT RISK OF SVR TSTMS ACROSS PARTS OF SERN WI...LOWER MI...NRN AND ERN IL...INDIANA...WRN OH...AND PARTS OF NRN KY...

...THERE IS A SLGT RISK OF SVR TSTMS ACROSS A LARGE AREA FROM THE GREAT LAKES REGION SWD TO THE GULF COAST STATES...

...SYNOPSIS...
LARGE MID-LEVEL TROUGH/LOW OVER THE CENTRAL CONUS AT THE START OF THE PERIOD IS FORECAST TO STRENGTHEN/SHARPEN AS IT MOVES EWD ACROSS THE MS VALLEY REGION. THIS TROUGH WILL BE ACCOMPANIED BY A VERY STRONG DEEP-LAYER WIND FIELD...INCLUDING A 90 KT SWLY H5 JET S AND E
OF THE LOW CENTER.

AT THE SURFACE...STRONG LOW IS FORECAST TO DRIFT NEWD ACROSS THE UPPER MS VALLEY REGION...WHILE TRAILING COLD FRONT MOVES ACROSS THE MS VALLEY AND INTO THE OH/TN VALLEYS THROUGH THE END OF THE PERIOD.

...GREAT LAKES REGION SWD TO THE GULF COAST STATES...
WIDESPREAD/POTENTIALLY-SIGNIFICANT SEVERE WEATHER EVENT APPEARS INCREASINGLY LIKELY ACROSS PORTIONS OF A WIDESPREAD AREA EXTENDING FROM THE GREAT LAKES REGION SWD TO THE GULF COAST STATES.

WIDESPREAD THUNDERSTORMS SHOULD BE ONGOING ACROSS PARTS OF THE RISK AREA AT THE START OF THE PERIOD...DRIVEN BY LARGE-SCALE WARM ADVECTION ASSOCIATED WITH 70 KT LOW-LEVEL JET. AS THIS JET WEAKENS/SHIFTS NEWD DURING THE DAY...CONVECTION SHOULD DIMINISH SOMEWHAT...ALLOWING POCKETS OF LIMITED HEATING AND AT LEAST MARGINAL
DESTABILIZATION OF VERY MOIST WARM SECTOR IN PLACE AHEAD OF THE APPROACHING STORM SYSTEM.

BY EARLY AFTERNOON...BANDS OF THUNDERSTORMS SHOULD REDEVELOP NEAR AND AHEAD OF THE COLD FRONT...AND THEN INCREASE THROUGH THE REMAINDER OF THE AFTERNOON AND EVENING AS THE FRONT SHIFTS EWD.

STORMS DEVELOPING AHEAD OF THE FRONT WILL RAPIDLY BECOME SEVERE...AS
INTENSE FLOW THROUGH THE LOWER AND MID TROPOSPHERE -- VEERING WITH

HEIGHT FROM THE LOWER TO MID LEVELS -- RESULTS IN SHEAR SUPPORTIVE
OF SUPERCELLS AND/OR WELL-ORGANIZED LINE SEGMENTS. LARGE HAIL WILL
BE POSSIBLE -- PARTICULARLY NEAR THE COLDER MID-LEVEL TEMPERATURES
ACROSS NRN PORTIONS OF THE RISK AREA...AND VERY STRONG/DAMAGING
WINDS ARE LIKELY GIVEN STRENGTH OF THE AMBIENT FLOW FIELD.
FURTHER...GIVEN MOIST BOUNDARY LAYER AND LOW LCLS ALONG WITH AMPLE
VEERING/SPEED SHEAR IN THE BOUNDARY LAYER...TORNADOES WILL ALSO BE
LIKELY -- INCLUDING THE POTENTIAL THAT A FEW MAY BE
STRONG/LONG-LIVED. THE THREAT WILL SPREAD EWD WITH TIME...LIKELY
LINGERING THROUGH THE END OF THE PERIOD AS STORMS CROSS THE
APPALACHIANS.

I am finalizing my list for the order to purchase a repeater for Kent County ARES / RACES.

Currently were planning 2M and 1.2GHZ. the 1.2 may not have Voice right away but were definitely working to get the digital portion up and running and purchase a few ID1's instead of the triplexer for the voice and data part.

I still need some more items on consignment. Bring your items in today

We will be closed this Saturday so I can be at the Holland Hamfest and closed next Saturday for State ARPSC ARRL meeting in Lansing on Oct 27.

New this week

Ramsey Kits for Kids (or Adults)
300 in 1 Electronic Lab $70
Electronic Crystal Radio Kit $10
Bell Action Kit $9
Motor Action Kit $8
LED Binky Kit $8
Police Siren Kit $8
Electronic Dripping Faucet $10
LED Strobe Light with Case $45
AM Broadcast Transmitter Kit with Case $35
Tri-Field Meter $64

14 Amp Jetstream Power Supply $55
28Amp Power Supply $90 With Meters $110
45Amp Power Supply $170
Lighting Arresters $21.50 ea

We have Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other items in Stock

HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $15 each
New SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
300 ohm twin lead 50Ft $10.00
RG-58 Cable .25 per foot
RG-8 .$1.00 per Foot
RG-8X Coax Cable .45 per Foot
75 ohm Cable 9040 International Wire and Cable .35per foot
PL-259 Connectors $2.50 ea adadapters for RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $12
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's

We are the only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.
Technician Class $18.95
General Class New as of July 1 $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Other Used Equipment on Consignment

High Gain DB-1015 3 Element HF beam for 10/15 meters $50 Must Sell GREAT BUY
Channel Master light duty Rotor with control box and cable $20
SAS-1 Amp Supply HF wire antenna with control box $10
Mixed box of short length coax cable with PL-259 Connectors on end $1 each
JT776SMA HT Antenna $19
Signalcrafter SW-77C SWR meter $5
Headphone/Mike Ear Headset $5
Radio Shack Woodgrain Speaker $5
IC-255A 2 meter Radio with no tone board Like New from 1982 Good Packet Radio $45
Tubes A great Assortment of tested used Tubes $1-$4 each
AL-80A Ameritron 1KW HF Amplifier $850
Bearcat BC 560XLT 16 Ch Scanner $30 Great Buy
B&K Model 4011 Precision function Generator $60
B&K Model 2140 Oscilloscope $175
GW Model GDM-8135 Digital Multimeter $40
B & W Antenna Tuner VS-300A $40
RCA Volt Ohm Meter $25
Barket & Williamson Low Pass Filter $5
Speakers $2 - $10
Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
Center Insulator for HF antenna $5
Rocky Mountain Radar Detector $175
LED Emergency Light $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50
MFJ-722 Notch Filter $30.00
MFJ 407C keyer $15
Code Key $15
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
Sharp SF7320 working Copy Machine $50
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40

Heathkit items in stock

Heathkit SA-2040 1KW Tuner $160
Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40

Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Keychain LED lights $1.50 and up
Other items coming in Daily

Tool Max Industrial Supply is the Tool and Ham Radio retail store on Schamber Dr just off Pontaluna Rd and US-31 just north of the old Hob Knob or Michael's Restaurant (Now tore down) in Muskegon . We have tools, industrial suppliers and Ham radios and parts for sale. For more information call or e mail Tom KB8VEE at 231 798-7898 I am in the Store from 9:00AM-4:30PM Monday-Friday. Stop by and see me for all your Ham needs.

3583. Deals on small generators

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-10-19 01:00:11 UTC
From: Hank Greeb
Topic: 3583 Message: 3583

Pep Boys has two deals for small generators -

They have a 1 KW generator for $119.95 after rebate, which seems to be a widely advertised deal.

I went to their Alpine Avenue store intending to buy one of these, but found an "in store" special of a 850 watt generator plus a small air compressor (1 gallon tank plus a small compressor) for $89.95 after a $30 rebate. I had always wanted an air compressor around the garage, and my rig doesn't draw more than about 200 watts, so I bought the generator/compressor combo. (Besides, I'm cheep, and would probably have bought the $90 deal even if I didn't need a compressor!)

Both generators have 2 cycle engines, so oil and gasoline need to be mixed. However, with <1 Gallon every 4 to 5 hours gasoline consumption, this isn't much of a pain.

73 de n8xx Hg

p.s. I have no financial interest in Pep Boys.

3584. D-Star Repeater Donation to NMARES Organization from Jim Davis - KC8NTE

D-Star Repeater Donation to NMARES Organization from Jim Davis - KC8NTE

Barb – N8JML and Duane – KX8D retired owners of ComDaC have made a extremely generous donation offer to the Northern Michigan Amateur Radio Emergency Services Organization. They have offered to provide a Free Icom D-Star repeater system to the NMARES organization.

The system will include the Icom ID-RP2C digital repeater controller, the ID-RP2000V VHF Digital RF module, and the ID-RP4000V UHF RF module. The D-Star system when completed with have both 2 meter and 70 cm digital repeater capabilities. These three components have a combined value of over $4,000.00.

Additional equipment will be required to complete this NMARES Tactical Emergency Repeater. These items will include duplexers, isolators, antennas coax, power supplies ect. The cost for these items will be born by NMARES.

NMARES members will need to purchase several Icom D-Star radios to take advantage of this generous donation from ComDaC. The D-Star version of the 2 meter digital radios start out around $300.00 each.

The Northern Michigan Amateur Radio Emergency Services Organization will be looking for donors to assist with the purchase of this Emergency Communications equipment for Northern Michigan.

The additional equipment order will be processed as an NMARES group order through ComDaC. The Deadline to place your order with Jim Davis - KC8NTE will be December 30th. If you are interested in experimenting in this new D-Star Mode and are willing to purchase a new D-Star radio for yourself or for NMARES please contact Jim Davis – KC8NTE at kc8nte@....

3585. Think twice before installing Compact Fluorescent lamps

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-10-19 13:05:15 UTC
From: Alan NV8A
Topic: 3585 Message: 3585

See the following sampling of end-user and installer reports:

http://www.mikeholt.com/newsletters.php?action=display&letterID=464

Note the warning against base-up use -- which probably most of our light fittings are.

To add my own 2 cents' worth: We replaced as many as possible (those not on dimmers) of the incandescent bulbs in this house by CFLs when we moved in just under 4 years ago. Most of them have had to be replaced already, but none has actually exploded or caught fire.

73

If no-one has already suggested it, I would download a live CD version of Linux (Puppy is my favorite at the moment), and boot the computer with the live CD. You may be able to access the hard drive thru Linux, and retrieve many (or all) of your lost files. Another possible solution is an USB hard drive enclosure, and another computer. Just a couple suggestions, and not guaranteed to be worth any more than you paid for them!!

3590. Re: Think twice before installing Compact Fluorescent lamps

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-10-21 06:30:24 UTC
From: heavyfistcharlie24
Topic: 3585 Message: 3590

Hi Alan,

How odd the timing of your post on this CFL subject, as I had just posted on our K8MHZHamClass reflector about my CFL incident. I have been using some CFL's for about 1 1/2 years. Most were purchased at the dollar store, and the others at Menards or Lowes. On the morning of 18Oct2007, I flipped on the switch to the overhead ceiling light in the kitchen. I was startled by a loud "POW", flash, and thick one foot diameter ball of white smoke, coming from the unenclosed light fixture, where I had three CFL's horizontally mounted. I quickly flipped the light switch off. When the smoke cloud cleared, I saw one of the three CFL's blown apart. These particular CFL's are the type that have three straight looped tubes, not the round corkscrew type configuration tubes. There is no dimmer on that kitchen light switch. These CFL's were purchased at a dollar store, and are either a 25 watt CFL that is advertised to equal the light output of a 100 watt incandescent bulb, or the 30 watt CFL that is suppose to equal the output of a 150 watt incandescent bulb. (Not by my eyes anyway). I bought both, and have used both without any problems other than early burn out. Upon closer inspection, the glass tubes did not break, but were hanging by a wire from a small circuit board, that was also hanging out of the CFL's white thin plastic base. The glass tubes and circuit board had been blown out when a capacitor apparently blew. I found a loose capacitor that smelled burnt, that was no longer attached to anything. I found small pieces of thin white plastic of the base, on the kitchen floor. I was very thankful that the glass tubes weren't shattered by the "explosion" or broken by an impact with the floor, as I am aware of the mercury inside the glass tubes. That's not a good thing to have scattered all over your kitchen counters, stove, and kitchen floor.
I will not use those straight three tube CFL's in the kitchen fixture again. I know the hardest think on CFL's and fluorescent lights is turning them on and off regularly, and that they have less problems and last longer if they are just left on. That kitchen light gets turned on and off many times during each 24 hour period.
I am still using the round corkscrew type CFL's (base down) in my three living room lamps. Only problem so far is a rather short life of about four months in one multiple light lamp on two of the CFL's. I am not so confident in these CFL's after my kitchen CFL incident, but will monitor them very closely. I do like the light output from them, plus their low current draw. The kitchen CFL was "Engineered in the USA, and manufactured in China" according to the package. Apparently, China has not yet copied our quality control here in the USA. They've copied everything else that they can get there hands on. No quality control on CFL's, childrens painted toys, antifreeze

flavored toothpastes, and pet foods. What's next?! Anything and
everything.

73,
Scott KD8FXF

3593. JAMBOREE-ON-THE-AIR

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-10-23 22:58:45 UTC
From: ravennaelectronics
Topic: 3593 Message: 3593

A huge thank you to everyone that helped out with the Jamboree-On-The-Air that was hosted by the MAARC and their Venturing Crew #9050. The scouts had a great time and learned alot. The interest was sparked in many of the scouts, some leaders and even some parents.

The sad news of the event was spotty band conditions that made getting DX stations hard. The other sad point was when a amateur radio operator from Illinois came on to the same frequency that we had been calling CQ JAMBOREE on and started doing his CQ Illinois QSO Party. He did not even ask if the frequency was in use, he just jumped right in. I kindly called him and stated that this frequency (7.270Mhz) is in use and has been for the Jamboree-On-The-Air. He replied "Yeah, I know. Time for you kids to go elsewhere and play and let some real operators use this frequency." He then proceeded on with his CQing. To set the example, we moved to a different frequency and band. I reassured the youth and their leaders that this one amateur radio operator speaks only for himself and not to judge amateur radio as a whole based upon one person's opinion.

Thanks again to all those that helped!!
Best Regards,
Rich "Doc" Strait, KD8BGQ

Years ago, when I lived in Ann Arbor, there were two hams that lived 10 miles apart and yet, used the Ann Arbor repeater ALL DAY LONG, DAY AFTER DAY, EVEN ON SUNDAY MORNINGS. Nothing could get them to change their minds. Even ignoring them didn't make a difference.

Some people are just like that and I wonder if befriending them would have helped, since all other methods failed? Just a thought...

You could join them on 52 and then after time, suggest a new frequency? Very few things work better than friendliness. You attract more bees with honey... as the ole cliche' goes.

All:

I echo KD8BGQ's remarks. We had a really great time with this event. I, too, was distracted with the band conditions.

We moved the event over to the Michigan state wide link system. Oh, what fun! We were well received, the conversations were easily understood, and ham radio was well demonstrated. I thank all the hams who took time to talk to our Boy Scouts. We could have just as easily been admonished for "hogging" the repeater. We were certainly enjoying the asset. Everyone was happy to share the magic of radio with these "citizens."

Thanks!

Good day Mark. I do not have his callsign. I spoke with another station later that night and he said that he recorded the guy and will send it in. He said this guy has a habit of doing this on that frequency as well as 7290. He said that the guy trumped his CQ JAMBOREE calls as well on Saturday. So, when he heard again on Sunday he was ready with the recorder and turned it on.

BTW, I distributed most of the cards you sent Mark. They were well received. Hopefully all the parents that took the cards will have their kids in your MAARC CE Class soon.

Best Regards

3604. FCC's Hollingsworth to Retire in January 2008

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-10-24 21:08:47 UTC
From: Hank Greeb
Topic: 3604 Message: 3604

from: http://www.arrl.org/news/stories/2007/10/24/102/?nc=1

FCC's Riley Hollingsworth to Retire in January 2008

Riley Hollingsworth, Special Counsel in the FCC's Enforcement Bureau, announced his retirement this week, effective Friday, January 3, 2008. While his successor has not been named, Hollingsworth was quick to point out that the FCC's Amateur Radio enforcement program will continue.

Hollingsworth told the ARRL: "After about a year of thinking about the 'if not now, when?' question, I decided to retire January 3. I love working for the FCC and I've always had great jobs, but this one involving the Amateur Radio Service has been the most fun and I have enjoyed every day of it. For nine years I've worked with the best group of licensees on earth, enjoyed your support and tremendous FCC support and looked forward every day to coming to work. The Amateur Radio enforcement program will continue without missing a beat, and after retirement I look forward to being involved with Amateur Radio every way I can. I thank all of you for being so dedicated and conscientious, and for the encouragement you give us every day."

Speaking at the New England Division Convention in August 2000, Hollingsworth offered his 10 personal suggestions to secure a sound future for Amateur Radio </arrlletter/00/0901/rileys10.html>, encouraging amateurs to "seize the moment" to ensure a bright future for Amateur Radio. "Look beyond enforcement," he urged, "because if I do my job right, in five years you won't even remember my name." Hollingsworth said that while no one can predict the future, amateurs must invent theirs in an era of converging digital and RF technology. "There is no reason why our Amateur Radio Service can't be the envy of the rest of the world," he said. Getting there, he suggested, comes with each amateur's taking responsibility for his or her behavior on the air. Amateurs should encourage arrogant, negative operators to "take their anger and hate to the Internet," he said. "Every minute they are on the Internet is a minute they aren't on Amateur Radio."

ARRL Chief Operating Officer Harold Kramer, WJ1B, said, "Riley Hollingsworth has been a tremendous supporter of and asset to the Amateur Radio Service. He will be remembered as being the force behind the re-introduction of Amateur Radio enforcement in 1998 and continuing those efforts through today. His contribution in cleaning up the amateur bands has been substantial and effective. While we are very sorry to see him go, and we wish him every continued success.

All,

We have several spots open because of the California disaster. If you are interested in coming to this course please email me.

Please pass on to anyone interested. Class is filling quickly!

Wilderness Search & Rescue

Search Manager Course (SARM)

Sponsored by: Kent County Search and Rescue

www.kcraces.net

Presented by: Anthony Marzano, Division Chief Will County Illinois EMA

Topics Include:

Search Management

Resource Management

Incident Command Issues

Search Planning

Course Meets or Exceeds NFPA & NIMS requirements for Wilderness SAR

Dates / Times / Pre-Requirements:

Pre Requisite Search and Rescue Operations Lecture:

October 26th 5-10 PM

(Only if you have not taken SAR Op’s lecture)

Should also have understanding of Incident Command System (FEMA IS-100 & IS-200

or MI UIC)

Search Management Class Session 1: Saturday October 27th 8:00 AM – 4:00 PM

Search Management Class Session 2: Sunday October 28th 9:00 AM – 3:00 PM

Lunch and Snacks included in cost!!

Location:

Kent County Sheriffs Department EOC Room

701 Ball Ave NE 49503

www.kcraces.net/kcsd - Google Map to location

Cost (includes meals during class):

$65.00

RSVP @ http://www.kcraces.net/signup/sarm_oct.php

3609. Hoffmaster Trail Run

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-10-25 20:32:22 UTC
From: Dennis Harriss
Topic: 3609 Message: 3609

Greetings All.

Once again it is time for the Hoffmaster Trail Run.

The run will be held at Hoffmaster State Park in Norton Shores on Saturday November 17, 2007. The race itself starts at 10AM. But, due to the distances and terrain we have to travel to get in position we need to be there at 8:45AM. The event will run no later that Noon.

I am looking for at least 12 people to help me. Once again we will be using a portable repeater supplied by AB8AZ.
The repeater frequency is 147.220 with a standard PLUS offset (147.820) and a PL/CTCSS of 94.8. This will make it easier to setup your radios.

Directions to Hoffmaster State Park.

For those using the US-31 Expressway get off at the Pontaluna Rd exit. Go west on Pontaluna RD approximately 2 miles and when the road starts to curve to the right the Entrance to the park will be on the Left. If you need assistance talkin will be on the Muskegon 94 repeater. Once you get to the park turn right at the first road after you pass the permit shack. You should be able to get into the park without a permit or having to buy a one day pass.

If you can help contact me at n8ctt@... or my cell phone 231-670-1284.

Denny N8CTT AEC/DRO Muskegon County

3610. Check your location in QRZ.COM

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-10-25 20:46:58 UTC
From: Alan NV8A
Topic: 3610 Message: 3610

My location in QRZ.COM always used to show as EN62xu, and although I am sure I did not enter the information, it seemed to be reasonably accurate.

Now it shows as EN72au, as it does for some nearby hams, but that is off by several miles. I was not the one who changed it.

It's possible to change your information in QRZ.COM, so check whether yours is still OK.

BTW, at www.qrz.com/gridfinder, you can enter your street address and get your location in compass coordinates and as a grid square. It seems to work reasonably well for my location.

3611. Re: FCC's Hollingsworth to Retire in January 2008

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-10-26 12:10:29 UTC
From: Bill
Topic: 3604 Message: 3611

Mark and Others:

Oftentimes it seems that folks who whine about a situation seem to think that long winded explanations will somehow be more persuasive. I, too, could be characterized as verbose. Maybe even in this message? In this context I wonder how mentioning irrelevant junk helps persuade one's audience? For example, if a ham is asked about his activities on a ham frequency, how does a diatribe on the Clinton/Lewinski fiasco clarify or answer the question? I tried to read that six land ham's novel. Endless drivel forced on the FCC guy. Sad

It seems that some folks like to hear themselves talk and don't seem to notice the bandwidth. I'm similarly guilty?

I have no long history with amateur radio. I similarly have no experience with enforcement. I have listened to the noise on twenty meters and I don't frequent seventy-five meters because of the language. I choose to use the Big knob or the power button. I'm happy that someone (Hollingsworth comes to mind) is out there to take the knocks, wade through the nonsense purported to be an explanation, and at least try to help his amateur radio hobby. I'm not one to try to find the gray areas or chase the obtuse. I'll leave that to others.

"I can cite many other reasons why I don't think Hollingsworth has done well during his tenure with the FCC with 40 of them being located between 26.965 and 27.205 MHz." This is a pretty good example of irrelevance passed off as explanation. How does the CB band factor into amateur radio, Hollingsworth's enforcement efforts, and the general wellbeing of ham radio? How does CB radio effect my hobby, amateur radio? Irrelevant?

And I don't really care if Hollingsworth is an attorney. I'm sure if he is not an attorney he can ask the lawyer types at the FCC for council. He's probably got one on speed dial.

It seems quite easy for a ham to stay in the mainstream and enjoy the hobby. Why test the edges? Mainstream too boring?

Now if there is a way for a ham to get a "lifetime license" then more power to them. If something like that were important then I'd chase a British ham license. Good forever. Might even be a lot easier or at least less stressful on a ham's reputation.

"Dimmer switches, aquarium heaters, . . . to name a few." Over the past few years I have read copies of FCC correspondence to neighbors of hams who have been advised, by the FCC, that their devices are

interfering with local hams. Several. How is the FCC not doing something? Have they not weighed in on your particular behalf? And does the ARRL have a department that can be asked for advise? Sort of takes some of the load off the FCC? I, for one, don't want those folks at the FCC to have to deal with EVERY aquarium heater problem. If I were to suffer such annoyance I suggest that I'm the one to initiate dialog with the owner of the offending device. I've heard of several instances where a ham can install a filter and easily resolve the problem. Cheap and quick? And I found the answer on the internet without bothering the FCC. Oh, you say it is my God given right as a taxpayer to pester the federal government? Efficient use of resources?

My thanks to Riley Hollingsworth for all his service. I, for one, am not applying for the job opening. My skin is too thin.

Bill, AB8SC

3614. Tool Max Closed this Saturday

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-10-26 17:08:01 UTC
From: Tool Max Ind. Supply
Topic: 3614 Message: 3614

I still need some more items on consignment. Bring your items in today

We will be closed this Saturday so I can attend the State ARPSC ARRL meeting in Lansing.

New this week

Ringo Ranger 2 meter antenna $35
11 Element 2 meter Beam $45

14 Amp Jetstream Power Supply $55
28Amp Power Supply $90 With Meters $110
45Amp Power Supply $170
Lighting Arresters $21.50 ea

We have Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other items in Stock

HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $15 each
New SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
300 ohm twin lead 50Ft $10.00
RG-58 Cable .25 per foot
RG-8 .$1.00 per Foot
RG-8X Coax Cable .45 per Foot
75 ohm Cable 9040 International Wire and Cable .35per foot
PL-259 Connectors $2.50 ea adadapters for RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $12
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's

We are the only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.
Technician Class $18.95
General Class $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Other Used Equipment on Consignment

Ramsey Kits for Kids (or Adults)
300 in 1 Electronic Lab $70
Electronic Crystal Radio Kit $10
Bell Action Kit $9
Motor Action Kit $8
LED Binky Kit $8
Police Siren Kit $8
Electronic Dripping Faucet $10
LED Strobe Light with Case $45
AM Broadcast Transmitter Kit with Case $35
Tri-Field Meter $64

High Gain DB-1015 3 Element HF beam for 10/15 meters $40 New Price Must Sell GREAT BUY MUST GO
Channel Master light duty Rotor with control box and cable $20
SAS-1 Amp Supply HF wire antenna with control box $10
Mixed box of short length coax cable with PL-259 Connectors on end $1 each
JT776SMA HT Antenna $19
Signalcrafter SW-77C SWR meter $5
Headphone/Mike Ear Headset $5
Radio Shack Woodgrain Speaker $5
IC-255A 2 meter Radio with no tone board Like New from 1982 Good Packet Radio $45
Tubes A great Assortment of tested used Tubes $1-$4 each
AL-80A Ameritron 1KW HF Amplifier $850
Bearcat BC 560XLT 16 Ch Scanner $30 Great Buy
B&K Model 4011 Precision function Generator $60
B&K Model 2140 Oscilloscope $175
GW Model GDM-8135 Digital Multimeter $40
B & W Antenna Tuner VS-300A $40
RCA Volt Ohm Meter $25
Barket & Williamson Low Pass Filter $5
Speakers $2 - $10
Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
Center Insulator for HF antenna $5
Rocky Mountain Radar Detector $160 New Price
LED Emergency Light $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50
MFJ-722 Notch Filter $30.00
MFJ 407C keyer $15
Code Key $15
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40

Heathkit items in stock

Heathkit SA-2040 1KW Tuner $160
Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40

Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Keychain LED lights $1.50 and up
Other items coming in Daily

Tool Max Industrial Supply is the Tool and Ham Radio retail store on Schamber Dr just off Pontaluna Rd and US-31 just north of the old Hob Knob or Michael's Restaurant (Now tore down) in Muskegon . We have tools, industrial suppliers and Ham radios and parts for sale. For more information call or e mail Tom KB8VEE at 231 798-7898 I am in the Store from 9:00AM-4:30PM Monday-Friday. Stop by and see me for all your Ham needs.

Tom,
Sorry I have not gotten back to you sooner. I just now got the chance to get the study run. The attached pics are of the area that your digi should hear a 300mw transmitter from. I believe the one on the ground 6db loss might be the most accurate. I was told that you or someone else has a digi within 10 miles of the one that heard the balloon. If I had the details on those digi's, we could eliminate the overlap areas. Again, thanks for all your help.

Hello Everyone ... I would like to get more information on the balloon ... from the youtube site it sounds like there is a cross band repeater on the balloon ... can we find out how long the battery support may last and if it has a ID unit on it and how often that is set to ID ... if someone trys to repeat through the unit they should make sure they use there low power so they are not useing the battery life up with no posibilty of hearing it ... if it has a ID unit on it we should all be moniter the frq it is on and we need one person to collect this information ... any one ... any one ... I would but I will not be home this weekend enough but I will be rideing around Muskegon County and will listen for the balloon ... and look ..73 Don -KB8ODB

Tom,

How long is the battery in the balloon possibly good for? Is it still transmitting APRS as far as we know, just not with GPS coordinates?

All
The balloon was down on Tuesday night and as I was on the phone at 8:30 PM the unit stopped transmitting. They think it should have hit the Michigan shoreline at about 6PM. The battery worked for about 1 week in testing but we were out Tuesday night until after 11PM and could not detect any new packets. All packets were thro the KB8VEE-3 APRS DIGI in Montague. WB9FDZ-11 was the callsign being used. No data came thro any other APRS DIGI at it hit the shoreline. I have to think that the balloon is in the Whitehall/Montague area.

Wow! That link looks long. Go to eBay and search for "ham tower" and it's there.

Read the description, especially the material from the manufacturer.

And I was kicking around the idea of a portable tower. Ha!

ZCZC AG24
QST de W1AW
ARRL Bulletin 24 ARLB024
>From ARRL Headquarters
Newington CT October 30, 2007
To all radio amateurs

SB QST ARL ARLB024
ARLB024 Hollingsworth to Stay Put at FCC

Riley Hollingsworth, K4ZDH, Special Counsel for the FCC's Enforcement Bureau, has decided not to retire. He had announced last week that he would leave the FCC in January 2008.

Riley states, "After spending the entire weekend thinking about the decision [to retire], it became more and more clear to me that it just isn't the right decision for me right now. There are several issues on the table that I want to continue to work through with the amateur community."

The Enforcement Bureau is the primary organizational unit within the Federal Communications Commission that is responsible for enforcement of provisions of the Communications Act, the Commission's rules, Commission orders and terms and conditions of station authorizations, as well as enforcement of Amateur Radio rules (Part 97).

puttin up an antenner
hay agin mi ham raydio frend.
lik i pramised bfor hear is mi letur tellin ya how 2 put up an antenner.
tha first theng i need ta say is it shor is hard wurk puttin up an antenner.
ya need a lota plannin an fixin bfor ya can git starded.
2 of tha mos emportent thengs ta hav is a gud test dawg ana gud pare uf wyre cuters..
mi test dawges name is yep.
i named hem that caws thates whut he duz whin he fines tha wrong wyre
fur mi antenner.
i ownly use won kind uf antenner wyre caws i kin fine it purty esey arond whur i liv.
it downt cost me nuttin ecept fur all tha wawkin an runnin me an yep mi dawg gota du.
we start kinda earlie en tha mornin hikin over tha hill tu mi naybors
land
wher i git tha wyre fur mi antenner.
mi naybors gota lota land whur he kepes hes couws an won bull fenced en.
an all tha wey arond it on tha fence he keeps nyce nue shiny wyre thet i make mi antenners owt uf.
i kin awl ways git awl tha wyre i need thayer caws ever tyme i git sum mi naybor puts mor
up betwen tha post.
i al so git mi ensulayters frum ofa tha posts ta use own mi antenners.
gettin this wyre kin be awful dangrous to yur helth caws uf tha bull so ya gota keepa sharp lookowt furim.
bout tha tyme we git closeta tha fence i needa little forta fyin sow i reech bak in mi bak pac and pul owt
o i for got to tel ya bout tha bac pac.
bfor i leve mi shak i git mi ol ladiy to pac me an yep up sumpin to eet an drenk.
wel i git mi dawg yep a biskit an im sorta thirstee sow owt she cums mi jar uf sippin licker.
i no im gonna needa lota corage ta git tha wyre owt frum unner that bulls nose sow i opener up and take abowt 8 swallers.
mi dowg yep es lookin up at tha jar sow i no he mus be needin a liddle corage 2 sow i reech bak in mi bac pac pull owt anuther biskit
and soke it gud withe the sippin whicker an givit toim.

doun it gos weth won gulpe ana coupla sekons latur bothe ears stan strate up an i no mi dawg es rediy to wurk.
he trots ovur ta tha furst post he cums tu hikes hes hin lig an letser fli.
if he lets owt a yep an is nocked backards then i no thet tha wyre is
hot ans tha wrong wyre fer mi antenner.
this is why its emportunt ta hava gud test dawg. yeps name sure is fittin fer im.
whin yep finaly stops yeppin an gits up we go ta a difrunt part uf tha fense and yep dum ol dawg testes it agin. thes tyme he jus sorta luoks at me an grins an i no tha wyre is gud wire fur my antenner.
smart dawg mi yep.
i reech out an kut tha wyre weth mi wyre cuters an grabit an me an ol
yep start runnin as hard as we kin tawards home hopein tha bull was busy. sumtymes i git forti er fity fut ata tyme lik thes.
we finely git tu tha shak an ol yep plops doun on tha botum step an i
pul ouwt my jar uf swippin clicker an biskits an set a spell wunderin
how ime gonna git mi nu wyre up in tha trees.
im knot tu keen on climin trees or enything vury hi but ol yep jest luvs ta clime. he wun a contest a while bak at tha cownty fare fer climin an beet dawgs frum al ovor tha place.
i now had an idear abowt how to git mi nu wyre up in tha tree sow i maid up mi mind tu let yep hav sume fun sow i wokeim up.
he jumped up weth won ear up an won doun an starded ta wag his tayal.
i think he new what wus gonna happin.
smart dawg mi yep.
i got tha nu wyre an tyed it tu his tayal an poyned tu tha tree an yelled up yep an he lit owt lyke greezed litenin up tha syde uf tha tree weth bark justa fliyin.
he got abowt tin fut up an straduled tha furst lim an held own an barked doun at me.
i new whut he wantid. mor corage.
i ran an got anuther biskit an soked it gud frum mi jar an chunked it
up tuim.
he cawt it in mid air an swollered it hole an ina flash he wuz own hes way agin.
i recon tha tree musta ben abowt therty er forety fut tall an yep brok alota lims own his way up tu tha top.
he finaliy got tu tha last lim at tha top an grabed hold weth bowth paws an hunge own fer deer lyfe.
he wuz sum syte hangin frum tha lim way up ther weth mi nu antenner wyre tyed tu his tayal.
wel it jest kame tu me thet ol yep wuz a gud tree climin dawg but thare wuz 1 problem i had fergot.

he did ent no how ta git doun.
dum dawg mi yep.
wel i did ent wont im ta fall sow up tha tree i wint after i
fenished
mi jar of sippin slisker caws i waddent tu keen on climin..
when i reeched him i tuk tha nu wyre ofa his tayal an tyed it tu tha
lim an grabed him an put
him arown mi nek an starded doun tha tree.
i got tu tha growne an ol yep leeped frum mi bak an ran unner tha
shak.
smart dawg mi yep.
i loked up at mi bran nu antenner wyre hangin frum tha tallist tree
i
had an then i real lized that
tha end uf it wuz abowt therty fuut up tha tree.
dang it. here yep. whure is zat dawg.

it shor is hard wurk puttin up an antenner.

eye will right mor latur whin i git anuther pin

yower frend elmur

3629. Anyone for Sweepsteaks?

This weekend is CW sweepsteaks. Starts 2100 UTC Saturday, ends 0300 UTC Monday ends Sunday evening (that's 3 p.m EDT This Saturday, 10 p.m. EST this coming Sunday. Two weeks after that is Phone Sweepsteaks, same starting time in UTC, but since it's Standard time then, it will be 3 p.m. EST starting time.

Who is going to be operating? I've had a blast every time I've tried the contest. There's a special category for working all 80 ARRL sections - which is what I generally attempt, sometimes with success, other times negative.

Hi Hank,

On the 17th we are going to do a big get together at the Muskegon clubhouse for Phone Sweepsteakes. We are going to kick it off Saturday morning with a free breakfast and a mini swap and activities in the afternoon till the Sweeps start. We will have people operating non-stop all night with food for all that get hungry. We did this last year without the mini swap and great turnout. Hope to see you there

This weekend is CW sweepsteaks. Starts 2100 UTC Saturday, ends 0300 UTC Monday ends Sunday evening (that's 3 p.m EDT This Saturday, 10 p.m. EST this coming Sunday. Two weeks after that is Phone Sweepsteaks, same starting time in UTC, but since it's Standard time then, it will be 3 p.m. EST starting time.

Who is going to be operating? I've had a blast every time I've tried the contest. There's a special category for working all 80 ARRL sections - which is what I generally attempt, sometimes with success, other times negative.

From: Hank Greeb
Topic: 3632 Message: 3632

If folks will be looking for North Dakota during Sweepsteaks 2007, look for K?RC from Grande Falls, North Dakota. He later confirms that he will be using his own call.

Now, lettuce c - last year I had trouble finding VO1 and one of the California sections - don't remember which. Should I run Assisted so I get help from the spotters, or should I do as I've done for some 50 or so years and just play the luck of the draw?

From: Robert Chudek - K0RC <k0rc@...>
To: Minnesota Wireless Assn <MWA@...>

Well I can't hold the secret any longer... North Dakota will be "on the air" this coming weekend.

By the generosity, hospitality, and encouragement of our very own MWA member Glenn Johnson - W?GJ and his son Mark - N?MJ, I will be operating the 2007 ARRL CW Sweepstakes from Grand Forks, North Dakota. So when you work me, yes the section I will be sending is ND!

Glenn recently finished the installation of a new SteppIR - BigIR vertical antenna and radials. This will be the first time I have ever used an HF vertical antenna! I will be operating in the Single Operator Unlimited class using my Pro III transceiver and Dell laptop. Glenn has a wireless access point so I should be able to connect to N5IN without any issues.

CQ SS!

73 de Bob - K?RC in MN - Go MWA (North)!

3634. Working the Satellites with Your FM Rig

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-11-01 19:44:57 UTC
From: Mark Thompson
Topic: 3634 Message: 3634

November - a great mobile satellite month

Bob WB4AOR says November should be a great month for working Amateur Radio satellites from your Mobile FM rig.

There are 7 satellites you can work from your mobile FM rig, including PCSAT-1 which should fully recover by this weekend and last for 2 or more weeks. So now is the time to get going with live satellite contacts via these easy FM satellites, or setting up a SATGATE (Igate).

DOWNLINK SATELLITE

145.825 ISS APRS digipeater
145.825 PCSAT-1 (recovery expected 3 Nov)
145.825 ANDE-1 (re-entry expected next month)
435.225 GO-32 +/- 10 KHz and 9600 baud

435.300 AO-51 *FM Voice* +/- 10 KHz
436.795 SO-50 *FM Voice* +/- 10 KHz
436.795 AO-27 *FM Voice* +/- 10 KHz

As you can see, there will be over 40 passes per day with 18 for the 1200 baud satellites, 6 per day for the 9600 baud GO32 and 18 for the voice birds.

All 1200 baud pass times are between about 6 AM to 1800 local sun time in the Northern Hemisphere.

GO-32 and AO-51 voice birds are in the morning and evening, AO-27 is in the afternoon. It is trivial to know when to operate these birds WITHOUT A PC.
Please see the manual-tracking page:
http://www.ew.usna.edu/~bruninga/MobileLEOtracking.html

The packet path on 145.825 is VIA ARISS for all three satellites. The path for GO-32 is VIA 4XTECH and uses two different uplinks: 145.85 for APRS software and messages.145.93 for all Mic-E, D7 and D700 radios. That's more than one pass per hour on 145.825. Lots of contact potential from your mobile...

For APRS birds:
http://www.ew.usna.edu/~bruninga/pcsat.html
http://www.ew.usna.edu/~bruninga/iss-faq.html
http://www.ew.usna.edu/~bruninga/ande-ops.html
http://www.ew.usna.edu/~bruninga/GO32-ops.html

For AMSAT birds:
http://www.amsat.org/amsat-new/satellites/status.php

For many of these satellites, you don't even need a tracking program. Just a slip of paper on the dashboard... See:
http://www.ew.usna.edu/~bruninga/MobileLEOtracking.html

The best antenna is a 19.5" whip in the center of your roof. 5 dBi gain on the 2m uplink and almost 8 dBi gain for the very weak UHF downlink (above 25 degrees)...

Watch for special event info.

WB4APR, Bob

3635. Tool Max Open this Saturday

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-11-01 20:34:03 UTC
From: Tool Max Ind. Supply
Topic: 3418 Message: 3635

I still need some more items on consignment. Bring your items in today

We will be OPEN this Saturday .

New this week

Ringo Ranger 2 meter antenna $35
11 Element 2 meter Beam $45

14 Amp Jetstream Power Supply $55
28Amp Power Supply $90 With Meters $110
45Amp Power Supply $170
Lighting Arresters $21.50 ea

We have Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other items in Stock

HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $15 each
New SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
300 ohm twin lead 50Ft $10.00
RG-58 Cable .25 per foot
RG-8 .$1.00 per Foot
RG-8X Coax Cable .45 per Foot
75 ohm Cable 9040 International Wire and Cable .35per foot
PL-259 Connectors $2.50 ea adadapters for RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $12
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's

We are the only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.
Technician Class $18.95
General Class $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Other Used Equipment on Consignment

Ramsey Kits for Kids (or Adults)
300 in 1 Electronic Lab $70
Electronic Crystal Radio Kit $10
Bell Action Kit $9
Motor Action Kit $8
LED Binky Kit $8
Police Siren Kit $8
Electronic Dripping Faucet $10
LED Strobe Light with Case $45
AM Broadcast Transmitter Kit with Case $35
Tri-Field Meter $64

High Gain DB-1015 3 Element HF beam for 10/15 meters $40 New Price Must Sell GREAT BUY MUST GO
Channel Master light duty Rotor with control box and cable $20
SAS-1 Amp Supply HF wire antenna with control box $10
Mixed box of short length coax cable with PL-259 Connectors on end $1 each
JT776SMA HT Antenna $19
Signalcrafter SW-77C SWR meter $5
Headphone/Mike Ear Headset $5
Radio Shack Woodgrain Speaker $5
IC-255A 2 meter Radio with no tone board Like New from 1982 Good Packet Radio $45
Tubes A great Assortment of tested used Tubes $1-$4 each
B&K Model 4011 Precision function Generator $60
B&K Model 2140 Oscilloscope $175
GW Model GDM-8135 Digital Multimeter $40
B & W Antenna Tuner VS-300A $40
RCA Volt Ohm Meter $25
Barket & Williamson Low Pass Filter $5
Speakers $2 - $10
Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
Center Insulator for HF antenna $5
Rocky Mountain Radar Detector $160 New Price
LED Emergency Light $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50
MFJ-722 Notch Filter $30.00
MFJ 407C keyer $15
Code Key $15
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40

Heathkit items in stock

Heathkit SA-2040 1KW Tuner $160
Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40
Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Keychain LED lights $1.50 and up
Other items coming in Daily

Tool Max Industrial Supply is the Tool and Ham Radio retail store on Schamber Dr just off Pontaluna Rd and US-31 just north of the old Hob Knob or Michael's Restaurant (Now tore down) in Muskegon . We have tools, industrial suppliers and Ham radios and parts for sale. For more information call or e mail Tom KB8VEE at 231 798-7898 I am in the Store from 9:00AM-4:30PM Monday-Friday. Stop by and see me for all your Ham needs.

3636. Fw: Milwaukee D-Star Forum @ AES & Hamfest Near AES, Saturday, 11/3

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-11-01 20:39:52 UTC
From: Mark Thompson
Topic: 3636 Message: 3636
Attachments: 2 described; binary payloads are missing from this source WARC

This Saturday morning, 11/3 there will be D-STAR forums sponsored by Icom hosted at AES in Milwaukee.

At the same time the Milwaukee Repeater Club is holding its hamfest across the street from AES.

Icom/AES D-STAR Flyer and MRC Hamfest Flyer are attached and also available at:

http://www.mrc91.org/

More information about the D-STAR forums is also in the attached email below.

The D-STAR simplex frequency at hamfest is 145.67 MHz and in the Milwaukee area the following D-STAR repeaters are on-the-air:

Milwaukee Area Digital Operators Group
Milwaukee
BandTypeRepeater OutputRepeater InputOffsetRepeater Call Sign

In a message dated 10/31/2007 10:56:49 A.M. Central Daylight Time, newsletter@... writes:

First Annual Great Lakes D-Star Forum - Saturday November 3, 2007

8:30 A.M. to 3:00 P.M. – Meet the AES gang and see the Latest Equipment on display.

10:00 A.M. to 2:00 P.M. – Attend the first annual Great Lakes Area D-STAR Forum presented by AES.

Learn about D-Star from the leading experts in this new amazing technology.

Guest Speakers:
Ray Novak, N9JA (D-STAR Introduction) ICOM National Amateur Radio Sales Manager
Kermit Carlson, W9XA; Chicago, IL
Jim McClellan, N5MIJ; Dallas, TX
Tim Barret, K6BIV; Mt. Diablo, CA

There will also be representatives from the Chicago and Milwaukee area D-Star repeater clubs. D-Star is no longer a theory but a viable communications method in operation around the Great Lakes area.

As an added bonus, you can visit the Milwaukee Radio Club's hamfest across the street from us at the Elk's lodge.

The Boy Scouts will be selling food and beverages as a fund raiser at AES and the Elk's lodge.

3639. Open House & Special Event Station

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-11-02 18:16:02 UTC
From: Dennis Harriss
Topic: 3639 Message: 3639

This is a reminder that Muskegon County Emergency Communications Services will be holding an open house to celebrate completing our radio room at the Muskegon County Emergency Communitions Center Tomorrow Saturday November 3, 2007 from 9am to 9pm.

We will also be operating a special event station on 146.82 (94.8), 14.267 and 7.267 during the same time.

Everyone is invited to come to the open house and help us celebrate. The Muskegon County Emergency Communications Center is located at 1611 Oak Ave, on the corner of Oak and Harvey in Muskegon. This is the former Muskegon County Health building which is across from General Hospital. We (K8WNJ) will be listening on the 146.82 repeater if you need directions.

3642. Snowfall reporting methods?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-11-04 05:08:45 UTC
From: Joe Veldhuis
Topic: 3642 Message: 3642

Well, the NWS says there is a 40% chance of snow this coming Monday, so now would be a good time for a refresher on how exactly to format and submit snowfall reports.

What I particularly need to know is, what methods of originating the reports currently exist? I used to use the QMN packet network, but that no longer exists. Is there any similar means of doing it, or are the voice and CW nets the only remaining option?

Joe,
As a partial answer to your question let me remind you and everyone that there will be a Winter Weather Observation and Reporting presentation by the National Weaher Service at Muskegon Community College at 7PM on November 8th. Mike Heathfield from the GRNWS office will be presenting a program in Room 1100. There is a link on the GRNWS home page with the announcement.

Joe,

You can send your NWS reports to the NTS nets QMN at 3563khz at 6:30pm or 10:00pm daily or to WMTN at 147.16mhz 94.8hz PL Monday, Wednesday, Friday and Sunday at 9pm.

If you want, I can relay them for you, there are a couple more NTS nets that will handle them.

Hello Everyone ?.
Again this year we have been asked by Grand Haven Public Safety to help out with the Grand Haven Jingle Bell Parade. The parade will be held this year on December 1st at 6pm this is one hour earlier then last year. This is always a fun event to do in that it is a short event and you get to welcome Santa Claus to town. There are a lot of floats and lots of people that are in the parade. There is a little traffic directing with the GHPS but most is people directing. Everyone that has helped in the past has said this is a event worth helping out with and is a good one to bring the family with you to watch the parade. If you can help us out with this event we will be meeting at 5:00pm in the GHPS training room for assignments, enter up the steps on the north east corner of the building talk in will be on the 145.49 repeater and net will be also on the 145.49 repeater. If you would like to help out with this event contact John Fisher KC8UNY or Don Meyer KB8ODB so we can
put you on the list. If you have a place you would like to be at or close to let us know that also ?? Thank you for helping out on the events in the Tri-City?s area ?. 73 Don Meyer ? KB8ODB

3649. LST on the Air, Veteran's Day

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-11-06 00:04:34 UTC
From: Bill
Topic: 3649 Message: 3649

All:

Did you hear that we're planning to play radio aboard the LST in Muskegon on Sunday? That's Veteran's Day and we will be aboard the ship from early until late. Or until all of us have had fun operating aboard only one of the two remaining LST ships.

You can contact Bob, N9AUY to schedule some operating time. You can drop in and cheer from the sidelines at any time. We'll also try to get you some microphone time, too!

Stop in and operate. Or dial around and give us a call. We'll be using the W8ZHO call sign. Hope to QSO you!

Bill, AB8SC
MAARC guy

I thought this would be an interesting article. They didn't mention
how many watts, or most likely mW that this puts out.

The World's Smallest Radio by Prachi Patel-Predd
A tiny radio made out of a single carbon nanotube could ultimately
find use in biological and environmental sensors.

3653. Kent County CERT / Disaster Preparedness training - Please pass on to anyone who may be interested

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-11-06 20:05:52 UTC
From: Jeff's Lists
Topic: 3653 Message: 3653

If anyone outside of Kent County is interested you are more then welcome to come! During the final exercise bring your ham radios!

Hi All:

This is a reminder we will be starting a Community Emergency Response Team training this week Friday night. We still have seats open. This class is open to anyone who is interested in learning more about being prepared for emergencies and possibly getting involved with the team that is forming in 2008. Read below for some important details.

These class's include training in Search and Rescue, how to use a fire extinguisher, disaster medical / triage, disaster psychology and much more!

Cost - FREE!!!

Locations / Times

Classes are all from 6-10 PM and we try to have snacks for you at the class.

November classes:
Nov 9: Introduction to CERT - Kent County Sheriff's department 701 Ball Ave NE
Nov 13: Fire Suppression / use of a fire extinguisher
Nov 16: Disaster Medical / Triage
Nov 20: Search and Rescue
Nov 26: Final Exercise

If you are interested in signing up go to:

3654. Kent County ARES program - Pass on to ALL hams living in Kent County

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-11-06 21:48:54 UTC
From: Jeff's Lists
Topic: 3654 Message: 3654

Hi All:

In the past few months we have seen the restart of the ARES program in Kent County. With this restart we have set up a sign up process for the program.

A few notes about the ARES program:

- We do not require a criminal history check of members as of November 2007
- The only requirement is a will to serve and an amateur radio license
- All HAMs are invited to the program living with Kent County
- ARES members are used for public service events, "non-secure" locations, severe weather spotting, CERT communications support and Disaster related activities.
- ARES members are encouraged to take independent study trainings provided free of charge from FEMA
- The ARES program uses amateur radio operators from around the community.
- This program is for radio operators NOT already involved with ARES / RACES / CERT.

Signup Link: http://www.kcvrm.net/resourcesignup.php

And use the following information:

Resource Code: ARES - This is Case sensitive
Password: HamRadio - This is case sensitive

This program is open to ANY amateur radio operator living or working in Kent County.

If you run into any issues while signing up please email aschultz@...

thank You

Jeff Nawrot
Kent County ARRL ARES Emergency Coordinator

3655. D-STAR Forum at Ft. Wayne Hamfest, Saturday, 11/17 @ 1 pm

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-11-07 09:13:19 UTC
From: Mark Thompson
Topic: 3655 Message: 3655
Attachments: 2 described; binary payloads are missing from this source WARC

There will be a D-STAR forum at the Fort Wayne hamfest on Saturday, 11/17 at 1 pm.

I will present an Overview / Introduction of D-STAR and afterward there will be a discussion of D-STAR activity in Indiana by Indiana D-STAR users.

Last year we had a standing room only crowd of over 75 in attendance at the D-STAR forum.

In addition, dealer KJI Electronics will again be at the hamfest. Last year they had all the models of D-STAR radios & repeaters available for sale.

More information about the forums at the hamfest is at:
http://www.fortwaynehamfest.com/forums.htm

General information about the hamfest & the hamfest flyer is at:
http://www.fortwaynehamfest.com/images/Main%20Hamfest%20Flyer%2007.pdf

The D-STAR simplex frequency at the hamfest will be 145.67 MHz.

I look forward to seeing you there.

73, Mark, WB9QZB
Chicago, IL

More information about ALL the ham digital modes is available at:

3656. Fw: Letter from Dennis M at Yeasu

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-11-07 16:26:31 UTC
From: Mark Thompson
Topic: 3656 Message: 3656

----- Forwarded Message ----

From Dennis, K7BV:

Friends,

By now, many of you may have heard that Vertex Standard Co., Ltd, (Vertex Standard USA's parent company) announced that they have agreed to form a collaborative joint venture with Motorola, Inc. I personally believe the most important words in this sentence are "collaborative joint venture“ a business relationship that indicates a far different outcome intent than the demise of one of the venture partners.

Since Yaesu is the Amateur Radio Division of Vertex Standard, I am sure you are just as curious as me, a Yaesu employee with a job at stake, to know what this business transaction will mean to all of us in the hobby. Predictably, I see that the news about the pending new Motorola relationship with Vertex Standard, hence Yaesu, is giving life to all sorts of misinformation and "doomsday". Internet postings by the usual cast of characters who always seem to know so much more about things than the rest of us mere mortals. After studying public announcements and considering the internal information that is made available to me in my role as the leadership individual for North American sales at Yaesu, I would like to offer the following FACTS about this exciting development.
Motorola, Inc. (NYSE: MOT) will launch a tender offer to acquire a controlling interest in Vertex Standard Co., Ltd. (JASDAQ: 6821). Upon successful completion of the tender offer and subsequent restructuring process, Motorola will own 80% of Vertex Standard and Toko Giken, a privately held Japanese company, controlled by Jun Hasegawa, current president and CEO of Vertex Standard, will retain 20%, forming a joint venture. On 5 November 2007, the Board of Directors of Vertex Standard expressed their support of the tender offer. Yaesu, of course, as one of the Vertex Standard operations, will be included in this exciting development.

I want our Yaesu customers and concerned others to know the following about the proposed merger:

Vertex Standard (meaning Yaesu to us in the Amateur Radio hobby) will remain a separate, global organization with distinct resources governed by the Board of Directors comprised of four Motorola representatives and one Toko Giken representative. Toko Giken is a privately held Japanese company, controlled by the founderâ€™s family. It currently holds 29.2% shares of Vertex Standard.

Mr. Jun Hasegawa (my boss), son of Sato Hasegawa JA1MP, the founder of Yaesu will continue to take part in the management of Vertex Standard in his capacity as the Representative Director, President and CEO of Vertex Standard after the Tender Offer. The day-to-day management of the joint venture will be the responsibility of Mr. Hasegawa and his senior leadership team, who are also expected to continue. Count me as one of those who will continue with Yaesu.
Our business will continue to be operated as is, and we will continue to actively develop new products and operate the business as a leading manufacturer of amateur radio, marine,

land mobile, and airband radios.

The Vertex Standard brand of equipment (Standard brand in Japan) will continue to exist. The current Vertex Standard brand strategies are highly respected by Motorola and will be continued. Since Motorola appreciates our Yaesu brand strategy, there will be no change to it.
There will NOT be a Motorola brand of Amateur Radio equipment replacing or competing with Yaesu.

Yaesu customers can expect to see positive benefit from the fact that:
Vertex Standard has an experienced engineering team that, combined with Motorola's extensive engineering talent, will develop new innovative products. Personally, I cannot wait to see what this joint engineering effort will bring to Amateur Radio!

Cost synergies will be realized through the use of Motorola's buying power to reduce the joint venture's costs for raw materials. Hams are known to enjoy seeking out the best buy for their hard earned money - expect to see Yaesu products remain highly competitive and providing excellent value for your investment.

Because Mr. Hasegawa will continue to manage the day-to-day operations of Vertex Standard, we do not expect to see changes in the existing Yaesu dealership, pricing and rebate philosophies as a result of the joint venture.

These are historic exciting times for Yaesu, our customers, and Amateur Radio. The future is bright and the potential for incredible technological advancements for Amateur Radio are immense. We are glad you will be there with us as the positive affects of the Vertex Standard / Motorola joint venture unfolds.

73,
Dennis Motschenbacher K7BV

All:

The leash my doctor has me on is getting longer and longer. I'm not to return to the eye doctor for another month. In the meantime I can get a new pair of glasses, return to driving a car, and begin weaning my eye of the drops. The doctor won't say the detached retina is cured. He will say I can begin returning to my more normal routine.

I'll be keeping an "eye" on the situation and babying the eye for the next several months. Others have eventually almost forgotten the discomfort of the cure and recovery. I'm hopeful.

This event has surely shown me the Huge power of prayer. I thank each of you for your kind words and prayers. This has been one onerous recovery made more manageable with your words and thoughts.

Thank You!!

3666. CQD / SOS some history

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-11-09 02:21:55 UTC
From: Jim KC8PCJ
Topic: 3666 Message: 3666

There was a rumor that the Titanic was the first to use SOS. According to this article they were not. It had been adopted years eailier. It also tells the meaning of CQD which was used before SOS. CQ representing a general call (i.e., "seek you") to other ships and D for danger.

Very interesting reading, Take a look.

I still need some more items on consignment. Bring your items in today

We will be OPEN this Saturday 9AM-12PM only.

New this week

Radio Shack HTX-242 2 meter 50 watt radio with added speaker $50
6-9 inch clamps to mount antenna on large poles or vent pipes $5.56 each

14 Amp Jetstream Power Supply $55
28Amp Power Supply $90 With Meters $110
45Amp Power Supply $170
Lighting Arresters $21.50 ea

We have Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other items in Stock

HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $15 each
New SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
300 ohm twin lead 50Ft $10.00
RG-58 Cable .25 per foot
RG-8 .$1.00 per Foot
RG-8X Coax Cable .45 per Foot
75 ohm Cable 9040 International Wire and Cable .35per foot
PL-259 Connectors $2.50 ea adadapters for RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $12
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's

We are the only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.
Technician Class $18.95
General Class $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Other Used Equipment on Consignment

Ramsey Kits for Kids (or Adults)
300 in 1 Electronic Lab $70
Electronic Crystal Radio Kit $10
Bell Action Kit $9
Motor Action Kit $8
LED Binky Kit $8
Police Siren Kit $8
Electronic Dripping Faucet $10
LED Strobe Light with Case $45
AM Broadcast Transmitter Kit with Case $35
Tri-Field Meter $64

Ringo Ranger 2 meter antenna $35
11 Element 2 meter Beam $45
High Gain DB-1015 3 Element HF beam for 10/15 meters $35 New Price Must Sell GREAT BUY MUST GO
Channel Master light duty Rotor with control box and cable $20
SAS-1 Amp Supply HF wire antenna with control box $10
Mixed box of short length coax cable with PL-259 Connectors on end $1 each
JT776SMA HT Antenna $19
Signalcrafter SW-77C SWR meter $5
Headphone/Mike Ear Headset $5
Radio Shack Woodgrain Speaker $5
IC-255A 2 meter Radio with no tone board Like New from 1982 Good Packet Radio $45
Tubes A great Assortment of tested used Tubes $1-$4 each
B&K Model 4011 Precision function Generator $60
B&K Model 2140 Oscilloscope $175

From: Don Meyer - KB8ODB
Topic: 3669 Message: 3669

Hello Everyone ....

Please pass the word to your usual contacts that the annual Hudsonville Holiday Parade is Saturday, November 17, and we could use quite a few volunteers for traffic control. Most, if not all, of our positions to cover are residential streets, where vehicle lighting and other special equipment is not necessary. (The Sheriff's Office is covering the high-traffic intersections.)

The briefing will be at the Hudsonville EOC at 9:00 a.m. The parade is scheduled to start at 10:00 and should end before 11:30.

Anyone can respond directly to me by email or phone with their availability or any questions.

Thank you.

~ Dave.

Greetings to all.

This has very little to do with amateur radio, but it seems that many folks that are involved in amateur radio are also involved in geocaching.

I started a group called West Michigan Geocaching in yahoo groups (can anybody guess where I got the idea for the name??).

http://groups.yahoo.com/group/westmichigangeogaching/join

If you are interested or participate in geocaching visit the group and sign up. Hopefully it will promote geocaching in the area.

Happy caching!

My favorite is whatcha wanna call it in Fremont at Branstrom park. It
is a multi stage that has a lot of neat challenging hides. It took me
a good week of lunch hours, and some emails to the Farmboy to solve
that one. Very fun hobby along with ham radio!!

Grow Your Club With New Hams
By Norm Fusaro, W3IZ

One of the most frequently asked questions that we hear from ARRL affiliated clubs is "How can we increase membership in our club?" On the surface the solution is a simple one - make more hams. A foundation of active Amateur Radio operators is required in order to maintain a healthy Amateur Radio club. If you lack a sufficient pool of licensed hams in your area then create some. Clubs that conduct licensing classes where they make recruitment part of the lesson continually increase membership. It does not matter if the course is an eight week program or a weekend crash course, a good instructor will pepper the syllabus with the advantages of membership in the local club and the Radio Amateur's national association -- ARRL.

Providing a license course for those people in the community who are interested in learning about Amateur Radio demonstrates the club's commitment to helping people. Reinforcing Amateur Radio's tradition of helping each other let's the new hams know that they are not just getting a license to operate a radio but that they are also earning a ticket to become part of a worldwide society whose existence is built on mutual contact. Whether on the air or in the community Amateur Radio has always been a two-way function.

From the moment the license class begins new hams need to know that your club is there to help them as they begin their Amateur Radio journey. This relationship begins not in the classroom but at the

time of registration or when that first contact is made whether in person or on the telephone or through the internet.

As the class progresses the new ham is made aware of the reciprocal bond between hams and while the novice may not believe that he or she has something to offer at the moment, their attendance and a desire to belong is sufficient contribution. As long as the club maintains a friendly environment that encourages participation and supports activities the novice will soon become the Elmer to the next group of new hams and will eventually take on leadership positions in the club. However, a club is destined to fade away if they choose to adopt the attitude "build it and they will come."

Be sure to invite the new licensees to your next club meeting. Using written invitations is a nice touch and sends a message that you really want them to attend. The focus of this meeting should be on your new hams and getting them into the mainstream. Several clubs have organized the meeting following a license class using the "Ham Radio 101" format where the entire evening's programming is to show the novices the basics of operating. Have refreshments on hand and be ready to talk about the fun activities such as Field Day or a community activity that your club is involved in. This is not the meeting where want to discuss politics or topics that will embattle the membership. Keep it light and focused on the needs of the newcomers.

New hams are thirsty for information no matter how basic. When and where are the club meetings held? How do I get on the air? What does this or that term mean? Be prepared to answer the simplest questions and provide details when you do. The Mt. Baker club in Bellingham Washington has developed a great handout for new hams that helps answer some of these questions. With Mt. Baker's permission ARRL has made this booklet available to download and customize for your use. The modified version provides a place for your club to insert club and local information.
< http://www.arrl.org/news/features/2005/03/06/1/MBARC-Info-Pack.pdf >
Use this brochure or develop one of your own but in any case be sure to give your new hams something informative to take home with them.

A closing thought when working with new hams, one person's favorite activity is not all that ham radio has to offer. Meeting programs and mentor sessions should stimulate new hams to explore the many options offered to the licensed radio amateur. Organizing and teaching an Amateur Radio license class where the students are encouraged to be a part of the fabric of ham radio and invited to participate in club activities is guaranteed to increase your club's membership with active hams.

ARRL has resources for instructors.

The Instructor's Manual < http://www.arrl.org/catalog/?item=9817 >
includes lesson plans for teaching a Technician license course and a
CD ROM with visual aids for the classroom.

Instructors can advertise their classes on the ARRL website so that
interested people can locate a class in their area. Visit the
instructor support page for more information.
< http://www.arrl.org/FandES/ead/instructor/ >

To become a registered instructor please contact ARRL Educational
Assistant, Rose-Anne Lawrence, KB1DMW at rlawrence@... or
860-594-0263

The Four Is
- Invite
- Inform
- Inspire
- Involve

Invite

- Invite everyone, the new hams and those who have not yet
received their CSCE, to attend the next club meeting where the
program will be based on things that the new ham will need to know.
- Invitations should be in the form of hard copy with day, date
and time. Hand an invitation to each student personally at the end of
the class or mail the invitations to everyone that attended the
class. A big shout out to come to the next meeting lacks sincerity.

Inform

- Provide a packet of information that has contact information
for people who can help the new ham get on the air.
- It's also a good idea to provide club information as well as
some operating aids like a list of local repeaters and how to access
them.

Inspire

- Congratulate your new hams and remind them that they have
just completed the first step toward a life long journey of learning
and fun.
- Encourage those who were not successful this time around to
keep trying because the reward is worth the effort.

Involve

- Welcome new members to your club and to the world of Amateur
radio.
- Encourage the new hams to participate in club functions and

on the air activities. Make sure that they know they are welcome to join the next on the air net, fox hunt or other club activity.

ARRL Awards Program For Clubs

Looking for an exciting way to challenge your club? Try earning DXCC, Worked All States (WAS) or VUCC award for your club. ARRL affiliated clubs are eligible to participate in all of the ARRL awards programs.
If your club does not have a station then use the club call from a member's station. Operate portable ala Field Day and activate a rare grid square. Use your imagination to come up with ideas to activate your club call and involve your members in chasing some very nice operating awards.
Complete information on the ARRL awards program is available on the web at:
http://www.arrl.org/awards/

For information on obtaining a club callsign:
http://www.arrl.org/arrlvec/605ins.html#club

Clubs can use Logbook of The World.

Attn: fellow hams, XYL's, Hunters & everybody else,

For those of you not going to Fort Wayne you need to come out to the MAARC W8ZHO clubhouse on Saturday the 17 th for a free breakfast and mini swap. Starting at 8:30 am. Feel free to bring items to sell. For the deer hunters you can take a quick break for a hot breakfast and check out the items for sale then head back out to the woods. Then later on in the afternoon we will begin operating in the Side Band Sweeps contest for the next 24 hours. We will have plenty of food and fun for everybody.

Any questions call Tom W8AMZ @ 231-767-1095

3679. Tool Max Closed This Saturday for Hunting

3680. Hoffmaster Trail Run

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-11-15 21:07:35 UTC
From: Dennis Harriss
Topic: 3609 Message: 3680

Greetings All.

I'm Still looking for help on the Hoffmaster Trail Run.

The run will be held at Hoffmaster State Park in Norton Shores this Saturday November 17, 2007. The race itself starts at 10AM. But, due to the distances and terrain we have to travel to get in position we need to be there at 8:45AM. The event will run no later that Noon.

I am looking for at least 12 people to help me. Once again we will be using a portable repeater supplied by AB8AZ.
The repeater frequency is 147.220 with a standard PLUS offset (147.820) and a PL/CTCSS of 94.8. This will make it easier to setup your radios.

Directions to Hoffmaster State Park.

For those using the US-31 Expressway get off at the Pontaluna Rd exit. Go west on Pontaluna RD approximately 2 miles and when the road starts to curve to the right the Entrance to the park will be on the Left. If you need assistance talkin will be on the Muskegon 94 repeater. Once you get to the park turn right at the first road after you pass the permit shack. You should be able to get into the park without a permit or having to buy a one day pass.

If you can help contact me at n8ctt@... or my cell phone 231-670-1284.

Denny N8CTT AEC/DRO Muskegon County

3681. WRC-07 Wrap Up, New Allocations, et. cetera

Yahoo group: WestMichiganHams (2006 — 2008)

WRC-07 Wraps Up in Geneva; Will Likely Meet Again in 2011

The final working session of the 2007 World Radiocommunication Conference (WRC-07) in Geneva drew to a close Thursday afternoon, November 15. The signing ceremony for the Final Acts will take place Friday. According to International Amateur Radio Union (IARU) Secretary David Sumner, K1ZZ, the principal achievements and disappointments, as they relate to the Amateur Services, of the conference are:

Achievements

? Maintenance all existing amateur allocations, including the 7.200-7.300 MHz allocation in ITU Region 2 (the Americas) that had been somewhat at risk in connection with consideration of additional allocations for HF broadcasting (see below).

? A new worldwide secondary allocation at 135.7-137.8 kHz with a maximum radiated power limit of 1 W e.i.r.p. (given the low efficiency of practical antennas for this frequency range, this limit is not as severe as it may sound).

? Inclusion of an item, "to consider an allocation of about 15 kHz in parts of the band 415-526.5 kHz to the Amateur Service on a secondary basis, taking into account the need to protect existing services" on the provisional agenda for WRC-11 (set for 2011).

? Avoidance of future agenda items that pose serious threats to key amateur allocations.

? Some improvement in the so-called "country footnotes" that provide for different allocations by country in all or part of the 1.8, 3.5, 50 and 430 MHz amateur bands.

Disappointments

? No new allocation for the Amateur Service in the vicinity of 5 MHz, and no agenda item to consider such an allocation at a future conference.

? No future agenda item to consider an amateur allocation at 50 MHz in ITU Region 1 (Europe, the former Soviet Union, Mongolia, Africa and parts of the Middle East).

"No Change" for Amateur Allocations, HF Broadcasting

The amateur issues were of course a minor part of the WRC-07 agenda, but the Amateur Service was involved in one of the most contentious agenda items dealing with allocations between 4 and 10 MHz. A series of European Common Proposals had proposed changes to allow for an increase

of 350 kHz in HF broadcasting allocations, with a footnote for administrations to allow the Amateur Service to use 5.260-5.410 MHz on a secondary basis and with a radiated power limit of 250 W; however, HF broadcasting had no support from the other regional organizations and no compromise acceptable to all parties could be found. Ultimately the European administrations had to accept "no change" for broadcasting, effectively scuttling our chances for a 5 MHz allocation.

Next WRC Tentatively Set for 2011

The IARU had hoped that if an allocation could not be achieved at WRC-07, an appropriate agenda item could be included for WRC-11. The 2007 conference, however, had little interest in taking up HF issues at the next conference, tentatively set for 2011, having little to show for a great deal of effort expended on HF in preparing for WRC-07. The only HF issues on the provisional WRC-11 agenda have to do with oceanographic radar applications and the implementation of new digital technologies for the maritime mobile service.

The International Telecommunication Union's planning for the next World Radiocommunication Conference begins on Monday in Geneva, with the convening of a two-day Conference Preparatory Meeting for WRC-11. Paul Rinaldo, W4RI, will attend on behalf of the IARU.

3682. 1 Day Left Till Big Day At The Club House

Just one day left till the big events at the clubhouse.

1st Breakfast 8:30 am

2nd Mini Swap following breakfast, with items from NS8Z's estate. Icom 706, Icom AH-4 Auto tuner, Ham-IV rotor & controller and many other items like mobile antennas, fixed antennas & Towers and so on.

Feel free to bring any other items you may want to sell also. There is no charge for table space.

3rd other events in the afternoon such as a visit to Dale K8PY at the nursing home and then preparing for SSB Sweeps.

4th SSB Sweeps at 4:00PM big 24hour contest

Hope to see everybody there.

Tom W8AMZ

After some software updates and a computer crash on my part, and finding time, the EMWIN transmitter is back on line in Fremont on 163.300. Also, the Fremont repeater on 146.920 pl 94.8 is running on one of my backup repeaters and seems to have a lot better range than before. Give it a try. It is a bit quirky right now, but I am hoping to get the bugs out soon.

• Maintenance all existing amateur allocations, including the 7.200-7.300 MHz allocation in ITU Region 2 (the Americas) that had been somewhat at risk in connection with consideration of additional allocations for HF broadcasting (see below).
• A new worldwide secondary allocation at 135.7-137.8 kHz with a maximum radiated power limit of 1 W e.i.r.p. (given the low efficiency of practical antennas for this frequency range, this limit is not as severe as it may sound).
• Inclusion of an item, "to consider an allocation of about 15 kHz in parts of the band 415-526.5 kHz to the Amateur Service on a secondary basis, taking into account the need to protect existing services" on the provisional agenda for WRC-11 (set for 2011).
• Avoidance of future agenda items that pose serious threats to key amateur allocations.
• Some improvement in the so-called "country footnotes" that provide for different allocations by country in all or part of the 1.8, 3.5, 50 and 430 MHz amateur bands.

Disappointments
• No new allocation for the Amateur Service in the vicinity of 5 MHz, and no agenda item to consider such an allocation at a future conference.
• No future agenda item to consider an amateur allocation at 50 MHz in ITU Region 1 (Europe, the former Soviet Union, Mongolia, Africa and parts of the Middle East).

"No Change" for Amateur Allocations, HF Broadcasting
The amateur issues were of course a minor part of the WRC-07 agenda, but the Amateur Service was involved in one of the most contentious agenda items dealing with allocations between 4 and 10 MHz. A series of European Common Proposals had proposed changes to allow for an increase of 350 kHz in HF broadcasting allocations, with a footnote for administrations to allow the Amateur Service to use 5.260-5.410 MHz on a secondary basis and with a radiated power limit of 250 W; however, HF broadcasting had no support from the other regional organizations and no compromise acceptable to all parties could be found. Ultimately the European administrations had to accept "no change" for broadcasting, effectively scuttling our chances for a 5 MHz allocation.

Next WRC Tentatively Set for 2011
The IARU had hoped that if an allocation could not be achieved at WRC-07, an appropriate agenda item could be included for WRC-11. The 2007 conference, however, had little interest in taking up HF issues at the next conference, tentatively set for 2011, having little to show for a great deal of effort expended on HF in preparing for WRC-07. The only HF issues on the provisional WRC-11 agenda have to do with oceanographic radar applications and the implementation of new digital technologies for the maritime mobile service.
The International Telecommunication Union's planning for the next World Radiocommunication

Conference begins on Monday in Geneva, with the convening of a two-day Conference Preparatory Meeting for WRC-11. Paul Rinaldo, W4RI, will attend on behalf of the IARU.

Thanks to all who participated at the Hoffmaster Trail Run yesterday (11-17-07). Once again we had a great event.

We had 15 participants this year. This includes Darryl AB8AB who supplied and setup the portable repeater we used. This years route was the same as last year, but due to the numbers of helpers we were able to add a 3rd position on the beach (halfway point) and double up a few other positions which gave us more and better coverage then we have had in previous years.

Dave Paulsen our contact with the race people once again expressed their thanks for our assistance which made their job much easier.

Once again thanks to all of you who helped out with years Hoffmaster Trail Run. I'm looking forward to seeing you again next year.

I still need some more items on consignment. Bring your items in today

We will be Closed Thursday, Friday and Saturday for a long Thanksgiving Holiday weekend.

We will be closeing on Saturday until January.
Look for a FREE inside swap and shop in January on one Saturday of the month.
Stop in during the week or call me for a off time to come in if Saturday is the only day you can come in.
I will contiue to send out message 1 time a week with new items that come in on consignment.

New this last week From KF8VN All like NEW

MC-50 Kenwood Microphone $60
MFJ-202B Noise Bridge $40
SWR-2 Vanco SWR meter $15
PC-1A Kenwood Phone Patch $40
#425 B+W Low Pass Filter $15
MFJ-704 Low Pass Filter $20

14 Amp Jetstream Power Supply $55
28Amp Power Supply $90 With Meters $110
45Amp Power Supply $170
Lighting Arresters $21.50 ea

We have Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other items in Stock

HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $15 each
New SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
300 ohm twin lead 50Ft $10.00
RG-58 Cable .25 per foot
RG-8 .$1.00 per Foot
RG-8X Coax Cable .45 per Foot
75 ohm Cable 9040 International Wire and Cable .35per foot
PL-259 Connectors $2.50 ea adadapters for RG-58 or RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $12
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's

We are the only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.
Technician Class $18.95
General Class $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Other Used Equipment on Consignment

Ramsey Kits for Kids (or Adults)
300 in 1 Electronic Lab $70
Electronic Crystal Radio Kit $10
Bell Action Kit $9
Motor Action Kit $8
LED Binky Kit $8
Police Siren Kit $8
Electronic Dripping Faucet $10
LED Strobe Light with Case $45
AM Broadcast Transmitter Kit with Case $35
Tri-Field Meter $64

Ringo Ranger 2 meter antenna $35
11 Element 2 meter Beam $45
High Gain DB-1015 3 Element HF beam for 10/15 meters $35
Channel Master light duty Rotor with control box and cable $20
Mixed box of short length coax cable with PL-259 Connectors on end $1 each
JT776SMA HT Antenna $19
Signalcrafter SW-77C SWR meter $5
Headphone/Mike Ear Headset $5
Radio Shack Woodgrain Speaker $5
IC-255A 2 meter Radio with no tone board Like New from 1982 Good Packet Radio $45
Tubes A great Assortment of tested used Tubes $1-$4 each
B&K Model 4011 Precision function Generator $60
B & W Antenna Tuner VS-300A $40
RCA Volt Ohm Meter $25
Barket & Williamson Low Pass Filter $5
Speakers $2 - $10
Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
Center Insulator for HF antenna $5
Rocky Mountain Radar Detector $160 New Price
LED Emergency Light $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50
MFJ-722 Notch Filter $30.00
MFJ 407C keyer $15
Code Key $15
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
Low Pass filter $5

EICO Solid State FET/TVM Model 240 VOM in good condition $40
6-9 inch clamps to mount antenna on large poles or vent pipes $5.56 each

Heathkit items in stock

Heathkit SA-2040 1KW Tuner $135 NEW PRICE
Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40
Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Keychain LED lights $1.50 and up
Other items coming in Daily

Tool Max Industrial Supply is the Tool and Ham Radio retail store on Schamber Dr just off Pontaluna Rd and US-31 just north of the old Hob Knob or Michael's Restaurant (Now tore down) in Muskegon . From: Chris Schulte
Topic: 3690 Message: 3697

Well, the big thing will be just finding something that will convert the audio from cw to dots and dashes. With the differences in signals on the air, voice might be a bit tough. Mainly because of the different tones and pitches of everyone's voices, as well as signal strength and what not. I have a feeling that if he does become a ham, he's going to be a huge psk31 or some other digital mode user.

I wonder if this software would work to change audio from a radio to text:

http://www.digitalriver.com/v2.0-img/operations/scansoft/site/367062/367062_dns-talk.html

They don't get into detail but it may be such that each person has to 'train' the software so it recognizes the voice and may not work with different people. One would have to contact the purveyor to find out.

I'd guess that Chris is right and the digital modes will be wonderful for this guy. I bet you could get something to flash a light to signal the code.

And there are a few folks in Fremont who sign. I can think of two or three without breaking a sweat. One or two even work with deaf folks. I can get you contacts if it would help. Granted, the signers are not hams.

Date: 2007-11-22 00:10:46 UTC
From: ravennaelectronics
Topic: 3690 Message: 3700

Good day everyone.
Being hearing impaired to the point that I wearing a hearing aid in each ear and have suffered through many ear sugeries, I find the digital modes the easiest. I am thankful to have the hearing I do have. Even with my hearing aids I find it difficult to hear voice transmissions at times. I have no problem with the CW as long as I zero in on it and watch the blinking light on the radio. That helps a lot when the signal is in that hearing loss range. Packet is good too.

Back in the dark ages, people who couldn't hear used a rectifier from the audio from a receiver which activated a light bulb so they could copy CW. This was in the days before computers, etc., and before good selectivity in receivers, so it wasn't all that good. I'd think a computer could be trained to listen to CW and activate a LED or something so your kid could learn code.

3703. LM 3900 or equivalent?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-11-23 03:36:18 UTC
From: Hank Greeb
Topic: 3703 Message: 3703

I think I'm in need of a LM 3900 or equivalent, made by either National Semiconductors or Texas Instruments? Does anyone have one of these devices in their junque box inventory? I can get one from Mouser Electronics or several other places, but if one is available near Grand Rapids, Michigan, it would save ordering and shipping delay.

Please advise by private message.

Hello Everyone ..
Again this year we have been asked by Grand Haven Public Safety to help out with the Grand Haven Jingle Bell Parade. The parade will be held this year on December 1st at 6pm this is one hour earlier then last year. This is always a fun event to do in that it is a short event and you get to welcome Santa Claus to town. There are a lot of floats and lots of people that are in the parade. There is a little traffic directing with the GHPS but most is people directing. Everyone that has helped in the past has said this is a event worth helping out with and is a good one to bring the family with you to watch the parade. If you can help us out with this event we will be meeting at 5:00pm in the GHPS training room for assignments, enter up the steps on the north east corner of the building talk in will be on the 145.49 repeater and net will be also on the 145.49 repeater. If you would like to help out with this event contact John Fisher KC8UNY or Don Meyer KB8ODB so we can put you on the list. If you have a place you would like to be at or close to let us know that also ..
Thank you for helping out on the events in the Tri-City's area .. 73 Don Meyer - KB8ODB

Date: 2007-11-25 23:45:13 UTC
From: Tom VanderMel KB8VEE
Topic: 3705 Message: 3705

I did not see this posted to West Mich and NOARC so hear it is not I am planing to go this Sat. Tom KB8VEE

Greetings all,

HARC has decided to see out 2007 with a twist.

In Summer we held our first breakfast combined with our regular monthly mini swap. Those who attended will know what a GREAT success that day was (people were queued out the door at 9am!!).

We've received numerous requests since to hold another, thus in view of that fact HARC shall be hosting another FREE* Breakfast (bacon, eggs, sausage, pancakes, coffee plus a few 'extras') and FREE Mini Swap this Saturday. Three world class top chefs (specially signed up) will be doing the honors in our kitchen (Sue Seidelman KC8RQS, Kim Lobart N8KAL and Ken Groom ZR5AAD/W8).

(*Whist the breakfast is free we would welcome any donations on the day, to help us offset expenses of large quantity of food purchases - thanks in advance*)

So bring a huge appetite, bring some surplus radio gear to dispose of or simply don't bring anything except yourself but be sure to attend, and join us for another great day of fellowship plus bargains. Non amateurs are also most welcome.

Details follow;-.

Free Parking available on site. DATE: SAT December 1st 2007 (Talk in : 147.060 94.8pl) SET UP TIME: SAT 09H30 - 10h00 Note: Friday night prior a limited opportunity exists between 19h00 - 20h30 to pre-setup your table. SWAP TIME: SAT 10h00 to 1.00pm BREAKFAST served : 09h30 onwards VENUE: 280 East 8th Street, Holland (right next to Holland Chamber of Commerce). ENTRY FEE : **FREE** TABLE COST : **FREE** HARC will provide once again.... * FREE table space * FREE trunk swap parking space (weather permitting) * FREE parking * FREE entry * FREE coffee * 50/50 Draw (To offset our new buildings upkeep, donations from sellers /visitors arealways very much appreciated!) Bring what ever surplus radio / computer equipment to sell / swap. Lastcouple of months a lot of equipment changed hands! Turn that surplus gearinto cash. We look forward to seeing everyone there. ANY QUESTIONS:Please contact HARC Building Manager - Ken ZR5AAD/W8Cell Ph: (616)726-3929E-Mail : rafaviator@...

You keep typing, we keep giving. Download Messenger and join the i’m Initiative now. Join in!

3708. SRD Update 2-WCM-OTR-

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-11-26 02:52:47 UTC
From: Tom VanderMel KB8VEE
Topic: 3708 Message: 3708

To all HAMs,

National SKYWARN Recognition Day is a little more than a week away. This 24 hour amateur radio event begins at 0000 UTC on December 1, 2007. Since my last update, we have gained roughly 30 more participants. This puts the running total of registered offices at 86, including our friends at the Prairie Storm Prediction Center. I realize hamradio.noaa.gov does not currently show 86 offices. Since yesterday was Thanksgiving, no 'push' to the web server was done. So, if you have registered with in the last two weeks, please be patient and watch for an updated website next week.

If you haven't already read the December issue of QST, SRD is mentioned on page 64 under the Public Service Section. SRD is also mentioned as a special event on the ARRL website special events calendar (for more info: http://www.arrl.org/contests/spev.html). I wanted to thank Steve Ewald for making this possible.

If you're office would like to publicize this special ham radio event I do have some generic press releases. Email me and I can send them to you for distribution.

As mentioned last week, if you know of an office that has not registered yet, please inform them the deadline is approaching and to send in their registration form. If they need another copy of the SRD sign up form, please e-mail me and I'll send it to them.

Lastly this is a reminder to those offices working from airport grounds to notify the airport manager about this event, including any temporary antennas you plan to erect, and what frequencies will be in use. This is done as a courtesy to make certain that our operators do not interfere with airport communications.

If you have any other questions, let me know.

73…..
Matt

NMARES - Northern Michigan Amateur Radio Emergency Services

D-STAR Repeater Project - Price List

ComDaC has advised pricing for the NMARES group D-Star equipment
order will be at or lower than, the current AES price. prices are
listed on the (http://www.nmares. net website) as listed in AES
Fall/Winter 2007 catalog)

There will be no sales tax added to your order and the payment will be
made with a single check drawn on the NMARES Organization account.

Shipping costs will be provided upon request and must be prepaid.
Local orders may be picked up in Elmira with no additional shipping
charges.

Please use the following information to determine your costs on the
D-STAR equipment.

Estimated prices reflect current rebates which may or may not be
available when the NMARES order is placed.

I have listed the D-STAR equipment by model number, from least
expensive to most expensive on the nmares website.

All orders must be prepaid in US dollars with cash, cashiers check or
money orders made out to James E. Davis.

The NMARES D-STAR group order deadline is December 31, 2007.

Please contact me if you have questions or need additional information.

3716. Building a crystal CW transmitter for 12m...

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-11-29 16:07:33 UTC
From: Joe Veldhuis
Topic: 3716 Message: 3716

For almost a year now, I've been planning to put up a 12 meter beacon. Early in the summer I put up a 1/4 wave groundplane antenna in the trees south of my house (which has since fallen apart), turned my FT-857 (which I no longer have) down to 5 watts and ran a beacon for awhile. I got a few e-mail QSLs from hams around the gulf coast, all of whom were amazed to hear a signal on the 12m band.

Seeing how useful such a beacon was for the ham community in general prompted me to try to come up with a dedicated transmitter, so the main rig would not be tied up to run it. I initially tried to convert an old CB, but that never really worked out.

Anyway, I was considering a few things last night and realized that I have a crystal for exactly twice the frequency I want to operate the beacon on. I'm trying to put it near (but obviously not exactly on) 24.930 MHz, and about 3 years ago I took a 49.860 MHz crystal out of an old toy walkie-talkie.

So, I want to try making a transmitter with that crystal. I know I'll need something like this:

Xtal oscillator - Freq divider - Low-pass filter - Amplifier - Antenna

Unfortunately, I don't have any idea where to even begin trying to design or build any of these (except for the antenna). I have spent hours Googling the various components, and although I've found a few schematics and descriptions, I'm no closer to understanding how to actually make them. Right now I have:

* The crystal
* A bag of 2N3904 transistors
* An enclosure
* A few capacitors pulled out of computer power supplies, values unknown

Anyone have any advice to offer?
-Joe, N8FQ

Paul,

You can sign up for any time slot you want / that is available.. For those time slot’s that are already full you can still come but the operators signed up get first dibs on the radios.

From: Tom Nickisch
Topic: 3716 Message: 3720

Buying a new crystal is not needed nor is a freq. divider needed. you just use the crystal as is and tune the transmitter for the correct freq. That's why we have tuned circuits in a transmitter to remove harmonics above and below the fundamental freq. of the oscilater circuit. It was quite common for a ham to use an 80m crystal on 40m and a 40m on 20m. and so on.

We are still in need of help for this event and also invited by Sgt Bo of GHPS for BBQ's and drinks in the GHPS area at 4:00 ..so if you come early you can have something to eat ..... thanks again for all your help in the events in the Tri-City Area...73 Don

Hello Everyone ?.
Again this year we have been asked by Grand Haven Public Safety to help out with the Grand Haven Jingle Bell Parade. The parade will be held this year on December 1st at 6pm this is one hour earlier then last year. This is always a fun event to do in that it is a short event and you get to welcome Santa Claus to town. There are a lot of floats and lots of people that are in the parade. There is a little traffic directing with the GHPS but most is people directing. Everyone that has helped in the past has said this is a event worth helping out with and is a good one to bring the family with you to watch the parade. If you can help us out with this event we will be meeting at 5:00pm in the GHPS training room for assignments, enter up the steps on the north east corner of the building talk in will be on the 145.49 repeater and net will be also on the 145.49 repeater. If you would like to help out with this event contact John Fisher KC8UNY or Don Meyer KB8ODB so we can
put you on the list. If you have a place you would like to be at or close to let us know that also ?? Thank you for helping out on the events in the Tri-City?s area ?. 73 Don Meyer ? KB8ODB

3722. Tool Max items for Sale

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-11-30 15:19:09 UTC
From: Tool Max Ind. Supply
Topic: 3722 Message: 3722

still need some more items on consignment. Bring your items in today

We will be closing on Saturday until January. Look for a FREE inside swap and shop in January on one Saturday of the month.
Stop in during the week or call me for a off time to come in if Saturday is the only day you can come in.
I will continue to send out message 1 time a week with new items that come in on consignment.

New this week From Dan N8MQS

1 APC Interruptible back up supply $35
1 B&K DC1651 Triple Power Supply $25
1 Ampprobe Clamp-Pn Meter $15
1 Sencore SG-165 AM-FM Stereo Analyzer $30
1 Box of Assortment Trimers and Relays $15
5 PS-28 2 amp power supply NEW Price $8 each
1 GW GDM 8135 Digital Multimeter $30

We have Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other items in Stock

14 Amp Jetstream Power Supply $55
28Amp Power Supply $90 With Meters $110
45Amp Power Supply $170
Lighting Arresters $21.50 ea
HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $15 each
New SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
300 ohm twin lead 50Ft $10.00
RG-58 Cable .25 per foot
RG-8 .$1.00 per Foot
RG-8X Coax Cable .45 per Foot
75 ohm Cable 9040 International Wire and Cable .35per foot
PL-259 Connectors $2.50 ea adadapters for RG-58 or RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $8
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's

We are the only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.

Technician Class $18.95
General Class $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Other Used Equipment on Consignment

Ramsey Kits for Kids (or Adults)

300 in 1 Electronic Lab $70
Electronic Crystal Radio Kit $10
Bell Action Kit $9
Motor Action Kit $8
LED Binky Kit $8
Police Siren Kit $8
Electronic Dripping Faucet $10
LED Strobe Light with Case $45
AM Broadcast Transmitter Kit with Case $35
Tri-Field Meter $64

MC-50 Kenwood Microphone $60
MFJ-202B Noise Bridge $40
PC-1A Kenwood Phone Patch $40
#425 B+W Low Pass Filter $15
MFJ-704 Low Pass Filter $20
Ringo Ranger 2 meter antenna $35
11 Element 2 meter Beam $45
High Gain DB-1015 3 Element HF beam for 10/15 meters $35
Channel Master light duty Rotor with control box and cable $20
Mixed box of short length coax cable with PL-259 Connectors on end $1 each
JT776SMA HT Antenna $19
Signalcrafter SW-77C SWR meter $5
Headphone/Mike Ear Headset $5
Radio Shack Woodgrain Speaker $5
IC-255A 2 meter Radio with no tone board Like New from 1982 Good Packet Radio $45
Tubes A great Assortment of tested used Tubes $1-$4 each
B&K Model 4011 Precision function Generator $60
B & W Antenna Tuner VS-300A $40
RCA Volt Ohm Meter $25
Barket & Williamson Low Pass Filter $5
Speakers $2 - $10
Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
Center Insulator for HF antenna $5
Rocky Mountain Radar Detector $160
LED Emergency Light $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50
MFJ-722 Notch Filter $30.00
MFJ 407C keyer $15

Code Key $15
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40
6-9 inch clamps to mount antenna on large poles or vent pipes $5.56 each

Heathkit items in stock

Heathkit SA-2040 1KW Tuner $135 NEW PRICE
Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40
Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Keychain LED lights $1.50 and up
Other items coming in Daily

Tool Max Industrial Supply is the Tool and Ham Radio retail store on Schamber Dr just off Pontaluna Rd and US-31 just north of the old Hob Knob or Michael's Restaurant (Now tore down) in Muskegon . We have tools, industrial suppliers and Ham radios parts for sale. For more information call or e mail Tom KB8VEE at 231 798-7898 I am in the Store from 8:30AM-4:30PM Monday-Friday. Stop by and see me for all your Ham needs.

From: Joe Veldhuis
Topic: 3725 Message: 3725

Well, I'm continuing to work on my previously announced 12m beacon project. Although I'm making progress with the design phase, the actual construction of it (and about half a dozen other projects) is being held up by one thing: I don't have anything to build it on. So, does anyone have some perfboard around that you'd be willing to give or sell to me for a reasonable price?

-Joe, N8FQ

3726. Re: [WestMichiganHams] Perfboard needed

I beleive Radio Shack still sells it. Seeing how it is a relitively simple circuit you might want to consider useing barrier strips. It was quite common for that practice to be used. Even Heathkit did that with it's earlier solid state kits.

3727. ARRL RTTY/Digital Mode Round-Up, January 5 - 6 (Includes Baudot RTTY, ASCII, AMTOR, PSK31 & Packet)

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-12-04 18:15:44 UTC
From: Mark Thompson
Topic: 3727 Message: 3727

2008 ARRL RTTY Round-Up Rules
General Rules
Object: Amateurs worldwide contact and exchange QSO information with other amateurs using digital modes (Baudot RTTY, ASCII, AMTOR, PSK31, and Packet–attended operation only) on 80, 40, 20, 15, and 10 meter bands. Any station may work any other station.
Date and Contest Period: First full weekend of January, but never on January 1. Begins 1800 UTC Saturday, ends 2400 UTC Sunday (January 5-6, 2008).
2.1. Operate no more than 24 hours.
2.2. The six hours of off time must be taken in no more than two blocks.
Entry Categories:
3.1. Single Operator:
3.1.1. Low Power.
3.1.2. High Power.
3.2. Multioperator, Single Transmitter:
3.2.1 Power.
3.2.1.1. Low Power
3.2.1.2. High Power
3.2.2. Stations are allowed only one transmitted signal at any given time.
3.2.3. Includes those single operators that use any form of spotting assistance such as from nets or packet.
3.2.4. Includes those that receive assistance with logging or relief operators, etc.
3.2.5. Limited to 6 band changes (maximum) in any clock hour.
3.2.6. The clock hour is from zero through 59 minutes.
3.2.7. Band changes are defined so that, for example, a change from 20 meters 15 meters and then back to 20 meters constitutes two band changes.
Exchange:
4.1. United States: Signal report and State.
4.2. Canada: Signal report and Province.
4.3. DX: Signal report and consecutive serial number, starting with 001.
Scoring:
5.1. QSO Points: Count one point for each completed QSO.
5.2. Multipliers: Each US state (except KH6 and KL7) plus the District of Columbia (DC), Canadian provinces/territories: NB (VE1, 9), NS (VE1), QC (VE2), ON (VE3), MB (VE4), SK (VE5), AB (VE6), BC (VE7), NWT (VE8), NF (VO1), LB (VO2), NU (VYØ), YT (VY1), PEI (VY2) and each DXCC country. KH6 and KL7 count only as separate DXCC entities.
5.2.1. Count only once (not once per band).
5.2.2. The US and Canada do not count as DXCC entities.
Reporting:
6.1. All entries are must be postmarked or emailed by February 5, 2008.
6.2. Entries in electronic format may be submitted to RTTYRU@... or submitted on 3.5” diskette to RTTY Round-Up, ARRL, 225 Main St, Newington, CT 06111.
6.3. All logs that are created electronically are required to submit their electronic log file in Cabrillo file format. A print out of an electronically generated log is not an acceptable substitute. A hand-written log that is later entered into a logging or other

electronic program is considered an electronically generated log and must meet electronic file requirements.
6.4. The Cabrillo entries include the header and the complete QSO list.
6.5. Submissions may be made using the web applet at www.b4h.net/cabforms
6.6. Hand-logged entries may be submitted to RTTY Round-Up, ARRL, 225 Main St, Newington, CT 06111.
Miscellaneous:
7.1. Packet radio contacts made through digipeaters or gateways are not permitted.
7.2. All ARRL Contest rules and forms may be downloaded from the ARRL Contest web page at: http://www.arrl.org/contests/forms or obtained from the Contest Branch by sending an SASE with 2 units of postage.
7.3. For contest information contact contests@... or (860) 594-0232
Awards:
8.1 Certificates will be awarded to:
8.1.1. Top high power and low power Single Operator and Multioperator scorers in each ARRL/RAC Section.
8.1.2. Top high power and low power Single Operator and Multioperator scorers in each DXCC country (other than W/VE).
8.2. Plaques, if sponsored, will be awarded to the top scoring low and high power entrant in each category overall, each ARRL Division, and Canada.
8.2.1. Unsponsored plaques may be purchased from the ARRL.
Other: See “General Rules for All ARRL Contests” and “General Rules for ARRL Contests on bands below 30 MHz (HF)” November 2001 QST.
Recommended HF Digital Operating Frequencies (MHz)
North and South America Europe/Africa
3.590 RTTY DX 3.580-3.620
See Note
7.040 RTTY DX 7.035-7.045
7.080-7.100
14.070-14.099.5 14.080-14.099
21.070-21.100 21.080-21.120
28.050-28.150

NOTE: With the recent realignment of frequency allocations on the 80-meter band, we offer no specific recommendations at this time. We remind stations that RTTY and digital modes are restricted to frequencies below 3.600 MHz in the US effective December 15, 2006. We also encourage participants to be mindful of other stations and activates on the 80-meter band.
Recommended Novice Digital Operating Frequencies (MHz)
10 meters 28.100-28.150*
Suggested simplex packet-radio frequencies
28.102.3
28.104.3
*Authorized power output 200-watts maximum for Novices / Tech Plus only in the 10-meter Novice sub-band.

Be a better pen pal.

3729. West Michigan Hams - Adopting a Family this Christmas

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-12-05 02:50:19 UTC
From: Don Meyer - KB8ODB
Topic: 3729 Message: 3729

Hello fellow West Michigan Hams members:

In the sprit of Christmas giving I have came across a fellow ham that by no means of his own has come on hard times. We as hams are willing to help out our communities with events, preparing and practicing in case of emergency so we would be able to help out others. We should also make sure we help out our own and with this in mind I would like to adopt this ham and his family to help out this Christmas with taking a collection up for them and keep this going in future years by putting a committee in place this coming year to handle this. Greg and Tom at Tool Max have agreed to be the collection point for all donations.

Here is some information on the family we are trying to help this year

Mark Strait - KD8BIG has in the past helped out ARES with runs and races and also been involved with the Red Cross this all came to a halt after he suffered a heart attack in June 2006 and he has not worked since. He has been diagnosed with diabetes, high blood pressure and cholesterol, postural orthostatic tachycardia syndrome, numerous tumors on the soft tissue, thyroid problems and the a few more things. Needless to say he will not be returning to work anytime soon. His wife is working and he does draw disability. They have a daughter Shelby who is mentally challenged and a son Cameron.
For their house they have some needed roof repairs and kitchen counter tops. Mark cashed in part of his 401(K) to get much of the needed house maintenance done. He does not want to loose the rest of his 401(K).
Gift cards would be the best choice for clothing. That way they can simply go to the store and have everyone "Try it on" to make sure it fits.
Cameron will be 13 on December 30th. He loves Game-Boy stuff and Play Station games. I do not know if they still have a PS2 or not. Mark liquidated a lot of stuff to pay bills.
Shelby will be 11 in August and she loves dressing Barbie dolls. Keep in mind Shelby's mental status is that of roughly a five or six year old. She can turn just about anything into a toy. She too has a love for Game Boys and Play Station stuff.
Cash donations can be give to Tom for gift cards and nonperishable food goods will also be collected at Tool Max

Donations can be dropped off or sent to:

Tool Max Industrial Supply
6516 Schamber Dr

Muskegon, MI 49444
Attn: Tom VanderMel KB8VEE

Thank You all for giving this your consideration and thank you for being part of West Michigan Hams

73 from my Family to yours Merry Christmas and a Happy New Year

Don Meyer - KB8ODB

Chicago Amateur Radio Group

http://groups.yahoo.com/group/ChicagoAmateurRadio/join/

The Chicago Amateur Radio Yahoo Group is dedicated to promoting closer communication and sharing of amateur radio knowledge & technique among fellow amateur radio enthusiasts.

The goals of the Chicago Amateur Radio Group are:

To provide an efficient means of disseminating amateur radio news, announcements, and event information;

To promote the activites, newsletters, events, and meetings of ALL participating radio clubs;

To encourage better communication and coordination among local radio clubs;

To foster positive discussions of news and topics relating to amateur radio, including but not limited to, DXing, contesting, digital modes & technology, homebrewing, antennas, portable operation, satellite communication, fox hunting, and other Amateur Radio topics;

To share information about amateur radio related electronic issues, problems, troubleshooting tips, work-arounds, and fixes among its members, and;

To provide a forum fostering improved operating techniques.

Membership is free and open to all licensed Amateurs. Postings by other Amateur Radio Clubs announcing meetings, activities or other events are encouraged.

It has to do with the flooding in the Pacific Northwest.

Enjoy.

3733. FW: [Kcarpsc] FW: Kent County ARES program - Pass on to ALL hams living in Kent County

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-12-06 19:52:44 UTC
From: Jeff's Lists
Topic: 3733 Message: 3733

Hi All:

In the past few months we have seen the restart of the ARES program in Kent County. With this restart we have set up a sign up process for the program.

A few notes about the ARES program:

- We do not require a criminal history check of members as of November 2007
- The only requirement is a will to serve and an amateur radio license
- All HAMs are invited to the program living with Kent County
- ARES members are used for public service events, "non-secure" locations, severe weather spotting, CERT communications support and Disaster related activities.
- ARES members are encouraged to take independent study trainings provided free of charge from FEMA
- The ARES program uses amateur radio operators from around the community.
- This program is for radio operators NOT already involved with ARES / RACES
- We request that hams pre-register before a disaster hits the area so we know how to better use the resources available.

Signup Link: http://www.kcvrm.net/resourcesignup.php

And use the following information:

Resource Code: ARES - This is Case sensitive
Password: HamRadio - This is case sensitive

This program is open to ANY amateur radio operator living or working in Kent County.

If you run into any issues while signing up please email aschultz@...

thank You

Jeff Nawrot
Kent County ARRL ARES Emergency Coordinator

3738. Misleading and Incorrect Rumors Surround IARU Region 2 Band Plan

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-12-07 22:53:41 UTC
From: Mark Thompson
Topic: 3738 Message: 3738

Misleading and Incorrect Rumors Surround IARU Region 2 Band Plan

Misleading and incorrect rumors are surrounding the recently revised band plan of IARU Region 2, adopted at its triennial conference in Brazil in September. The following statement was authorized by ARRL President Joel Harrison, W5ZN.

During the conference, held September 10-14 in Brasilia, representatives from IARU Region 2 societies met in committees prior to a final plenary session and adopted recommendations concerning a number of items important to Amateur Radio in the region. These included plans to improve emergency communication, enhance education and reduce interference to national emergency nets, as well as revising the Region 2 HF band plan.

The revised Region 2 band plan for 160-10 meters takes effect January 1, 2008. The band plan is based on the band plan adopted by IARU Region 1 at its conference in Davos, Switzerland in September 2005.

IARU regional band plans have been in existence for many years. They are developed, reviewed and approved at regional conferences of the IARU Member-Societies. The band plans provide voluntary guidelines and recommendations for good operating practice that are intended to assist amateurs in making the most effective use of our limited frequency allocations. They are not restrictions and carry no regulatory authority.

Unlike the US, where the FCC's Part 97 rules regulate the frequencies allocated to the Amateur Radio Service by emission designator, many countries do not have government-regulated sub-bands within their amateur allocation. Because of this, the national Amateur Radio societies in these countries look to a band plan to provide guidance for the location of operating preferences. In such cases, these countries are urged to promote incorporation or recognition of a band plan into their regulations. In the United States, however, ARRL's band plans will continue to provide guidance for recommended operating preferences including the 160 meter band plan that was revised in 2001 on the basis of membership input.

One virtue of voluntary band plans is that they are more flexible and can be amended more easily than the FCC rules; writing them into the rules would be counterproductive. As voluntary guidelines, the band plan cannot by definition be "more severe" than regulations; however, if the band plan did not suggest an operating pattern that is a subset of the regulations, it would serve no purpose.

There is also a mistaken assumption that the new IARU Region 2 band plan is an ARRL initiative seeking regulation by bandwidth. It is not, nor is it in any way a vehicle to achieve regulation by bandwidth.

It happens that the ARRL's "regulation by bandwidth" petition, the now-withdrawn RM-11306, also drew on the Region 1 band plan. This is acknowledged on page 10 of the petition. The similarities between RM-11306 and the Region 2 band plan are the result of having some common roots, but the two are not otherwise related.

While a number of Amateur Radio organizations and publishers support and agree with the ARRL on the concept of regulation by bandwidth as an essential element to the orderly introduction of new digital modes into the HF bands, ARRL will not be pursuing a rulemaking until some degree of consensus can be achieved in the amateur community.

ARRL has conducted an open process of soliciting input regarding matters of importance to the Amateur Radio Service. That will continue prior to the submission of any proposals for

future regulatory changes to improve the Amateur Radio Service.
As one of the 39 Member-Societies of IARU Region 2, the ARRL will, as always, continue to openly work to improve the Region 2 band planning process prior to the next conference and give its members ample opportunity to offer comments and suggestions. Members may provide input to their elected representative (identified on page 15 of QST), or to our Ad-hoc Band Plan Committee and e-mail address that was established in 2006 at bandplan@....

3744. Inexpensive Emergency Power Generator

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-12-09 22:48:23 UTC
From: Hank Greeb
Topic: 3744 Message: 3744

Pep Boys has a 800 watt generator, 950 watts peak, plus a small air compressor combination for $79.90.

I have one of these, and the generator works okay. Not the best regulation in the world, but if I keep it loaded with about 200 watts of incandescent lamps it will purr along nicely with a 100 watt output transceiver attached to it, with CW or SSB. Without the resistive load the governor has a hard time keeping up with key down/key up when using CW. I've used it with SSB to some extent, and the regulation problemme isn't as severe.

It also has a 10 amp, 12 VDC output, which would keep an automobubble battery topped up when using CW or SSB @ 100 watts output (probably <20 amp maximum draw from the car battery, with <50% average draw.)

It has a 2 cycle engine, but for <$100 it's a "throwaway" item, if there is ever a major problemme.

Pep Boys has a store on Alpine Avenue in Walker, near Grand Rapids, as well as other places in Michigan.

I have no stock in Pep Boys, nor any financial interest in selling these things.

3745. Adopt a Family going very well

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-12-11 00:17:33 UTC
From: Don Meyer - KB8ODB
Topic: 3745 Message: 3745

Hello fellow Hams: I just wanted to let you know that the Adopt a family is going very well and that I would like to get the donations in by Dec. 19th so they can be taken to Marks family in time for Christmas. Here is my phone #616-846-7307 if you have any questions or need something picked up.
I am resending the information in case someone needs it.

Thank you for being part of West Michigan Hams ... 73 Don

Hello fellow West Michigan Hams members:

In the sprit of Christmas giving I have came across a fellow ham that by no means of his own has come on hard times. We as hams are willing to help out our communities with events, preparing and practicing in case of emergency so we would be able to help out others. We should also make sure we help out our own and with this in mind I would like to adopt this ham and his family to help out this Christmas with taking a collection up for them and keep this going in future years by putting a committee in place this coming year to handle this. Greg and Tom at Tool Max have agreed to be the collection point for all donations.

Here is some information on the family we are trying to help this year

Mark Strait - KD8BIG has in the past helped out ARES with runs and races and also been involved with the Red Cross this all came to a halt after he suffered a heart attack in June 2006 and he has not worked since. He has been diagnosed with diabetes, high blood pressure and cholesterol, postural orthostatic tachycardia syndrome, numerous tumors on the soft tissue, thyroid problems and the a few more things. Needless to say he will not be returning to work anytime soon. His wife is working and he does draw disability. They have a daughter Shelby who is mentally challenged and a son Cameron.
For their house they have some needed roof repairs and kitchen counter tops. Mark cashed in part of his 401(K) to get much of the needed house maintenance done. He does not want to loose the rest of his 401(K).
Gift cards would be the best choice for clothing. That way they can simply go to the store and have everyone "Try it on" to make sure it fits.
Cameron will be 13 on December 30th. He loves Game-Boy stuff and Play Station games. I do not know if they still have a PS2 or not. Mark liquidated a lot of stuff to pay bills.
Shelby will be 11 in August and she loves dressing Barbie dolls. Keep in mind Shelby's mental status is that of roughly a five or six year

old. She can turn just about anything into a toy. She too has a love for Game Boys and Play Station stuff.
Cash donations can be give to Tom for gift cards and nonperishable food goods will also be collected at Tool Max

Donations can be dropped off or sent to:
Tool Max Industrial Supply
6516 Schamber Dr
Muskegon, MI 49444

Attn: Tom Vander Mel - KB8VEE

Thank You all for giving this your consideration and thank you for being part of West Michigan Hams

73 from my Family to yours Merry Christmas and a Happy New Year

Don Meyer - KB8ODB

>
> +++ A Poll - I Heard You +++
>
> In the last issue, I asked for your opinions concerning the publication
> schedule of the ARRL Letter. Here is what you told me:
>
> - 180 said, "I really don't care if an occasional week is missed."
> - 97 said, "I'd prefer the Letter comes out every week, but occasional
> lapses are no big deal."
> - 12 said, "Drop other things at HQ to get the ARRL Letter out every
> week -- no exceptions."
>
> I appreciate the wishes expressed by each responder. Based upon the
> responses I believe there is no justification for me to push HQ to
> expand the publication schedule.
>
> FYI, each issue of the ARRL Letter contains the following statement:
> "The ARRL Letter is published Fridays, 50 times each year, by the
> American Radio Relay League: ARRL--the National Association for Amateur
> Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax
> 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President."
>
> Because Thanksgiving is always on Thursday, there is no Letter each
> Thanksgiving week. This year, a second exception to publication will
> be Christmas week. This will still leave us with 51 weeks of
> publication of the Letter this year. Depending on personnel schedules
> at HQ, one more issue could be skipped and we would still have the
> promised 50 issues for 2007. Watch the ARRL Letter for any details.
>
> Thanks to everyone who answered the poll. I appreciate your input.
> I'm sorry I didn't have time to acknowledge each vote personally.
>
> +++ Region 2 Band plan -- Skepticism persists +++
>

> To set the stage for the following discussion, you need to know that
> some AM operators believe the new IARU Region 2 voluntary band plan
> will cost them operating privileges. This is true even though the plan
> is strictly voluntary and the fact that FCC regulations clearly take
> precedent over any voluntary band plan. Some of these operators accuse
> ARRL, a member of Region 2 of manipulating the new Region 2 plan in an
> effort toward abolishing AM and getting Regulation by Bandwidth adopted
> in the US.
>
> I do not intend to get into a point-counterpoint discussion of this
> issue; however, I will expand the explanation I put in the last issue
> of Words. The bottom line still is precisely what I said the last
> time. ARRL was not involved in developing the Region 2 voluntary band
> plan, and the new Region 2 band plan has absolutely no relevance to US
> amateurs.
>
> Fact: The committee I loosely referred to as the band plan committee
> is properly named the Region 2 HF Committee. This is the group that
> developed the new voluntary band plan. There was no ARRL involvement
> with the HF Committee.
>
> Fact: As stated in the Region 2, conference news release, "A new
> Region 2 band plan for 160--10 meters was adopted, effective January 1,
> 2008. The new plan is modeled on one adopted previously by IARU Region
> 1, with regional differences taken into account."
>
> The Region 1 voluntary plan was developed in 2005. It became effective
> January 2006. This voluntary band plan has had no impact on operations
> in the US. ARRL is not a member of IARU Region 1 and has no vote in
> its meetings.
>
> After developing its new voluntary band plan, the Region 2 HF Committee
> submitted its new voluntary band plan to the Region 2 B/C Committee.
> This committee forwarded the proposed plan to the plenary session where
> it was adopted. ARRL Chief Technical Officer Paul Rinaldo, W4RI was
> secretary to the B committee. He had no vote in its proceedings and
> merely recorded the Committee's activities.
>
> I assure you that when the Region 2 voluntary band plan becomes
> effective January 1, 2008, it will have no effect on US operations --
> AM or otherwise. Any changes in operation by US operators will come
> only if they, themselves, choose to make changes.
>
> As your Director, I repeat that I will actively oppose any effort to
> curtail AM operating privileges for US amateurs. No such proposal has
> been introduced by ARRL in the five years I've been on the Board, and I
> do not expect any one to be forwarded in the future. The fact is that
> ARRL has been and continues to support any mode of operation that is
> legal in the US and the operators who use these modes -- AM included.
>

> Now, you know the rest of the story.
>
> For another discussion, see
> www.arrl.org/news/stories/2007/12/07/100/?nc=1.
>
> +++ Section HF Nets +++

> ARRL HQ has just announced the availability of awards that can be

> purchased to give to special amateurs. The awards are modestly-priced
> and can be personalized for the recipient. These are suitable to give
> to a club Amateur of the Year or other award recipient. Go to
> www.barkerstores.com/arrl and click on Custom Awards. The current
> selection is somewhat limited. Expect it to be expanded as time goes
> by.
>
> +++ Congratulations to our Vice Director +++
>
> Unknown to most members is the fact that GLD Vice Director, Gary
> Johnston, KI4LA is a history buff. Not only is he a member of the ARRL
> Board's Historical Committee, but he is the President of the
> Behringer-Crawford Museum in Covington, KY. The museum re-opened
> December 1 after being closed for 8-months for a $2+ million expansion
> and remodeling. Among his other duties, Gary was primarily responsible
> for obtaining funding from the Commonwealth of Kentucky that made this
> possible.
>
> Great job, Gary
>
> +++ Happy 75th Anniversary +++
>
> I was fortunate to have been able to join SM Dale Williams, WA8EFK and
> ARRL CEO Dave Sumner, K1ZZ to take part in the December 1 celebration
> of the Motor City Radio Club's (W8MRM) 75th Anniversary. It was a
> great evening with members and guests filling the banquet room at a
> major restaurant. I was particularly impressed with the high number
> (14) of past presidents who participated in the evening in spite of bad
> travel weather.
>
> Similarly, the Hiawatha ARA (K8LOD) in Marquette, MI, also recently
> celebrated reaching the 75th Anniversary mile post.
>
> Congratulations to each club. Each is strong and active. Each is ARRL
> Affiliated Clubs. This is a great achievement.
>
> +++ Call Signs Issued +++
>
> The FCC is issuing KJ4A** 2X3 call signs. The most recent call I've
> seen for Kentucky is KJ4AUJ. The poor fellow's last name is Weaver.
> No relation to me, though. KD8HHZ is the most advanced 8-call reported
> to date. This call was issued to a ham in Saginaw.
>
> Calls that are more alphabetically-advanced certainly have been issued.
> These have not yet been included in reports I typically see. Even
> without having seen the latest calls, my original call of WA8COA
> definitely demonstrates I am an old timer.
>
> +++ Sunny Future +++
>

> I've never been known for having great insight into the future. The
> best I can do is to look at events of the past and present, and attempt
> to anticipate how any trends apparent from these might be used to
> predict what will come in the days ahead. My take on the future of
> Amateur Radio during the next several years is that it will grow in
> significance and importance to the pubic.
>
> What is the basis for this belief? Here are a few observations that
> lead me to this conclusion:
>
> 1. State and local EMA directors and the Salvation Army (SATERN) have
> come to credit amateurs publicly with the emergency relief work we are
> doing.
> 2. Amateurs are becoming increasingly skilled in providing high-quality
> emergency communications support to served agencies.
> 3. There is a modest growth in Amateur Radio licensing in recent
> months.
> 4. Youngsters are becoming interested in hamming when it is presented
> to them properly.
>
> How do these observations fit together? As we continue to make strong,
> favorable impressions on EMA and Salvation Army, they will talk even
> more about us. Still more agencies might even begin to talk of our aid
> to them. This good press will interest still more people in learning
> what hamming is and how it works. Some of these people will become
> amateurs.
>
> Regarding youngsters, they, too will be impacted by the positive press.
> This will be particularly true of youngsters who attend schools that
> feature ARRL's "Big Project" Amateur Radio program. Big Project
> schools already have shown that youngsters still buy-in to Amateur
> Radio when they are shown its relevance to today's life.
>
>
> +++ Tentative Travel Schedule +++
>
> A note to program and hamfest/swap schedulers: Gary and I are
> beginning to look toward the 2008 year to schedule trips. If you would
> like for either of us to visit your hamfest/swap, meeting or
> celebration, please let us know as soon as possible. We already have a
> few requests, some from clubs that we have visited regularly. We are
> always happy to revisit old friends; however, we also need to visit
> different places when this is possible. Because of this, I am delaying
> scheduling additional meetings until after January 1. This will give
> me an opportunity to view any additional requests before adding visits
> to my schedule.
>
> As one final point, the cost of gasoline is hitting our travels just as
> it is yours. Please consider having two or more clubs join together to
> host Gary or me at a combined meeting. Doing this will help us spend

> your dues money more efficiently.
>
> I wish you each Happy Hanukah and Holy Ramadan (I'm a little late), and
> a very Merry Christmas filled with love and joy. All the best in
> 2008.

3747. Fw: Southwest Ohio Digital & Technical Symposium, January 12th

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-12-11 17:02:14 UTC
From: Mark Thompson
Topic: 3747 Message: 3747

----- Forwarded Message ----
From: K8CM <K8CM@...>
To: illinoisdigitalham@yahoogroups.com
Sent: Tuesday, December 11, 2007 8:58:05 AM
Subject: [illinoisdigitalham] SWO Digital and Technical Symposium

The 22nd annual Southwest Ohio Digital and Technical Symposium will
be held from 8 AM to approximately 4:30 PM EST, Saturday, January 12,
2008 in Thesken Hall, on the Middletown Campus of Miami University,
Middletown, Ohio.

Symposium planners have issued a "call for papers" and
presenters. If you have a particular related subject of interest
which you'd like to present, or know of someone who is qualified to
present, please contact Jay Slough, K4ZLE <K4ZLE@...>.

If you have not attended previously, here's some additional
information. This symposium is unusual in that there are no
attendance fees, there is no flea market and there is no commercial
sponsorship. It is not a way to raise money; rather, it is a way to
raise the knowledge level of ham radio-related technology. In
addition to the formal presentations, informal sharing of information
is encouraged through a demonstration room and one-on-one
conversations and small group discussions.

Mark your calendar now and plan to attend the 22nd Annual Southwest
Ohio Digital and Technical Symposium on Saturday, January 12,
2008. Check http://www.swohdigi.org/ for future updates on the agenda.

3748. New Tool Max items for Sale

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-12-12 17:52:49 UTC
From: Tool Max Ind. Supply
Topic: 3748 Message: 3748

I still need some more items on consignment. Bring your items in today

We will be closing on Saturday until January. Look for a FREE inside swap and shop in January on one Saturday of the month.
Stop in during the week or call me for a off time to come in if Saturday is the only day you can come in.
I will continue to send out message 1 time a week with new items that come in on consignment.

New this week From Fred KB8UPX
Cushcraft AR-6 6 meter Ringo like new $25
Cushcraft AR-2 2 meter Ringo Antenna $20
Cushcraft 222 5 Eleament 220mhz Beam $25
LDG Electronics Z11 Automatic Antenna Tuner $50
Yaesu FT-790R II UHF All Mode Radio $80
Yaesu FT 290 II VHF Radio All Mode Radio $80
Yaesu FT 690 II 6 meter All Mode Radio $110
Yaesu FBA-8 Battery Pack for above Radios $25

3 Standard HX 320 Business Band Radio $10
Regency H600B UHF Mobile Business Band Radio $25
5 HX 240U Standard Business Band UHF Hand Held Radio $30

We have Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other items in Stock

14 Amp Jetstream Power Supply $55
28Amp Power Supply $90 With Meters $110
45Amp Power Supply $170
Lighting Arresters $21.50 ea
HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $15 each
New SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
300 ohm twin lead 50Ft $10.00
RG-58 Cable .25 per foot
RG-8 .$1.00 per Foot
RG-8X Coax Cable .45 per Foot
75 ohm Cable 9040 International Wire and Cable .35per foot
PL-259 Connectors $2.50 ea adadapters for RG-58 or RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $8

Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's

We are the only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.

Technician Class $18.95
General Class $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Other Used Equipment on Consignment

Ramsey Kits for Kids (or Adults)

300 in 1 Electronic Lab $70
Electronic Crystal Radio Kit $10
Bell Action Kit $9
Motor Action Kit $8
LED Binky Kit $8
Police Siren Kit $8
Electronic Dripping Faucet $10
LED Strobe Light with Case $45
AM Broadcast Transmitter Kit with Case $35
Tri-Field Meter $64

1 APC Interruptible back up supply $35
1 Ampprobe Clamp-Pn Meter $15
1 Sencore SG-165 AM-FM Stereo Analyzer $30
1 Box of Assortment Trimers and Relays $15
1 GW GDM 8135 Digital Multimeter $30
MC-50 Kenwood Microphone $60
MFJ-202B Noise Bridge $40
PC-1A Kenwood Phone Patch $40
#425 B+W Low Pass Filter $15
MFJ-704 Low Pass Filter $20
Ringo Ranger 2 meter antenna $35
11 Element 2 meter Beam $45
High Gain DB-1015 3 Element HF beam for 10/15 meters $35
Channel Master light duty Rotor with control box and cable $20
Mixed box of short length coax cable with PL-259 Connectors on end $1 each
JT776SMA HT Antenna $19
Signalcrafter SW-77C SWR meter $5
Headphone/Mike Ear Headset $5
Radio Shack Woodgrain Speaker $5
IC-255A 2 meter Radio with no tone board Like New from 1982 Good Packet Radio $45
Tubes A great Assortment of tested used Tubes $1-$4 each
B&K Model 4011 Precision function Generator $60
B & W Antenna Tuner VS-300A $40

RCA Volt Ohm Meter $25
Barket & Williamson Low Pass Filter $5
Speakers $2 - $10
Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
Center Insulator for HF antenna $5
Rocky Mountain Radar Detector $160
LED Emergency Light $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50
MFJ-722 Notch Filter $30.00
MFJ 407C keyer $15
Code Key $15
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40
6-9 inch clamps to mount antenna on large poles or vent pipes $5.56 each

Heathkit items in stock

Heathkit SA-2040 1KW Tuner $135
Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40
Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Keychain LED lights $1.50 and up
Other items coming in Daily

Tool Max Industrial Supply is the Tool and Ham Radio retail store on Schamber Dr just off Pontaluna Rd and US-31 just north of the old Hob Knob or Michael's Restaurant (Now tore down) in Muskegon . We have tools, industrial suppliers and Ham radios parts for sale. For more information call or e mail Tom KB8VEE at 231 798-7898 I am in the Store from 8:30AM-4:30PM Monday-Friday. 3749. For Sale: Battery for TH-D7AG (PB-39)

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-12-14 15:52:46 UTC
From: Zach Lassiter
Topic: 3749 Message: 3749

I lost my Kenwood TH-D7AG radio when I moved about a year ago, but I still have the spare battery I have. Its in good cosmetic shape, with no damage visible or cracks on the plastic tabs.

I'm asking $15 for it if picked up or handed off at a local amateur radio club (Kalamazoo Area) meeting or will ship to someone at cost of shipping.

Thanks,

Zach Lassiter

Yes!!!

The crawl in my web browser says the solar flux is 92. When was the last time we saw that high a number? And I was trying to break the pile-up on an ET earlier today. No joy there (no joy breaking the pile-up that is, but great happiness even hearing the DX) although we will look forward to the Pakistan that will get on the air rather soon. Gosh I wish the tower were constructed. Hi!

Maybe I need to take a road trip to the clubhouse shack.

NASA Science News for December 14, 2007
The solar physics community is abuzz this week. No, there haven't been any great eruptions or solar storms. The source of the excitement is a modest knot of magnetism that popped up on the sun, possibly heralding the start of a new solar cycle.

3754. Opinion please...

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-12-16 15:39:50 UTC
From: Jim Miller
Topic: 3754 Message: 3754

I saw this station advertised on qrz.com:

http://www.qrz.com/ib-bin/ikonboard.cgi?s=205b4b17bcd80718053fa832ea5986\
6e;act=ST;f=1;t=176986
<http://www.qrz.com/ib-bin/ikonboard.cgi?s=205b4b17bcd80718053fa832ea598\
66e;act=ST;f=1;t=176986>

It's older, but the reviews that I have looked at say this is a pretty good rig. I emailed the seller with a list of questions.

For a little less money I can get a used Yaesu 857. I would still need to purchase a power supply and tuner.

Which, in your opinion, is the better way to go?

I am going to upgrade to general in January and am looking for a rig to get on the HF bands. I would like to purchase a set up that I will be able to use for the next several years.

I will be operating from an appartment using some kind of simple antenna. I was considering the MFJ-1622.

Any suggestions or opinions would be greatly appreciated!

Jim - kd8fcv

Topic: 3754 Message: 3760

My two cents worth:

I agree that a newer rig would be a better choice. You might have trouble getting service for such an older rig. Or you might argue that all its problems have been resolved?

I'm an Icom guy and have a 735 that works great. It has been in the "hospital" a few times. The fix-it guy is good, friendly, and handy. I have no experience with Yaesu.

You don't need the power supply, rig, and antenna tuner from the same manufacturer. Power supplies, in particular, are inexpensive. And there are great manufacturers who make automatic antenna tuners that work wonderfully with all rigs.

Bill, AB8SC

I still need some more items on consignment. Bring your items in today

We will be closing on Saturday only until January.
Look for a FREE inside swap and shop in January on one Saturday of the month.
Stop in during the week or call me for a off time to come in if Saturday is the only day you can come in.
I will continue to send out message 1 time a week with new items that come in on consignment.

From K8PIX All like NEW
HP PDA Pocket PC Model Jornada 545 16MB Ram Color PDA $100
Paum Zire Black & White PDA $30
Radio Shack Model 12-259 Hand Held Weather Radio $30
Radio Shack PRO-94 1000 Channel Handheld Trunking Scanner $75
Icom W21AT 2 meter/440 Hand held with BP-130 AA Bat. pack and PB-132 Bat Pack $100

From KV8VPX All like NEW
Cushcraft 222 5 Eleament 220mhz Beam $25
Yaesu FT-790R II UHF All Mode Radio $80
Yaesu FT 690 II 6 meter All Mode Radio $110
Yaesu FBA-8 Battery Pack for above Radios $25

From KC8OVS
3 Standard HX 320 Business Band Radio $10
Regency H600B UHF Mobile Business Band Radio $25
5 HX 240U Standard Business Band UHF Hand Held Radio $30

We have Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other items in Stock

14 Amp Jetstream Power Supply $55
28Amp Power Supply $90 With Meters $110
45Amp Power Supply $170
Lighting Arresters $21.50 ea
HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $15 each
New SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
300 ohm twin lead 50Ft $10.00
RG-58 Cable .25 per foot
RG-8 .$1.00 per Foot
RG-8X Coax Cable .45 per Foot
75 ohm Cable 9040 International Wire and Cable .35per foot
PL-259 Connectors $2.50 ea adadapters for RG-58 or RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea

Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $8
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's

We are the only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.

Technician Class $18.95
General Class $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95

AM Broadcast Transmitter Kit with Case $35
Tri-Field Meter $64

1 APC Interruptible back up supply $35
1 Ampprobe Clamp-Pn Meter $15
1 Sencore SG-165 AM-FM Stereo Analyzer $30
1 Box of Assortment Trimers and Relays $15
1 GW GDM 8135 Digital Multimeter $30
MC-50 Kenwood Microphone $60
MFJ-202B Noise Bridge $40
PC-1A Kenwood Phone Patch $40
#425 B+W Low Pass Filter $15
MFJ-704 Low Pass Filter $20
Ringo Ranger 2 meter antenna $35
11 Element 2 meter Beam $45
High Gain DB-1015 3 Element HF beam for 10/15 meters $35
Channel Master light duty Rotor with control box and cable $20
Mixed box of short length coax cable with PL-259 Connectors on end $1 each
JT776SMA HT Antenna $19
Signalcrafter SW-77C SWR meter $5
Headphone/Mike Ear Headset $5
Radio Shack Woodgrain Speaker $5
IC-255A 2 meter Radio with no tone board Like New from 1982 Good Packet Radio $45

Tubes A great Assortment of tested used Tubes $1-$4 each
B&K Model 4011 Precision function Generator $60
B & W Antenna Tuner VS-300A $40
RCA Volt Ohm Meter $25
Barket & Williamson Low Pass Filters $5
Speakers $2 - $10
Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
Center Insulator for HF antenna $5
Rocky Mountain Radar Detector $160
LED Emergency Light $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50
MFJ-722 Notch Filter $30.00
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40
6-9 inch clamps to mount antenna on large poles or vent pipes $5.56 each

Heathkit items in stock

Heathkit SA-2040 1KW Tuner $135
Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40
Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Keychain LED lights $1.50 and up
Other items coming in Daily

Why Icom, or Kenwood, or Yaesu? Its probably because of the mobile rig we first purchased. Or the other radio brand was available for a reasonable price. Or the wind blew just right. There are a ton of reasons. Your idea of staying with Yaesu has as much merit as my reason I'm using Icom.

I'd suggest you choose a newer rig from the 1990s or later. Get a hundred watts or more (life's too short for QRP in your early stages) and don't worry about the specifications too much. QST has likely reviewed the rig and you will certainly find reviews on eHam. They won't sway you much either way but are good reading. You will be able to stuff bells and whistles inside as you learn you need a CW filter or another microphone.

If I were doing it over I'd ask around a club meeting to see what other hams might have to offer. The other ham won't stick you with a lousy rig at a too high price because you'll eventually find out and he knows you'll be around for a few years to remind him of the poor treatment. Or get with KB8VEE and get one of his consignment rigs.

Congrats go out tonight to four students from the Holland Amateur Radio Club "Extra Class" class.
Studying for ten weeks, these four took and passed the Extra:

Tonight, at the Holland Red Cross:

Chris, KC8RQT
Pete, W8BUX
Jim, KB8VZY

and Sunday morning at the Lowell Hamfest,

Charlie, N8HMD

If you hear any of these four on the radio, stop and pat them pn the back for the hard studying they did.

Jim- also, please be aware that the FT-301 was available in both a QRP (10W) and 100W model. The 10W model had an accessory outboard amp available, which is HIGHLY sought after yet today. It was the FL-110. I have owned an FT-301 QRP model, with the amplifier. It was a very good radio for it's vintage. I'm not sure if it would matter to you, but if my memory serves me correctly, you could fit the volume of about 4 or 5 FT-857's inside the FT-301. It was quite a good sized rig. I think I know a ham who owns one yet, if you wanted to test drive one before you purchase. Contact me direct, if you need his info. I would agree that you are better off spending your hard earned $$ on a used (LOCAL) late model rig. Same goes for the tuner and power supply. Go get that upgrade!!!!

Good News for all the DXers in the audience:

From: ARRL Web site www.arrl.org

The ARRL DXCC Desk is pleased to announce the addition of St Barthelemy (FJ) to the DXCC List, making the island entity number 338 with an effective date of 14 December, 2007. Cards with contacts dated December 14, 2007 or after will be accepted for DXCC credit. New card submissions for St Barthelemy will not be accepted until January 1, 2008 in order to allow time for administrative adjustments.

Topic: 3768 Message: 3770

Hi, Curt:

I have a Heathkit HW-9 which has a sick receiver, and maybe a parasitic or two in the PA which I need to troubleshoot. I'm 99.44% sure it has some "dry" electrolytic capacitors because it has been sitting on the shelf for something like 10 years or more. The rig works, but the audio out is mushy and very low compared. I made a successful contact with it, but the transmitter output is finiky with tuning of the antenna matchbox. The HW-9 was known for having parasitics, but I didn't notice them earlier when I first build the rig back in the 80's.

Another current project is a NorCal SMK-1 surface mount kit which I haven't had the guts to start. I want to get proficient at using surface mount components, because I'm looking to build one of KD1JV's ATS-3b kits. I'm planning to buy one, unassembled if I find I can get the SMK-1 going.

I've looked at the 2N2/40 rig and am wondering if I should try building one of them.

As you can tell, I like operating QRP with <5 watts. I have a Drake TR-5 as my "QRO" rig, but often I crank it down to <5 watts. And, I built a 300 milliwatt 3 transistor transmitter @ "Four Days in May" at the Dayton Hamvention this spring - it's much to simplistic, but it was nice to see that something I put together actually worked.

Earlier in my ham career I designed and did troubleshooting on a 100 watt transmitter. I had trouble because I screwed up and connected the rotor of the split stator capacitor to the center tap of the coil on a push pull output stage. It took me several weeks to figure out why I was getting two dips in the final current - that's when I found that the ARRL's Technical Informaton Service was very worthwhile!

What kind of projects do you have up your sleeve right now?

Topic: 3768 Message: 3775

Hank, I could probably help with the SMD stuff. I've held certification in surface mount soldering, etc. and I do SMT repairs at work and I like to use it in my ham experiments and projects.

A current project that I started a year or so ago is a 6m transverter. I completed the RX converter portion but I ran into a snag with a driver stage to drive the final stages of the TX. I'm planning on giving it another "go" with another driver amp circuit.

Another project I sure would like to finish is a 80m CW transciever. The snag I ran into with that is a not-so-sensitive RX. I put together a single-stage superhet with a SBL-1 for the mixer and product detector, a 9.6MHz xtal filter, a MC1350P IF amp and a LM386 AF amp. I think my problem is that I need a post-mixer amp. I just got tired of these setbacks and put the thing away. Well, now I'm interested again...

Last year I ordered all the parts I could wish for to homebrew and now it's just a matter of putting them together in the right order to create something :)

Then, when all hope is alive, comes this from the ARRL's propagation bulletin:

Sunspot 978 held no indication for the next sunspot cycle, because the magnetic polarity was the same as spots from Cycle 23, which is now ending. It was also at mid-latitude, and spots from a new cycle tend to be high latitude. But there was quite an interest this week in a high-latitude area of reverse magnetic polarity. So far this has not turned into an actual sunspot, so we wait. You can read about it at, http://sidc.oma.be/news/100/welcome.html.

Back in the 60's were there some folks from California who did sun dances and cheered the coming sun spot cycle? Where are these friends now? It must be a lost art. Hi

Satscape TV

Satscape is one of the most popular programs for tracking Amateur Radio Satellites. Now Scott Hather G7LIU has added Satscape TV to his website.

On the website Scott says:

Satscape TV is a 24 hour TV Channel that broadcasts Videos all about Satscape, Space exploration, NASA, ESA, Amateur Radio and Amateur Satellite Radio tutorials and 'how-tos', and anything else I can think of that I think you'll want to watch.

We will also have special days where we'll put the serious stuff to one side and have a "comedy day", or some other theme, so what do you need to watch Satscape TV?

You probably already have everything, just a web browser and Flash installed, it works on Windows, Linux and Mac (much like Satscape for Java!).

Satscape TV

3788. Reward for Capture of a convicted criminal

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-12-26 03:50:50 UTC
From: Hank Greeb
Topic: 3788 Message: 3788

A reward of 500 micro farads is offered for information leading to the arrest of this desperate criminal Hop-A-Long Capacity

This unrectified criminal escaped from a western primary cell where he had been clamped in ions awaiting the gauss chamber.

He was charged with the induction of an 18 turn coil named Milli Henry who was found choked and robbed of valuable joules. He is armed with a carbon rod and is a potential killer.

Capacity is also charged with driving DC motor over a Wheatstone bridge and refusing to let the band-pass. If encountered, he may offer series of resistance.

The electromotive force spent the night searching for him in a magnetic field, where he had gone to earth. They had no success and believed he had returned ohm via a short circuit. He was last seen riding a kilocycle with his friend eddy current who was playing a harmonic.

All:

There are tons of various wallpaper to chase. One interesting one is the WPX which CQ Magazine awards for contacts with over four hundred different prefixes. It's fairly easy to earn. This new prefix counts. Not to brag but I've got 1600+ QSOs in the log and over 400 prefixes. Hit a few contests and the call signs mount up.

Speaking of contests, I've been working on my presentation to the MAARC January meeting. We'll be talking about contesting. We'll look at hardware, software, propagation, and having fun in another part of the universe of ham radio. Stop in and I'm sure you'll enjoy a new tidbit and a new opportunity to "play" radio.

Bill, AB8SC

3796. Contesting for DX, Play our Game!

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-12-27 22:17:12 UTC
From: Bill
Topic: 3793 Message: 3796

Yes, contests are GREAT for chasing DX. I especially enjoy the three or five days before when the DX is putting the shack together. He will often call CQ before the 'test to check out the shack. That's a great time to put a new one into the log. The competition is not so stiff.

And in a contest the exchange is short, sweet, and the DX really likes to have your QSO in the log. In and out, then chase the paperwork. That's a great way to get new ones. And the contesters seem to like sending out a card in exchange for the point in the contest.

However, your antenna problems will take you out during some juicy contests. Isn't the CQ WPX in early March? Phone? I'll have to check. I so want to get my tower together. Some really great DX is coming. Check out Clipperton Island, for example. Not that they'll be contesting. Yes, that was an official "thread drift."

Bill, AB8SC

> My HF station is down due to the recent windstorms taking out my antennas. They won't be back up until spring. And then, I think I am going with a vertical as all three of the one's I have survived. (2m, 440, 10/11m all on the roof) and have been up for years without coming down, even with Category 1 hurricane force winds. Yes, that is what we had here Monday. 78 mph gusts. When we had the derechos Muskegon only clocked 62 mph winds.
>
> Cool about the presentation for contests. I have found that when the contests are on the air they provide a great means to work all sorts of DX that you wouldn't normally be able to do. I only have about 325 QSL cards from 60 or so entities but many of them came from working contest stations. All hard cards, none of this LOTW stuff, either. (My dad collects stamps, I collect *real* QSL cards.) :)
My cards are worth more to me than my radios. The radios can be replaced.

3797. dx and cw question

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-12-28 00:33:17 UTC
From: Chris Schulte
Topic: 3797 Message: 3797

Hello list:

Although I don't have hf right now, I will hopefully before June. My question is, do you have to be able to send CW at an extremely high rate of speed in order to break through some of those pile ups and get noticed by dx stations? I send extremely slow right now, and hopefully will get faster over time, but I don't want to be pounding away with my callsign if I can't send very fast and taking up valuable air space with that to try and get a dx station if it's required that you have to be quick on the key/paddle.

73,
Chris, w8cjs

Now you know why people want short call signs....

I still think the rule applies that you send at the rate you can reliably copy.

Send slow, but try to send LOUD. :)

Hopefully some of the better CW dudes can give you some tips on snagging that DX via CW. Hank? John?

Chris:

No, you do not have to send a call sign really fast. For a few reasons:

First, in contests the DX will generally send faster than he can send. He will probably be able to copy call signs faster than he can send. In a contest the intent is to log as many calls as he can. So he sends CQ fast to cut down the time it takes to get a return call. However, the DX might also send the exchange rather fast. I'll often hang around the frequency before calling and after getting into the log to get the fill on the exchange.

Second, you should get a memory keyer. You can load the keyer with your call, the exchange, and the like. Then crank the speed button to throw out the call sign. Works very well.

Third, a QSO a day is a great way to get comfortable with the code. My DX elmer has suggested this tactic. I remember a board sailor saying you won't get good at board sailing until you have fallen a thousand times. Maybe you need a few QSOs in the log before you get better with code.

Fourth, the code is intimidating. You can get into the novice parts of the bands where you are expected to work the code with training wheels. And there are nets designed to help you with code. And don't forget the FISTS guys can get you a code buddy. I'm beginning to realize it is much more putting time on the paddles than any other skill set.

Fifth, there is a rhythm to a QSO. You know this from the phone contacts you are already good at. Same with a CW QSO. And especially when you are chasing DX. I am embarrassed to tell you that my DX elmer was trying to help me get into the log of a rare DX. I was totally way off the rhythm. Totally lost. It's a bit better now. Maybe only a bit, though.

I think the great CW operators are kind and skillful folks who encourage and support. Very few CW contests go by that I don't marvel at the "fraternity" of the code. And I'm nowhere near ready to pledge.

I'd drop into a club meeting in Muskegon. There are any number of boat anchor folks who generally attend. And it is such a small community that they all know each other.

Or give Doran, WA8EOW a call. He has repaired one or more rigs for hams in the recent past.

Bill, AB8SC

I still need some more items on consignment. Bring your items in today

We will be closing this Saturday for New Years weekend

Mark your calendar for Saturday January 19 for FREE inside Swap and Shop. Bring your items to sell and a table from 9AM-12PM
Call me for your reservation. 231 798-7898

New items this week

LED Flashlights From $4.99

We have Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other items in Stock

14 Amp Jetstream Power Supply $55
28Amp Power Supply $90 With Meters $110
45Amp Power Supply $170
Lighting Arresters $21.50 ea
HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $15 each
New SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
300 ohm twin lead 50Ft $10.00
RG-58 Cable .25 per foot
RG-8 .$1.00 per Foot
RG-8X Coax Cable .45 per Foot
75 ohm Cable 9040 International Wire and Cable .35per foot
PL-259 Connectors $2.50 ea adadapters for RG-58 or RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $8
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's

We are the only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.

Technician Class $18.95
General Class $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95

ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Ramsey Kits for Kids (or Adults)

300 in 1 Electronic Lab $70
Electronic Crystal Radio Kit $10
Bell Action Kit $9
Motor Action Kit $8
LED Binky Kit $8
Police Siren Kit $8
Electronic Dripping Faucet $10
LED Strobe Light with Case $45
AM Broadcast Transmitter Kit with Case $35
Tri-Field Meter $64

Other Used Equipment on Consignment

HP PDA Pocket PC Model Jornada 545 16MB Ram Color PDA $100
Paum Zire Black & White PDA $30
Radio Shack Model 12-259 Hand Held Weather Radio $30
Radio Shack PRO-94 1000 Channel Handheld Trunking Scanner $75
Icom W21AT 2 meter/440 Hand held with BP-130 AA Bat. pack and PB-132 Bat Pack $100
Arrow 222 5 Element 220mhz Beam $25
Yaesu FBA-8 Battery Pack for above Radios $25
3 Standard HX 320 Business Band Radio $10
1 Regency H600B UHF Mobile Business Band Radio $25
1 APC Interruptible back up supply $35
1 Ampprobe Clamp-Pn Meter $15
1 Sencore SG-165 AM-FM Stereo Analyzer $30
1 GW GDM 8135 Digital Multimeter $30
MFJ-202B Noise Bridge $40
PC-1A Kenwood Phone Patch $40
#425 B+W Low Pass Filter $15
MFJ-704 Low Pass Filter $20
Ringo Ranger 2 meter antenna $35
11 Element 2 meter Beam $45
High Gain DB-1015 3 Element HF beam for 10/15 meters $25
Channel Master light duty Rotor with control box and cable $20
Mixed box of short length coax cable with PL-259 Connectors on end $1 each
JT776SMA HT Antenna $19
Headphone/Mike Ear Headset $5
Radio Shack Woodgrain Speaker $5
IC-255A 2 meter Radio with no tone board Like New from 1982 Good Packet Radio $45
Tubes A great Assortment of tested used Tubes $1-$4 each
B&K Model 4011 Precision function Generator $60
B & W Antenna Tuner VS-300A $40
RCA Volt Ohm Meter $25
Barket & Williamson Low Pass Filter $5
Speakers $2 - $10
Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
Center Insulator for HF antenna $5

LED Emergency Light $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50
MFJ-722 Notch Filter $30.00
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40
6-9 inch clamps to mount antenna on large poles or vent pipes $5.56 each

Heathkit items in stock

Heathkit SA-2040 1KW Tuner $125 New lower price
Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40
Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Keychain LED lights $1.50 and up

Tool Max Industrial Supply is the Tool and Ham Radio retail store on Schamber Dr just off Pontaluna Rd and US-31 just north of the old Hob Knob or Michael's Restaurant (Now tore down) in Muskegon . We have tools, industrial suppliers and Ham radios parts for sale. For more information call or e mail Tom KB8VEE at 231 798-7898 I am in the Store from 8:30AM-4:30PM Monday-Friday. Stop by and see me for all your Ham needs.

Subject: [frrl] Last chance to work all of the Canadian Provinces for 2007 HF Challenge

In case you did not know, there is a Canadian Day HF contest from 0000
to 2359 UTC on December 29 where you may be able to work the rest of
the Canadian Provinces missing from your HF Challenge worksheet.

The suggested CW freqs on 160, 80, 40, 20, 15, and 10m is xx.025 MHz.

The suggested Phone frequencies are 1850,3775,7075(not our phone
band), 14175,21250,and 28500.

The exchange you give is RST and serial number.

By the way, I am just looking for VE8. I hope the propagation Gods
smile on me...

73, Dick AH6EZ

3811. Ham Radio BrowserToolbar and PocketDigi & Mobile Log forWindows Mobile/PocketPC PDAs by N0HR

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-12-29 05:13:01 UTC
From: Mark Thompson
Topic: 3811 Message: 3811

N0HR Software & Resources

N0HR's ham radio website, http://www.n0hr.com has many free resources for ham radio:

The Ham Radio Toolbar for Internet Explorer & Firefox:
http://www.n0hr.com/Ham_Radio_Toolbar.htm

HamLinks is a free ham radio toolbar that extends your (Internet Explorer or Firefox) web browser to give ham radio operators quick access to great ham radio content. It's completely free, easy to install (and uninstall) and can be configured by the user. No registrations, spyware, spam or other hooks.

No spyware, security holes, email scams or hijacked searches. See the privacy policy.
Features of the HamLinks ham radio toolbar
Here are a few of the features of the HamLinks ham radio toolbar.
Powerful search box. Simply enter some text in the box or select it in your browser, then use the search menu to quickly search any of the following:
QRZ.com (great for callsign searches from the toolbar)
DXwatch (spot searches from the toolbar)
QSL Manager (lookup dx callsigns from the toolbar)
FindU.com (APRS location information with a call search from the hamlinks toolbar)
Ham Radio Links (search the links directory)
Product reviews (select a ham radio product and instantly find reviews for it!)
Ham Radio Classifieds at eHam and QTH.com (select a product and see if there are any for sale). Of course, you can also find ham radio products at eBay as well further down the menu.
Links to popular ham radio websites.
Access to the DXpedition Map.
Ham Radio Blog Feeds
Customizable email notifier and weather icon
UTC Time
WWV gadget to show propagation bulletins
Podcast player with ham radio related podcasts
Propagation Data from WWV - similar to Propfire

PocketDigi for Windows Mobile and PocketPC PDAs:
http://www.n0hr.com/PocketDigi/PocketDigi_intro.htm

What is PocketDigi?
PocketDigi is an open source utility developed by OK1IAK to provide ham radio operators with PocketPC PDAs with the ability to use (encode and decode) digital modes such as RTTY (teletype), PSK (phase shift keying), and CW (Morse Code).
Want to take your PocketPC PDA to go backpack mobile and work PSK31 QRP? Then, PocketDigi is the app for you! Since the advent of mobile computing, radio amateurs have been exploring creative ways to utilize laptop computers and PDAs for portable ham radio

operations and mini-DXpeditions.
PocketDigi was created by Vojtech OK1IAK who built the utility using Microsoft's Embedded Visual C. He used (and improved) portions of a Linux GNU open source application called gMFSK to do encoding and decoding.

MobileLog PocketPC PDA Logbook Application:
http://www.n0hr.com/MobileLog/MobileLog_2_Tour.htm

Your PocketPC / Windows Mobile PDA keeps you organized on the go. But have you considered using it to manage your ham radio activities? With MobileLog, you can log your ham radio contacts while on-the-go..
MobileLog 2 offers significant improvements over earlier versions of MobileLog including:
Major performance improvements (speed and size)
Integration with PocketDigi, the PocketPC digitial mode application
WAS reports
Save reports as CSV, Tab delimited or HTML files
Landscape mode
User-defined fields
Easy to update prefixes and DXCC entities
Advanced reports which allow you to create a filtered listing of worked or confirmed QSOs
Logbook view
Compatibility with Windows Mobile 5 and PocketPC 2003 without the need for the Microsoft VBRuntime
Built-in on-line help system
An improved / simplified installation process
Automatically uses GMT
and much more

3813. ARRL RTTY/Digital Mode Round-Up , 1/5 - 1/6

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2007-12-29 07:22:24 UTC
From: Mark Thompson
Topic: 3813 Message: 3813

ARRL RTTY/Digital Mode Round-Up

Date: January 5-6, 2008

Location: Baudot RTTY, ASCII, AMTOR, PSK31, and Packet—attended operation only on 80, 40, 20, 15, and 10 meter bands

Notes: 2008 ARRL RTTY Round-Up Rules
General Rules

Object: Amateurs worldwide contact and exchange QSO information with other amateurs using digital modes (Baudot RTTY, ASCII, AMTOR, PSK31, and Packet—attended operation only) on 80, 40, 20, 15, and 10 meter bands. Any station may work any other station.

Date and Contest Period: First full weekend of January, but never on January 1. Begins 1800 UTC Saturday, ends 2400 UTC Sunday (January 5-6, 2008).
2.1. Operate no more than 24 hours.
2.2. The six hours of off time must be taken in no more than two blocks.

Entry Categories:
3.1. Single Operator:
3.1.1. Low Power.
3.1.2. High Power.
3.2. Multioperator, Single Transmitter:
3.2.1 Power.
3.2.1.1. Low Power
3.2.1.2. High Power
3.2.2. Stations are allowed only one transmitted signal at any given time.
3.2.3. Includes those single operators that use any form of spotting assistance such as from nets or packet.
3.2.4. Includes those that receive assistance with logging or relief operators, etc.
3.2.5. Limited to 6 band changes (maximum) in any clock hour.
3.2.6. The clock hour is from zero through 59 minutes.
3.2.7. Band changes are defined so that, for example, a change from 20 meters 15 meters and then back to 20 meters constitutes two band changes.

Exchange:
4.1. United States: Signal report and State.
4.2. Canada: Signal report and Province.
4.3. DX: Signal report and consecutive serial number, starting with 001.

Scoring:
5.1. QSO Points: Count one point for each completed QSO.
5.2. Multipliers: Each US state (except KH6 and KL7) plus the District of Columbia (DC), Canadian provinces/territories: NB (VE1, 9), NS (VE1), QC (VE2), ON (VE3), MB (VE4), SK (VE5), AB (VE6), BC (VE7), NWT (VE8), NF (VO1), LB (VO2), NU (VYØ), YT (VY1), PEI (VY2) and each DXCC country. KH6 and KL7 count only as separate DXCC entities.

5.2.1. Count only once (not once per band).
5.2.2. The US and Canada do not count as DXCC entities.

Be a better friend, newshound, and
know-it-all with Yahoo! Mobile. Try it now.

If anyone is interested in a worked all states net, this is one that I have checked into many times. They have a free bureau for sending QSL cards. When I am active on the nets I get an envelope of cards every few weeks. I generally send in 5-7 cards in one envelope have saved a good amount in postage.

For more information on the nets http://www.3905ccn.com/

Here are some stats for 2007.

40 METER BUREAU WM9H BUREAU
INCOMING MAIL 5,738 PCS
OUTGOING MAIL 6,793 PCS
TOTAL WT 783 LBS
SASES ON FILE 9,063
THIS EQUATES TO APROX 50,000 TO 70,000 QSL CARDS

Other 3905CCN Bureau,s except the 40M bureau
INCOMING MAIL 11,949 PCS
OUTGOING MAIL 10,912 PCS
TOTAL WT 1,428 LBS
SASES ON FILE 13,633

Jim:

As you know, and as those in our audience should know, this organization is an excellent one to use when chasing wallpaper like the Worked All States from the ARRL. This organization also has other fun ways to enhance the experience from working their club officers to working YLs and such. These folks have tremendous fun and provide a great service.

I, too, highly recommend their nets.

Bill, AB8SC

Subject: [GQRP] attempt to fly a Amateur Beacon across atlantic

Hello,

An attempt to fly a amateur beacon across the atlantic is going to
happen at 0300 etc Friday morning.

http://www.spiritofknoxville.com

the frequency is 10.1257 mhz.

at the last attempt 4 weeks ago the beacon ended up in the sea 400 miles
from the us coast.

Best Wishes Martin 2E0AYQ<

HEYKOOP, MR. GERALD E. Widower of Betty Muskegon Mr. Gerald E. "Jerry" Heykoop, age 81 died Monday evening, December 31, 2007, at Mercy Hospital following a short illness. He was born May 7, 1926 in Shelby Twp., MI to Leonard & Minnie (TenBrink) Heykoop; and had resided in the Muskegon area most of his life. Immediately following high school graduation, Jerry enlisted in the U.S. Navy and served during WW II as a Radio Man. On October 13, 1950 he married the former Betty J. Zuidema and she preceded him in death, on May 16, 2007. He was also preceded in death by his infant daughter, Bonnie. Together, Jerry and Betty started and owned White Lake Electronics, a Radio Shack franchise for 12 years prior to his retirement in 1992. He was a member of Bethany Christian Reformed Church and had volunteered as a board member and usher for the Frauenthal Center for the Performing Arts for many years. Jerry was also an Amateur Radio Operator (W8EHO) and loved organic gardening. SURVIVORS include 4 children, Ken Heykoop of Thailand, Sally (Dave) Wagenmaker of Muskegon, Peggy (Kelly) Drake of North Muskegon and Terry (Leanne) Heykoop of Fremont; 9 grandchildren, 2 great-grandchildren; 1 brother, Louis (Donna) Heykoop of New Era and by 2 sisters, Wilma Vannette of Holland and Carol (Ed) Wiers of Marne. SERVICES will be 10 AM Saturday, January 5, 2008 at Bethany Christian Reformed Church with the Rev. David Sieplinga officiating. Burial will be in Restlawn Cemetery. VISITATION with Jerry's family will be 5-8 PM Friday at The Sytsema Chapel Sytsema Funeral Homes, Inc. 737 Apple Avenue 231-726-5210 MEMORIAL GIFTS may be made to the Endowment Funds of Muskegon Christian School or Western Michigan Christian High School or to Harbor Hospice. You are also invited to sign the family's On-line Guest Book @ www.sytsemafh.com

Published in the Muskegon Chronicle on 1/3/2008.

I still need some more items on consignment. Bring your items in today

Mark your calendar for Saturday January 19 for FREE inside Swap and Shop.
Bring your items to sell and a table from 9AM-12PM
Call me for your reservation. 231 798-7898

No New items this week

We have Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other items in Stock

14 Amp Jetstream Power Supply $55
28Amp Power Supply $90 With Meters $110
45Amp Power Supply $170
Lighting Arresters $21.50 ea
HF Antenna 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $15 each
New SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
RG-58 Cable .25 per foot
RG-8 .$1.00 per Foot
RG-8X Coax Cable .45 per Foot
75 ohm Cable 9040 International Wire and Cable .35per foot
PL-259 Connectors $2.50 ea adadapters for RG-58 or RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $8
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's

We are the only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.

Technician Class $18.95
General Class $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Ramsey Kits for Kids (or Adults)

300 in 1 Electronic Lab $70
Bell Action Kit $9
Motor Action Kit $8
LED Binky Kit $8
Police Siren Kit $8
Electronic Dripping Faucet $10
LED Strobe Light with Case $45
AM Broadcast Transmitter Kit with Case $35
Tri-Field Meter $64

Other Used Equipment on Consignment

HP PDA Pocket PC Model Jornada 545 16MB Ram Color PDA $100
Paum Zire Black & White PDA $30
Radio Shack Model 12-259 Hand Held Weather Radio $30
Radio Shack PRO-94 1000 Channel Handheld Trunking Scanner $75
Icom W21AT 2 meter/440 Hand held with BP-130 AA Bat. pack and PB-132 Bat Pack $100
Arrow 222 5 Element 220mhz Beam $25
Yaesu FBA-8 Battery Pack for above Radios $25
3 Standard HX 320 Business Band Radio $10 ea.
1 Regency H600B UHF Mobile Business Band Radio $25
1 APC Interruptible back up supply $35
1 Ampprobe Clamp-Pn Meter $15
1 Sencore SG-165 AM-FM Stereo Analyzer $30
1 GW GDM 8135 Digital Multimeter $30
MFJ-202B Noise Bridge $40
PC-1A Kenwood Phone Patch $40
#425 B+W Low Pass Filter $15
MFJ-704 Low Pass Filter $20
Ringo Ranger 2 meter antenna $35
11 Element 2 meter Beam $45
High Gain DB-1015 3 Element HF beam for 10/15 meters $25
Channel Master light duty Rotor with control box and cable $20
Mixed box of short length coax cable with PL-259 Connectors on end $1 each
JT776SMA HT Antenna $19
Headphone/Mike Ear Headset $5
Radio Shack Woodgrain Speaker $5
IC-255A 2 meter Radio with no tone board Like New from 1982 Good Packet Radio $45
Tubes A great Assortment of tested used Tubes $1-$4 each
B&K Model 4011 Precision function Generator $60
B & W Antenna Tuner VS-300A $40
RCA Volt Ohm Meter $25
Barket & Williamson Low Pass Filter $5
Speakers $2 - $10
Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
Center Insulator for HF antenna $5
LED Emergency Light $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50
MFJ-722 Notch Filter $30.00
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25

Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40
6-9 inch clamps to mount antenna on large poles or vent pipes $5.56 each

Heathkit items in stock

Heathkit SA-2040 1KW Tuner $125 New lower price
Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40
Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Keychain LED lights $1.50 and up

Tool Max Industrial Supply is the Tool and Ham Radio retail store on Schamber Dr just off Pontaluna Rd and US-31 just north of the old Hob Knob or Michael's Restaurant (Now tore down) in Muskegon . We have tools, industrial suppliers and Ham radios parts for sale. For more information call or e mail Tom KB8VEE at 231 798-7898 I am in the Store from 8:30AM-4:30PM Monday-Friday. Stop by and see me for all your Ham needs.

From: kc8rqt
Topic: 3823 Message: 3827

Paul,

The Yaesu FT-7800 does not have a memory battery as some of the older rigs do. The FT-7800 uses a memory chip(non volatile memory)to store all of your radios information. If you remove the radio from a power source it will keep all it's memory information.

I hope this helps.

Chris

Lamps radio

Detailed history of lamps radio
Building of a transmitter using ancient lamps
Manufacture of a triode and all tools necessary for his realization
Small balance sheet of activity with the fabricated triodes

The author

Claude slob begins as many in the fifties, by the remote control of reduced models. The mechanics being one of its favourite violins of Ingres, it puts a full stop of honour to construct the motor which will equip the boat.
In 1959 he becomes F2FO and takes the exam on a transceiver AM 5 bands of his manufacture. DXCC is although quickly fastened traffic is not its " cup of tea " and serves mostly only for validating a personal realization. It gives joy therefore in heart with BLU which becomes established little by little on bands amateurs. Then a period RTTY, on re-conditioned machines comes.

His first article for Radio-ref (in 1959) is BFO for " command set " BC453 who hold attention for their remarkable selectivity. He becomes the editor of the " Analyses of magazines ", column which he will hold several years. He will also be councilman of administration of REF for 3 years.
It publishes an implement, between others, a linear booster equipped with 811, oscillographique allowing the permanent control of the quality of modulation but also the purity of the issued sign, a camera TV equipped with integrated circuits and several equipment BLU of which a transistorized transceiver which will be broadly used in motive.

It is then the realization of a station 2300 MHz then an equipment 10 GHz descriptions of which appear in Radio-ref. These two achievements are crowned on the ground by first " Frances-England " in 1968 and 1969. A superb QSO "cross-country running-band " 2,3 - 10 GHz on a 40 km distance still stays in the memory of the sacred good instants of the signatories!

Loving and respectful of the old and venerable components, he makes relive tubes of reception of the twenties by making them issue 3 watts in the band 80m in telegraphy. QSO in all Europe will be accomplished... See Broadcasting chapter QRP.

His veneration for the equipment of mister Arthur Collins, leads it to restore a certain number of transceivers Collins, and particularly the 618-T.

And then, it is to participate in its manner in the centenary of the creation of the triode by Lee De Forest in 1906, it launches into the manufacture of the mythical TM put in the point by the general Ferrié in 1915. Make a lamp, it is not so easy, but to complicate difficulty a bit, F2FO is going to construct all essentials in this plan, and particularly various pomps, of which a molecular, to acquire a space allowing job in program of the accomplished tubes.

A dozen lamps is so going to come into the world...

To prove measurements, QSO will be accomplished on the January 1st, 2005 on 80m in CW between Montrouge / 92 and Camaret / 29. Tubes are robust and will make other contacts...

The initial purpose, which was to cross Atlantic, was attained by F6BWO who accomplished of numerous QSO on 4 continents.

Work

Work

*Lamps: history of lamps radio, of their appearance in 1906 up to the advent of the transistor by 1960
*Transmitter QRP: realization of a transmitter using lamps dating former on 1925
*Triodes: manufacture of a triode TM and the necessary tools (pomps, étuve etc)
*Photographs: some photographs of stages of manufacture
*Mr Mignet (format PDF: 58 pages - 2 Mb): original document representing the manufacture of " lamps with space in électrodes 3 " by a forerunner in the twentieth
*Supplementary benefits of October 6th, 2005 (not reproduced in format PDF)
*Balance sheet of activity after one year of use of fabricated triodes (published in MEGAHERTZ magazine N ° 281 - August, 2006)

Printable versions of the first four chapters in format PDF are available below:

Lamps (left 1) 72 pages - 68 Mb
Lamps (left 2) 49 pages - 61 Mb
Transmitter QRP 41 pages - 5 Mb
Triodes (left 1) 36 pages - 31 Mb
Triodes (left 2) 25 pages - 15 Mb
Triodes (photographs) 6 pages - 24 Mb

If you want to know about it more, continue unwinding these pages.
Texts, photographs and video are of AUTHOR F2FO.

Video

Very Kewl Larry . Thanks for sharing .

Want a new facet of hamming? Why not go retro, with vacuum tubes, but build your own.

http://www.dailymotion.com/video/x3wrzo_fabrication-dune-lampe-triode_tech

Considerably beyond my capabilities, one would need a machine shop, experience with glass blowing, etc..... But, wouldn't it be a thrill to make a contact with a rig made from your own vacuum tubes? :)

There are two nets I can think off off the top of my mind. Both are on 144.155 USB. One is run every day at 8:30 AM by N9NDP in Racine, WI. The other is on Sunday nights at 9:30 PM by K8NFT in Holland.

The USB calling frequency is 144.200. The keyboard digital frequency is 144.150, and the meteor scatter calling frequency is 144.140.

At the moment, I'm down to using a half-deaf Icom 706 for 2m SSB but it's probably enough for digital, and maybe SSB if you want to set up a sked.

I was on 2M SSB a number of years ago and my range was typically 200+ miles with a dead band, and up from there with better conditions. Of course there are numerous variables here.

3844. OCEC - Training Reminder

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-01-10 21:42:18 UTC
From: Steve Vander Hill
Topic: 3844 Message: 3844

Hello, and Happy New Year.

Just a quick email to allow everyone to review their calendars. OCEC monthly meetings are being slated for the second Thursday evening of each month. The final arrangements with Fillmore are being worked out to have access to the room, etc. Unless you hear different, please plan on the next OCEC meeting being held on February 14 (Valentine's Day).

The January OCEC meeting is not being held this month with the intend of cutting down the number of meetings we all attend in a month's time, which will hopefully allow everyone to attend this month's training meeting.

The training this month will be presented by Rich Brand KB8FXD who will share his insights as it relates to weather. The timing for this training will not only prepare us for our Spring severe weather, but also with our unique January weather. The training meeting is scheduled for January 17 at 7:00pm at Fillmore. Hope to see everyone there!

Best regards,

Steve

3847. Tool Max this week

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-01-11 17:36:52 UTC
From: Tool Max Ind. Supply
Topic: 3847 Message: 3847

I still need some more items on consignment. Bring your items in today

Mark your calendar for Saturday January 19 for FREE inside Swap and Shop.
Bring your items to sell and a table from 9AM-12PM
I only have resevations for 3 tables now Call me for your reservation. 231 798-7898

New items this week

1 KVM Switch for switching Keyboard, video, mouse on computer $10
1 Box of Large Compactors 10-12 pc total $5
2 boxs of New CR-RW Pocket CD's by Memorex $3
1 W- 4 Drake Wattmeter $20

We have Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other items in Stock

14 Amp Jetstream Power Supply $55
28Amp Power Supply $90 With Meters $110
45Amp Power Supply $170
Lighting Arresters $21.50 ea
HF Antenna 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $15 each
New SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
RG-58 Cable .25 per foot
RG-8 .$1.00 per Foot
RG-8X Coax Cable .45 per Foot
75 ohm Cable 9040 International Wire and Cable .35per foot
PL-259 Connectors $2.50 ea adadapters for RG-58 or RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $8
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's

We are the only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.

Technician Class $18.95
General Class $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95

ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Ramsey Kits for Kids (or Adults)

300 in 1 Electronic Lab $70
Bell Action Kit $9
Motor Action Kit $8
LED Binky Kit $8
Police Siren Kit $8
Electronic Dripping Faucet $10
LED Strobe Light with Case $45
AM Broadcast Transmitter Kit with Case $35
Tri-Field Meter $64

Other Used Equipment on Consignment

HP PDA Pocket PC Model Jornada 545 16MB Ram Color PDA $100
Paum Zire Black & White PDA $30
Radio Shack PRO-94 1000 Channel Handheld Trunking Scanner $75
Arrow 222 5 Element 220mhz Beam $25
Yaesu FBA-8 Battery Pack for above Radios $25
3 Standard HX 320 Business Band Radio $10 ea.
1 Regency H600B UHF Mobile Business Band Radio $25
1 APC Interruptible back up supply $35
1 Ampprobe Clamp-Pn Meter $15
1 Sencore SG-165 AM-FM Stereo Analyzer $30
1 GW GDM 8135 Digital Multimeter $30
MFJ-202B Noise Bridge $40
PC-1A Kenwood Phone Patch $40
#425 B+W Low Pass Filter $15
MFJ-704 Low Pass Filter $20
Ringo Ranger 2 meter antenna $35
11 Element 2 meter Beam $45
High Gain DB-1015 3 Element HF beam for 10/15 meters $25
Channel Master light duty Rotor with control box and cable $20
Mixed box of short length coax cable with PL-259 Connectors on end $1 each
JT776SMA HT Antenna $19
Headphone/Mike Ear Headset $5
Radio Shack Woodgrain Speaker $5
IC-255A 2 meter Radio with no tone board Like New from 1982 Good Packet Radio $45
Tubes A great Assortment of tested used Tubes $1-$4 each
B&K Model 4011 Precision function Generator $60
B & W Antenna Tuner VS-300A $40
RCA Volt Ohm Meter $25
Barket & Williamson Low Pass Filter $5
Speakers $2 - $10
Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
Center Insulator for HF antenna $5
LED Emergency Light $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50

MFJ-722 Notch Filter $30.00
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40
6-9 inch clamps to mount antenna on large poles or vent pipes $5.56 each

Heathkit items in stock

Heathkit SA-2040 1KW Tuner $125 New lower price
Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40
Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Keychain LED lights $1.50 and up

Tool Max Industrial Supply is the Tool and Ham Radio retail store on Schamber Dr just off Pontaluna Rd and US-31 just north of the old Hob Knob or Michael's Restaurant (Now tore down) in Muskegon . We have tools, industrial suppliers and Ham radios parts for sale. For more information call or e mail Tom KB8VEE at 231 798-7898 I am in the Store from 8:30AM-4:30PM Monday-Friday. Stop by and see me for all your Ham needs.

Paul wrote:
>Any 2meter SSB beacons to tune into?

Paul, I am not aware of any SSB 2 meter beacons, but, APRS is a great tool to check out any 2 meter SSB radio. Where 144.200 MHz is the 2 meter SSB calling frequency, there is a gaggle of signals just above there at 144.39, for APRS. A lot of signals, and all the time. From my house I don't think there is ever more than 15 seconds without a signal, and they come from all over.

I'm off 2 meter SSB right now, had to pull the antennas off the roof to redo the roof, but they will be back up when this white stuff goes away for good.

From: Bill
Topic: 3853 Message: 3853

All:

This weekend our Muskegon area radio club is inviting you to their annual Leadership Development Workshop. This event will train you in how our successful club operates. We will give you key leadership tips. We will brain storm on the subject of making our club even better. We will generate the year's calendar. We will also discuss the financial operation of our club. This meeting is open to you and you are extended a special invitation.

We will meet at 9 o'clock at the EOC on Oak Street in Muskegon. Use the '94 repeater as a "talk in." We will be there until the early afternoon hours. Lunch will be a version of stone soup. Please bring along a can of your favorite soup. Other fare will also be provided.

This important occasion sets the tone for the coming club year. Won't you come down and help make a difference? There are so many ways we can direct the resources in our club.

Bill, AB8SC
MAARC guy

3854. ARRL VHF Sweepstakes, Saturday/Sunday, 1/19-1/20

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-01-15 15:23:08 UTC
From: Mark Thompson
Topic: 3854 Message: 3854

2008 ARRL January VHF Sweepstakes
General Rules
Object: To work as many amateur stations in as many different 2 degrees x 1 degree grid squares as possible using authorized frequencies above 50 MHz. Foreign stations work W/VE amateurs only.
Date and Contest Period: The date will be announced annually by the ARRL but will generally be the third or fourth weekend in January. Begins 1900 UTC Saturday, ends 0400 UTC Monday (January 19-21, 2008).
Entry Categories:
3.1. Single Operator.
3.1.1. Low Power
3.1.2. High Power
3.2. Single Operator Portable
3.3. Rover.
3.3.1. Rover
3.3.2. Limited Rover
3.3.3. Unlimited Rover
3.4. Multioperator.
3.5. Limited Multioperator.
Exchange: Grid-square locator (see April 1994 QST, p 86).
4.1. Exchange of signal report is optional.
Scoring:
5.1. QSO points:
5.1.1. Count one point for each complete 50- or 144-MHz QSO.
5.1.2. Count two points for each 222- or 432-MHz QSO.
5.1.3. Count four points for each 902- or 1296-MHz QSO.
5.1.4. Count eight points for each 2.3 GHz (or higher) QSO.
5.2. Multiplier: The total number of different grid squares worked per band. Each 2 degrees x 1 degree grid square counts as one multiplier on each band it is worked.
5.3. Final score: Multiply the total number of QSO points from all bands operated by the total number of multipliers for final score.
5.4. Rovers only: The final score consists of the total number of QSO points from all bands times the sum of unique multipliers (grid squares) worked per band (regardless of which grid square they were made in) plus one additional multiplier for every grid square from which they successfully completed a contact.
5.4.1. Rovers are listed in the contest score listings under the Division from which the most QSOs were made.
Reporting:
6.1. Electronic submissions may be emailed to JanuaryVHF@... and hand-written paper logs or diskettes mailed to January VHF, ARRL, 225 Main St, Newington, CT 06111.
6.2. Entries that have been electronically generated must submit their log file in the Cabrillo file format. Paper printouts of electronic files are not acceptable substitutes.
6.3. Entries must be emailed or postmarked no later than February 20, 2008.
6.4. Entries may be submitted using the web applet at www.b4h.net/cabforms
6.5. Rovers who submit scores for the club competition must submit a second summary sheet

indicating QSOs and score if they make any contacts from outside of the club territory. Indicate clearly on the summary sheet and in log if the log is the total entry or that portion to be counted for the club score.
Miscellaneous:
7.1. Stations may be worked for credit only once per band from any given grid square, regardless of mode. This does not prohibit working a station from more than one grid square with the same call sign (such as a Rover).
7.2. Only one signal per band (6, 2, 11/4, etc) at any given time is permitted, regardless of mode.
7.3. Multi-operator stations may not include QSOs with their own operators except on frequencies higher than 2.3 GHz. Even then, a complete, different station (transmitter, receiver and antenna) must exist for each QSO made under these conditions.
Awards: Certificates will be awarded in the following categories:
8.1. Single operator.
8.1.1. Top single operator in each ARRL/RAC Section for high and low power.
8.1.2. Top single operator on each band (50, 144, 222, 432, 902, 1296 and 2304-and-up categories) in each ARRL/RAC Section where significant effort or competition is evident. (Note: Since the highest score per band will be the award winner for that band, an entrant may win a certificate with additional single-band endorsements.) For example, if KA1RWY has the highest single-operator all-band score in the CT Section and her 50- and 222-MHz scores are higher than any other CT single operator’s, she will earn a certificate for being the single-operator Section leader and endorsements for 50 and 222 MHz.
8.2. Top single-operator portable in each ARRL/RAC Section where significant effort or competition is evident. (Single operator portable entries are not eligible for single-band awards.)
8.3. Top rover in each ARRL Division and Canada where significant effort or competition is evident. (Rover entries are not eligible for single-band awards.)
8.4. Top multi-operator score in each ARRL/RAC Section where significant effort or competition is evident. (Multioperator entries are not eligible for single-band awards.)
8.5. Top limited multioperator in each ARRL/RAC Section where significant effort or competition is evident. (Limited multioperator entries are not eligible for single-band awards.)
8.6. Top DX stations where significant effort or competition is evident.
Other:
9.1. See “General Rules for All ARRL Contests” and “General Rules for ARRL Contests on bands above 50 MHz (VHF)” in November 2001 QST or on the ARRL Web at www.arrl.org/contests
9.2. For more information contact contests@... or (860) 594-0232.

3855. Spaghetti Dinner at the MAAR Club House

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-01-15 16:00:20 UTC
From: w8amz
Topic: 3855 Message: 3855

Spaghetti Dinner at the MAARC Club House

Saturday January 26, 2008 @ 5:00 PM

$5.00 a person

If you are concerned about transportation due to weather then contact
Bill Fries AB8SC or Tom Nickisch W8AMZ and we will arrange
transportation.

Don't forget Sat. the 26th is also Winter Field Day from 12:00 Noon ☐
12:00 Noon Sun. So come on out and help operate

3856. Annual Kent County Severe Weather Spotter Training for the 2008

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-01-16 01:06:25 UTC
From: Hank Greeb
Topic: 3856 Message: 3856

Date: February 21st, 2008

Time: 7:00 PM - 9:00 PM

Location:

Grandville Middle School Auditorium,

3535 Wilson Avenue SW, Grandville, MI 49418

Cost: FREE!

Bring yourself and a friend.

RSVP required:

3857. Winter Field Day '08!

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-01-16 02:07:42 UTC
From: Bill
Topic: 3688 Message: 3857

All:

We will be enjoying the Winter Field Day event this year at the W8ZHO clubhouse. You are invited to attend, enjoy, and assist. We will need operators, stations, and loggers. Come by to enjoy an informal contest and operating session on the HF bands. Help us make this the best fun of the season!

The event starts at noon local time on January 26 and runs nonstop for the following twenty-four hours until noon on Sunday.

You can operate an hour or the entire time. There will be a special fund raising dinner Saturday evening at five o'clock. Cost is $5. Stop in early or late but don't miss the dinner.

Contest details? See:
http://www.spar-hams.org/contests/winterfd/index.php

We hope to see YOU there!

Bill, AB8SC
MAARC guy

3859. Chicago D-STAR Repeaters On-the-Air & Internet Gateway On-Line

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-01-16 04:17:02 UTC
From: Mark Thompson
Topic: 3859 Message: 3859
Attachments: 1 described; binary payloads are missing from this source WARC

The first D-STAR repeaters in the City of Chicago were installed last August by the NSRC (North Shore Radio Club).

The system's internet gateway came on-line on Friday, January 11th. You can access the repeaters at:

NSRC Digital Voice Repeaters
NS9RC B 442.09375 Mhz (+5)
NS9RC A 1292.2000 MHz (-20)

NSRC Digital Data Access Point
NS9RC 1242.200 MHz

The NSRC repeaters are located in the city of Chicago 6 miles north of downtown Chicago & 1/2 mile west of the Lake Michigan lakefront on a building 57 floors above ground level.

We are in the process of enhancing the D-STAR antenna system which should occur soon. The new antennas should result in D-STAR coverage similar to the existing NSRC FM repeater on 442.725 MHz at the same site providing excellent coverage to the city of Chicago and north, northwest, west & southwest suburbs, including coverage for boaters well into Lake Michigan.

The repeaters are open, but access to the gateway requires club membership or gateway authorization by another club or organization. More information about the North Shore Radio Club can be found at: http://www.ns9rc.org

The NSRC repeaters join the FRRL(Fox River Radio League) D-STAR repeaters which came on the air during the fall of 2006. They are:

FRRL Digital Voice Repeaters
W9CEQ B 442.10625 Mhz (+5)
W9CEQ C 145.2700 MHz (-600)

The FRRL repeaters are located in the far western suburb of Elburn, 45 miles west of downtown Chicago. They use high-gain antennas with a directional pattern towards the east on a 400 ft. tower and cover the west, northwest & southwest suburbs of the Chicago area. More information about the FRRL is at: www.frrl.org

We look forward to hearing you on the air whether you're in the Chicago area or using the D-STAR network.

73, Mark, WB9QZB
Chicago, IL

More Information about D-STAR and All Other Digital Modes Can be Found at:

3861. ARLX002 Lunar Echo Experiment looking for Amateur Radio Participants

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-01-17 20:17:00 UTC
From: Mark Thompson
Topic: 3861 Message: 3861

SB SPCL @ ARL $ARLX002
ARLX002 Lunar Echo Experiment looking for Amateur Radio Participants

ZCZC AX02
QST de W1AW
Special Bulletin 2 ARLX002
From ARRL Headquarters
Newington CT January 17, 2008
To all radio amateurs

SB SPCL ARL ARLX002
ARLX002 Lunar Echo Experiment looking for Amateur Radio Participants

The HF Active Auroral Research Program (HAARP) in Alaska and the Long Wavelength Array (LWA) in New Mexico are planning an additional lunar echo experiment for January 18-19.

Interested radio amateurs are invited to participate in this experiment by listening for the lunar echoes and submitting reports.

On January 19, listen on 6.7925 MHz from 0500-0600z, and on 7.4075 MHz from 0600-0700z. On January 20, listen on 6.7925 MHz from 0630-0730z and on 7.4075 MHz from 0730-0830z (depending on frequency occupancy at the time of operation, it may be necessary to adjust the frequency slightly).

Based on previous experiments, investigators believe it should be possible to hear the lunar echoes with a standard communications receiver and a simple 40 meter dipole antenna. The format for the transmissions will follow a five second cycle beginning on the hour and repeating continuously.

The HAARP transmitter will transmit for the first two seconds. The next three seconds will be quiet to listen for the lunar echo. Then HAARP will transmit again for two seconds, repeating the cycle for one hour. In the second hour, this five second repetitive cycle will be repeated at a different frequency. All transmissions from HAARP will be CW (no modulation).

Depending on ionospheric conditions, it may or may not be possible to hear the HAARP transmission directly via skywave propagation. Since HAARP will not be using any modulation, set your receiver on to CW mode to hear HAARP and the lunar echo. Investigators are interested in receiving signal reports from radio amateurs who may be able to detect -- or not detect-- the lunar echo or the transmitted skywave pulse from HAARP.

Submit reports via e-mail to mbreport@... and list your
call sign and the type and location of your receiving equipment and
antennas.

From: Joe Veldhuis
Topic: 3862 Message: 3863

Could be that because your average power is so much lower when running SSB, the SWR meter isn't seeing as much reflected power as it does when you're running FM, where the power is continuously at its maximum level.

This Saturday January 19 is the Winter FREE inside Swap and Shop.
Bring your items to sell or trade and a table from 9AM-12PM See bottom of e mail for location to Store.

New items this week
None

We have Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other NEW items in Stock

14 Amp Jetstream Power Supply $55
28Amp Power Supply $90 With Meters $110
45Amp Power Supply $170
Lighting Arresters $21.50 ea
HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $20 each
New SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
RG-58 Cable .25 per foot
RG-8 .$1.00 per Foot
RG-8X Coax Cable .45 per Foot
75 ohm Cable 9040 International Wire and Cable .35per foot
PL-259 Connectors $3.25 ea adadapters for RG-58 or RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $8
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's

We are the only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.

Technician Class $18.95
General Class $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Ramsey Kits for Kids (or Adults)

300 in 1 Electronic Lab $70
Bell Action Kit $9

Motor Action Kit $8
LED Binky Kit $8
Police Siren Kit $8
Electronic Dripping Faucet $10
LED Strobe Light with Case $45
AM Broadcast Transmitter Kit with Case $35
Tri-Field Meter $64

Other Used Equipment on Consignment Call and make a offer

1 KVM Switch for switching Keyboard, video, mouse on computer $10
1 Box of Large Compactors 10-12 pc total $5
2 boxes of New CR-RW Pocket CD's by Memorex $3
1 W- 4 Drake Wattmeter $20
HP PDA Pocket PC Model Jornada 545 16MB Ram Color PDA $100
Paum Zire Black & White PDA $30
Radio Shack PRO-94 1000 Channel Handheld Trunking Scanner $75
Arrow 222 5 Element 220mhz Beam $25
Yaesu FBA-8 Battery Pack for above Radios $25
3 Standard HX 320 Business Band Radio $10 ea.
1 Regency H600B UHF Mobile Business Band Radio $25
1 APC Interruptible back up supply $35
1 Ampprobe Clamp-Pn Meter $15
1 Sencore SG-165 AM-FM Stereo Analyzer $30
1 GW GDM 8135 Digital Multimeter $30
MFJ-202B Noise Bridge $40
PC-1A Kenwood Phone Patch $40
#425 B+W Low Pass Filter $15
MFJ-704 Low Pass Filter $20
Ringo Ranger 2 meter antenna $35
11 Element 2 meter Beam $45
High Gain DB-1015 3 Element HF beam for 10/15 meters $25
Channel Master light duty Rotor with control box and cable $20
Mixed box of short length coax cable with PL-259 Connectors on end $1 each
JT776SMA HT Antenna $19
Headphone/Mike Ear Headset $5
Radio Shack Woodgrain Speaker $5
IC-255A 2 meter Radio with no tone board Like New from 1982 Good Packet Radio $45
Tubes A great Assortment of tested used Tubes $1-$4 each
B&K Model 4011 Precision function Generator $60
B & W Antenna Tuner VS-300A $40
RCA Volt Ohm Meter $25
Barket & Williamson Low Pass Filter $5
Speakers $2 - $10
Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
Center Insulator for HF antenna $5
LED Emergency Light $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50
MFJ-722 Notch Filter $30.00
B&W 550A 5 Coax switch unit $10

M1000 Regency 10 Ch Scanner Works great $25
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40
6-9 inch clamps to mount antenna on large poles or vent pipes $5.56 each

Heathkit items in stock

Heathkit SA-2040 1KW Tuner $125 New lower price
Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40
Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Tool Max Industrial Supply is the Tool and Ham Radio retail store on Schamber Dr just off Pontaluna Rd and US-31 just north of the old Hob Knob or Michael's Restaurant (Now tore down) in Muskegon . We have tools, industrial suppliers and Ham radios parts for sale. For more information call or e mail Tom KB8VEE at 231 798-7898 I am in the Store from 8:30AM-4:30PM Monday-Friday. Stop by and see me for all your Ham needs.

Hello Gentlemen, I hope you won't mind this post. It's for a good cause. Hopefully a new HF rig for myself. :-) I have appx. $700.00 worth of mobile audio equipment for sale. I had no luck on Ebay and was hoping that somebody may know a person in need.

800 watt audiobahn bridgeable amp.
640 watt kenwood 4 channel amp.
Poineer supertuner III.
2 kenwood 6x9 speakers
1 MTX 800 watt sub woofer
2 infinity 5 1/4 in front speakers.

Again thanks in advance for the post. and please keep all the great information coming, I've learned so much from the wealth of knowledge that is shared on the group.

P.S. I'm looking for a speaker mic. the will fit my ft-60r. If anybody has one for sale.

Last night my Wife and I were sitting in the den and I said to her,

"I never want to live in a vegetative state, dependent on some machine and fluids from a bottle to keep me alive. That would be no quality of life at all, If that ever happens, just pull the plug."

So she got up, closed DXLabs, unplugged the computer & radio, and threw out my beer.

All:

It's coming! The Winter Field Day event. A combination of a group gathering, contest, party, dinner, fun, and a just plain fun operating event. Winter Field Day!

We'll be playing radio at the W8ZHO clubhouse, 2888 Scenic Drive, Muskegon, between Muskegon and White Lakes. Saturday, noon until Sunday morning.

Spaghetti Dinner at five o'clock on Saturday. The cost is a minuscule five bucks.

Will we see you there? Or will you give us a contact and a point? We need help! Please?

Subject: [MIDSTAR] NMARES D-Star Poject Update from Jim - KC8NTE

Last Friday stake holders in Northern Michigan met at the University Center in Gaylord to consider Amateur Radio Equipment options for the new Otsego County Emergency Operations Center. (to be located at the University Center in Gaylord)

Several proposals and options were reviewed and considered by the group. After discussion amongst those present it was decided to include I-Com D-Star equipment in the new EOC facility in Otsego Co.

The University Center in Gaylord is funding the entire purchase of new D-Star Equipment for the EOC.

They are purchasing the following D-Star Equipment that will be installed in the new EOC, at the University Center in Gaylord.

1 ICOM IC-2820H 2M/440 50W DIG COMPATIBLE RADIO $649.95
1 ICOM IC-UT123 DIGITAL VOICE BOARD FOR IC-2820H $269.95
1 ICOM OPC-1529R RS-232 type PC/GPS Cable $19.95
1 ICOM SP-10 EXTERNAL SPEAKER $49.95
1 DIAMOND X50NA 2M/70CM ANTENNA $94.95
1 ICOM CS-2820 Programing Software $27.95

Vendor: $1,112.70

R&L Electronics
1315 Maple Ave
Hamilton, Ohio 45011
800-221-7735
513-868-6399
513-868-6574 Fax
sales@randl. com

During this meeting Lt. Hosh advised that the nine counties, making up Michigan's first district have received grants to purchase D-Star Repeater Systems, for installation in each County Emergency Operations Center.

There was additional discussion about development of a D-Star repeater network for Northern Michigan and the 7th District. The concept was embraced by those present, and there may be DHS funds to

develop the concept.

Existing Otsego County owned Amateur VHF and HF analog equipment and antennas with be moved to the new EOC location when it is completed.

In the interim the existing VHF and HF equipment will be set up in the EM office at the Otsego County Building in Gaylord.

Present at this meeting were:
Otsego County Emergency Manager and 911 Director - Mr. Mike Thompson

University Center of Gaylord - Executive Director - Mr. Jack Thompson

Charlevoix Cheboygan and Emmet County Emergency Manager - Ms. Cheryl Beyer

Michigan State Police - 7th District Emergency Emergency Coordinator - Lt. Mike Hosh

Charlevoix, Cheboygan and Emmet Counties Public Services Communication' s Organization President Mr. Chuck Scott -N8DNX

Otsego County Emergency Coordinator - Mr. Dick Nelson

ARRL Technical Specialist, Assistant Emergency Coordinator for Otsego, Emmet and Cheboygan Counties - Mr. Jim Davis - KC8NTE

3877. 7 MHz Moonbounce Videos

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-01-22 17:19:16 UTC
From: Mark Thompson
Topic: 3877 Message: 3877

7 MHz Moonbounce Videos

Last weekend Moonbounce tests on 7 MHz were conducted from Alaska. Both K7AGE and EB7FLW have posted videos on YouTube showing reception of the signals.
On the 19/20th January Amateur Radio operators from around the world listened in to the HF transmissions from the High Frequency Active Auroral Research Program (HAARP) in Gakona, Alaska.

Several UK Radio Amateurs received the moonbounce signals during the early Sunday morning transmissions.

The video by Randy K7AGE is at
http://www.youtube.com/watch?v=L5E2ntIxAsc

The video by EB7FLW is at
http://www.youtube.com/watch?v=RKUTwfx0_mY

3878. Alinco DR-110T Service Manual/Schematics??

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-01-23 16:16:00 UTC
From: Jason B
Topic: 3878 Message: 3878

Hello All,

I'm not usually one to whine publicly, and I hope this doesn't sound as if I am...With that said, I wonder if anyone out there can offer any help.

I am a fairly new ham. Recent financial issues have prevented me from jumping headfirst into the hobby so my start was pretty slow. I picked up an older Alinco radio (DR-110T) ...My first rig. I was in hog heaven, then it quit. :-(

Alinco's website has a decent collection of info on their older radios, including some stuff on this one like the owners manual, etc. however they don't have any service info or schematics.

This is my only radio and I won't be able to afford to run out and buy another one for quite a while. I have also been told that it would probably cost way more than the rig is worth to have someone repair it. I would like to attempt to fix this rig myself, however I'm running blind. The issue shouldn't be a very major problem. It was installed in my car and I was listening in one day at lunch. I turned the radio off, went into BK for a burger, and when I came out it wouldn't power up again. I checked everything when I got home and still had power all the way to the back of the radio and the fuses were intact. It took it inside and cracked the case. Hooked it up to my power supply and I have voltage on the sub-board where the wires come in, but I don't see anything I'd recognize as a reverse polarity diode or Schottky diode anywhere near the power input. I know the radio didn't get reversed, it worked for a month. I also don't think it got overloaded or anything because the fuses were intact. That's where the troubleshooting ends...

It's been years since I went to school for electronics and I don't have any test equipment more than the basics, a DMM and Soldering Iron. I haven't worked on any electronics more complex than RC cars for several years, but if I had the info I may at least have a chance to fix it. Do any of you folks out there happen to have any info on that radio, or know someone who might? I would really like to get back on the air and any help you could offer would be greatly appreciated.

Thanx for listening,

73

Date: 2008-01-24 19:40:19 UTC
From: Joe Veldhuis
Topic: 3881 Message: 3882

I can't say I've had any experience with them.

With apologies in advance for the blatant threadjack, I would strongly suggest you build your own interface. It'll save you a lot of money and you'll gain valuable insight as to how exactly it works.

For the RX audio, just run a standard 1/8" audio cable from the speaker jack of the rig to the line-in jack of your soundcard. For TX audio, run a cable from your soundcard speaker/headphone jack through an audio transformer to your rig's mic jack.

For PTT, take an optocoupler, connect the anode of the LED side to pin 7 of your computer's serial port, and the cathode to pin 5. On the transistor side, connect the collector to your rig's PTT pin, and the emitter to the ground pin.

About $10 from Mouser (part# 42TL001-RC for the transformer, 551-PS2501A-1-A for the optocoupler), or free if you do a little scrounging.

If you need any help with it, send me an e-mail. I've built dozens of these things, and most of them still work!

From: Hank Greeb
Topic: 3881 Message: 3883

I built my own interface, but the MFJ should work fine. Another one is the rigblaster.

Essentially all of them have connections from the computer sound card output through an antennuator to the input of the audio section of the transmitter, and from the output of the receiver to the input of the sound card, usually through a level control. And, typically there's a switch, sometime automatic, to go from microphone input and speaker output to the computer control of the rig.

I've operated PSK-31, FeldHell (Hellschriber), and RTTY with my setup - they all seem to be "plug and play" with proper (usually free) software.

Date: 2008-01-25 16:34:43 UTC
From: Tool Max Ind. Supply
Topic: 3885 Message: 3885

We will not be in this Saturday so stop during the week.

New items this week

1 Set Husler HF Antennas 80m/40m/15m $30
1 RC 432 long wire antenna on a spool $15
1 MK-1 Autek Research Memory Keyer $25
1 Home brew 2 m/440 pipe antenna $15
1 NC 60B Yaesu 15 volt Nica Battery Charger $5
4 Dynamo crank LED Flashlight $8
1 GR-213 Holux GPS Receiver for USB port $40

We have Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other NEW items in Stock

14 Amp Jetstream Power Supply $55
28Amp Power Supply $90 With Meters $110
45Amp Power Supply $170
Lighting Arresters $21.50 ea
HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $20 each
New SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
RG-58 Cable .25 per foot
RG-8 .$1.00 per Foot
RG-8X Coax Cable .45 per Foot
75 ohm Cable 9040 International Wire and Cable .35per foot
PL-259 Connectors $3.25 ea adadapters for RG-58 or RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $8
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's

We are the only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.

Technician Class $18.95
General Class $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Ramsey Kits for Kids (or Adults)

300 in 1 Electronic Lab $70
Bell Action Kit $9
Motor Action Kit $8
LED Binky Kit $8
Police Siren Kit $8
Electronic Dripping Faucet $10
LED Strobe Light with Case $45
AM Broadcast Transmitter Kit with Case $35
Tri-Field Meter $64

Other Used Equipment on Consignment Call and make a offer

1 KVM Switch for switching Keyboard, video, mouse on computer $10
1 Box of Large Compactors 10-12 pc total $5
HP PDA Pocket PC Model Jornada 545 16MB Ram Color PDA $100
Paum Zire Black & White PDA $30
Radio Shack PRO-94 1000 Channel Handheld Trunking Scanner $75
Arrow 222 5 Element 220mhz Beam $25
3 Standard HX 320 Business Band Radio $10 ea.
1 Regency H600B UHF Mobile Business Band Radio $25
1 APC Interruptible back up supply $35
1 Ampprobe Clamp-Pn Meter $15
1 Sencore SG-165 AM-FM Stereo Analyzer $30
1 GW GDM 8135 Digital Multimeter $30
MFJ-202B Noise Bridge $40
PC-1A Kenwood Phone Patch $40
#425 B+W Low Pass Filter $15
MFJ-704 Low Pass Filter $20
Ringo Ranger 2 meter antenna $35
11 Element 2 meter Beam $45
Mixed box of short length coax cable with PL-259 Connectors on end $1 each
JT776SMA HT Antenna $19
Headphone/Mike Ear Headset $5
Radio Shack Woodgrain Speaker $5
IC-255A 2 meter Radio with no tone board Like New from 1982 Good Packet Radio $45
Tubes A great Assortment of tested used Tubes $1-$4 each
B&K Model 4011 Precision function Generator $60
B & W Antenna Tuner VS-300A $40
RCA Volt Ohm Meter $25
Barket & Williamson Low Pass Filter $5
Speakers $2 - $10
Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
Center Insulator for HF antenna $5
LED Emergency Light $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50
MFJ-722 Notch Filter $30.00
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
Low Pass filter $5

EICO Solid State FET/TVM Model 240 VOM in good condition $40
6-9 inch clamps to mount antenna on large poles or vent pipes $5.56 each

Heathkit items in stock

Heathkit SA-2040 1KW Tuner $125 New lower price
Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40
Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Tool Max Industrial Supply is the Tool and Ham Radio retail store on Schamber Dr just off Pontaluna Rd and US-31 just north of the old Hob Knob or Michael's Restaurant (Now tore down) in Muskegon . We have tools, industrial suppliers and Ham radios parts for sale. For more information call or e mail Tom KB8VEE at 231 798-7898 I am in the Store from 8:30AM-4:30PM Monday-Friday. 3886. Radio Spectrum

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-01-25 21:41:06 UTC
From: Ross
Topic: 3886 Message: 3886

Today is the day the FCC opens up the bidding for an amount of spectrum
space that is coming available. This may be the last chance to get spectrum space in a long time. The frequencies up for auction are 6 Mhz, 12 Mhz, 22 Mhz and the coveted 700 Mhz. I read where Google is interested in the 700 Mhz space for future cell phone applications. These guys have a lot of cash in their back pocket and it will be interesting to see if they can outlast Verizon, who also wants it very
bad.

There is one block of spectrum that the FCC has designated as open, where anyone can access the network.

The government expects about $15 Billion dollars in revenue from this two week auction.

Now, I did a little math. I believe there are about 425,000 Hams in the
US. If we where to auction off a hunk of our space, each one of us would get about $35,000. I know it is impossible since we don't own any
frequency, but it is fun to speculate. More fun on speculation is what
equipment that money would go for. Hmmm, let's see, Icom 7600, a 200 foot crank-up tower, and hundreds of pounds of radiating elements?

It will be interesting to see what technologies will come about from this.

Tom:

I'm not the one who will actually be teaching the ham-in-a-day class, but I think the plan is to use the materials from www.ham-in-a-day.com for the one-day session.

However, I'll forward your info onto my local area hams list, which contains the folks in our local area who we sent the class flier to.

Hopefully, some of those folks will want the actual W5YI book as an additional reference source in advance, if nothing else.

3891. ARRL's Amateur Radio Emergency Communications Course Level 1

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-01-27 18:56:06 UTC
From: ravennaelectronics
Topic: 3891 Message: 3891

There has been some discussion about conducting another ARECC Level 1 course. If there is enough interest in the West Michigan area, then I will go ahead and conduct another ARECC Level 1 course. This will be in the Hybrid format though.

What is the hybrid format you ask?
The Hybrid format is the recommended method for students with limited computer or Internet access. With this method the student takes the Final Assessment online. The course will be accomplished by using a combination of classroom, on the air, and online techniques. In other words, you will not have to drive to the EOC or other meeting place every week for five weeks.

Cost of the course is the same as it is online: ARRL members $45.00 and non-members $75.00. Course would most likely start in March and go for five weeks.

If you are interested please reply to this message or send me an email to kd8bgq at arrl.net

Best Regards,
Doc, KD8BGQ

3892. Kent County ARES program - Pass on to ALL hams living in Kent County

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-01-28 22:08:18 UTC
From: Jeff's Lists
Topic: 3892 Message: 3892

Hi All:

We have a new electronic registration process for people interested in being part of the ARES group in Kent County.

A few notes about the ARES program:

- We do not require a criminal history check of members as of November 2007
- The only requirement is a will to serve and an amateur radio license
- All HAMs are invited to the program living with Kent County
- ARES members are used for public service events, "non-secure" locations, severe weather spotting, CERT communications support and Disaster related activities.
- ARES members are encouraged to take independent study trainings provided free of charge from FEMA
- The ARES program uses amateur radio operators from around the community.

- This program is for radio operators NOT already involved with ARES / RACES / CERT.

Signup Link: http://www.kcvrm.net/resourcesignup.php

And use the following information:

Resource Code: ARES - This is Case sensitive
Password: HamRadio - This is case sensitive

This program is open to ANY amateur radio operator living or working in Kent County.

If you run into any issues while signing up please email aschultz@...

Thank You

Jeff Nawrot
Kent County ARRL ARES Emergency Coordinator

3893. Test Session, Saturday Morning

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-01-29 15:49:43 UTC
From: Bill
Topic: 3893 Message: 3893

All:

There will be testing this Saturday in Muskegon at the Red Cross Building. You can test for your license and test for your upgrade license. The session starts at nine o'clock and will run until you run through all the tests you can. Use the back door to the building.

Bring along identification, your current license and a copy of your current license (if you currently have a call sign) or the CSCE (if you just passed an element), fourteen dollars in cash, and your lucky pencil. Also you might want a calculator. The test proctors will provide paper.

You will be able to take each of the tests, in succession, until you hit the wall. For example, if you pass the Technician test you can earn a General and then Amateur Extra license all in one looonnng session.

Welcome and we look forward to helping you earn extra privileges to better enjoy this wonderful hobby.

Bill, AB8SC
MAARC guy

" . . copy of your current license (if you currently have a call sign) or the CSCE (if you just passed an element), fourteen dollars. . . lucky pencil."

There has been some question regarding the CSCE and its use in the licensing process. There are very few instances where a CSCE is helpful. Particularly in this day when the code has gone by the wayside.

Keep your CSCE in your file. At the next test session it is only helpful if that last test session was between when you tested and earned the CSCE and when the FCC acknowledges your achievement on-line. I'll admit that is a very narrow window.

Bottom line? Don't expect a CSCE to be too useful. The VE folks are reliable, quick, and efficient. In retrospect maybe I should not have mentioned the CSCE.

Bill, AB8SC

Howdy Bill.
I hope the scouts and you are having a great weekend. I heard that is why you were not at the VE session this morning. I showed and tested for Amateur Extra just as I said I would. The rest of the crew did not. Karen and three others all have colds/flu. Two others said they wanted to test yet their practice test scores were not consistent and I fear that would have failed. That failure could cause them to stumble so after some discussion, they decided to continue with the studying and practice tests. They want to come in and know they will pass.

Have a great weekend!
Doc, KD8BGQ/AE

Doc:

Congratulations!!! GREAT! We're proud of your achievement. "Doc, KD8BGQ/AE" Are you getting a new "AC8??" call sign?

Excellent news.

Yes, the Scouts were doing their yearly Klondike Derby. It was great fun. And, yes, they will be doing the Merit Badge Saturday gig on March 1. More on that later.

Good on ya!

3900. Logikey For Sale

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-02-03 22:44:34 UTC
From: Bill
Topic: 3900 Message: 3900

Hi, All:

I've got a Logikey Keyer from Idiom Press for sale. It's the K-3 model. While not the current version (K-5) this keyer is magnificent. It is smooth as silk with six memories attached to push buttons. There are an amazing number of features like contest serial numbers, weight, side tone, speed via a pot, and this thing is really smooth. You use the keyer between your paddles and your rig. Did I mention that this thing is really smooth?

From the manufacturer's web site (www.idiompress.com) this K-3 is very similar to the new K-5 model. The K-3 needs power (I think from nine to twelve volts, as I've run it from a nine volt battery and now run it from a twelve volt power supply in my shack) and is a different shape from their newer model. This keyer is really smooth.

You tell the keyer to perform functions by sending it code. It talks back to you in code, as well. There is a great tutorial and a thorough manual. It really is simplicity to use. You won't need another keyer and you'll hate that junk keyer inside your rig. This keyer is so smooth it makes your cw marvelous. And I've got the QSLs to prove it.

Six memories can be programmed to run at a push of the button. I've got my call sign on one button, the exchange on another, Linda's call sign on another, and some misc. stuff on the fourth. You can load in CQ and call with a push of another button. I load a message at my slow ten wpm and then crank the speed knob to send like a pro. I'd bet you never fill the memory. And those memories stay inside. This keyer is so smooth.

I'm moving to another keyer and this one is available. If it does not sell to you I'll list it on eBay. You can save shipping (and I won't tell the governor you didn't pay sales tax). I'll sell you the keyer, the cord between keyer and rig, and a power pigtail. I think I've got a hard copy of the manual together with .pdf versions of the manual and tutorial. I'm not a smoker. I'm certain it was factory assembled. All you add is a set of paddles and you're smoothly sending code. You'll love this keyer! It's a deal to you for $60 firm.

Contact me off list before a week or two. If it's still here then I'll post a link on eBay and you can purchase it from there for a few more dollars. You will love this keyer. I guarantee it! You just cannot imagine how smooth this keyer feels.

3902. ARRL/TAPR Digital Communications Conference in Chicago Dates Announced

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-02-05 17:02:03 UTC
From: Mark Thompson
Topic: 3902 Message: 3902

Dates for ARRL/TAPR Digital Communications Conference in Chicago Announced (Feb 4, 2008) --

The Tucson Amateur Packet Radio Corporation (TAPR) has announced that the 2008 ARRL/TAPR Digital Communications Conference will take place September 26-28 at the Holiday Inn Hotel in Elk Grove Village, Illinois, a suburb of Chicago, near O'Hare airport.

The conference is an international forum for radio amateurs to meet, publish their work and present new ideas and techniques. Presenters and attendees will have the opportunity to exchange ideas and learn about recent hardware and software advances, theories, experimental results and practical applications. Forums will feature the latest developments in Amateur Radio digital communications, as well as demonstrations of emerging digital technology.

More information is available on the ARRL/TAPR DCC Web site, http://www.tapr.org/dcc.html

Curt,here are the symptoms--upon startup(power up)I get the 3 tone"greeting tone"upper left hand 1-H is displayed and BUSY on the bottom and the unit shuts off.
I try the Rest Procedure---holding [MHz(PRI)] while turning on.
I have tried F-1 through F-5.Each one after pressing and holding [BAND(SET)] the unit shuts down.
Is the a reset feature or something I am missing?Or is is it Yaesu repair shop bound?

You could try Matt Adrian at SAR Technical Services, with a Web page at
http://www.sarts1.com.

Although he is "accredited" for Icom service, I'm sure he works on other
makes as well. In fact, I'm sure that some of the Holland club members
have used him for Yaesu repairs.

I know that this message is nothing ham radio related but I am trying to get this message out to everyone possible--we are desperate. I am sorry if I have inconvienenced anyone.
I have been missing my 1 year old Pug puppy since December. If anyone has a clue where he might be, I would love any information you may have. He is a full male pug. He has been neutered--all black in color with only a small patch of white on his chest. When he ran off he had a black collar on but not his tags. My girls are missing him terribly and he needs medication. Please let me know if you have seen or heard of this dog. Thank you soooo much for any help you may have. Please contact via email.

I have been missing my 1 year old Pug puppy since December. If anyone has a clue where he might be, I would love any information you may have. He is a full male pug. He has been neutered--all black in color with only a small patch of white on his chest. When he ran off he had a black collar on but not his tags. My girls are missing him terribly and he needs medication. Please let me know if you have seen or heard of this dog. Thank you soooo much for any help you may have. Please contact via email.

His name is Poneyae but we called him "poopy" for short. He will come at either name. I last seen him before Christmas, he took off from my house which is located in Hart, across from Hart lake-by John Gurney Park. Thanks so much for all of your help. I have enclosed a picture, this is the only one I could find close up.

Marsha,

Can you give us some more info?

Where was the puppy last seen?

Can you tell us the approximate size and weight?

Do you have a picture to post?

If someone does see him, what does he answer to?

Granted, this isn't a true ham post but under the circumstances I don't see a problem with it.

I hope we can help.

3913. Tool Max this week

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-02-07 20:59:51 UTC
From: Tool Max Ind. Supply
Topic: 3847 Message: 3913

We will not be in this Saturday so stop during the week.

Check out our New Web sight at www.toolmaxonline.com Let me know what you think.

New items this week
None

We have Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other NEW items in Stock

14 Amp Jetstream Power Supply $55
28Amp Power Supply $90 With Meters $110
45Amp Power Supply $170
Lighting Arresters $21.50 ea
HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $20 each
New SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
RG-58 Cable .25 per foot
RG-8 .$1.00 per Foot
RG-8X Coax Cable .45 per Foot
75 ohm Cable 9040 International Wire and Cable .35per foot
PL-259 Connectors $3.25 ea adadapters for RG-58 or RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $8
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's

We are the only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.

Technician Class $18.95
General Class $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Ramsey Kits for Kids (or Adults)

300 in 1 Electronic Lab $70
Bell Action Kit $9

Motor Action Kit $8
LED Binky Kit $8
Police Siren Kit $8
Electronic Dripping Faucet $10
LED Strobe Light with Case $45
AM Broadcast Transmitter Kit with Case $35
Tri-Field Meter $64

Other Used Equipment on Consignment
1 Set Husler HF Antennas 80m/40m/15m $30
1 RC 432 long wire antenna on a spool $15
1 MK-1 Autek Research Memory Keyer $25
1 Home brew 2 m/440 pipe antenna $15
1 NC 60B Yaesu 15 volt Nica Battery Charger $5
4 Dynamo crank LED Flashlight $8
1 GR-213 Holux GPS Receiver for USB port $40
1 KVM Switch for switching Keyboard, video, mouse on computer $10
1 Box of Large Compactors 10-12 pc total $5
HP PDA Pocket PC Model Jornada 545 16MB Ram Color PDA $100
Paum Zire Black & White PDA $30
Radio Shack PRO-94 1000 Channel Handheld Trunking Scanner $75
Arrow 222 5 Element 220mhz Beam $25
3 Standard HX 320 Business Band Radio $10 ea.
1 Regency H600B UHF Mobile Business Band Radio $25
1 APC Interruptible back up supply $35
1 Ampprobe Clamp-Pn Meter $15
1 Sencore SG-165 AM-FM Stereo Analyzer $30
1 GW GDM 8135 Digital Multimeter $30
MFJ-202B Noise Bridge $40
PC-1A Kenwood Phone Patch $40
#425 B+W Low Pass Filter $15
MFJ-704 Low Pass Filter $20
Ringo Ranger 2 meter antenna $35
11 Element 2 meter Beam $45
Mixed box of short length coax cable with PL-259 Connectors on end $1 each
JT776SMA HT Antenna $19
Headphone/Mike Ear Headset $5
Radio Shack Woodgrain Speaker $5
IC-255A 2 meter Radio with no tone board Like New from 1982 Good Packet Radio $45
Tubes A great Assortment of tested used Tubes $1-$4 each
B&K Model 4011 Precision function Generator $60
B & W Antenna Tuner VS-300A $40
RCA Volt Ohm Meter $25
Barket & Williamson Low Pass Filter $5
Speakers $2 - $10
Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
Center Insulator for HF antenna $5
LED Emergency Light $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50

MFJ-722 Notch Filter $30.00
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40
6-9 inch clamps to mount antenna on large poles or vent pipes $5.56 each

Heathkit items in stock

Heathkit SA-2040 1KW Tuner $125
Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40
Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Tool Max Industrial Supply is the Tool and Ham Radio retail store on Schamber Dr just off Pontaluna Rd and US-31 just north of the old Hob Knob or Michael's Restaurant (Now tore down) in Muskegon . We have tools, industrial suppliers and Ham radios parts for sale. For more information call or e mail Tom KB8VEE at 231 798-7898 I am in the Store from 8:30AM-4:30PM Monday-Friday. Stop by and see me for all your Ham needs.

3914. A Repeater Story

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-02-08 15:06:29 UTC
From: Bill
Topic: 3914 Message: 3914

A Repeater Story

Many of you know that the Muskegon Area Amateur Radio Council has a two-meter repeater. The machine is on a tower near Giles and Russell Roads in what I would characterize as east North Muskegon. Comcast owns the tower and they have let us put our antenna at about 350 feet.

We have been experiencing problems with the repeater. Right now the repeater is running at reduced power because of issues we suspect are related to the antenna. Both antenna and feed line were installed new in 1978. It is not a real surprise that the repeater is not performing as well as it had in the recent past. This machine is easily reached by an HT from anywhere in Muskegon County and even from many points in adjoining counties. Well, easily reached when it is humming along at full power.

Comcast has an agreement with FedEx to host their 800 mHz antenna on the top of the Comcast tower. FedEx is retiring their service. FedEx needs to remove their antenna and feedline. There is another outfit that services Comcast towers. These other folks will climb the tower and they asked us if we needed anything while they are up at the top of the tower, some 400 feet. Well, you can imagine we jumped at the opportunity.

The subcontractors for Comcast I'll call Radio Towers, Inc. RT swept the FedEx hardline and antenna. They suspect that the problem they saw on the sweep is a direct result of the FedEx antenna's flopping in the breeze. They asked the MAARC if the club would like to put the 1 1/4" hard line to the FedEx antenna on the MAARC's antenna.

This opportunity got us thinking a little. Before RT offered we were trying hard to scrounge about $5000 for feedline, climb, antenna, and general grief. You can imagine that we jumped at the chance to save about $1500 in feedline cost with the RT/FedEx offer.

So, in the next few weeks or month the nice folks from RT will climb the tower. They will remove and lower the FedEx antenna. They will put a dummy load on the FedEx feedline. When they find the feedline in good shape they will put another connector on the feedline. Then they haul up a brand new commercial two-meter antenna and standoff. The new antenna will be a few feet higher than the old antenna and will be very near the top of the tower. Then they run the FedEx feedline into the MAARC antenna and we are in really great shape.

Also RT will remove the old MAARC antenna and aluminum feedline. We're anxious to see just what a thirty-year-old antenna looks like.

Now why would I share the above with you?

The cost of all this work is close to $2000. For example, the antenna and standoff set us back close to $600. In anyone's book that is a lot of money.

We are soliciting donations from the ham population to help the MAARC cover the expense of getting our two-meter repeater back on the air and running smoothly again.

You can see that if a couple of hundred hams donated just $10 we can cover this expense. Ten bucks is not a lot and many hands make short work of the task. Let's all dig in and see if we can find a way to help this machine. You will enjoy the results of the effort. Can you imagine that we will be set for the next score and ten years?

Please consider a donation in any denomination to the W8ZHO repeater fund. Dig out that envelope, put in the check, and mail them to:

W8ZHO
MUSKEGON AREA AMATEUR RADIO COUNCIL
PO BOX 691
MUSKEGON MI 49443

Donations are gratefully accepted. When this thing goes over Big we will put the additional money raised into the repeater fund. We would like to purchase a Digital Voice Recorder for announcements. Imagine, our '94 repeater can be back and running smoothly.

Thanks to all for considering this situation. We enjoy working with our ham community on these opportunities. We thank our repeater trustee, Al, KV8X and our repeater's chief troubleshooter, Jim, K8COP. They worked hard to put together this opportunity.

Bill, AB8SC
MAARC guy

3919. Field Day 2008 Rules and Forms Now Available

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-02-09 21:14:03 UTC
From: Mark Thompson
Topic: 3919 Message: 3919

Field Day 2008 Rules and Forms Now Available

It's that time of year again -- time to start gearing up for Field Day, ARRL's flagship operating event. Field Day, held the fourth full weekend in June, brings together new and experienced hams for 24 hours of operating fun. ARRL Field Day Manager Dan Henderson, N1ND, says there are several rules changes this year, mainly concerning "Get on the Air" (GOTA) stations and the elimination of the Demonstration Mode Bonus Category. The complete Field Day Packet can be downloaded, http://www.arrl.org/fieldday from the ARRL Web site. A full 2008 Field Day page on the ARRL Web site will be coming in the next few weeks.

2008 Rules Changes

GOTA (Get on the Air) stations are those stations set aside by Field Day teams designed to get non-hams or newly licensed hams on the air. Unlike in past years where GOTA stations were limited to only one band, the 2008 rules state that these stations may operate on any authorized HF or VHF Field Day band. Keep in mind that only one signal may be transmitted from the GOTA station at any time.

Henderson said the eligibility for operating the GOTA station has changed slightly: Anyone who has been licensed since Field Day 2007 is eligible to operate the GOTA station, regardless of license class.

For 2008, the Demonstration Mode Bonus category has been eliminated and replaced by an Educational Activity Bonus worth 100 points. "This bonus is intended to encourage clubs and groups to do some more formal educational activity during their Field Day operation," Henderson said. If you have any questions concerning what activities might be appropriate for this bonus, Henderson said you should submit them via e-mail, fdinfo@....

Be sure to read the Field Day rules and FAQs in the 2008 Field Day Packet for details of these changes. There are also numerous small changes in the FAQs and support materials in the packet that should help groups and individuals as they plan their Field Day activities, Henderson said.

Get the Word Out!

The 2008 Field Day Packet also includes an expanded Press Kit, thanks to the work of ARRL Media and Public Relations Manager Allen Pitts, W1AGP. Included in this expanded portion of the packet is a sample "Field Day Proclamation" for those groups who work with local city or town officials toward getting a Field Day Week declared in their location.
"We are excited that historic station K6KPH will once again participate transmitting the W1AW special Field Day Bulletin on the West Coast," Henderson said. More details are available in the Field Day Packet.

Information concerning the popular Field Day pins and T shirts will be announced in the next few weeks.

Henderson said that those wishing to obtain a complete Field Day Packet via US mail need to send a 9 x 12 inch self-addressed, stamped manila envelope with 5 units of postage to Field Day Packet Request, ARRL, 225 Main St, Newington, CT 06111. Please allow 2-3 weeks for delivery.

If people wish to order display kits for their tables at Field Day, please contact Debra Johnson, K1DMJ, ARRL Education Manager, 225 Main St, Newington, CT 06111, tel 860-594-0296. The cost for the display kit ranges from $8-$12 depending on shipping. To ensure having the kits in time for Field Day, you are encouraged to order them no later than June 13.

2008 Field Day Logo: Ride the Waves

ARRL member Mary Von Lintig, KV2M, suggested the slogan for Field Day 2008: "Ride the Waves." A member of the South Jersey Radio Association, Von Lintig, inspired by the 2007 Field Day "bug" in last year's logo, enjoys VHF contesting and ARRL Sweepstakes and recently joined the Frankford Radio Club. "And, I like ARRL Field Day of course," she says. "I usually operate 21 hours of the event!" An avid portable radio operator, she has even been on-the-air while operating her lawnmower. "They also call me the YL on rollerblades." Mary and her husband Richard Van Lintig, KV2R, live in Voorhees, New Jersey. This year's logo was designed by ARRL Graphic Arts Supervisor Sue Fagan, KB1OKW, and Senior Technical Illustrator David Pingree, N1NAS.

All:

I've learned that making a Pay Pal donation to our repeater fund is simplicity itself. Easy!

Should you wish to help the MAARC and their repeater fund using Pay Pal you visit their site (paypal.com) and in the upper left corner is the option to "Send Money" to an email address.

Enter my email address, "bill_fries@..." and you will be offered the opportunity to send me money using Pay Pal. I ask that you mention your name and call sign during the transaction. This way we can keep track of donors. I'll clear out the Pay Pal account periodically with a check to our Council's treasurer.

I hope you will find a way to donate to the repeater fund at the MAARC. Should Pay Pal be your preferred method we can now accommodate your wishes.

The MAARC thanks you for your consideration of this worthy fund raising cause. We are looking forward to having a wonderful repeater for use of our ham community. Even if you don't donate please monitor the machine and use the repeater lots and often.

Bill, AB8SC

From an earlier post, I quote, "A Repeater Story

Many of you know that the Muskegon Area Amateur Radio Council has a
two-meter repeater."

The MAARC is the Muskegon radio club. Our membership hails from
around Muskegon and into neighboring counties. I'm a member of the
board of directors. We have about a hundred members meeting monthly,
encouraging elmer opportunities, enjoying dinners together, and having
the occasional contest and DX opportunities. Our clubhouse is located
between Muskegon and White Lakes and is close enough to Lake Michigan
to hear the roar from a gale in November. Our members enjoy HF and
two meter nets. We sponsor a Boy Scout unit in their Venture program
helping young men and women. We have a marvelous radio shack. We
also put together a really great Field Day event with about seven
shacks (and GOTA) and a wonderful potluck dinner. You are encouraged
to participate.

Thanks for asking!

Bill, AB8SC
MAARC guy

Let me also say Charley, that there is no such thing as a stupid question, there may be obvious ones, but there is never a stupid one, except of course, the one that is never asked. That's about the stupidist question that someone could ask is not to ask one in the first place.

The MAARC is the Muskegon radio club. Our membership hails from around Muskegon and into neighboring counties. I'm a member of the board of directors. We have about a hundred members meeting monthly, encouraging elmer opportunities, enjoying dinners together, and having the occasional contest and DX opportunities. Our clubhouse is located between Muskegon and White Lakes and is close enough to Lake Michigan to hear the roar from a gale in November. Our members enjoy HF and two meter nets. We sponsor a Boy Scout unit in their Venture program helping young men and women. We have a marvelous radio shack. We also put together a really great Field Day event with about seven shacks (and GOTA) and a wonderful potluck dinner. You are encouraged to participate.

Thanks for asking!

3931. The Bank Job movie and Amateur Radio

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-02-15 18:13:42 UTC
From: Mark Thompson
Topic: 3931 Message: 3931

The Bank Job movie and Amateur Radio

A new British movie The Bank Job features Amateur Radio.

Due for release at the end of February The Bank Job is inspired by an extraordinary true event, a daring, unsolved robbery, which took place more than 35 years ago in London.

The robbery made headlines for a few days and then disappeared - the result of a UK Government ‘D’ Notice, gagging the press.

Pye handhelds are used by the criminals in the movie and they are intercepted by a Radio Amateur who becomes involved in the attempt to catch them.

On the official website at http://www.bankjobmovie.co.uk/ the "Trailer" option gives you 5 movie clips to view.

The Pye handhelds can be seen in movie clip 2 titled "No Names Eddie" and halfway through clip 5 "Tightening The Net" there is what looks like an Amateur Radio HF rig from the 60's or 70's (possibly Yaesu ?).

UK film censor rating: 15

USA MPAA Rating: R for sexual content, nudity, violence and language.

From: Joe Veldhuis
Topic: 3932 Message: 3935

When one or more parties of a given VoIP contact are making use of a ham radio, then there isn't much to discuss: it's definitely a radio application. This isn't neccessarily limited to EchoLink, IRLP and D-Star: with a VOX circuit, it's trivial to interface something like Skype to RF. Of course, you wouldn't want to leave such a link running unattended for any length of time, since such systems offer no protection against unlicensed folks taking control of the station.

Strictly computer-to-computer contacts, in my opinion, do NOT count as radio. However, if you're on a conference server and an RF node connects, then it IS radio. Since you might not always know for sure if an RF node is connected, and the system is explicitly designed to enable RF links, it's good to assume that you ARE going out over the airwaves, and operate accordingly.

Of course, there's the other end of the spectrum. I am particularly annoyed with the way QsoNet is advertised as a "virtual ionosphere for amateur radio", while loudly promoting the fact that it has absolutely nothing to do with radio whatsoever. It's Skype with callsigns, nothing more.

From: Mark Thompson
Topic: 3941 Message: 3941

The Dayton Hamvention is only 3 months away.

As in past years I have reserved a block of 10 double rooms at a suite-type hotel in Dayton. I get these rooms for friends & acquaintances. Since I usually have some extra rooms available if you're interested in a room let me know.

Details about the Hamvention are available at:

www.hamvention.org

At the Hamvention I will be monitoring 147.435 (107.2 Hz decode) simplex & 441.000 D-STAR simplex.

My group goes out to dinner on Friday night at the Old Hickory BBQ near the Univ. of Dayton and on Saturday night at the Spaghetti Warehouse in downtown Dayton. You're welcome to join us.

See you at Dayton.

3942. SDR Presentation at Chicago ARRL/TAPR DCC

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-02-18 01:29:45 UTC
From: Mark Thompson
Topic: 3942 Message: 3942

SDR Presentation Announced for Chicago ARRL/TAPR DCC(Digitial Communications Conference) Sunday Seminar

'Software Radio Through the Looking-Glass'

Phil Harman, VK6APH

One of the most exciting, and rapidly evolving, aspects of Ham Radio is that of Software Defined Radios. What was initially left to technical minded experimenters is now starting to move into the main stream. The latest SDRs offer performance equal to the best analogue radios on the market.

For those brought up on analogue radios there is quite a learning curve to understand exactly how these new radios work, what they do well and what shortcomings there have.

Phil will guide us through the basics of SDRs right up to the very latest techniques that digitise signals directly at the antenna socket. Using diagrams and a minimum of math he will cover such subjects as front end design, mixers, why we need I and Q signals, digital up and down conversion,AGC techniques, noise blanking and high efficiency Power Amplifiers.

The presentation will be highly interactive, so be sure to bring along that question that has been puzzling you for so long!

Biography:

Phil Harman, VK6APH, has held a ham license for over 40 year. For much of this time he has worked on leading edge RF techniques related to receivers and transmitters. Phil's current passion is the development of fully digital HF radios. Phil co-writes the Software Defined Radio column in the
RSGB Radio Communications journal and also co-authored the SDR chapter in the latest RSGB Handbook.

3952. ARRL's VHF Digital Handbook (Coming in early March)

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-02-21 21:15:04 UTC
From: Mark Thompson
Topic: 3952 Message: 3952

ARRL's VHF Digital Handbook
-- by Steve Ford, WB8IMY
Ham radio operators are using digital radio applications for fun, technical achievement, and public service. And it’s no wonder. Getting started often requires little more than a VHF radio and a computer.
Without complicated “owners manual” jargon—ARRL’s VHF Digital Handbook presents the material through a unique how-to approach and friendly, conversational style. Readers will understand how to setup and operate their equipment and software, and make the best use of their VHF digital station.
Contents:

Packet Radio Fundamentals: All the basics including TNCs, operating commands, and networks (such as DX Packetcluster).
APRS – The Automatic Position Reporting System: Track moving objects on maps (other stations, public service vehicles, marathon runners, etc.). Connect your own GPS receiver and transmit your location even as you’re moving!
D-STAR: Enjoy high-speed digital voice and data on the growing network of D-STAR repeaters.
High Speed Multimedia: Discover how you can set up your own wireless Amateur Radio data network by modifying over-the-counter gear such as routers and access points. It’s ham WiFi consumers can only dream about!
Digital Meteor Scatter and Moonbounce: Explore weak signal operating using the software masterpiece WSJT by Joe Taylor, K1JT.
Technical Descriptions: In-depth information about AX.25, D-STAR and APCO-25 protocols. Plus, digital applications in public service and emergency communications: Packet radio, APRS, Winlink 2000 and more!
Also available: ARRL's HF Digital Handbook
First edition, © 2008, published by American Radio Relay League, Inc.

Coming in early March!

ARRL's HF Digital Handbook
-- by Steve Ford, WB8IMY
ARRL’s HF Digital Handbook is your guide to understanding the most active HF digital communication modes in use today. There is something here for every radio operator—beginners and more advanced operators alike. And, as this technology rapidly advances, your increased understanding of digital communication techniques will make certain that you stay in the race as new modes and methods unfold.
This fourth edition book includes expanded station setup information, discussion of PSKMail and other varieties of PSK, new content on Olivia, DominoEX, HF digital voice and image modes, and Automatic Link Establishment.
Just getting started? All it takes is your sound-card-equipped computer and your HF transceiver. ARRL’s HF Digital Handbook will guide you through the rest!
Contents:
Assembling Your HF Digital Station
RTTY

PSK31
PACTOR
Winlink 2000
Clover
Hellschreiber
MFSK
G-TOR, MT-63, Throb, Olivia and DominoEX
HF Digital Contesting
HF Digital Voice and Image
Automatic Link Establishment …and much more!
Also available: ARRL's VHF Digital Handbook
Fourth edition, © 2007, published by American Radio Relay League, Inc.

3953. Tool Max this week

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-02-22 15:35:04 UTC
From: Tool Max Ind. Supply
Topic: 3847 Message: 3953

We will not be in this Saturday so stop during the week. Skywarn training in Muskegon County is this Saturday Feb 23

Check out our New Web sight at www.toolmaxonline.com Let me know what you think.

New items this week
None

We have Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other NEW items in Stock

14 Amp Jetstream Power Supply $55
28Amp Power Supply $90 With Meters out of stock now $110
45Amp Power Supply $170
Lighting Arresters $21.50 ea
HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $20 each
New SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
RG-58 Cable .25 per foot
RG-8 .$1.00 per Foot
RG-8X Coax Cable .45 per Foot
75 ohm Cable 9040 International Wire and Cable .35per foot
PL-259 Connectors $3.25 ea adadapters for RG-58 or RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $8
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's

We are the only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.

Technician Class $18.95
General Class $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Ramsey Kits for Kids (or Adults)

300 in 1 Electronic Lab $70
Bell Action Kit $9
Motor Action Kit $8
LED Binky Kit $8
Police Siren Kit $8
Electronic Dripping Faucet $10
LED Strobe Light with Case $45
AM Broadcast Transmitter Kit with Case $35
Tri-Field Meter $64

Other Used Equipment on Consignment
1 Set Husler HF Antennas 80m/40m/15m $30
1 RC 432 long wire antenna on a spool $15
1 Home brew 2 m/440 pipe antenna $15
1 NC 60B Yaesu 15 volt Nica Battery Charger $5
4 Dynamo crank LED Flashlight $8
1 GR-213 Holux GPS Receiver for USB port $40
1 KVM Switch for switching Keyboard, video, mouse on computer $10
1 Box of Large Compactors 10-12 pc total $5
HP PDA Pocket PC Model Jornada 545 16MB Ram Color PDA $100
Paum Zire Black & White PDA $30
Radio Shack PRO-94 1000 Channel Handheld Trunking Scanner $75
Arrow 222 5 Element 220mhz Beam $25
3 Standard HX 320 Business Band Radio $10 ea.
1 Regency H600B UHF Mobile Business Band Radio $25
1 APC Interruptible back up supply $35
1 Ampprobe Clamp-Pn Meter $15
1 Sencore SG-165 AM-FM Stereo Analyzer $30
1 GW GDM 8135 Digital Multimeter $30
MFJ-202B Noise Bridge $40
PC-1A Kenwood Phone Patch $40
#425 B+W Low Pass Filter $15
MFJ-704 Low Pass Filter $20
Ringo Ranger 2 meter antenna $35
11 Element 2 meter Beam $45
Mixed box of short length coax cable with PL-259 Connectors on end $1 each
JT776SMA HT Antenna $19
Headphone/Mike Ear Headset $5
Radio Shack Woodgrain Speaker $5
IC-255A 2 meter Radio with no tone board Like New from 1982 Good Packet Radio $45
Tubes A great Assortment of tested used Tubes $1-$4 each
B&K Model 4011 Precision function Generator $60
B & W Antenna Tuner VS-300A $40
RCA Volt Ohm Meter $25
Barket & Williamson Low Pass Filter $5
Speakers $2 - $10
Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
Center Insulator for HF antenna $5
LED Emergency Light $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50

MFJ-722 Notch Filter $30.00
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40
6-9 inch clamps to mount antenna on large poles or vent pipes $5.56 each

Heathkit items in stock

Heathkit SA-2040 1KW Tuner $125
Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40
Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Tool Max Industrial Supply is the Tool and Ham Radio retail store on Schamber Dr just off Pontaluna Rd and US-31 just north of the old Hob Knob or Michael's Restaurant (Now tore down) in Muskegon . We have tools, industrial suppliers and Ham radios parts for sale. For more information call or e mail Tom KB8VEE at 231 798-7898 I am in the Store from 8:30AM-4:30PM Monday-Friday. Stop by and see me for all your Ham needs.

Greg:

I'm hoping that there is a short story about VP6 in the upcoming issue of Flashovers, the Muskegon Area Amateur Radio Council's newsletter regarding my chase for that DX. Congrats on your catch.

I was reading on their web site that all hams should give them a call. They are occupying a remote, desolate, and uninhabited (well, uninhabited usually with nine or ten folks there now) island. Give them a call as they don't have anything better to do than QSO you.

Work them now as they are leaving in well under a week.

Keep your eyes open for Clipperton Island coming next month.

Bill, AB8SC
MAARC guy

Greg, I am not a dx'r, but it has been fun watching/listening to these guys. I got them on 20 and 17 ssb and cw. I'm a hack at CW, and they stayed right with me. I thought how they operated, with giving the listening frequency out rather often, was very nice.

Superbly organized. Top notch operators, and they really put up great antennas. They heard my 100 watts with a wire dipole also. They are using seven Elecraft K3's, which hear very well, as that is what I have here.

It took me about 15 calls on 20 SSB to get them. On the other hand, K8AJ got them right after me, with just one call. Something about a 18 dB gain voice advantage.

I've seen groups put DVD's on their dxexpeditions at Dayton, and I never cared, but I just might be interested in one for Ducie.

On SSB they announce where they are listening, not how many kc's up they are.

On cw they will indicate QSX xx.xxx, which is where they are listening.

Also, check any of the online dx clusters/spotters.

I caught word that a kid in my Boy Scout Troop is studying a country. I imagine that he's chasing down population, religion, culture, holidays, and interesting stuff like that. I get a bright idea, "How about I get the kid into my shack and we call a ham in his country?" Wow, that would be great!

I send off an email message to get the kid's country. The country? Rwanda!?

I tell my DX Elmer my dilemma. He says, "give me a shout when you plan to have the QSO. I'd like to listen in!" I'm guessing the kid's going to be disappointed. There can't be even one ham rag chewing with a call sign starting with 9X.

Hello All,

Well I have to say and try not to brag to much because I know all you folks are back in Muskegon area am and me being down here in Tampa FL. But I'm sitting here on the deck as the sun comes up and it's 68' and just beautiful this morning listening to the birds. Now my won't agree with this but the only thing that would make this any better would to have an HF radio so I could get in the net this morning. I can now see why a lot of hams like to come down here in the winter. As for now all of you folks take care and I will see next week when I'm forced to come back to the frigid north.

Al:

Thanks for the friendly reminder to mind the third party rules. I completely forgot. That would be just my luck.

There is a dxpedition planned later in March. I sure need to get that tower up.

3968. More questions about radio repair.

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-02-25 14:51:01 UTC
From: Jason B
Topic: 3968 Message: 3968

Hello again all.

I'm still working on my old junk ham rig in my (sparse) spare time. I seem to have hit an annoying stopping point. I believe a diode may be out in the PS section of my old Alinco 2M. According to the not very intuitive repair docs that I have, the diode is a Iss226TE85L. Now I can find a ton of links from huge electronics distributors offering to sell them by the thousands, and some by the hundreds, but for peat's sake, I only need one (an depending on how it should test, may not even need that).

Do any of you out there have any knowledge about this thing? I can't find a faq sheet on it, nor do I know what would be an equivalent substitution part. Several of you were instrumental in helping me locate the service manual for it, and I thank you for that help. I'm just hoping there may be someone out there that may shed a bit of light on this old thing. I miss the chit-chat on my daily commute.

73
Thank you,

Jason Blakley

You guys probably already know that the VP6DX has a great web site,
http://ducie2008.dl1mgb.com/

They're crowing about putting over 170k QSOs into the log. A
magnificent feat.

Check out their online QSL service. And you can confirm you're in the
log with the log search function.

I like the "notes home" about life on an almost deserted island.

3981. Re: [WestMichiganHams] Third party questions

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-02-27 20:27:44 UTC
From: CHRISTOPHER SCHULTE
Topic: 3980 Message: 3981

Mark,

I think in answer to your question about the trustee not being present, but holding an extra class license, as long as the control opperator is opperating within his/her privillages using a club call, there is no issue. For instance, there are a number of general class opperators that use the w8zho call in contests, but within their own privillages. Being as you are an extra class licensee, there shouldn't be an issue with you being control op for the w8mta station. I again reference the previous mention of the w8zho call. Obviously there isn't always a trustee of the club around when that call is used, but it is being used within the licensed privillages, therefore, it shouldn't be a problem.

73,
Chris, w8cjs

Subject: [WestMichiganHams] Third party questions

Greetings All,

I would like to operate at the school station W8MTA this Saturday and make international contacts during the ARRL SSB contest.

I am not quite clear on the rules for 3rd party traffic.

Here is what is stated on the ARRL web site:

"Occasionally, DX stations may ask you to pass a third-party message to a friend or relative in the States. This is all right as long as the US has signed an official third-party traffic agreement with that particular country, or the third party is a licensed amateur."

And...

"Note: At the end of an exchange of third-party traffic with a station located in a foreign country, an FCC-licensed amateur must transmit the call sign of the foreign station as well as his own call sign."

Also noted from the list of countries on that same page, Germany was *not* listed as having a 3rd party agreement with the US.

My goal is to get QSO's and cards from all over the world for W8MTA. W8MTA is technically a club call.

Q1) If the country being contacted is on the list I assume we can use the call W8MTA. Is my assumption correct?

Q2) If the country being contacted is on the list can the person talking be anyone, regardless of license, class or lack of a license?

Q3) If the country is *not* on the list can we use the call W8MTA so long as the person talking holds a valid license?

Q3) If the above is answered in the affirmative, does the licensee have to have privleges in the band / segment we are using at the time?

Q4) At the end of the contact, do we sign with W8MTA, or do we have to use the call of a licensed amateur?

Q5) If the above is answered 'licensed amateur', and Q2's answer indicates a person without a license can do the calling, how do we determine which licensee will supply the call?

Q5) How do we determine which band / segement can be used? The trustee of the station won't be present, presumably, but holds and Extra class ticket. I will be present and hold an Extra class ticket and will take on the role of control operator.

Q6) If there is an error on the 3rd party list available at the page following, where can I get an accurate list? http://www.arrl.org/FandES/field/regulations/io/3rdparty.html

Also, any additional information we may need to operate W8MTA to contact international stations will be greatly appreciated. We won't be officially participating in the contest. Our goal is to get the log book filled and seek QSL cards to display at the station.

Thanks and 73

Mark K8MHZ

3982. Tool Max this week Feb. 28

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-02-28 19:02:34 UTC
From: Tool Max Ind. Supply
Topic: 3982 Message: 3982

Check out our New Web sight at www.toolmaxonline.com Let me know what you think.

New items this week I need some, bring them in.
None

We have Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other NEW items in Stock

14 Amp Jetstream Power Supply $55
28 Amp Power Supply $90 With Meters out of stock now $110
45Amp Power Supply $170
Lighting Arresters $21.50 ea
HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $20 each
New SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
RG-58 Cable .25 per foot
RG-8 .$1.00 per Foot
RG-8X Coax Cable .45 per Foot
75 ohm Cable 9040 International Wire and Cable .35per foot
PL-259 Connectors $3.25 ea adadapters for RG-58 or RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $8
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's

We are the only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.

Technician Class $18.95
General Class $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Ramsey Kits for Kids (or Adults)

300 in 1 Electronic Lab $70
Bell Action Kit $9
Motor Action Kit $8
LED Binky Kit $8

Police Siren Kit $8
Electronic Dripping Faucet $10
LED Strobe Light with Case $45
AM Broadcast Transmitter Kit with Case $35
Tri-Field Meter $64

Other Used Equipment on Consignment
1 Set Husler HF Antennas 80m/40m/15m $30
1 RC 432 long wire antenna on a spool $15
1 Home brew 2 m/440 pipe antenna $15
1 NC 60B Yaesu 15 volt Nica Battery Charger $5
4 Dynamo crank LED Flashlight $8
1 GR-213 Holux GPS Receiver for USB port $40
1 KVM Switch for switching Keyboard, video, mouse on computer $10
1 Box of Large Compactors 10-12 pc total $5
HP PDA Pocket PC Model Jornada 545 16MB Ram Color PDA $100
Paum Zire Black & White PDA $30
Radio Shack PRO-94 1000 Channel Handheld Trunking Scanner $75
Arrow 222 5 Element 220mhz Beam $25
1 Ampprobe Clamp-Pn Meter $15
1 Sencore SG-165 AM-FM Stereo Analyzer $30
1 GW GDM 8135 Digital Multimeter $30
MFJ-202B Noise Bridge $40
PC-1A Kenwood Phone Patch $40
#425 B+W Low Pass Filter $15
MFJ-704 Low Pass Filter $20
Ringo Ranger 2 meter antenna $35
11 Element 2 meter Beam $45
Mixed box of short length coax cable with PL-259 Connectors on end $1 each
JT776SMA HT Antenna $19
Headphone/Mike Ear Headset $5
IC-255A 2 meter Radio with no tone board Like New from 1982 Good Packet Radio $45
Tubes A great Assortment of tested used Tubes $1-$4 each
B&K Model 4011 Precision function Generator $60
B & W Antenna Tuner VS-300A $40
RCA Volt Ohm Meter $25
Barket & Williamson Low Pass Filter $5
Speakers $2
Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
Center Insulator for HF antenna $5
LED Emergency Light $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ 1278B TNC $50
MFJ-722 Notch Filter $30.00
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40
6-9 inch clamps to mount antenna on large poles or vent pipes $5.56 each

Heathkit items in stock

Heathkit SA-2040 1KW Tuner $125
Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40
Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Tool Max Industrial Supply is the Tool and Ham Radio retail store on Schamber Dr just off Pontaluna Rd and US-31 just north of the old Hob Knob or Michael's Restaurant (Now tore down) in Muskegon . We have tools, industrial suppliers and Ham radios parts for sale. For more information call or e mail Tom KB8VEE at 231 798-7898 I am in the Store from 8:30AM-4:30PM Monday-Friday. Stop by and see me for all your Ham needs.

3985. Wisconsin QSO Party - Sunday 9 March

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-03-03 21:01:37 UTC
From: Hank Greeb
Topic: 3985 Message: 3985

The Wisconsin QSO Party is this Sunday, from 1800z March 9 to 0100z (March 10). Don't forget that Daylight Savings Time starts on this same day, so don't be an hour early or an hour late. :)

Full details at http://www.warac.org/wqp/wqp.htm

2008 Severe Weather Spotter Training
Ionia County

You are invited to become a National Weather Service trained Severe Weather Spotter for the 2008 season, and serve your community. The Weather Service relies on reports from Skywarn spotters during severe weather events. Learn all you need to know during this training. Public Invited!

When: April 10, 2008
Time: 7:00pm ☐ 9:00pm
Cost: Free!
Where: Ionia County ISD
2191 Harwood Road
Ionia, MI 48846
RSVP not required ☐ just show up!
Bring yourself and a friend.

Sponsored by:
Ionia County Office of Emergency Management
And
The National Weather Service

For information contact:
Rick Norman, PEM
Emergency Program Manager
616-527-8250

3990. March Weather Spotter training sessions

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-03-05 15:32:43 UTC
From: Hank Greeb
Topic: 3990 Message: 3990

Dates for upcoming Skywarn training in Weather spotting for March are:

COUNTY DATE
Van Buren March 8th, 2008
Montcalm March 11th, 2008
Clinton March 13th, 2008
Isabella March 18th, 2008
Newaygo March 19th, 2008
Mecosta March 20th, 2008
Calhoun March 22nd, 2008
Gratiot March 25th, 2008
Ottawa March 27th, 2008
Ingham March 29th, 2008

Details of locations, times and contacts are at

http://www.crh.noaa.gov/grr/skywarn/training/

It appears that if you can't make it to your own county training
session, the training repeats in adjacent counties.

Training continues into April, details at the above site.

Subject: Ottawa County IS-300, 4/30 & 5/1/08, EOC & IS-400 Training, 5/13 &
14/08, HPD

Ottawa County Staff:

Ottawa County will be providing Training, presenting the IS-300 Course on Wednesday and Thursday, April 30 and May 1, 2008, from 8:00 AM-5:00 PM each day at the Ottawa County EOC, Lower Level of the Fillmore Complex in West Olive.

The companion IS-400 Course will be held on Wednesday & Thursday, May 13 and 14, 2008, from 8:00 AM-5:00 PM each day at the Holland Police Department, Training Room, 89 W. 8th St, in Holland. This session is also the companion course for the IS-300 Training held in Holland on January 8 & 9, 2008.

Class size is limited to the first 35 that register.

I've attached the NIMS training guidelines and Region 6 NIMS requirements to assist you in determining which members of your staff need to attend.

This is required training to maintain our eligibility to receive Federal Funding.

Please register yourself and any of your staff that need the training, in the appropriate table below. Respond to this e-mail "with history", which will allow you to complete the table below.

You will receive confirmation by return e-mail. This class will be limited to the first 35 that sign up. Just a reminder, you will be required to attend the full session of each course to complete the training.

If you have any questions, please call the office at 616-738-4050.

NS 300 - Intermediate Incident Command System, ICS-300
THIS COURSE MEETS THE STANDARDS ESTABLISHED BY THE NIMS INTEGRATION CENTER FOR COURSES AS TAUGHT BY THE DEPARTMENT OF HOMELAND SECURITY (DHS).
Middle management, strike team leaders, task force leaders, unit leaders, division/group supervisors, branch directors and Multi-Agency Coordination System/Emergency Operations Center staff.

NS 400 - Advanced Incident Command System, ICS-400
THIS COURSE MEETS THE STANDARDS ESTABLISHED BY THE NIMS INTEGRATION CENTER FOR COURSES AS TAUGHT BY THE DEPARTMENT OF HOMELAND SECURITY (DHS).
Command and general staff, agency administrators, department heads, emergency managers, areas commander and Multi-Agency Coordination System/Emergency Operations Center managers.

Not for sure where they went if not on the FEMA page . I did take both those courses .

4001. You might be a ham if:

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-03-08 01:27:04 UTC
From: K8TB
Topic: 4001 Message: 4001

You Might be a Ham Operator if:

1. When you look at a full moon and wonder how much antenna gain you would need.

2. When a friend gets a ride from you and remarks that you have a lot of CBs in your vehicle, it turns in to an hour long rant on how ham radio is not CB radio.

3. When someone asks for directions, you pause, wondering if long or short path would be best.

4. When you can look at a globe and be able to point to your antipode (and you know what an antipode is).

5. Your cell phone ring tone is a Morse code message of some kind.

6. You have accidentally said your Amateur Radio call sign at the end of a telephone conversation.

7. Your favorite vacation spots are always on mountain tops.

8. You notice more antennas than road signs while driving your car.

9. You have driven onto the shoulder of the road while looking at an antenna.

10. Porcupines appear to be fascinated with your car.

11. If you ever tried to figure out the operating frequency of your microwave oven.

12. When you look around your bedroom of wall to wall ham gear and ask: Why am I still single?

13. The local city council doesn't like you.

14. You actually think towers look pretty.

15. Your family doesn't have a clue what to get you for Christmas, even after you tell them.

16. Your HF amplifier puts out more power than the local AM radio station.

17. The wife and kids are away and the first thing that goes through your head is that no one will bother you while you call "CQ

DX" a few hundred times.

18. When you pull into a donut shop and the cops there on
their coffee break ask if they can see your radio setup.

19. You refer to your children as your "Harmonics".

20. Your girlfriend or wife asks: "You're going to spend
$XXXX on what???

21. You actually believe you got a good deal on eBay.

22. When you see a house with a metal roof, and your only
thought is what a great ground plane that would be.

23. You have pictures of your radio equipment as wallpaper
on your computer's desktop.

24. Every family vacation includes a stop at a Ham radio store.

25. The first question you ask the new car dealer is: "What
is the alternator's current output"?

26. You buy a brand new car based on the radio mounting
locations and antenna mounting possibilities.

27. You have tapped out Morse code on your car's horn.

28. A lightning storm takes out a new Laptop, Plasma TV, and DVD
Recorder, but all you care about is if your radios are okay.

29. Your wife has had to ride in the back seat because you
had radio equipment in the front seat.

30. Your wife threatens you with divorce when you tell her
that you are going on a "fox" hunt.

31. You always park on the top floor of the deck, just in
case you might have to wait in the car later.

32. When house hunting, you look for the best room for a
radio shack and scan the property for possible tower placement.

33. When house hunting, you give your realtor topographical maps
showing local elevations.

34. The real estate agent scratches his head when you ask if
the soil conductivity is high, medium, or low.

35. You have Ham radio magazines in the bathroom.

36. When your doorbell rings, you immediately shut
down the amplifier.

37. Fermentation never enters your mind when "homebrew"
is mentioned.

38. Instead of just saying no, you have said "negative".

39. You have used a person's name to indicate acknowledgement.

40. You become impatient waiting for the latest AES
catalog to arrive.

41. You have found yourself whistling "CQ" using Morse code.

42. You always schedule the last full weekend in June
for vacation.

43. You walk carefully in your back yard to avoid
being close-lined.

44. You have deep anxiety or panic attacks during high
winds or heavy ice.

45. You and the FedEx/UPS men are on a first name basis.

46. You really start to miss people that you've never seen.

47. Your exercise machine is a Morse code keyer.

48. You walk through the plumbing section at the hardware
store and see antenna parts.

49. Your neighbors thought you were nuts when you ripped up
your lawn to bury chicken wire.

50. Your next door neighbor thinks that your wife is a widow.

51. Your wife has delivered meals to your Ham shack.

52. If you sold all your Ham radio equipment, you could
pay off your mortgage.

53. Removing snow from the roof of your car requires working
around the antenna and wires.

So, how many did you get "right"? :)

4003. Prelim Announcment - Michigan QSO party

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-03-09 00:08:10 UTC
From: Hank Greeb
Topic: 4003 Message: 4003

The Michigan QSO Party is April 19, 1200 EDST to 2400 EDST (16Z Saturday April 19 until 04Z Sunday April 20) Details at http://www.miqp.org

The MiQP is REALLY fun - we folks in Michigan are the bait for all the folks outside the state who are looking for contacts!

For up to date info on who is operating, etc., please join the Michigan QSO Party reflector. Details of how this works are at http://www.miqp.org/Reflector.htm

4004. Ham Radio in new The Bank Job Movie

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-03-09 18:24:51 UTC
From: Mark Thompson
Topic: 4004 Message: 4004

I saw the new movie The Bank Job last night.

http://www.thebankjobmovie.com/

It is apparently based on a true story that occurred in the early 1970s in England.

Ham radio is prominent in the movie. A London ham operator uses a 1970s vintage Yaesu FT-101
to intercept some apparent bank robbers using CB-type walkie-talkies.

March 11, 1958, Florence, South Carolina A B-47E accidentally jettisoned an unarmed nuclear weapon without its fissile core at 15,000 feet,

4006. New Operator notes:

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-03-10 18:57:34 UTC
From: Jeff's Lists
Topic: 4006 Message: 4006

All:

I am re-working my notes I give to operators during the HIAD. I would like opinions / suggestions about "important" things to know.

This is what I usually talk about at the end:

New Radio Operator Notes

1. EMERGENCY TRAFFIC takes over the topic!
2. You must ID every 10 Minutes or at the end of your conversation.
3. Listen before you speak!
4. When calling someone on the radio
a. 2x1 Call
IE: KC8EST KC8EST this is N8JSN
b. 1x1 Call
IE: KC8EST this is N8JSN
5. To get into a rotation
a. Wait until someone takes a breath and throw your call into the break. Someone will recognize you
6. To take someone into the rotation
a. When you hear someone throw there call sign into the break point recognize them make your comment and then take them into the rotation.
7. be courteous to other users of the repeater system. Unless you are on a closed or private system, you should make sure to give breaks to allow others to hop into the rotation or to report emergency traffic
8. Pretend you are talking to a 5 year old! If you would not want, the topic talked about with your child / Grand Child it should not be talked about on the radio!
9. Don't hog the repeater; let others take a chance at it. Take a break and let others join into the conversation.
10. Use the auto patch wisely!

To check for your call sign go to:
http://wireless2.fcc.gov/UlsApp/UlsSearch/searchLicense.jsp

Your paper license will arrive within 30 days from the day your call sign is issued on the internet.

Get involved with your local ARES / RACES program.

If you have suggestions I'd like to see them. Tnx Jeff

4007. Midwest Classic Radio Ham-boree, June 28th, Union, IL

Sent: Monday, March 10, 2008 6:19:53 AM
Subject: AM Jambo

ATTENTION ALL VINTAGE HAM RADIO ENTHUSIASTS

AND ESPECIALLY

THE MIDWEST CLASSIC RADIO NET PARTICIPANTS

In recognition of the AM Jamboree as was initiated and hosted by Ron (K5HZ) and
Julie that was held for a number of years in south-central Wisconsin and
also recognizing that many AM'ers, in the Illinois, Wisconsin, Indiana and Iowa area
have expressed an interest in wanting to participate in such a social event such as the AM
Jamboree,

We are very happy to announce the Midwest Classic Radio Ham-boree

To be held on
Saturday June 28, 2008
8:00 am

at beautiful
Siems Memorial Park
In Union, Illinois

(Union Illinois is the home of the famous Illinois Railway Museum and
is located only 15 miles from the Wisconsin State line and approximately 100 miles from
Iowa and Indiana)

Scheduled
(further information forthcoming)

Free Swap-meet of vintage ham gear
Bring your own table

Free auction of vintage ham gear
Seller final-say protection

Catered lunch featuring Italian Beef and Sausage

Pavilion shelter with picnic tables

Raffle or bingo-type "Radio" game

-and-

SPECIAL PRESENTATION

This very first Ham-boree will be in honor of, and dedicated to the recognition of, the 13 years of unselfish service as net-control operator of the Midwest Classic Radio Net faithfully provided by Robert Hummel (WA9ZTY)

Please do not pass the presentation information to Rob as we want to keep it a surprise to him

SB QST ARL ARLB005
ARLB005 W1AW 2008 Spring/Summer Operating Schedule

Morning Schedule:

Time	Mode	Days
1300 UTC (9 AM ET)	CWs	Wed, Fri
1300 UTC (9 AM ET)	CWf	Tue, Thu

Daily Visitor Operating Hours:

1400 UTC to 1600 UTC - (10 AM to 12 PM ET)
1700 UTC to 1945 UTC - (1 PM to 3:45 PM ET)

(Station closed 1600 to 1700 UTC (12 PM to 1 PM ET))

Afternoon/Evening Schedule:

2000 UTC (4 PM ET)	CWf	Mon, Wed, Fri
2000 " "	CWs	Tue, Thu
2100 " (5 PM ET)	CWb	Daily
2200 " (6 PM ET)	RTTY	Daily
2300 " (7 PM ET)	CWs	Mon, Wed, Fri
2300 " "	CWf	Tue, Thu
0000 " (8 PM ET)	CWb	Daily
0100 " (9 PM ET)	RTTY	Daily
0145 " (9:45 PM ET)	VOICE	Daily
0200 " (10 PM ET)	CWf	Mon, Wed, Fri
0200 " "	CWs	Tue, Thu

0300 " (11 PM ET) CWb Daily

Frequencies (MHz)

CW: 1.8175 3.5815 7.0475 14.0475 18.0975 21.0675 28.0675 147.555
RTTY: - 3.5975 7.095 14.095 18.1025 21.095 28.095 147.555
VOICE: 1.855 3.990 7.290 14.290 18.160 21.390 28.590 147.555

Notes:

CWs = Morse Code practice (slow) = 5, 7.5, 10, 13 and 15 WPM
CWf = Morse Code practice (fast) = 35, 30, 25, 20, 15, 13 and 10 WPM
CWb = Morse Code Bulletins = 18 WPM

CW frequencies include code practices, Qualifying Runs and CW bulletins.

RTTY = Teleprinter Bulletins = BAUDOT (45.45 baud) and AMTOR-FEC (100 Baud). ASCII (110 Baud) is sent only as time allows.

Code practice texts are from QST, and the source of each practice is given at the beginning of each practice and at the beginning of alternate speeds.

On Tuesdays and Fridays at 2230 UTC (6:30 PM ET), Keplerian Elements for active amateur satellites are sent on the regular teleprinter frequencies.

A DX bulletin replaces or is added to the regular bulletins between 0000 UTC (8 PM ET) Thursdays and 0000 UTC (8 PM ET) Fridays.

In a communications emergency, monitor W1AW for special bulletins as follows: Voice on the hour, Teleprinter at 15 minutes past the hour, and CW on the half hour.

FCC licensed amateurs may operate the station from 1400 UTC to 1600 UTC (10 AM to 12 PM ET), and then from 1700 UTC to 1945 UTC (1 PM to 3:45 PM ET) Monday through Friday. Be sure to bring your current FCC amateur license or a photocopy.

The complete W1AW Operating Schedule may be found on page 97 in the March 2008 issue of QST or on the web at,
http://www.arrl.org/w1aw.html .

This raises a question in my mind...

If one does not own a frequency, then how can one legally camp
his repeater on a given frequency and then block others from using
that frequency? (I am assuming a case where no operator has
violated any rules, regulations, and is using good operator
practice.)

Thanks - /////////// Richards - K8JHR ////////////

==========

k8mhz@... wrote:

> repeater owner does *not* own the frequency but is responsible for the

> rules for that repeater, but ... limit the use of their repeater to
anyone they feel fit. Amateurs do not have a given right to use
any repeater just because it is there.

4015. Michigan 2008 Youth Forum

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-03-10 22:30:55 UTC
From: Hank Greeb
Topic: 4015 Message: 4015

Michigan 2008 Youth Forum
Date: April 12, 2008 **10 AM to 4 PM.
Location: Mount Hope Church
1672 M-32 East, Gaylord, Michigan
Talk-in on 147.120 Repeater, Tone 151.4 Hz

Who: Young radio amateurs and their parents/sponsors.

Goals: Learn what sparks the interest of young people in ham radio
Allow our young hams to share their experiences
Introduce the attendees to new facets of ham radio
Conduct operating events
Report findings to all Michigan clubs
Set goals for bringing more youth into the hobby
Have fun !

Sponsor: Michigan Section ARRL

Cost: Nothing. (A donation to help cover pizza and soft drinks would be appreciated).

Registation: Form on separate message

Club Officers: Please publicize this event as much as possible. We strongly encourage attendance by as many young folks as possible. Our sessions will include active participation by our young hams to help us determine what brought them into ham radio, why they like it and what aspects they don't like. Our Gaylord venue was chosen to centralize travel for everyone, as we expect attendees from both the upper and lower peninsulas of Michigan. (Special thanks to Pastor Norm and the members of Mt. Hope Church for hosting our event).

This will be a fun event and include a Special Event Station as well. Operating freqs will be posted on the ARRL Michigan Section Web page soon.

Please distribute the attached announcement poster and distribute copies of the registration form to those who may be interested

Feel free to contact me with any questions.

Regards and thanks for helping make Ham Radio grow.

Dale Williams WA8EFK
ARRL Section Manager ? Michigan
734-529-3232

Thanks -- but the correct reference is: 97.205(b) ...

Still seems inconsistent,... but the law if full of that
sort of thing. Apparently, the FCC encourages repeater
use over simplex usage. I suppose absent a loud outcry
against restrictive repeater management, it favors repeater
use and deployment. If there were a lot of complaints of
undue restrictions by repeater owners, then maybe it would
adopt a different position.

Thanks for the reply.

I just noticed your call sign... very cool. I bet you
could sell it for big money! ;-)

On another front... Do you guys have any regular HF nets?
If so, is there a web site or FAQ that tells about them?

Thanks for your courtesy and assistance. Happy trails and 73.

Spirit of Knoxville IV balloon launches Tuesday 11th March

Spirit of Knoxville IV (SNOX IV) launch date has been set at 0300 UT on Tuesday 11th March. The balloon with carry a RTTY LSB/CW beacon on 10.126 MHz.

This flight is designed to stay aloft for more than 24 hours, inserted into the current jet stream at normal flight altitudes of 30,000 to 40,000 ft. This will take the balloon into Europe over the UK and France if all goes well around 40 hours into the flight.

Launch Time: 0300 UTC March 11 (10 PM EDT March 10) Track the mission live at: http://www.spiritofknoxville.com (the Live status page will only become active at launch)

Keep an eye on the latest progress from the launch team on the front page of spiritofknoxville.com or by using twitter to follow twitter user "spiritofknox".

Radio listeners: Flight radio details will be available on the DTRC status page which opens when you run the current version of DTRC.

Download DTRC from http://dtrc.utarc.org

Thanks,

Spirit of Knoxville Crew

4022. Two Meter Net

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-03-12 12:06:05 UTC
From: Bill
Topic: 4022 Message: 4022

All:

You're invited to participate in the Muskegon radio club's two meter net. It runs Wednesdays starting at 7:00 pm on Muskegon's 146.94 repeater. We have fun with conversation between participants & the net control, radio trivia, a question from the question pools, an education and learning topic, and the ARRL audio news.

It is lots of fun. You can get your two cents in and learn a few things. And all call signs checking into the net are entered into a monthly "door prize" drawing.

You'll like this net. Stop in!

Mark:

We could take that under advisement. It might happen. I'll ask the board.

You do not need to be a club member to participate in the net. The single requirement is you have a ham license. Well, that and a desire to use the radio. Er, we do encourage lurkers. It is tons more fun to interact with the net control guy.

Yes, get your dues paid. We welcome K0LEY's participation. And we encourage yours, too.

Bill, AB8SC
MAARC guy

From: Tool Max Ind. Supply
Topic: 4027 Message: 4027

I will be in Marshall this Saturday at the Hamfest not in the Store.

Check out our New Web sight at www.toolmaxonline.com Let me know what you think.

New items this week I need some, bring them in.

1 SMC 7004BR 4 port Computer Hub $5
1 Otto Head Set with Mic $5
1 2004 ARRL Handbook $10
1 Johnson Desk Mic $10
1 MFJ hand mic for HT $5
1 IC 706 interface cable unit to use Power Amp $20

We have Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other NEW items in Stock

14 Amp Jetstream Power Supply $55
28 Amp Power Supply $90 With Meters out of stock now $110
45Amp Power Supply $170
Lighting Arresters $21.50 ea
HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $20 each
New SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
RG-58 Cable .25 per foot
RG-8 .$1.00 per Foot
RG-8X Coax Cable .50 per Foot
75 ohm Cable 9040 International Wire and Cable .35per foot
PL-259 Connectors $3.25 ea adadapters for RG-58 or RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
Laser pointers $2 ea
2 Amp Power Supplies good to power Hand Held $8
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's

We are the only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.

Technician Class $18.95
General Class $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95

ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Ramsey Kits for Kids (or Adults)

300 in 1 Electronic Lab $70
Bell Action Kit $9
Motor Action Kit $8
LED Binky Kit $8
Police Siren Kit $8
Electronic Dripping Faucet $10
LED Strobe Light with Case $45
AM Broadcast Transmitter Kit with Case $35
Tri-Field Meter $64

Other Used Equipment on Consignment
1 Set Husler HF Antennas 80m/40m/15m $30
1 RC 432 long wire antenna on a spool $15
1 Home brew 2 m/440 pipe antenna $15
1 NC 60B Yaesu 15 volt Nica Battery Charger $5
4 Dynamo crank LED Flashlight $8
1 GR-213 Holux GPS Receiver for USB port $40
1 KVM Switch for switching Keyboard, video, mouse on computer $10
1 Box of Large Compactors 10-12 pc total $5

ARLB006 FCC Fixes Typographical Errors in Part 97

ZCZC AG06
QST de W1AW
ARRL Bulletin 6 ARLB006
>From ARRL Headquarters
Newington CT March 13, 2008
To all radio amateurs

SB QST ARL ARLB006
ARLB006 FCC Fixes Typographical Errors in Part 97

The FCC released a Memorandum Opinion and Order (MOO) on Wednesday, March 12, in an effort to correct typographical errors in Commission's Rules, including rules affecting Part 97, the Amateur Radio Service.

According to the FCC, these changes are "non-substantive editorial revisions" and do not introduce new rules or change old rules applicable to Amateur Radio operators. The MOO is available at, http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-08-530A1.pdf.

In this MOO, the FCC is updating the Allocation Table and service rules for the Amateur Radio Service with regard to the band 75.5-81 GHz. In 2003, the Commission released a Report and Order (R&O), commonly called the 70/80/90 GHz R&O, that adopted a transition plan for the amateur use of the segment 75.5-76 GHz. The Commission concluded that moving Amateur Radio operations out of the 75.5-76 GHz band would not pose a major inconvenience to the Amateur Radio Service, but would "substantially benefit future fixed services, because it would eliminate the possibility of harmful interference from amateurs."

Accordingly, the primary allocations to the Amateur and Amateur Satellite Services in the 75.5-76 GHz band were downgraded from primary to secondary status, with secondary use ceasing on January 1, 2006. After that date, the band 75.5-76 GHz was no longer available for use by the Amateur Service or the Amateur Satellite Service.

This transition plan was codified in footnote US387 and in Section 97.303(r)(3) of the Commission's Amateur Service rules. Because the transition period has concluded, the Commission "removed expired footnote US387 from the list of U.S. footnotes and we are amending Part 97 of the Commission's Rules to reflect this allocation change by: (1) revising the entry "75.5-81.0" GHz in Section 97.301(a) to

read "76-81" GHz; (2) removing paragraphs (r)(2) and (r)(3) from Section 97.303; and (3) renumbering paragraph (r)(1) as paragraph (r)."

In October 2006, the FCC released the Amateur Phone Band Expansion R&O, that expanded the phone bands. With the release of the MOO, the FCC is making two changes.

The first change to the October 2006 R&O is simply a correction of a typographical error in the Rules for the General phone allocation on 15 meters. In the Amateur Phone Band Expansion R&O, the Commission revised 21.30-21.45 MHz to read 21.275-21.45 MHz, but the current codification of the rule does not reflect this change. All the Commission did was to bring the Rules into alignment with the R&O.

The second change fixed an omission in the Novice/Technician allocation on 40 meters. The FCC found that when the Amateur Phone Band Expansion R&O was released, "the Commission expanded the frequency segment authorized for amateur voice communications within the 40 meter band by correspondingly reducing a band segment used for narrowband emission types by 25 kHz, from 7.100-7.150 MHz to 7.100-7.125 MHz."

The revised frequency table in Section 97.301(e) of the FCC's Rules that lists authorized frequency bands for Novice and Technician Class inadvertently omitted 7.100-7.125 MHz from Regions 1 and 3. "Because the Amateur Phone Band Expansion R&O addressed the division of amateur frequencies among permissible emission types and not between geographic ITU Regions, we must further amend Section 97.301(e), as set forth in Appendix C, to implement the Commission's decision. Specifically, we are revising the 40 meter band by reinserting the segment '7.100-7.125' MHz in the Region 1 and Region 3 columns."

The FCC also took the opportunity to remove a double negative from Section 97.303(b). Before the release of the MOO, this Section read: "No amateur station transmitting in the 1900-2000 kHz segment, the 70 cm band, the 33 cm band, the 23 cm band, the 13 cm band, the 9 cm band, the 5 cm band, the 3 cm band, the 24.05-24.25 GHz segment, the 76-77.5 GHz segment, the 78-81 GHz segment, the 136-141 GHz segment, and the 241-248 GHz segment SHALL NOT cause harmful interference to, nor is protected from interference due to the operation of, the Federal radiolocation service."

The FCC chose to take out the word "NOT" to bring the rule's words in line with the spirit of the rule.

I edited your question a bit for clarity. Did I destroy the intent of the question?

Listen to the DX station. Toward the end of their run the DX will likely be working so the US Generals can legally get into the log. That means if they transmit on, say, 14.197 they will listen on 14.260 or something. Maybe it was the operator but my experience was teh DX announced where he was listening.

For example, they were working twenty meters transmitting on 14.197. The DX wanted to work Europe and Africa. They were listening 14.140 to 14.145. I could hear the calling stations working the DX. It was frustrating that even an Extra could not call the DX on those frequencies. The DX operator was clearly stating he was listening on 14.140 to 14.145.

If the DX says "up" or "up five" you need to start dialing up at least five and trying hard to hear the station calling. For example, "up five" means if he is transmitting on 14.197 he is listening (14.197 + 5) on 14.203 or higher. The "up five" means "do not call me on my transmit frequency." Lids and cops transmit over the DX and their powerful Big Gun signal wipes out the DX for Everyone. Never transmit on the DX.

Especially in the early days of the DXpedition you'll only hear a cryptic "up" or "up five" because the DX is dialing around more or less up five or more listening for a clear call-sign. The VP6, toward the end, was just camped on two frequencies and clearly stated his listening frequency.

The first rule of DX is, 1. Listen, Listen, Listen. All the other stuff is fluff.

1) How do I set my rig to do this split thing? Do I use RIT or
is that what the second VFO is for? Or is it something else?

2) Why would he want to split up his transmit and receive frequencies
like that? What is the advantage to this practice?

Thanks. // JHR - K8JHR //

DX working split is one of the hard parts of working DX. You just don't know where to transmit. QRPers like myself struggle with this on each DXpedition.

I suggest you look at the DX spots. Often the spotter will mention his transmit frequency. That's a good place to start. You already know that the transmit frequency was the last station's frequency as the DX was listening there for that QSO. You have to find that station's frequency. Each DX will be different and some will work up the band after each QSO. The DX must get a call-sign and if Everyone is piled up right on top of each other the DX simply waits or dials around. He wants to keep the rate high and you want that rate high, too, because you want to be in the log before the DX goes QRT.

I've heard that the great DXers (OH2BH comes to mind) eventually work everyone. I've worked OH2BH and I bet each time he told me where to transmit. The other great ones dial up after each QSO until they run out of range on the RIT and then start back down. Sneaky DX can manage two pile-ups, one above and the other below their transmit. I've only heard this rumored.

It is best to listen to the DX. After all he wants you in his log as much as you want to be in the log.

And, related, the question is asked, "why split?" That's a great question and Very popular with DX.

The DX needs to let us know he is on the air. When he develops a following the stations calling him obliterate each other and if the DX is working simplex, also obliterate the DX. So the DX goes split. The theory is: The DX needs to ask QRZ? Then he digs a call-sign out of the crowd. He listens generally above his transmit frequency (generally but not always, that's why you listen) for a call-sign. The callers all try to find that place the DX is listening and time their call. The DX hears and replies to a call. They swap signal reports and the process continues.

How do you do this on your rig? Easy. Forget the RIT and XIT. They mess up the process. Set up your rig so you are using VFO A and VFO B. Equalize each VFO. Using A you listen to the DX and hear him say he is working up five. When he asks for a signal report from a station you go looking for that station with the VFO B. Find that guy and return to VFO A. Push the split button and check key the mic. Your rig should be listening on A and transmitting on B. When the DX goes QRZ you send your call, phonetically (and don't use the cute words) and your rig returns to listen for the DX to ask you for a

signal report. It sounds easy and the theory is easy. The hard part is finding the station in QSO with the DX. You have to find that station as the DX was listening there for that QSO. Often the DX will acknowledge a station, get them in the log, and then change his listening frequency. You need to find the station in QSO and discern any pattern. For example, does the DX move up after each QSO? Maybe stay there until he cannot hear a call-sign and then move up? Maybe never moving and your timing needs to be tweaked?

Remember the pile-up is Very fluid. Things change instantaneously. Listen to the DX, listen for the station he is in QSO with, and see if there is any pattern. Maybe you just need to call a second late. Maybe you need to tweak the phonetics? Always remember that the DX is not always an American with an understanding of your sense of humor. Full call, phonetically, enunciate, and remember it is a hobby and supposed to be fun.

Put the freq that the dx is transmiting on on vfo A put the listning on vfo B find the botton on the front of your radio that says split and push on the display it should say split when you key your rig it should show the freq that the dx is listning on when you unkey your back on his transmit freq . if all else fails pull out the manual for your rig that will help you the most most of the time they are saying up 5 to10 14.197 up 14.205 to 14.210 or today the were on the gen band they were at 14.182 up 14.245 to 14.250 hope this helps

THANKS FOR THE EXCELLENT ANSWERS !!

Funny... I asked this question today, and my Extra Class Exam Text Book arrived about an hour later, and I was reading about it in the text book this evening as I started in.

I think I get it.

I also appreciate the fellow who said "read the manual" - yet unfortunately, my TenTec Omni VII manual is really poor on telling me how to use the rig - it assumes one who buys such a rig already knows how to operate one! Yes, it says what the buttons and dials do, but not HOW or WHEN to use them in combination with the other stuff to get a certain result. Split VFO... cool... but WHY? Now I know.

Thanks all for taking time to explain it for me!

I've not tried this with two radios. I wonder how you keep the transmit from radio B from overpowering the receiver A? In the olden days they had a T/R switch. Today, too?

Michigan Amateurs Team Up with State

ARRL Michigan Section Manager Dale Williams, WA8EFK, and Michigan Section Emergency Coordinator John McDonough, WB8RCR, have been working with the Homeland Security Division of the Michigan State Police Emergency Management to align the capabilities of the Amateur Radio Public Service Corps (ARPSC) -- Michigan's integrated ARES/RACES program -- more closely with the communications needs of the state's public service agencies.

ARPSC also participates in the Michigan State Department Emergency Management Coordinators Quarterly meetings at the State Emergency Operating Center. It is here, Williams said, that discussion of the Public Safety communications grants are discussed and their investment justifications are detailed. "We have been afforded the opportunity to discuss Amateur Radio's involvement with communications interoperability, as well as our ability to fill gaps in disparate networks and outages. As a result of these conferences, I was asked to include a list of ARPSC's needs for the next three years."

To further that end, Williams told the ARRL that they have been successful in incorporating the ARPSC Program into the Michigan State Preparedness Priorities. Michigan intends to develop the ARPSC into a fully integrated communications team operating under common standards and procedures, including maintaining and enhancing the statewide Amateur Radio communications system; establishing suggested standards for Amateur Radio capabilities in local Emergency Operations Centers, and developing a public awareness and education program to bolster the ranks of Amateur Radio participants. The hope, Williams said, is to have all this implemented by 2010.

Williams said, "Since the early 1980s, Michigan has operated an integrated ARES, RACES and NTS program referred to as the Michigan Amateur Radio Public Service Corps. By combining the forces of these normally separate structures, these valuable resources are pulled together to form an active trained and unified organization. The Section Emergency Coordinator also holds the positions of Section Traffic Manager and RACES Radio Officer. Membership is ARPSC is open to all amateurs and is structured to allow a beginning ham to progress from an entry-level position to a RACES-qualified operator by meeting specific training milestones."

"There is no doubt that by presenting a unified organization, the Michigan ARPSC has demonstrated the effective use of resources, training and our unique capabilities so that we have become a well respected public service organization in the state," Williams said.

Hi all
Could you all please be on the look out for anyone that suddenly has a newly aquired Vertex 150 2 meter radio? My friend, Mike Ayers / KD8DLG, and I wheeled a load of unsold items back to our vehicle, after this past weekend's Marshall swap. When we returned to our table to retrieve the remainder of our items, we realized that Mike's Vertex was missing from the table. It was in very good condition, in complete working order, with all accessories, in the original box. If you see or hear of someone with this model radio, could you please email either Mike or myself, at: m2096ay@... for Mike, or lauff2@... for Gary? We will verify the serial number, to see if there is a match.
Thanks and 73,

Subject: [Kcarpsc] Radio Training Events

KCRACES has two radio training classes coming up.

Both classes will be held in the EOC room at the Kent County Sheriff
Department at 701 Ball in Grand Rapids.

The classes are:

1. Introduction to Amateur Radio: This class covers practical aspects of
using an amateur radio. Although there is some theory that is essential to
learn, most of the class is learning how to talk on the radio. It is
preferred that people taking this class already have a license, but it is
not required. The class will be held on March 29, at 9:00 AM until about
noon. If you have a two meter hand held radio, please bring it. If you
don't we will have some available for the class.

2. Net Control Station Basics: This class teaches people the basics of
being a net control station. We will have a lecture as well as a few
exercises. This class will be held on April 12, at 9:00 AM until about
noon. If you have a two meter hand held radio, please bring it. If you
don't we will have some available for the class. This class is limited to
20 people.

If you plan on attending either class or have questions please email me at
kkarr@....

Hi, everyone:

Somehow, I have lost the recent e-mail notice from earlier this week concerning
the Basic Radio Operations class that will be conducted by the Kent County RACES group for new hams in our
area.

Can anyone re-send me the notice about the class?

I have a number of new hams in our area up here in Mecosta and Osceola Counties that I'd like to send the notice to.

Thanks, and 73 from Tom Behler: KB8TYJ, Mecosta County EC/RO

I'm resending this as a reminder.

KCRACES has two radio training classes coming up.

Both classes will be held in the EOC room at the Kent County Sheriff Department at 701 Ball in Grand Rapids.

The classes are:

1. Introduction to Amateur Radio: This class covers practical aspects of using an amateur radio. Although there is some theory that is essential to learn, most of the class is learning how to talk on the radio. It is preferred that people taking this class already have a license, but it is not required. The class will be held on March 29, at 9:00 AM until about noon. If you have a two meter hand held radio, please bring it. If you don't we will have some available for the class.

2. Net Control Station Basics: This class teaches people the basics of being a net control station. We will have a lecture as well as a few exercises. This class will be held on April 12, at 9:00 AM until about noon. If you have a two meter hand held radio, please bring it. If you don't we will have some available for the class. This class is limited to 20 people.

If you plan on attending either class or have questions please email me at kkarr@....

4050. EchoLink/IRLP Presentation at ARGYL Hamfest (Please Pass On)

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-03-24 15:16:49 UTC
From: Michael J. Wolthuis
Topic: 4050 Message: 4050

I just thought I would send this information here so that local operators could come if interested or pass on to those who may find it of interest.

At the ARGYL (Lowell Youth Club, see www.argyl.org) swap on April 5th at 9:15AM EST. I will present a short 20 minutes (with 10mins questions) forum on EchoLink/IRLP/VoIP.

The presentation will include very introductory level overview, a short piece on how IRLP and Echolink are tied in with Google Earth, the tie to APRS and tactitcal communications and I will also distribute a list of Echolink and IRLP weekly nets as well as local repeater frequencies that have IRLP, EchoLink or both.

Additionally, if time allows we may run a few example contacts via local repeaters and people at the swap on those repeaters for fun.

If you are familiar with EchoLink and IRLP, but have never seen the Google Earth add-ons this will be fun even for the advanced user.

Hope to see you all there and supporting the Local Youth Hamfest!

Topic: 4051 Message: 4051

Hi all,

I sold my rig with the promise of getting another rig when the guy decided to back out at the last minute. Now I am stuck with NO radio! I DO NOT have much money as I didn't get a lot for FT-840. I would like to buy locally if at all possible as I don't know if I will have enough for shipping on top of a rig. I am looking for anything with digital readout as I have a hard time reading analog. Something like another FT-840, Icom 718, FT-890. It does NOT have to have a built in tuner as I already have a manual tuner.I will have the money on the 3rd. I do have a small down payment if needed. Please email me if you or know of anyone selling a rig.

Thanks,

Allen/KD8FXB

Don't know your specific needs, but the Grand Rapids ARA has an open radio room @ the W8DC shack 1050 Fuller Ave NE, Grand Rapids, MI 49503, 1/2 Block South of Leonard on Fuller NE (that's the Red Cross building).every Wednesday evening from about 7 p.m. to about 9 p.m ? interest. I'm sure if you'd specify your particular needs for basic operating one or more of the Olde Tymers who attend would be happy to form a class. Or, any of your hams who'd like to see a station in actual operation are more than welcome to just drop in and do some operating.

We did have a class on formal traffic handling, run by WD8USA, a few weeks ago, and either Joe or I would be willing to lead another such course.

Another way to learn is to check into the West Michigan Traffic Net on the linked repeater system, Sunday, Monday, Wednesday, and Friday, at 9 p.m. Eastern Time.

Topic: 4051 Message: 4066

Well all an update on the situation. He still hasn't called me back
but now I know why. He sold the equipment right after we talked an
made the deal on the phone. Found out who bought them and working out
a deal on the FT-890 :)

I would not touch that rig for lovin' nor money.
Does not pass the smell test. But that is...

Just MY take. // JHR ///

4068. An Exotic Island for Radio

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-03-26 13:27:35 UTC
From: Bill
Topic: 4068 Message: 4068

All:

It might be about the right time to reactivate your W8ZHO Yahoo Group account. The Muskegon Area Amateur Radio Council is planning a trip to South Manitou Island this summer. It is hoped that some of the planning can be facilitated on their group site. Stop in, lurk, contribute, attend, and help make this a great event for our local hams.

Bill, AB8SC
MAARC guy

4069. Cadillac Swap - May 3, 2008

Yahoo group: WestMichiganHams (2006 — 2008)

Modification to what Bill posted.
It is the Muskegon Area Amateur Radio Council's Venturing Crew that is planning the trip. The youth Activity Planner, Crew Associate Advisor of Program and the Crew Advisor are spear heading this. This is the crew's Super Activity for 2008.

If you wish to know more, come to the next MAARC Club meeting or one of the crew meetings.

Best Regards,
"Doc" AC8AL
MAARC Secretary and
MAARC Venturing Crew 9050 Committee Chair

4073. Tulip Time Festival 2008

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-03-28 18:04:05 UTC
From: Steve Vander Hill
Topic: 4073 Message: 4073

Hello, it might not feel like Spring is just around the corner but it will be here very soon, with Spring's arrival comes the 2008 Tulip Time Festival. As in the past the Amateur Radio Operators and the American Red Cross will be providing support along the parade routes during the three Tulip Time parades.

The first parade is scheduled for Wednesday, May 7, which we will need twelve Amateur Radio Operators to work as a Team with two American Red Cross First Aid Responders in covering a one block section of the parade route. Along with two Net Control Operators, we will need a total of fourteen Amateur Radio Operators, during the time frame of approximately noon until 3:30pm.

The second parade is scheduled for Thursday, May 8, which we will need the same number of Amateur Radio Operators as the Wednesday parade, during the same approximate time frame. The rain date for this parade will be Friday, May 9, 2006.

The third, the largest, and the longest parade is schedule for Saturday, May 10, which we will need twenty-four Amateur Radio Operators to cover a one-block section of the expanded parade route, along with two-three Net Control Operators. Also during this parade we need packet radio stations setup and operating at the American Red Cross Tulip Time Headquarters, Holland High School, and at Net Control.

Also for the Saturday parade, Amateur Radio Operators are needed to assist with parade lineup. This group will be working within their own net, and on a different frequency than the parade route Teams. We need approximately ten operators, six assigned to specific Division Parade Marshals, one to work with the floats, one to assist the TV Crew with their coverage, one to work with the cars, one to work directly with the Grand Marshal, and two Net Control Operators. Adding up the various activities on Saturday, we need approximately forty Amateur Radio Operators just to cover what we currently know needs to be covered.

As one can see, this is large operation in which one Club or Group cannot handle on their own. Please we need your help in getting the word out to all area Amateur Radio Operators of this need. Many have done this festival for years and have their favorite spots to serve. If you are willing to serve, and have a favorite spot, please let me know I will to my best to assign you to that specific position. For those that are new to the hobby or those that have sat on the sidelines in the past years, please consider giving it a try. It is fun, and is a great way to brush up on your net operating procedures while providing a highly visible community service.

If you're interested in volunteering, please provide me with you full name, call sign, physical limitations or special needs, contact phone number, email address, and any special assignments you would like to cover. Please email Dave Lamer WA8RSA directly at wa8rsa@... if you're interested in working the parade line-up on Saturday.

Thank you in advance!

Best regards,

Steve Vander Hill - N8UJD

Ham in a day!

Get your Amateur Radio License in just one day!

Sponsored by the:

Kent County Radio Amateur Civil Emergency Service

No Techno-Babble needed, this class is for anyone who wants their amateur radio license

Since 2006 more than 325 people have taken this class and passed!

Date: Sunday April 27th 2008

Cost: 35.00 Includes license Fee

Location: Red Cross 1050 Fuller Ave NE

Pre-Registration is required to reserve a spot in the class

Time: 1:30 PM - 7:30 PM

Testing will start at 6:30 PM

To register http://kcraces.net/signup/hiad.php

Questions: jnawrot@... <mailto:jnawrot%40kcvrm.net>

Under 16 must be accompanied by an adult!

Bring either drivers license or 2 pieces of identification

Coffee will be provided! Dress comfortably!

Small Print: This class uses memory retention, everyone learns differently. Class is not a guarantee to getting your license.

4075. W1AW TO CELEBRATE WORLD AMATEUR RADIO DAY AS NU1AW

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-03-28 18:37:41 UTC
From: Hank Greeb
Topic: 4075 Message: 4075

From The ARRL Letter, Vol. 27, No. 12. March 28, 2008

==> W1AW TO CELEBRATE WORLD AMATEUR RADIO DAY AS NU1AW

Each year on the anniversary of its founding, April 18, the International Amateur Radio Union (IARU) marks World Amateur Radio Day <http://www.iaru.org/rel030418.html>. On this, the 83rd anniversary of its inaugural meeting in Paris, the IARU dedicates World Amateur Radio Day to the radio amateurs, educators and administrators who use Amateur Radio to support technology education in the classroom.

To call attention to the occasion in advance, ARRL staffers will be activating W1AW in the CQ WPX SSB Contest <http://www.cqwpx.com> this weekend (March 29-30) using the IARU club call sign NU1AW. By celebrating the event, staffers hope to provide an opportunity for hams worldwide to put NU1AW in their logs, chase the WPX award <http://www.cq-amateur-radio.com/cqworldwidewpxawards.html> and learn about HF propagation as the world turns through day and night not once, but twice! Springtime propagation near the equinox is enhanced on the HF bands, even during the Solar Cycle minimum, so it's worth taking a listen even if the HF bands have been quiet lately.

This year's theme for World Amateur Radio Day is "Amateur Radio: A Foundation of Technical Knowledge." What better way to express the theme than by engaging in one of the largest international radiosporting events. ARRL Contest Branch Manager Sean Kutzko, KX9X, said, "If you haven't tried HF contesting or the WPX contest, the general format is to exchange a signal report (a simple '59' will do nicely) and a serial number (the number of the contact in the contest for you). The contest Web site spells out the way to compute your score, but the fun of this contest is to contact as many different prefixes as possible. For example, NU1AW counts as the NU1 prefix and KX9X counts as KX9. If you're new to HF, your prefix might be one sought after by those calling CQ! The WPX contest also features a 'Rookie' category for new radiosport folk, so be sure to send in your log as described by the rules -- it's easy!"

World Amateur Radio Day is also an opportunity for publicizing Amateur Radio to the interested public that may not be familiar with ham radio activities. Radiosport is an excellent way to introduce our service to teachers and students, as well. Competitive activities are an important focus for students to take the opportunity to ask questions about how signals get "from here to there" while watching hams make rapid-fire contacts around the world or even making a contact or two themselves, Kutzko said.

"NU1AW is not expected to be seriously competitive in the event," Kutzko explained, "but will make every attempt to be on the air as propagation warrants, so we hope to hear you marking the day and making World Amateur Radio Day a part of your springtime ham radio operation."

4076. Tool Max this week

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-03-28 18:50:33 UTC
From: Tool Max Ind. Supply
Topic: 3847 Message: 4076

Check out our New Web sight at www.toolmaxonline.com Let me know what you think.

No New items this week I need some, bring them in.

We have Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other NEW items in Stock

14 Amp Jetstream Power Supply $55
28 Amp Power Supply $90 With Meters out of stock now $110
45Amp Power Supply $170
Lighting Arresters $21.50 ea
HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $20 each
New SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
RG-58 Cable .25 per foot
RG-8 .$1.00 per Foot
RG-8X Coax Cable .50 per Foot
75 ohm Cable 9040 International Wire and Cable .35per foot
PL-259 Connectors $3.25 ea adadapters for RG-58 or RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
2 Amp Power Supplies good to power Hand Held $8
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's

We are the only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.

Technician Class $18.95
General Class $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Ramsey Kits for Kids (or Adults)

300 in 1 Electronic Lab $70
Bell Action Kit $9
Motor Action Kit $8
LED Binky Kit $8
Police Siren Kit $8
Electronic Dripping Faucet $10

LED Strobe Light with Case $45
AM Broadcast Transmitter Kit with Case $35
Tri-Field Meter $64

Other Used Equipment on Consignment
1 SMC 7004BR 4 port Computer Hub $5
1 Otto Head Set with Mic $5
1 MFJ hand mic for HT $5
1 IC 706 interface cable unit to use Power Amp $20
1 Set Husler HF Antennas 80m/40m/15m $30
1 RC 432 long wire antenna on a spool $15
1 Home brew 2 m/440 pipe antenna $15
1 NC 60B Yaesu 15 volt Nica Battery Charger $5
1 GR-213 Holux GPS Receiver for USB port $40
1 Box of Large Compactors 10-12 pc total $5
HP PDA Pocket PC Model Jornada 545 16MB Ram Color PDA $100
Paum Zire Black & White PDA $30
Radio Shack PRO-94 1000 Channel Handheld Trunking Scanner New Price $70
Arrow 222 5 Element 220mhz Beam $25
1 Ampprobe Clamp-Pn Meter $15
1 Sencore SG-165 AM-FM Stereo Analyzer $30
1 GW GDM 8135 Digital Multimeter $30
MFJ-202B Noise Bridge $40
PC-1A Kenwood Phone Patch $40
#425 B+W Low Pass Filter $15
MFJ-704 Low Pass Filter $20
Ringo Ranger 2 meter antenna $35
11 Element 2 meter Beam $45
Mixed box of short length coax cable with PL-259 Connectors on end $1 each
JT776SMA HT Antenna $19
IC-255A 2 meter Radio with no tone board Like New from 1982 Good Packet Radio $45
Tubes A great Assortment of tested used Tubes $1-$4 each
B&K Model 4011 Precision function Generator $60
B & W Antenna Tuner VS-300A $40
RCA Volt Ohm Meter $25
Barket & Williamson Low Pass Filter $5
Speakers $2
Barket and Williamson Rotary Inductor and Counter for Antenna Tuner $50
Center Insulator for HF antenna $5
LED Emergency Light $10
Motorola consolette Base Station for packet set up on 145.090 $45
MFJ-722 Notch Filter $30.00
B&W 550A 5 Coax switch unit $10
M1000 Regency 10 Ch Scanner Works great $25
Low Pass filter $5
EICO Solid State FET/TVM Model 240 VOM in good condition $40
2-9 inch clamps to mount antenna on large poles or vent pipes $5.56 each and less for smaller ones

Heathkit items in stock

Heathkit SA-2040 1KW Tuner $125
Model HD-19 Hybrid Phone Patch for $5
2 HD-15 Phone Patch for $5 each
1 Model 10-17 Oscilloscope $40 Make offer
Heathkit Drive Belts for SB-100, 101,102, HW 100,HW101 $3

Tool Max Industrial Supply is the Tool and Ham Radio retail store on Schamber Dr just off Pontaluna Rd and US-31 just north of the old Hob Knob or Michael's Restaurant (Now tore down) in Muskegon . We have tools, industrial suppliers and Ham radios parts for sale. For more information call or e mail Tom KB8VEE at 231 798-7898 I am in the Store from 8:30AM-4:30PM Monday-Friday. Stop by and see me for all your Ham needs.

4079. REMINDER: THIS SAT -FREE BREAKFAST plus next MINI-SWAP for 2008, at HARC's T&T center.

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-03-31 00:42:53 UTC
From: Tom VanderMel KB8VEE
Topic: 4079 Message: 4079

.

Greetings all,

FREE BREAKFAST / MINI-SWAP - THIS SATURDAY!!!!!!!

We've received numerous requests since our last one, to hold another, thus in view of that fact HARC shall be hosting a FREE* Breakfast (bacon, eggs, sausage, pancakes, coffee plus a few 'extras') and FREE Mini Swap this Saturday. Three world class top chefs (specially signed up) will be doing the honors in our kitchen (Allen WB0STV, Kim Lobart N8KAL and Ken Groom ZR5AAD/W8).

(*Whist the breakfast is free we always welcome any donations on the day, to help us offset expenses of large quantity of food purchases - thanks in advance*)

So bring a huge appetite, bring some surplus radio gear to dispose of or simply don't bring anything except yourself but be sure to attend, and join us for another great day of fellowship plus bargains. Non amateurs are also most welcome.

Details follow;-.

Free Parking available on site. DATE: SAT 5th APRIL 2008 (Talk in : 147.060 94.8pl) SET UP TIME: SAT 09H30 - 10h00 Note: Friday night prior a limited opportunity exists between 19h00 - 20h30 to pre-setup your table if this works out better for you. SWAP TIME: SAT 10h00 to 1.00pm BREAKFAST served : 09h30 onwards VENUE: 280 East 8th Street, Holland (right next to Holland Chamber of Commerce). ENTRY FEE : **FREE** TABLE COST : **FREE** HARC will provide once again.... * FREE table space * FREE trunk swap parking space (weather permitting) * FREE parking * FREE entry * FREE coffee * 50/50 Draw (To offset our new buildings upkeep, donations from sellers /visitors arealways very much appreciated!) Bring what ever surplus radio / computer equipment to sell / swap. Lastcouple of months a lot of equipment changed hands! Turn that surplus gearinto cash. We look forward to seeing everyone there. ANY QUESTIONS:Please contact HARC Building Manager - Ken ZR5AAD/W8Cell Ph: (616)726-3929E-Mail : rafaviator@...

4080. April 1st Peak of Solar Cycle 24

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-04-01 13:57:04 UTC
From: Hank Greeb
Topic: 4080 Message: 4080

SOLAR MAX RESCHEDULED:

Impatient with the quiet sun, NASA researchers have rescheduled solar maximum.

The peak was due in 2012, but now it's going to happen this month. "We've launched millions of dollars worth of spacecraft to study solar activity, and what are we getting? Puny little A-flares and feeble old sunspots," complained a high-ranking source at NASA headquarters.

"We need some real explosions! Rescheduling Solar Max should solve the problem."

News of the shift was announced on April 1st.

Note: If you believe this was just made up by me, see http://www.spaceweather.com/

4081. Michigan D-STAR Region One Brief Status Update

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-04-01 15:24:42 UTC
From: Mark Thompson
Topic: 4081 Message: 4081

----- Forwarded Message ----
From: Jim Kvochick <kvo@...>
To: MIDSTAR@yahoogroups.com
Sent: Tuesday, April 1, 2008 9:59:00 AM
Subject: [MIDSTAR] Michigan D-STAR Region One brief status update

The first D-STAR system purchased as part of the Region One Homeland Security Grant has been installed and is operational at a temporary location.

As you may be aware, the Region One Homeland Security grant provided funding to purchase D-Star repeaters, antennas,feedline, duplexers, gateway hardware, and radios for deployment in the 9 counties with the Region One borders.

Those counties are:

Clinton County KD8IEI
Eaton County
Gratiot County KD8IEK
Hillsdale County KD8IFO
Ingham County
Jackson County
Lenawee County N8TTH
Livingston County W8LIV
Shiawassee County

Livingston County has temporarily installed their D-STAR repeaters on VHF and UHF at the Livingston County EOC while their permanent site is being upgraded. You may access the VHF system (W8LIV A) on 145.320 MHz. You may access the UHF system (W8LIV B) on 444.0375 MHz. The D-STAR Gateway system is currently NOT installed.

For further information, contact Jon Harris, KC8VAB (KC8VAB@ARRL. NET).

Looking forward to the remainder of county deployments within Region One!

73

Jim WB8AZP

You rock. That's why Blockbuster's offering you one month of Blockbuster Total Access, No Cost.

Reminder, the ARGYL Hamfest is this Saturday, April 5, Lowell High School. Due to the nasty weather during the hamfest in December, this event has been moved to April. For the majority of you that didn't make it last December, This Saturday's weather is sunny in the 40s. See you there!

73 Jack NY8D

From the hamfest website http://www.argyl.org/hamfest.html

The date of our annual hamfest has been moved to April in search of better weather! Be sure to mark you calendars for Saturday, April 5th 2008. It opens at 8:00am.

You can expect the 'normal' ARGYL hamfest just at a different time of year! Our Three main vendors; Tower Electronics, Amateur Accessories, and Elmers Ham Shack will all be there.

Need any more info click the E-Mail Al link under Advanced Sales/Information.
Admission: Adults- $5.00
Elementary, Middle School, and High School Students- Free
Advanced Sale Special: Two 5' tables & Admission- $12.00
One 5' table & Admission- $9.00
At the door: Two 5' tables & Admission- $15.00
One 5' table & Admission- $10.00

From: Hank Greeb
Topic: 4087 Message: 4087

I'm going to the hamfest - it's very rarely that one gets to see an entire group of young hams these daze! Many/most of us are olde fogeys, or are nearing that "magical age" where we turn from energetic youngsters into the older set.

I'll be a few minutes late, because our church is having a pancake breakfast starting at 7:30 a.m., but I'll be there by 9 a.m. for sure.

This is one hamfest I wouldn't miss, unless there were 8" or more of sn*w on the ground like in December. In December it took me all morning to dig out of the sn*w with my small farm tractor.

Come one, come all! Support the youth of our Amateur Radio Service/Hobby!

Mark thanks for pasting that in. Those of us that read the list on
the Web cannot see attachments, as you know.

Pretty exciting, huh?! Here it is, 2200 local, and I'll have to wait
until morning to call AES about these :{

Oh, was that a one day special???

Laryn K8TVZ

--- In WestMichiganHams@yahoogroups.com, <k8mhz@...> wrote:
>
> AES is selling digital antennas with analog to digital converters
that look like baluns at the base of the antenna. The good news is
that they allow regular analog radios to be used with digital
repeaters. The bad news is that they are battery powered and the
batteries only last a year or so. AES recommends changing them twice
a year along with smoke detector batteries each time we have a time
change. I have heard that the more digital the repeater is, the more
power it takes to convert to analog and the harder it is on batteries,
hence the recommendation of changing them twice a year.

2008 Spring VHF/UHF Sprints
Sponsored by
John Kalenowsky, K9JK, and Steve Gilmore, W4SHG
John Kalenowsky, K9JK, and Steve Gilmore, W4SHG, with support from Ham Radio Outlet of Virginia, are pleased to announce the 2008 Spring VHF/UHF Sprints. Everyone is encouraged to participate, even if only in a small way. The rules have intentionally remained simple, and the contest's focus continues to be for single operator, single transmitter entries, both "fixed" and "rover". Again we will have for 2008, the "Rookie" classification, to recognize 'first-time' participants, from their own stations OR as "guest-op" at an "experienced" station to introduce newcomers to weak signal vhf/uhf operations and, hopefully, encourage their participation in the future. Guidance from an experienced operator for a "Rookie" is permitted as long as entries in this class are clearly identified by comments in the SOAPBOX: lines for Cabrillo formatted logs or on the Summary Sheet for paper logs. The detail should identify who is the "Rookie" and list any "experienced" operator(s) who were
present.
Please note that, for 2008, we still have the shortened submission date window and STRONGLY encouraging electronic log submissions using the Cabrillo format, but we will continue to accept paper logs (though the shorter deadline will apply to paper log submissions as well). A summary Sheet which includes your total contacts, multipliers and calculated score WILL BE required with Paper Logs (see sample at:
http://www.sysadnet.com/vhfsprintsummary.pdf). Such summary info is not required for electronic logs but may be included in the SOAPBOX: area of the Cabrillo formatted log if participants so desire. Be sure to include the grid square you operated from in either your log or summary sheet.
Please take a look at the sponsors for this year's events at
http://www.sysadnet.com/springsprintsponsors-2008.htm. Several sponsorship opportunities are still available. If interested in becoming a prize sponsor or sponsoring a plaque for the events in 2008 (or in the future), please email us at springsprintquestions@...
** Log submissions for 2008 may be viewed here. **
** Awards for 2007 may be viewed here. The complete scores database for 2007 can be viewed here.

We wish you the very best of VHF! 73,
John Kalenowsky, K9JK, and Steve Gilmore, W4SHG

---

1. Object: To work as many amateur stations in as many 2 degree by 1 degree grid squares as possible, using authorized amateur frequencies on the 50, 144, 222, 432, 902 MHz and above bands.
2. Contest Period:
2.1. - 144 MHz
The 144 MHz Sprint will be from 7 PM until 11 PM local time on Monday, April 7, 2008.

2.2. - 222 MHz
The 222 MHz Sprint will be from 7 PM until 11 PM local time on Tuesday, April 15, 2008.
2.3. - 432 MHz
The 432 MHz Sprint will be from 7 PM until 11 PM local time on Wednesday, April 23, 2008.
2.4. - Microwave (902+)
The Microwave Sprint will be on Saturday, May 3, 2008, from 6 AM until 1 PM local time. This includes all Amateur frequencies above 902 MHz. Please include band data in summaries and logs. NOTE: use of Liaison Frequency is encouraged.
2.5. - 50 MHz
The 50 MHz Sprint will be from 2300Z Saturday, May 10, until 0300Z Sunday, May 11, 2008.
3. Exchange: Grid-square locator - PLEASE EXCHANGE and LOG SIX-Character Grid Locators where possible. Correct exchange of FOUR-Character Grid Locator is the minimum requirement for a valid contact but we'd REALLY like to see SIX-Character locators exchanged and recorded in the submitted logs.

What's that, you say you have no clue what your SIX-Character Grid Locator is? To assist you with that, please try the following...
Enter your FOUR-Character Grid Locator here: [input] [input]
When you click the "Show me my Grid Square!" Button, you will be presented with a Google Map showing the borders of the 2-degree by 1-degree FOUR-character Grid Square that you entered. You can then navigate as well as Zoom in and out using the controls at the upper left of the screen. When you click a point on the map, however, the Latitude and Longitude of that point ALONG WITH THE SIX-Character Grid Locator for that point will pop up in a text balloon and the border of the SIX-Character Grid Locator will be shown. This is provided as a service to the Amateur Radio Community by Laurent/Larry Haas, F6FVY, using the Google Maps API. Thanks to Larry and Google! Try it, we think you'll like it!
4. Scoring:
4.1. QSO Points: Count one point for each complete QSO.
4.2. Multipliers: The total number of different FOUR-Character Grid Squares worked. Each FOUR-Character Grid Locator represents a 2 degree by 1 degree area on the earth's surface, the SIX-character designators are just sub-divisions of that. So, to be clear, if you work a station in EN53bj and another in EN53we, that is only ONE Multiplier, EN53.
4.3. Final score: Multiply QSO points by multipliers. Each Sprint is scored separately.
4.4. Rovers use same QSO Point and Multiplier criteria but scoring for Rovers is cumulative, total # of multipliers worked from each grid activated multiplied by total # of complete QSOs from each grid activated. Segregation of rover logs by grid activated is no longer required as long as the log makes it clear from which FOUR-Character grid locator each contact was made.
Example: Scores from EM98 5 qso's , 3 grids / EM99 10 qso's, 4 grids / EM89 3 qso's, 2 grids.
Total score would be 18 qso's x 9 grids = 162 points
4.5. Microwave Sprint scoring is cumulative, total # of grids worked from each band activated multiplied by total # of stations worked in each band activated.
5. Reporting: Logs (Cabrillo format preferred) must be received via e-mail or paper logs WITH summary sheet postmarked no later than following deadlines (roughly two weeks after the close of each event):
5.1. - 144 MHz - April 23, 2008
5.2. - 222 MHz ? May 1, 2008
5.3. - 432 MHz - May 9, 2008
5.4. - Microwave (902+) - May 19, 2008

5.5. - 50 MHz - May 27, 2008
6. Awards:
6.1. Certificates/Plaques (if sponsored) will be awarded as follows:
6.1.1. TOP FIVE individual scores for each of the five Sprint "band" events (Single-Op Fixed, Rover and Rookie will be considered for this ranking).
6.1.2. TOP FIVE cumulative Single-Op Fixed scores (adding scores together by callsign used from each of the events, up to 5, for which valid logs are received).
6.1.3. TOP FIVE cumulative Rover scores (adding scores together by callsign used from each of the events, up to 5, for which valid logs are received).
6.1.4. TOP FIVE cumulative Rookie scores (adding scores together by callsign used from each of the events, up to 5, for which valid logs are received).
6.1.5. If a plaque is not sponsored for a particular finish above, a certificate (similar to what other VHF Contest sponsors provide) will be sent. "Specialty" plaques will also be considered (such as for best finish in a region) if anyone wants to sponsor such (and can provide a clear criteria). Please contact John or Steve regarding that. To view what plaques have been sponsored (and criteria) for 2008, click here.
6.2. Prizes: As they are sponsored, prizes will be awarded based on criteria of the sponsor. As an example, the simplest criteria will be "random drawing from all logs received." To view what prizes have been sponsored (and criteria) for 2008, click here.
7. Submission of Logs:
7.1. By submitting a log, participants confirm that they have observed all contest rules, as well as all regulations established for amateur radio in their country and that their log submission is true and accurate to the best of their knowledge. Participants further agree to be bound by the decisions of the Spring Sprint sponsors.
7.2. Electronic Logs:
7.2.1. The "Cabrillo" log format is now the standard for the Spring Sprints.
7.2.1.1. Use the following names for the Cabrillo "CONTEST:" field:
For 144 MHz, use CONTEST: VHF-SPRINT-144MHZ-SPRING
For 222 MHz, use CONTEST: VHF-SPRINT-222MHZ-SPRING
For 432 MHz, use CONTEST: VHF-SPRINT-432MHZ-SPRING
For "Microwave" (902 MHz & Up), use CONTEST: VHF-SPRINT-MICROWAVE-SPRING
For 50 MHz, use CONTEST: VHF-SPRINT-50MHZ-SPRING
7.2.1.2. Until logging programs with 'official' support for these events become more available, the closest format is probably for the June or September ARRL VHF QSO Parties (as long as the logging program knows how to handle SIX-Character Grid Square input and can properly 'ignore' the 5th and 6th characters for Multiplier counting). It may be necessary to manually edit the "CONTEST:" line in the file and Claimed Score may be incorrect for bands 222 MHz and above but the QSO data should be correct.
7.2.1.3. E-mail logs to: springvhfsprints@... preferably using a "Plain Text" e-mail format, with ONLY "your call" and the "band" in the subject line (W4SHG 144 -or- K9JK MICROWAVE for example) and with the log file as an attachment named "<your call>.LOG" (e.g. W4SHG.LOG)
7.2.2. "Web-to-Cabrillo": Bruce Horn, WA7BNM, has graciously agreed to provide 'web forms' to facilitate generation and AUTOMATIC SUBMISSION of Cabrillo-formatted logs for the Spring VHF & Up Sprints at the http://b4h.net/cabforms web site that he maintains. You may have to scroll down the homepage a bit to the "Other Contests" area to find the ones for the Spring VHF Sprints and they may not be there until just before the actual contests. PLEASE consider using these to generate and submit electronically instead of submitting a paper log. Our thanks to Bruce!
7.3. Paper logs:

7.3.1. Paper logs must include a Summary Sheet and the log sheets themselves should include the following information:
Band (in MHz, e.g. 50, 144, 222, 432, 902. For above 902, change to GHz, e.g. 1.2, 2.3, 3.4, etc.)
Mode (e.g. CW, PH, DIG)
Date/Time (PLEASE indicate whether the dates & times are "local" or UTC)
Callsign SENT (can be listed at the top of a page OR on each line)
Grid Locator SENT (PLEASE give your SIX-character locator when known)
Other Station's Callsign
Other Station's Grid Locator (PLEASE ask for and record SIX-character when the other station provides it)
7.3.2. "Snail Mail" paper logs to:
Steve Gilmore ? W4SHG
11 Ryan Way
Stafford, VA 22554
Questions ? Email springsprintquestions@...

4093. Michigan QSO Party, Saturday, April 19

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-04-04 21:09:40 UTC
From: Hank Greeb
Topic: 4093 Message: 4093

The Michigan QSO party is Saturday, April 19, starting at 1600Z and ending at 2359Z.

It operates on all HF bands, 160 thru 10 metres, SSB and CW.

This is a fairly "laid back" contest, so please jump in and represent your county....

For details see http://www.miqp.org

Subject: [MIDSTAR] NMARES D-Star Repeater Project Update - from Jim Davis - KC8NTE

Northern Michigan's 7th District EOC's receive D-Star Equipment.

Good Day

FYI

There will be a free D-Star Presentation at the next NMARES meeting on
April 16th at 6:00 PM.

This presentation will be part of the NMARES monthly meeting held in
Elmira. The location for the meeting is listed below all are welcome
to attend coffee and treats will be provided.

MSP D/Lt. Hosh announced at the last 7th District Emergency
Coordinators meeting, 17 counties in Northern Michigan will be
installing D-Star Equipment in their EOC's - Emergency Operations
Centers. The new D-Star equipment purchase is being funded by a DHS -
Department of Homeland Security grant, that has been approved. Icom
2820-H dual band radios with D-Star Modules and GPS will be installed
in each counties Emergency Operation Center. This additional D-Star
equipment will enhance the Emergency Communications Capability in
Northern Michigan. D/Lt. Hosh is the Emergency Management Coordinator
for the Michigan State Police 7th District.

James E. Davis - KC8NTE
NMARES - Northern Michigan Amateur Radio Emergency Services Organization.
Assistant Emergency Coordinator for Emmet Cheboygan and Otsego Counties.
ARRL - Official Emergency Station, Official Observer and Technical
Specialist.

Thanks - 73 for Now

4097. D-STAR Presentation at Goshen Club Meeting on Tuesday, April 8th @ 7 pm

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-04-06 21:13:00 UTC
From: Mark Thompson
Topic: 4097 Message: 4097

The Tuesday, April 8th meeting of the Goshen Amatuer Radio Club (GARC) will feature an Overview & Introduction to D-STAR presented by Mark, WB9QZB.

D-STAR is an open protocol developed by the JARL and supports both Digital Voice & Data on 2m, 70cm & 23cm. D-STAR repeaters can be connected
to the internet via a gateway PC. Icom & others currently make products for D-STAR.

The meeting & presentation are open to all interested amateurs.

GARC meets on the second Tuesday of each month at 7 pm in Goshen, IN at the Homan Building (Activities Center on the Greencroft campus).

The GARC club house is located on the south side of Goshen, east of state road 15 or west of US 33 on college ave. Go to the enterance of Greencroft Retirement Center which is across from the save-a-lot grocery store. Turn and go south to the stop sign and turn right going around the circle drive to second street turn right and as you make the 2nd right hand turn you will see our 150 foot tower on the right. The club house is located to the south side of the tower in the Homan Activities Building. Main entrance to club house is on the east end of Homan Activities Building, name is on the glass of door.

Look forward to seeing you at the meeting.

More information about GARC is available at:

http://www.goshenarc.org/

More information about the digital modes is available at:

http://groups.yahoo.com/group/illinoisdigitalham/

You rock. That's why Blockbuster's offering you one month of Blockbuster Total Access, No Cost.

Hi Les -
Sorry I haven't answered sooner! Yes, I am on the Reflector, so I do get these notices, but really appreciate your letting me know about it. Wish I could have seen the work being done on the antenna - not that I would want to climb up anything like that, but it would be quite a "visual", as the worker got smaller and smaller as he went up. To do that work takes a special attitude, one I don't care to cultivate - too scary.

I still don't have a base station, but am now able to be heard from my driveway (with a magnetic antenna on the car). Someone told me that I could use that antenna in the house - just put it on the fridge, or clothes dryer. What do you think? In terms of safety, that is; don't want to try finding out if it's effective until I know it's safe!

Enjoy this spring weather!
Barb

Don't know if you get these emails or not so I'm forwarding this one on to

you FYI. He's referring to the 94 repeater.

Vince Schumacher Volunteer Liason,
Disaster Readiness & Response
(616) 456-8661 ext 3903
American Red Cross of Greater Grand Rapids

Low-cost comprehensive training
basic to advanced
June 11 - 14, 2008
The 2008 Michigan Training Institute is held June 11 - 14 at Calvin College in Grand Rapids.

Check out the announcement and enrollment package for the Institute. A convenient version is found on the Kalamazoo Chapter's website: www.greaterkzooredcross.org/mti. You can also find the package on our website, www.ggr.redcross.org, but it is not quite as user-friendly.

The whole package is 15 pages. Page 1 is the announcement; page 2 is the calendar of course offerings; pages 3 - 9 are course descriptions; page 10 is the application/enrollment form; page 11 is an application for on-campus lodging (check "No Lodging Required" if you will not need a place to stay on campus); page 12 and part of page 13 list the courses (check the boxes); pages 14 and 15 are Red Cross Form 5898H (used by the Chapter to endorse and rcommend a student for advanced courses).

Fill out the on-line application for the courses you want.
Print it and bring it or mail it to this chapter (not Kalamazoo) with your check for $25.00 payable to "American Red Cross." We will forward it promptly to the Kalamazoo chapter.

If you enroll before April 18, the total cost for all course sessions is just $25.00. It's an amazing deal! On offer: eight

advanced courses,* 23 basic courses, nine workshops, and more. The Computer Lab will be open for taking Red Cross web-based courses (for which you will need a user ID and password). Your twenty-five dollars even includes lunch each day!

* For advanced courses, you will need this chapter's endorsement on Form 5898H. Ask Debbie Jones or John Rottenberg.

PS : Your Volunteer Liaison, Vincent Schumacher, is looking for a few members to help make phone calls to keep in touch with DSHR and DAT members. Call 345-8661, extension 3903, to participate.

Hank,

Historically, the Ottawa County ARES/RACES group (OCEC) has supplied the communications for this even, with help from Hams from all over. The Holland Repeater on 147.06 has been used and the bikes would run through SW Kent and Allegan county to Holland on Saturday, spend the night at Hope College and then travel through Ottawa County back to SW Kent on Sunday.

Hank,

This year the dates are May 31 and June 1. Saturday morning the bikes
leave from Holland, travel south to somewhere near South Haven, and
return for overnight. Sunday morning leaving Holland, traveling to
the Spring Lake area, through the Hudsonville area, and back to Holland.

A number of hams are needed. It's a fun event, free food, full days,
good cause.

4106. Zapping Cancer Cells at 13.56 MHz on 60 Minutes This Weekend

Yahoo group: WestMichiganHams (2006 — 2008)

From: Mark Thompson
Topic: 4106 Message: 4106

Zapping Cancer Cells at 13.56 MHz on 60 Minutes This Weekend (Apr 10, 2008) -- John Kanzius, K3TUP, of Erie Pennsylvania, has been working on an RF-based treatment for cancer that is currently undergoing testing. According to ARRL Media and Public Relations Manager Allen Pitts, W1AGP, Kanzius is scheduled to be on the CBS news show 60 Minutes on Sunday, April 13 (keep in mind that the line-up could change). "While there never is a way to predict what shows and what ends up on the cutting room floor, John gave as many plugs to his ham radio background as he could in being the foundations of hands-on learning that led to his research and invention," Pitts said. Kanzius, a very active Amateur Radio operator, aided in the creation of the upcoming ARRL Technology and Amateur Radio public relations campaign. Read more about Kanzius and his ground-breaking idea to kill cancer cells with radio waves in the February 2008 issue of QST.

4107. Digital Seminar and a HUGE Day of Fun!

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-04-11 13:24:30 UTC
From: Bill
Topic: 4107 Message: 4107

Hey, radio people:

We're going to enjoy a seminar related to digital modes on HF radio. This seminar will be Saturday, April 19 at the Muskegon Area Amateur Radio Council's clubhouse. Google 2888 Scenic Drive, Muskegon for detailed directions. The seminar starts at 9:00 am. That's a week from Saturday.

Come early and we'll have fun with digital modes on HF. You'll see a little RTTY, PSK-31, and Slow Scan TV.

Hang around afterwards and we'll be knee deep into the Michigan QSO Party. The MAARC is going to have at least two Multi Single operations on the air. What, you don't know what multi-single means? FUN!!! And the Steak Fry dinner at 5:00 makes for a fine finale. Well, not the end as the QSO party runs until midnight local time.

Mark those calendars, set the alarm clock, grab a quick breakfast snack on the way, and come on out to the clubhouse. April 19 will be one HUGE and FUN day of radio.

Bill, AB8SC
MAARC guy

Gee... not good planning. I want to take full measure of the
QSO Party, and yet also want to attend the Digital Seminar.
Now... I must choose one or the other. Watching a few other
guys make contacts on the club rig... vs... working them on
my own rig with my new headset/mic combo... Hmmmm... Gee I
wonder what I will do....

Shoot.

Thank you for considering my view.

Oops!

I didn't intend for anyone to have to choose either the seminar or the MIQP. We can enjoy each as the seminar runs for a couple of hours before the start of the MIQP. We'll just have to shoehorn in a lunch between each. Or sked a rare county for early afternoon. Hi

FCC ADOPTS RULES FOR DELIVERY OF COMMERCIAL MOBILE ALERTS
TO THE PUBLIC DURING EMERGENCIES

Washington, DC – The Federal Communications Commission (FCC) today adopted a First Report and Order (Order) that will support the ability of the nation’s wireless carriers to transmit
timely and accurate alerts, warnings and critical information to the cell phones and other

mobile
devices of consumers during disasters or other emergencies.
In compliance with the Warning, Alert and Response Network Act (WARN Act), today's Order adopts relevant technical requirements based on the recommendations of the Commercial
Mobile Service Alert Advisory Committee (CMSAAC) for the transmission of such emergency messages to the public.

During emergencies, Americans increasingly rely on wireless telecommunications services and devices to receive critical, time-sensitive information anywhere, anytime. Once fully implemented, the Commercial Mobile Alert System (CMAS) will help ensure that Americans who subscribe to participating wireless services receive emergency alerts when there is a disaster or
emergency that may impact their lives or well-being.

Wireless carriers that choose to participate in the CMAS will transmit text-based alerts to their subscribers. As technology evolves, the CMAS may eventually include audio and video services to transmit emergency alerts to the public. To ensure that people with disabilities who
subscribe to wireless services receive these emergency alerts, the FCC adopted rules that will
require wireless carriers who participate in the CMAS to transmit messages with both vibration
cadence and audio attention signals.

Consumers can expect to receive three types of messages via their cell phones and other mobile devices from participating wireless carriers, including:

· Presidential Alerts - national emergency-related alerts delivered to the American public that would preempt any other pending alerts;

· Imminent Threat Alerts - alerts with information on emergencies that may pose an imminent risk to people's lives or well-being; and

· Child Abduction Emergency/AMBER Alerts - alerts related to missing or endangered children due to an abduction or runaway situation.

-more-

Under the CMAS, subscribers to wireless services with roaming agreements will receive timely alerts, provided the subscriber's mobile device is configured for, and technically capable of,
receiving such emergency alerts from the network they are roaming on.
Participating wireless carriers will be required to comply with the rules adopted in the Order
today within 10 months from the date of announcement that a Federal agency has been designated
to collect and transmit the alerts to the wireless carriers.

Action by the Commission, April 9, 2008, by Commercial Mobile Alert Service First Report and Order (FCC 08-99). Chairman Martin, and Commissioners Copps, Adelstein, Tate and McDowell. Separate Statements issued by Chairman Martin, and Commissioners Copps, Adelstein,

Tate and McDowell. PS Docket No. 07-287.

Public Safety & Homeland Security Bureau (PSHSB) contact is Lisa Fowlkes, Deputy Bureau Chief, at (202) 418-7452.

-FCC-
News and other information about the Federal Communications Commission is available at www.fcc.gov.

THE COMMERCIAL MOBILE ALERT SYSTEM. Adopted rules necessary to enable Commercial Mobile Service alerting capability for Commercial Mobile Service providers who elect to transmit emergency alerts to their subscribers. Action by: The Commission. Adopted: 04/09/2008 by R&O. (FCC No. 08-99). PSHSB

Hello Everyone
I am looking for hams that have fully contained except the antenna
and power tracking units on the 2 meter aprs frq that would be willing
to let us use them for the upcoming Tulip Time parade to try and track
were the Emergency vehicles are along the parade route.
My Idea is to show emergency management how this tracking would be
helpful in emergency events and try to justify getting moneys to
purchase units that would be ready to track emergency units.
I am just checking at this time to see how many units would be
available to us before I find out how they could be hooked up to the
vehicles they would need to be on .
Please let me know by email to kb8odb@...

4116. Anyone for a QRP Outing?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-04-12 19:58:40 UTC
From: Hank Greeb
Topic: 4116 Message: 4116

QST de n8xx:

Anyone for a QRP-xpedition this month? I plan to go out "to the field" during the upcoming QRP To The Field "contest" on April 26. I'd welcome anyone who is interested to join me. The operation would start somewhere around 1500Z (11 a.m EDST) April. 26 and end well before 0300Z April 27 (11 p.m EDST April 26) Last year I shut down around 6 p.m. Complete rules are at http://www.zianet.com/qrp/2008/qttfruls.html

The "twist" to this year's event is to set up near a museum, advertise amateur radio, and make a few CW contacts on 40 thru 10 metres. There's a small museum in downtown Rockford, near where I live, and a nice park with a gazebo which will provide some shelter from the elements if there's any precipitation. There are also some nicely spaced, naturally occurring antenna masts in this park. (Some folks call these things trees, but we hams know their real utility!)

Plus, I'm amenable to a change in venue if anyone has a better idea of where to locate such a station. There are many Museums in the vicinity, I chose the one in Rockford for my own convenience, but I'm quite sure there would be others just as suitable or perhaps more suitable. Many museums are in downtown areas, and not near public parks, so it is difficult to find suitable antenna supports, etc. But, many smaller towns have museums - I'm aware of ones in Rockford, Cedar Spring, and Lowell, all of which appear to be suitable.

I've reserved the use of WQ8RP, the Michigan QRP Club's call for this event. Such a call is generally a "magnet" for operations during a QRP event.

Last year I operated from a parking lot near a Taco Bell Restaurant - because last year's event was "run for the border" where operators got extra multipliers for setting up near a Taco Bell operation. I made 96 Q's in 14 different States and provinces in about 6 hours of low key operating.

It's lots of fun. It's more fun as a group. Things can get a bit tiring if there's no relief in sight. Anyone wish to join in?

Please let me know.

Thanks, Laryn

I see that it's two loops from Holland to Holland two daze.

If some of us from the Grand Rapids area drap over to Holland on Saturday, will the MS folks put us up, or do we have to either find a motel or drive about 60 to 90 miles round trip back home and back to Holland again on Sunday? This might make a difference to some folks on whether they'd volunteer for one or two daze.

Please advise.

You will need:

* A 2 meter or dual-band HT (if buying new, I recommend the Icom IC-T7H Sport, $170 from www.randl.com)
* A cigarette lighter adapter for it
* A mag-mount antenna with appropriate adapter
* Sunscreen

4122. HARC General license class - May 5, 2008

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-04-15 19:51:03 UTC
From: Joe Veldhuis
Topic: 4122 Message: 4122

We tried to kick off our General class yesterday, but only one person showed up, so we are rescheduling the beginning of the class for the beginning of May.

If anyone out there has, or knows someone who has, a Tech license and wants to upgrade to General, the Holland Amateur Radio Club is offering a General license class. The class is free, study books are available for $20 from Ed Heyboer, KF8EV (eheyboer@...). Let either him or I know if you're interested!

Date: May 5, 2008 and the next 8-10 Mondays after that
Time: 1900h (7:00 PM)
Place: HARC Technology and Training Center - 280 E 8th St, Holland (42° 47' 24" N/86° 5' 40" W)
Directions: take Chicago Dr. west of US-31, look for blue house on the left just past the Chicago/8th merge, next to the Chamber of Commerce and across from Long John Silver's

At the same place and time, Chuck W8GCW is offering a beginners' CW class. So if you want to work DX without an amplifier, or just be able to identify repeaters, see him.

Spread the word!
-Joe, N8FQ

Hello, the purpose of this email is to share with you information as it relates to this years MS150 Bike Ride, which this year is being call "Bike MS: West Michigan Ride 2008".

The dates for the event are Saturday, May 31, and Sunday, June 1, 2008. Please find below the unofficial routes for the event as of today, they continue to be tweaked. The planners are currently planning on 8 SAG vehicles and 12 Medical Support vehicles, plus with a couple HAMS managing Net Control, we need at a minimum 22 Amateur Radio Operators for each day for the two day event.

Day One

May 31, 2008

Start: Holland High School, Holland, MI

Finish: Hope College, Holland, MI

Route opens at 7:00 AM and closes at 5:00 PM

There will be 3 routes ? 30 Mile, 75 Mile and 100 Mile

There will be 7 rest stops; one of them will be the lunch stop

Links:

30 Mile: http://www.mapmyride.com/ride/united-states/mi/holland/436925018

75 Mile: http://www.mapmyride.com/ride/united-states/mi/holland/633212723

100 Mile: http://www.mapmyride.com/ride/united-states/mi/holland/491090237

Day Two

June 1, 2008

Start: Hope College, Holland, MI (a portion of the 30 mile riders will start at Holland High School)

Finish: Holland High School, Holland, MI

Route opens at 7:00 AM and closes at 5:00 PM

There will be 3 routes ? 30 Mile, 75 Mile and 100 Mile

There will be 8 rest stops; one of them will be the lunch stop

The National Multiple Sclerosis Society, Michigan Chapter depends on communication professionals like you to insure such events are safe and efficient, and your support is greatly appreciated. Please consider volunteering for this event, it can be one day or both. Plus please spread the word among your Clubs, groups, and coffee tables of the communication needs for this special event.

If you would to volunteer, please provide me via return email your full name, call sign, email address, your preference as it relates to working in a SAG or Medical vehicle, working Net Control, or assisting in leading the amateur radio efforts of this worthy event. As additional information becomes available, it will be shared via email to those whom have registered to volunteer.

Thank you for your time and consideration.

Thanks, Laryn

I see that it's two loops from Holland to Holland two daze.

If some of us from the Grand Rapids area drap over to Holland on Saturday, will the MS folks put us up, or do we have to either find a motel or drive about 60 to 90 miles round trip back home and back to Holland again on Sunday? This might make a difference to some folks on whether they'd volunteer for one or two daze.

Please advise.

Perhaps HARC could open the Technology and Training Center for the radio volunteers staying the night. A lot more economical than hotel rooms.

4127. Annual Armed Forces Day Crossband Test

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-04-16 22:22:59 UTC
From: Dennis Harriss
Topic: 4127 Message: 4127

Annual Armed Forces Day Crossband Test Scheduled for May

The Army, Air Force, Navy, Marine Corps and Coast
Guard are co-sponsoring the annual
Military/Amateur Radio Crossband Communications
Test in celebration of the 58th anniversary of
Armed Forces Day
(<http://en.wikipedia.org/wiki/Armed_Forces_Day>AFD).
Although the actual Armed Forces Day is
celebrated on the third Saturday in May -- May 17
in 2008 -- the AFD Military/Amateur Crossband
Communications Test will be conducted on May 10
to prevent conflict with the
<http://www.hamvention.org>Dayton Hamvention?, scheduled for May 16-18.

The annual celebration features traditional
military to amateur crossband communications SSB
voice tests and copying the Secretary of Defense
message via digital modes. These tests give
Amateur Radio operators and short wave listeners
an opportunity to demonstrate their individual
technical skills and to receive recognition from
the Secretary of Defense and/or the appropriate
military radio station for their proven
expertise. QSL cards will be provided to those
stations making contact with the military
stations. Special commemorative certificates will
be awarded to anyone who receives and copies the
digital Armed Forces Day message from the Secretary of Defense.

Military-to-Amateur crossband operations will
take place on the dates and time in UTC on the
frequencies listed for each station on the Army
MARS Web site. Voice contacts will include
operations in single sideband voice (SSB). Some
stations, depending on propagation and manning,
may not operate the entire period. Participating
military stations will transmit on selected
Military MARS frequencies and listen for Amateur
Radio stations in the Amateur bands. The military
station operator will announce the specific
amateur band frequency being monitored. Duration
of each voice contact should be limited to 1-2 minutes.

Look for
<http://www.netcom.army.mil/MARS>schedules and

frequencies of participating military stations to
be published in May on the Army MARS Web site.

John:

Don't know what kind of "base station" you have, but typically I've used my mobile station and a mag mount. The mobile station has more power (I typically run it at about 20 watts, a mid range, but can go up to 50 watts if in a hole). A 5/8 wave mag mount is almost a necessity in some areas of the usual routes.

One needs, in any case, a 12VDC adapter with a plug for a cigarette lighter outlet. Even if you're using a handheld (which works in probably 90+% of the locations, you can run the internal batteries down if you don't have a charger.

Thanks for the uptake. All very helpful input.

"base station" is an Omni VII AT HF transceiver.
I am in process of selecting VHF/UHF equipment.

Hello Steve,

Yes, we provide housing free of charge at Hope College for all volunteers on Saturday night and Friday night (if needed). In addition, we provide a light breakfast on Saturday morning, food and lunch along the route on both days, buffet dinner on Saturday night and buffet breakfast on Sunday morning and a fantastic BBQ at the finish line on Sunday. All meals are provided regardless of where you stay overnight.

Please let me know who will need a room one week before the event. In addition, please let me know who each person wants to room with.

Please let me know if you have any questions. Thank you very much for your support.

(CNN) -- A magnitude 5.4 earthquake, centered 127 miles east of St. Louis, Missouri, shook southern Illinois at 4:36 a.m. (5:36 a.m. ET) Friday, according to the U.S. Geological Survey.

There were no immediate reports of damage, according to USGS spokeswoman Jessica Sigala.

The epicenter of the earthquake was about 3 miles below ground and 41 miles north-northwest of Evansville, Indiana.

People as far north as Chicago and as far west as St. Louis reported feeling the quake, Sigala said

Thank you to Tom, W8AMZ and his cadre of helpers. They did a wonderful job of preparing our supper last evening. And the turn out! We saw lots of our friends. And not all of them were hams! Steak dinner at the clubhouse with friends just can't be beat.

A hint: When you hear that W8ZHO is having a dinner clear your calendar and get out to the clubhouse. You won't be disappointed!

Thank You, Tom!

Check out our New Web sight at www.toolmaxonline.com Let me know what you think.

No New items this week I need some, bring them in.

We have Antennas, connectors, and mounts from Tower Electronics. We are a Dealer for Tower and have put them in Stock.

Other NEW items in Stock

14 Amp Jetstream Power Supply $55
28 Amp Power Supply $90 With Meters out of stock now $110
45Amp Power Supply $170
Lighting Arresters $21.50 ea
HF Antenna 20 Meter, 40 Meter, 75 Meter Fiberglass Hamsticks in Stock $20 each
New SWR Watt/Power & Field Strength Meter for 1.7-150 MHz in Stock $30
J Pole Antennas in Stock $15
The Te-Ne-Ke code key by the North Ottawa Club $35.00
RG-58 Cable .25 per foot
RG-8 .$1.00 per Foot
RG-8X Coax Cable .50 per Foot
75 ohm Cable 9040 International Wire and Cable .35per foot
PL-259 Connectors $3.25 ea adadapters for RG-58 or RG-8X $1.10 ea
BNC - SO-239 Connectors $2.50 ea
Double Female Connectors $2 ea
2 Amp Power Supplies good to power Hand Held $8
Digital Volt Meters $5.00
Heavy duty 12 Volt Socket to Cigarette lighter plug

We also have Diagonal Pliers, Digital Multi Testers, Electrical Tape,Precision Screwdrivers Sets, Soldering guns, Irons and Industrial Batteries for your HT's

We are the only stocking Dealer in Michigan for W5YI Gordon West Study Manuals.

Technician Class $18.95
General Class $20.95
Extra Class $21.95
FCC Part 97 rule book only $3.95
ARRL Level 1 Amateur Radio Emergency Communications Course Level 1 books $16 each

Ramsey Kits for Kids (or Adults)

300 in 1 Electronic Lab $70
Bell Action Kit $9
Motor Action Kit $8
LED Binky Kit $8
Police Siren Kit $8
Electronic Dripping Faucet $10

LED Strobe Light with Case $45

To all radio amateurs

SB QST ARL ARLB008
ARLB008 Court Finds FCC Violated Administrative Procedure Act in BPL Decision

The US Court of Appeals for the District of Columbia Circuit today released its decision on the ARRL's Petition for Review of the FCC's Orders adopting rules governing broadband over power line (BPL) systems. The Court agreed with the ARRL on two major points and remanded the rules to the Commission. Writing for the three-judge panel of Circuit Judges Rogers, Tatel and Kavanaugh, Judge Rogers summarized: "The Commission failed to satisfy the notice and comment requirements of the Administrative Procedure Act ('APA') by redacting studies on which it relied in promulgating the rule and failed to provide a reasoned explanation for its choice of the extrapolation factor for measuring Access BPL emissions."

The Court agreed with the ARRL that the FCC had failed to comply with the APA by not fully disclosing for public comment the staff studies on which it relied. The Court also agreed with the ARRL that the Commission erred in not providing a reasoned justification for its choice of an extrapolation factor of 40 dB per decade for Access BPL systems and in offering "no reasoned explanation for its dismissal of empirical data that was submitted at its invitation."

The Court was not persuaded by the ARRL's arguments on two other points, on which it found that the Commission had acted within its discretion.

The conclusion that the FCC violated the APA hinges on case law. "It would appear to be a fairly obvious proposition that studies upon which an agency relies in promulgating a rule must be made available during the rulemaking in order to afford interested persons meaningful notice and an opportunity for comment," the Court said, adding that "there is no APA precedent allowing an agency to cherry-pick a study on which it has chosen to rely in part."

The Court continued, "The League has met its burden to demonstrate prejudice by showing that it 'has something useful to say' regarding the unredacted studies citation omitted that may allow it to 'mount a credible challenge' if given the opportunity to comment." Information withheld by the Commission included material under the headings "New Information Arguing for Caution on HF BPL" and "BPL Spectrum Tradeoffs." The Court concluded that "no precedent sanctions such a 'hide and seek' application of the APA's notice and comment requirements."

With regard to the extrapolation factor, the Court ordered: "On remand, the Commission shall either provide a reasoned justification for retaining an extrapolation factor of 40 dB per decade for Access BPL systems sufficient to indicate that it has grappled with the 2005 studies, or adopt another factor and provide a reasoned explanation for it." The studies in question were conducted by the Office of Communications, the FCC's counterpart in the United Kingdom, and were submitted by the ARRL, along with the League's own analysis showing that an extrapolation factor closer to 20 dB per decade was more appropriate, as part of the record in its petition for reconsideration of the FCC's BPL Order. The Court said that the FCC "summarily dismissed" this data in a manner that "cannot substitute for a reasoned explanation." The Court also noted that the record in the FCC proceeding included a study by the National Telecommunications and Information Administration that "itself casts doubt on the Commission's decision."

The briefs for the ARRL were prepared by a team of attorneys at WilmerHale, a firm with extensive appellate experience, with assistance from ARRL General Counsel Christopher D. Imlay, W3KD. Oral argument for the ARRL was conducted by Jonathan J. Frankel of WilmerHale. Oral argument was heard on October 23, 2007; the Court's decision was released more than six months later.

After reading the decision, General Counsel Imlay observed, "The decision of the Court of Appeals, though long in coming, was well worth the wait. It is obvious that the FCC was overzealous in its advocacy of BPL, and that resulted in a rather blatant cover-up of the technical facts surrounding its interference potential. Both BPL

and Amateur Radio would be better off had the FCC dealt with the interference potential in an honest and forthright manner at the outset. Now there is an opportunity to finally establish some rules that will allow BPL to proceed, if it can in configurations that don't expose licensed radio services to preclusive interference in the HF bands."

ARRL Chief Executive Officer David Sumner, K1ZZ, added: "We are gratified that the Court decided to hold the FCC's feet to the fire on such a technical issue as the 40 dB per decade extrapolation factor. It is also gratifying to read the Court's strong support for the principles underlying the Administrative Procedure Act. Now that the Commission has been ordered to do what it should have done in the first place, we look forward to participating in the proceedings on remand, and to helping to craft rules that will provide licensed radio services with the interference protection they are entitled to under law."

ARRL President Joel Harrison, W5ZN, concluded: "I am very pleased that the Court saw through the FCC's smoke screen and its withholding of valid engineering data that may contradict their position that the interference potential of BPL to Amateur Radio and public safety communications is minimal. The remand back to the FCC regarding their use of an inappropriate extrapolation factor validates the technical competence of Amateur Radio operators and especially of the ARRL Lab under the direction of Ed Hare, W1RFI. We are grateful for the work of our legal team and especially for the unflagging support of the ARRL membership as we fought the odds in pursuing this appeal."

> - Hamvention forums announced.
> - Do you want to be GLD Director or Vice Director?
> - Tentative schedule.
>
> +++ FCC must review BPL rules. +++
>
> In a decision released April 25, a three-judge panel of the US Court of
> Appeals for the District of Columbia directs the FCC to reconsider
> rules it made concerning technical rules for the operation of Broadband
> over Powerlines (BPL). This ruling came as a result of the lawsuit
> ARRL brought against the Commission. The case is identified as No.
> 06-1343. This decision is nearly as much as we could have wanted, and
> is a victory for ARRL and Amateur Radio.
>
> What is the practical meaning of this decision? It means that the FCC
> must reconsider its technical rulings concerning BPL and the technical
> bases for these rulings, and the level of interference that should be
> allowed. It also means that the Commission must make data it says it
> uses in reaching conclusions to all interested parties to review. In
> essence, FCC cannot hide data as it had done in issuing BPL
> regulations.
>
> We don't know the final cost of the suit, yet, but the Board had
> allocated $300,000 for it. This should indicate the great importance
> my 14 fellow directors and I placed on the suit. The effort and
> expense the Board authorized was made possible by members who
> contributed to the relevant ARRL fund drives over the last few years.
> Without these contributions the League would not have had funds
> available to wage a suit, let alone to wage the quality of action that
> proved good enough to win most of the points we made in our argument.
>
> Does this put a little different perspective on the "please donate"

> pleas Mary Hobart, N1MMH has been sending to each of us? Our money
> served a valued, precedent-setting purpose. Thanks to you who
> contributed.
>
> +++ Ohio amateur sounds the alarm! +++
>
> On March 25, Geauga ARA President Eric Bartholomew, KF8YK sent me an
> e-mail warning that an Ohio university had submitted a request asking
> the FCC to assign five frequency pairs in the 420-430 MHz band to it.
> He pointed out that the higher frequency of each pair was in the
> Amateur Band and not legally available for commercial assignment. The
> following is an abbreviated summary of how his warning very likely
> saved the university and the ARRL (i.e. you) a significant amount of
> money, effort and hassle.
>
> After re-reading the relevant portion of Part 97 of the FCC
> regulations, I initially thought Eric's assessment was not correct. To
> be certain, I forwarded his memo to ARRL President Harrison, W5ZN, CEO
> Sumner, K1ZZ and Chief Counsel Imlay, W3KD to obtain expert review.
> K1ZZ and W3KD promptly confirmed Eric's assessment. My problem was
> that I did not read FCC's commercial radio rules -- Part 30 in this
> instance -- which apply in this situation.
>
> Our unanimous view was that ARRL should voice a formal objection to the
> frequency assignment request to the FCC even though its denial should
> have been automatic. Even as the ink on this formal objection was
> drying, the FCC granted the university's request for the frequencies.
> The FCC in essence violated its own rules -- again.
>
> Counsel Imlay tossed our objection into the round file even before its
> final in-house review was completed. In its place, a formal request
> for review was sent to the Commission in its place.
>
> Concurrent with submitting the petition for review to the FCC, General
> Counsel Imlay notified the university administration of the problem.
> Its spokesman immediately offered to withdraw the request and to modify
> it by resubmitting it to cover frequencies that are consistent with FCC
> rules. In turn, ARRL agreed to withdraw our petition for review as
> soon as the university's revised petition was submitted. The problem
> had been the result of an error by a consulting firm.
>
> Arguments over frequency assignments typically cover long periods of
> time and eat many thousands of dollars. In this instance though,
> everyone acted promptly in good faith to avoid a potential, major and
> costly problem. All this was accomplished thanks to the watchfulness
> and action of KF8YK, and to the capability of ARRL that he called on to
> resolve the problem.
>
> Thanks, again, Eric. Good eyes! Thanks, also, to General Counsel
> Imlay for knowing the appropriate prompt action to take with the right

> people.
>

Attachments: 1 described; binary payloads are missing from this source WARC

This is interesting! I have confirmed there will be EM COMM exams for levels 1,2&3 at Dayton this year! If you are going you might want to try them and see if you can pass. They cost 14.00 a setting. A word of warning however-There are those that say not mentoring through the course as it is set up will lessen the value you get in the end. DE WD8USA ...-.-

From: Hank Greeb
Topic: 4145 Message: 4145

The ARRL has a Field Day locater on the web at

http://www.arrl.org/contests/announcements/fd/locator.php

It has only two sites within 30 miles or so of Rockford, Michigan at the present time. There are two listed in the Kalamazoo area, one in the Holland area. I'm absitively sure that there are more FD sites in the planning stages. This seems like a good way to encourage "drop in" operators who otherwise aren't affiliated with your club.

Please consider putting your location on this site. It's very easy to add and/or modify information on the site.

QST QST all clubs:

The IRS seems to have a new method of reporting for typical low budget non profit organizations. Typically, they didn't need to report unless their combined income was over a certain amount (I think the number was $25,000, or assets were above a certain amount (again, I think that number was $60,000) but don't hold me to these numbers, since I'm not an accountant. Anyway, they have a very easy form 990N, available on their web site at http://www.IRS.gov. It appears that all 501c-3 organizations, regardless of budget or assets, must file this form. There may be exceptions, but I'd heartily recommend that any ham club with IRS non profit categorization investigate I'm treasurer of a local section of the American Chemical Society Section, and the former treasurer, who filled out this year's 999N said it is very simple. He said it appears that the IRS wants only to keep track of where to send mail in case they have a question about the organization.

I have the instructions from the IRS web site if anyone needs them and/or can't find them on the irs web site.

Dear Local Section Treasurers:

As you are now aware, changes in IRS regulations require all local sections whose gross receipts are normally $25,000 or less to electronically submit Form 990-N

also known as the e-Postcard. The first e-Postcards are due on May 15, 2008 for tax years ending December 31, 2007.

Attached please find the instructions for the Annual Electronic Filing of Form 990-N.

If you have any questions, please do not hesitate to contact:

4149. Follow up - Instructions for Annual Electronic Filing of Form 990-N (e-Postcard)

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-04-30 21:55:58 UTC
From: Hank Greeb
Topic: 4149 Message: 4149

QST QST all clubs:

After receiving some flak from some offishials of ham clubs and other non profits to which I belong, I looked up the web site for IRS and found where the insttstructions for the 990N reside:

http://www.irs.gov/charities/article/0,,id=169250,00.html

A very important point on that page is:

Late Filing or Failure To File the e-Postcard

If you do not file your e-Postcard on time, the IRS will send you a reminder notice but you will not be assessed a penalty for late filing the e-Postcard. However, an organization that fails to file required e-Postcards (or information returns ? Forms 990 or 990-EZ) for three consecutive years will automatically lose its tax-exempt status. The revocation of the organization?s tax-exempt status will not take place until the filing due date of the third year.

So, you're not financially penalized for not filing, except that after three years the organization loses its non profit status, which could affect contributions.

Hello, take a look at the number of HAMS that live in Ottawa County that are not active or have never been seen taking part in any of the NOARC, HARC, OCEC, RACES, or Field Day activities.

Maybe this is the opportunity to do some Marketing?

4158. It Takes a Club by K1ZZ

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-05-04 21:04:38 UTC
From: Mark Thompson
Topic: 4158 Message: 4158

It Takes a Club

By David Sumner, K1ZZ, ARRL Chief Executive Officer

May 01, 2008

"Looking at variations in Amateur Radio licensing activity and new ARRL membership around the country, it's apparent that there are "hot spots" where newcomers are joining our ranks in relatively large numbers compared to other areas."

What does it take to make such a "hot spot"? One answer is that it takes a local radio club -- but not just any club. It takes a club that has made a commitment to reach out to the community or communities that it serves, with a program to bring friends and neighbors from a vague awareness of Amateur Radio all the way to being active radio amateurs.

Such clubs don't just happen. It takes vision, leadership and a lot of hard work. It takes club officers and members who are willing to venture beyond their normal comfort zone. It takes a welcoming, supportive and non-judgmental attitude on the part of everyone in the club that a newcomer is likely to encounter.

The good news is that once you have such a club it becomes -- almost -- a perpetual motion machine. Here's how it works.

Assuming that your community has a radio club and that you're a member, the first step is to develop a culture of outreach and welcome within the club. This takes conscious effort, especially if your members are in the comfortable rut of talking to the same group of friends all the time.

Imagine that you're listening to the club's repeater for the first time, as an amateur who is either new to the community or a new licensee. Would you feel welcome to join in the conversation, or would you feel that you would be regarded as an intruder? Now, imagine that you're attending a club meeting for the first time. You walk in and see knots of people talking among themselves. Would anyone greet you and introduce them-selves or would you be left standing by yourself? Before you're ready to make a serious outreach effort you must be able to answer these questions positively.

Being friendly and welcoming is necessary, but not sufficient. Does your club offer licensing classes? Do you help new licensees get over the many other hurdles -- selecting and installing antennas, learning how to use equipment, debugging interference to and from consumer electronic devices, and so on -- that stand in the way of aspiring operators? Do

you make sure that their first on-the-air contact is a positive experience, and offer nets and roundtables that they will want to join? Do you expose them to the wide variety of activities that they can pursue as radio amateurs? Do you encourage ARRL membership, so they will enjoy full access to membership benefits and will receive the monthly stimulus of QST?

If you have all of these bases covered, congratulations! Your club is ready to promote itself to the community. Most clubs already have some experience doing this, with varying degrees of success. While a full discussion of the do's and don'ts is more than this page can accommodate, here are a couple of thoughts.

There are many amateur licensees in your community who are not presently active. With the caveat that some are Silent Keys and others have not kept their addresses current in the FCC data base, it's easy to compile a mailing list for an invitation to an Open House or other special event. If you succeed in reactivating them, their renewed enthusiasm may infect their friends and family members.

If you invite the general public to come and see your club, make sure there's something for them to look at. Even a static display with some QSL cards and photos of past club events can be an ice-breaker, giving your greeters something to talk and invite questions about.

Field Day is just around the corner. With proper planning it can be an ideal event for introducing Amateur Radio to your community, and your club to existing and prospective licensees. This year there is a new, easy-to-use tool for publicizing your club's Field Day site: the ARRL Field Day Station Locator Web Site:

www.arrl.org/contests/announcements/fd/locator.php

But remember -- an invitation to visit your site carries with it the responsibility to ensure that visitors (including children) are safe and that they have a positive, informative experience. If your Field Day operation is open to the public, the proper greeting of visitors cannot be left to chance -- it's as important a part of Field Day planning as the antennas, equipment, operators and food.

Every club has its ups and downs. If yours has been in the downward part of the cycle, now is a good time to take stock -- to capitalize on the strengths and overcome the weaknesses. The opportunities for club growth, in quality as well as quantity, have never been greater.

Oh, about that "perpetual motion machine." Have you ever attended a club meeting where there was to be an election of officers, but there were more offices than candidates? If not, you're fortunate. Many clubs with static or shrinking membership lists find that it's difficult to fill club offices or undertake new projects. Once a club finds the formula for attracting and nurturing new members, maintaining the club's vibrancy and activity becomes much easier.

The best local clubs provide a logical path for identifying and developing their future leaders, from student to new member and in succession to greeter, committee member, committee chairman, and officer. Your club's president for 2012 may be someone who sees Amateur Radio in action for the first time on Field Day -- or may be sitting in your licensing class right now!

4159. Tulip Time 2008

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-05-04 22:58:11 UTC
From: Steve Vander Hill
Topic: 4143 Message: 4159

Hello, it's hard to believe but the 2008 Tulip Time Festival has already started. Due to the weather the popular Fire Works display has been cancelled but the this weeks parades are right on schedule.

Currently we are short 1 HAM for both the Wednesday and Thursday parades and we are short 7 HAMS for the grand finale parade on Saturday. For both the Wednesday and Thursday parades the position is a block position working along side a American Red Cross medical team. On Saturday, we are short one packet operator, one SAG (golf cart), and five block positions working with the American Red Cross medical teams. Please spread the need around in your various circles, thank you.

If anyone is interested, please have them contact me as soon as possible via email (svanderhill@...).

4169. Help needed for Tri-City Events May 24th and May 26th

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-05-13 00:43:17 UTC
From: Don Meyer
Topic: 4169 Message: 4169

Hello Everyone .... I am looking for help for these events in the Tri-City area ....

Saturday May 24th we have the YMCA Kick of to Summer Snug Harbor Run in Grand Haven which is a 5K run and a fun run. The 5K starts at 8:30 and will be over bye 10:00. The fun run will start a little later then the 5K but should be over by 10:00 also.
We will be meeting in the Grand Haven Public Safety lot by 7:45 and use the 145.49 repeater to communicate on. If you can help please send me a email @ kb8odb@... or call me at 616-846-7307 and leave a message ? As I get a lot of emails and have to make the maps and get the planning done I may not be able to reply back to you so If I see a email that you have volunteered I will count you in.
??.73 Don Meyer

Also I need help for Monday May 26th for the Spring Lake Memorial Day Parade. We will meet at Spring Lake EOC at 9:15 so we can be in place by 10:15 to close off the roads ? for this we will be assisting police with directing traffic on some of the corners so if you can help please send me a email @ kb8odb@... or call me at 616-846-7307 and leave a message ?73 Don Meyer

4170. Storm Spotters

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-05-13 23:07:43 UTC
From: Mark Strait
Topic: 4170 Message: 4170

Having held a strong passion in weather and storm chasing . I have always question the idea of sending Storm Spotters out into the elements with out making sure they have the proper equipment and knowledge.
I personally think if a Storm Spotter is sent out the spotter should have a Lap-Top , Cell Phone , 2 meter radio, Weather Radio, GPS, First Aid Kit able to handle severe injuries and knowledge of how to treat severe injuries, Electronic Road Flares or Triangles, Protective Clothing , Eye protection, Head Protection etc.
To jump into your vehicle and run out to a location and not be prepared can and will have circumstances . Remember , There maybe airborne debris, Hail failing to the ground with great velocity, Trees toppling over , Down Power Lines to name a few possibilities that one can face.
I have yet to hear of anyone mention these issues . Maybe due to the fact we have never really had a severe situation to where a life had been claimed or someone had been injured.

Something for those of you who send out Storm Spotters to think about .
The reason I am posting this is due to the death of a Storm Spotter in Missouri this week .

Just my own personal thoughts .

Mark KD8BIG

LOCAL RADIO ENTHUSIASTS SHARE THEIR PASSION FOR TECHNOLOGY AND PUBLIC SERVICE DURING AMATEUR RADIO WEEK
For More Information Contact:
John T Fischer
616-402-0665
Grand Haven Mi) -- On-air demonstrations, satellite communications and emergency preparedness activities are on tap for members of the North Ottawa amateur radio club as they gear up to celebrate Amateur Radio Week, June 23 & 29 2008
During Amateur Radio Week, enthusiasts will put on demonstrations, give talks to community groups and take part in other activities to raise awareness about Amateur Radio. The week culminates with the annual preparedness exercise called "Field Day," June 28 and 29. Field Day is sponsored by the American Radio Relay League (ARRL), the national association for Amateur Radio.
During Field Day, operators set up in local parks, at shopping malls, or even in their own backyards, and get on the air using generators or battery power. Field Day was designed to test operators' abilities to set up and operate portable stations under emergency conditions such as the loss of electricity. "We want the community to know that in the event of an emergency, we will be ready to assist in any way we can, says Jim Miller. "While people often think that cell phones or other communications technologies have replaced ham radio, we can still provide an important communications service that others can't."
Field Day is a serious test of skill, but it is also a contest for fun and the largest "on-air" operating event each year. During the weekend, radio operators try to contact as many other Field Day stations as possible. More than 30,000 Amateur Radio operators across the country and Canada participated in last year's event.
The North Ottawa amateur radio club will hold Field Day at Coast Guard park on north shore rd. and will be operating from Sat June 28 starting at 8:00am for setup At 2:00 pm Radio operations start until 2:00 pm Sun June 29 "We hope that anyone who is interested in seeing what Amateur Radio is all about will come out for Field Day," says Jim Miller
Today there are more than 670,000 Amateur Radio operators in the United States and more than 2.5 million worldwide. To find out more about Amateur Radio or how you can get started, contact John Fischer at 616-402-0665, or email kc8uny@... Information is also available from the American Radio Relay League, 225 Main Street, Newington, CT 06111 or by calling 1-800-32-NEW HAM. The URL for the ARRL's home page on the World Wide Web is www.arrl.org.

Hello Weather Spotters and ham members interested in emergancy services ....
Tomorrow night Thursday May 14th you are needed at the Ottawa County Filmore Complex for EOC weather activation SET. Bill King-Skywarn and Rich Brand-NWS have put together a SET weather event tabletop to test the operations of ham radio. We will go through skywarn activation, warnings, events, and how we would respond. Now is the time to come and see how you would respond and see how we can make ham radio?s response better.
If you at all can please come to this training..... 73 Don

Donald Meyer - KB8ODB

Assistant Emergency Coordinator for Amateur Radio in Ottawa County

Steve- please forward this on to your team: On Behalf of the Ottawa County American Red Cross, I just want to say thank you for the professional job done by the Holland Amateur Radio Club during Tulip Time 2008. Several positive comments were given to Duane and I regarding the response times and the communication skills demonstrated by the teams working the road and the command centers. THANK YOU so much!! I am proud to be teamed up with such a professional organization. See you next year

Mark,

I believe a gentleman in northern Muskegon County did lose his life about 10 years ago during the "Derecho" storms. I don't know if he was a weather spotter but he was out in his vehicle during the storm. I wasn't involved with Amateur Radio back then so I don't know the details.

Having held a strong passion in weather and storm chasing . I have always question the idea of sending Storm Spotters out into the elements with out making sure they have the proper equipment and knowledge.
I personally think if a Storm Spotter is sent out the spotter should have a Lap-Top , Cell Phone , 2 meter radio, Weather Radio, GPS, First Aid Kit able to handle severe injuries and knowledge of how to treat severe injuries, Electronic Road Flares or Triangles, Protective Clothing , Eye protection, Head Protection etc.
To jump into your vehicle and run out to a location and not be prepared can and will have circumstances . Remember , There maybe airborne debris, Hail failing to the ground with great velocity, Trees toppling over , Down Power Lines to name a few possibilities that one can face.
I have yet to hear of anyone mention these issues . Maybe due to the fact we have never really had a severe situation to where a life had been claimed or someone had been injured.

Something for those of you who send out Storm Spotters to think about .
The reason I am posting this is due to the death of a Storm Spotter in Missouri this week .

Just my own personal thoughts .

I remember someone did die during the storms but I don't think it was a spotter. Jim, Don or Tom V might remember..

For some reason I think he was either hit by a wire or a pole something? Possibly an electrical worker.

I asked this question privately of someone I thought was part of the organizing committee, and received no reply. Sorry for the bandwidth.

I'll probably volunteer. I'm available both daze. However, it's an 88 mile round trip from my home in Rockford to Hope College and back.

Will the MS folks put us ham volunteers up for Saturday evening in similar housing as the Bike Riders? If so, I can volunteer for both daze. Otherwise I'll choose one or the other, depending on need and what else might be happening here in Rockford..

Hello Steve,

Yes, we provide housing free of charge at Hope College for all volunteers on Saturday night and Friday night (if needed). In addition, we provide a light breakfast on Saturday morning, food and lunch along the route on both days, buffet dinner on Saturday night and buffet breakfast on Sunday morning and a fantastic BBQ at the finish line on Sunday. All meals are provided regardless of where you stay overnight.

Please let me know who will need a room one week before the event. In addition, please let me know who each person wants to room with.

Please let me know if you have any questions. Thank you very much for your support.

----- Forwarded Message ----

Michigan ARRL DRG's Suggested SSID's
Posted by: "Dan Dahms" n9wnh@... n9wnh
Date: Thu May 15, 2008 6:35 pm ((PDT))

I have done some initial searching via the internet concerning SSID protocols. Since the ARRL never bothered to establish a standard and because the Indiana Digital Experimenters Assoc. died and knowone to my knowledge has picked up the pieces, here we sit.

In fact the whole country has been a mix of different protocols. If we are reviving packet we should try and establish some kind of standard at least statewide no matter what it is.

Here is what Michigan Section ARRL DRG had proposed back in 2005.

Dan M. Dahms N9WNH
President
Whitley Co. ARC Inc.

ARRL Michigan Section Digital Radio Group (DRG)

Working Group
for
Operational Standards

Recommended SSID Assignments:
At the first DRG meeting held Saturday March 5th 2005 in Lansing, here are the suggested SSID assignments that were discussed. Many of these are 'legacy' uses and some are new assignments. These are not cast in stone but are supplied here as a suggested guideline.

SSID	PURPOSE
none (-0)	home stations
-1	home station personnal mailboxes (usually a TNC-based PBBS
-2	gateways
-3	full-service BBS's (those that forward mail/bulletins)
-4	network nodes (having two or more radio ports that perform routing functions via TCP/IP, NetROM, etc.) (Can be combined with BBS's that also perform routing)
-5	console/keyboard -or- printer

```
  -6          conference bridges
  -7          cross-band digipeaters (and KA-nodes)
  -8          cross-band digipeaters
  -9          mobile / modats
-10          WL2K
-11            - unassigned -
-12            - unassigned -
-13            - unassigned -
-14            - unassigned -
-15          (often used as a downlink address when exiting the far
                end of a network connection)

Enjoy!
    --- Jay Nugent  WB8TKL
        Washtenaw AEC - NTS Liasion & Packet Operations
        District-2 DRG Representative
        Chair, ARRL Michigan Section "Digital Radio Group" (DRG)

4185. W8T - National Trails Day - Jun 7

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-05-19 03:55:55 UTC
From: Hank Greeb
Topic: 4185 Message: 4185

Anyone care to join me in this effort? It's always nice to have at least two operators for an event such as this. Anyone capable of either or both phone or CW is cordially invited to contact me. Availability for all or part of the proposed operating times is all that's required.

The special events call W8T will be activated during the National Trails day from the Hospitality Kiosk next to the Fred Meijer White Pine Trail <http://www.whitepinetrail.com/> http://www.whitepinetrail.com/ either in Belmont Michigan or a similar kiosk in Peppler Park, downtown Rockford, Michigan. Proposed operation will be between about 1600Z and 2359Z on June 7. I've just reserved the call, it should be official within a week or so.

The advantage of downtown Rockford is it is close to home, power is probably available, and the park is quite busy. This location is also near facilities for food, restrooms, etc. The advantage of the Belmont location is that is is very close to the White Pine Trail, so it might be a slightly better site for advertising ham radio, but we'd need a generator (which I have), and practically need two people, since restrooms and food facilities are a mile or two away. Both site would involve only very short trek with radio gear.

See http://www.greeb.net/w8tinfo/ for details.

Subject: [WestMichiganHams] Question about the MS Bike Ride

I asked this question privately of someone I thought was part of the organizing committee, and received no reply. Sorry for the bandwidth.

I'll probably volunteer. I'm available both daze. However, it's an 88 mile round trip from my home in Rockford to Hope College and back.

Will the MS folks put us ham volunteers up for Saturday evening in similar housing as the Bike Riders? If so, I can volunteer for both daze. Otherwise I'll choose one or the other, depending on need and what else might be happening here in Rockford..

4187. American Red Cross Responds to ARRL Concerns Regarding Background Checks

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-05-20 05:08:24 UTC
From: Mark Thompson
Topic: 4187 Message: 4187

American Red Cross Responds to ARRL Concerns Regarding Background Checks
In November 2007, ARRL President Joel Harrison, W5ZN, wrote to the American Red Cross (ARC) regarding concerns voiced by ARRL volunteers. In 2006, the Red Cross stated it would implement background checks that included, among other things, a credit check and a "mode of living" check for its staff and volunteers, including ARES volunteers providing services to the Red Cross during disasters. ARRL saw these portions of the background check as unneeded and inappropriate for ARES service.
In a letter dated May 8 of this year, Armond T. Mascelli, ARC Vice President for Disaster Response Services replied to President Harrison: "I can now report back to you that [these] actions have been completed and changes have been instituted which I trust resolves the concerns detailed in your letter. This effort took considerably more time and attention than originally envisioned, but I believe the results will now benefit our respective organizations.
"A new background consent form now [is] to be used by all Red Cross chapters for ARRL members and other partner organizations. The form and related process is limited to the name and social security number verification of the individual, and a criminal background check. References and suggestions to other related investigative possibilities have been stricken."
ARRL Emergency Preparedness and Response Manager Dennis Dura, K2DCD, announced the resolution at the ARRL ARES forum at the Dayton Hamvention® and received hearty applause. "We are very pleased that the American Red Cross has addressed some of the issues that we raised regarding their background investigations and that we can move forward in a relationship that has existed for a long, long time," Harrison said. "The American Red Cross and the ARRL have shared a productive relationship for many years which has been of benefit to both the organizations and to the public. We are glad that throughout the past months we have been able to negotiate the issues that we had and have finally come to a resolution."
What's Next?
With the background check issue apparently resolved, the ARRL will be working with the ARC in the negotiation and creation of a draft for a new Memorandum of Understanding (MOU) or similar document to replace the one which expired last year; Dura and Keith Robertory of the ARC will be leading the effort. When complete, the draft of the MOU will be presented to the leadership of both organizations for approval.
"The ARRL is very pleased that the American Red Cross has responded appropriately to our concerns about the background check issue," said ARRL Chief Executive Officer David Sumner, K1ZZ. "We believe it now will be possible to go forward to negotiate a statement of understanding between the two organizations. We look forward to renewing and expanding the relationship with the Red Cross."

4188. Price rises ahead?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-05-20 14:02:24 UTC
From: Alan NV8A
Topic: 4188 Message: 4188

Someone has reported the following in another Yahoo! group:

"ICOM is raising all prices across the board by anywhere from 10-20% on June 1. The other mfrs. are expected to follow suit shortly thereafter. So anybody on the fence about buying a new rig- act now!"

I have no idea whether this is true, but some price rises would not come as a surprise, because of the falling US$.

4190. Help Needed for events this weekend and next in Tri-Citys

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-05-20 23:56:59 UTC
From: Don Meyer
Topic: 4190 Message: 4190

Hello Everyone .... I am looking for more help for these events in the Tri-City area ....

Saturday May 24th we have the YMCA Kick of to Summer Snug Harbor Run in Grand Haven which is a 5K run and a fun run. The 5K starts at 8:30 and will be over bye 10:00. The fun run will start a little later then the 5K but should be over by 10:00 also.
We will be meeting in the Grand Haven Public Safety lot by 7:45 and use the 145.49 repeater to communicate on. If you can help please send me a email @
kb8odb@sbcglobal. net or call me at 616-846-7307 and leave a message ? As I get a lot of emails and have to make the maps and get the planning done I may not be able to reply back to you so If I see a email that you have volunteered I will count you in. ??.73 Don Meyer

Also I need help for Monday May 26th for the Spring Lake Memorial Day Parade. We will meet at Spring Lake EOC at 9:15 so we can be in place by 10:15 to close off the roads ? for this we will be assisting police with directing traffic on some of the corners so if you can help please send me a email @
kb8odb@sbcglobal. net or call me at 616-846-7307 and leave a message ?73 Don Meyer

Also I need help for Saturday May i31st in Grand Haven the girls on the run run we will meet at the public safety lot at 7:30 am run kicks off at 9:00

Please let me know if you can help out with these events ..... 73 Don

Donald Meyer - KB8ODB

From: Hank Greeb
Topic: 4185 Message: 4192

Hi, Richards:

Questions, "rookie" or otherwise, are always welcome. You guessed correctly. This will be a Special Events Station on 80 through 10 meters, SSB and CW (probably only 80/75 thru 20 with the current lack of sunspots), set up next to the White Pine Trail . If the local QRN from downtown Rockford isn't overwhelming, the preferred location will be the park next to the dam behind Arnie's. The alternate site is a kiosk/shelter next to the White Pine Trail in Plainfield Township just north of West River Drive near the trail overpass. This will not be a "high stress" effort - we'll call CQ repetitively, and/or look for stations calling CQ if our calls aren't answered, but we can chat and describe National Trails Day. I hope to have some brochures about the White Pine trail and about Ham Radio, for publicizing the trail and giving information about Ham Radio to passers by. If we have more than a couple of operators we can also operate on VHF, 2 metres and 440 MHz, probably FM. With the linked repeater system we should be able to scare up considerable activity on VHF. The object will be to contact as many people as we can to publicize outdoor hiking, ham radio, and the White Pine Trail.

Besides local reflectors like this, I've put the information on the ARRL web site at http://www.arrl.org/contests/spev.html There will be other special event stations during this time - I know that N8T will be on from the Upper Peninsula from the Elliott-Donnely Wilderness on the North Country Scenic Trail (trail runs from New York through PA, OH, MI, WI, MN into SD) north of Marquette. See the event web: http://www.lakeeffectarc.info/N8T-Trails2008 I have told KC8ULE, the organizer of the N8T effort, that we will be looking for them on 40 metres SSB and CW. It looks like a dozen or more special event stations, commemorating other events, will be on, so hopefully the bands will be crowded with folks desiring to work 1 by 1 calls.

This kind of event is good publicity for Ham Radio - as well as for an organization like National Trails Day.

Come on out and lend a hand - one hour or all 8 hours! It should be fun.

4194. ARRL Introduces "Fifth Pillar" at Dayton Hamvention®

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2008-05-21 20:54:14 UTC
From: Mark Thompson
Topic: 4194 Message: 4194

ARRL Introduces "Fifth Pillar" at Dayton Hamvention®
On Saturday, May 17 at the Dayton Hamvention, ARRL President Joel Harrison, W5ZN, plans to announce that the League will expand its identity program to include greater emphasis on technology. Harrison explained that "Ham radio operators, and particularly ARRL members, closely identify with current and emerging radio technology. Today, we are naming 'technology' as ARRL's new fifth pillar." ARRL's other four pillars, the underpinnings of the organization, are Public Service, Advocacy, Education and Membership. "For hams, expanding the four pillars to include technology will reinforce one of the organization's guiding principles -- that ham radio is state-of-the-art, innovative and relevant," he said.

"Radio amateurs have entered a new era. More than a dozen Amateur Radio satellites are presently in orbit with more to come. Software is expanding the capabilities of their radio hardware and communication by digital voice and data is expanding rapidly among hams," Harrison said.

In addition to the new fifth pillar, the ARRL has launched a year-long ham radio recruitment campaign emphasizing the Amateur Radio Service as a scientific national resource. The campaign invites newcomers to discover ham radio in the 21st Century -- where hams are using science, technology and experimentation to explore the radio spectrum. "For more than 90 years, the ARRL has been at the forefront of technology, encouraging experimentation and education through its license training resources, publications and periodicals. ARRL provides its members with top-notch technical information services, trusted product reviews and radio spectrum advocacy," Harrison said. "The ARRL Laboratory is a centerpiece of ham radio technology, contributing to radio electronics experimentation, spectrum development and advocacy, and radio frequency engineering." Harrison also noted that many hams attribute their affinity to "Amateur" Radio as launching their professional careers in radio engineering, satellite communications, computer science and wireless communications.

"This is less about defining a new course for Amateur Radio, but simply recognizing a course that has always been a precept of radio amateurs and the ARRL," he said. Referring to the federal rules and regulations for Amateur Radio, Harrison explained that one of the defining principles of the Service's very creation by the government is the amateur's proven ability to contribute to the advancement of the radio art. Harrison remarked, "Today's technology is nothing new to ham radio!"

Hello, I have a used Garmin 12XL GPS for sale; it comes with GPS unit, carrying case (black w/zipper), cigarette lighter plug power cable, lanyard, and owner?s manual. I am selling the unit to purchase a new dual-band HT, if you?re interested in the unit, please let me know. If you want we can arrange for you to play with it a few days to take it for a test drive. No reasonable offer will be refused, thanks.

Below is Garmin?s product description and attached is the Garmin PDF file on the unit.

Description:

When your idea of an outdoor adventure means getting way off the beaten path, you demand the most of yourself and your equipment. And when the time comes to head back to civilization, you'll enjoy the peace of mind that the Garmin? GPS 12XL has to offer.

The GPS 12XL is all about performance. It features a 12 parallel channel receiver for fast satellite aquisition and tight satellite lock ? even under tree cover. More than just an ultra-reliable receiver, the GPS 12XL is loaded with navigation information including 106 map datums and 7 grid formats, plus advanced orienteering features like user datum/UTM/and user grid formats to define your own map parameters. Store your position as one of 500 waypoints or add it to any of 20 routes. The proximity waypoint feature gives advanced warning of nearby hazards, while the position averaging function helps get the best fix possible.

Packed in a rugged case to handle tough conditions, the GPS 12XL uses an ergonomic rocker keypad for easy one-hand operation and features a user-friendly operating system to keep you on the move instead of pushing buttons. Four AA batteries provide up to 24 hours of use, and a variety of accessories can be added like an external antenna and mounting bracket. With the GPS 12XL, getting there won't be half the battle ? it'll be half the fun.

Yes -- I can help out that day. I do, however, need to know
the frequencies and PL codes in advance as I have a new radio
and need to figure out how to program in the frequencies. It
is probably awkward and embarrassing to have to ask you guys to
set up my radio before I can work it!

I have a nice HF station, but only recently purchased a UHF/VHF
rig. I skipped the Technician class privileges and went straight
to the low bands when I was first licensed. In that way, I am
backwards.

Happy trails. Just let me know what to bring and when and
where to bring it.

Hello, the purpose of this email is to share with you information as it relates to this years MS150 Bike Ride, which this year is being call "Bike MS: West Michigan Ride 2008".

The dates for the event are Saturday, May 31, and Sunday, June 1, 2008. Please find below the unofficial routes for the event as of today, they continue to be tweaked. The planners are currently planning on 8 SAG vehicles and 12 Medical Support vehicles, plus with a couple HAMS managing Net Control, we need at a minimum 22 Amateur Radio Operators for each day for the two day event.

Day One

May 31, 2008

Start: Holland High School, Holland, MI

Finish: Hope College, Holland, MI

Route opens at 7:00 AM and closes at 5:00 PM

There will be 3 routes ? 30 Mile, 75 Mile and 100 Mile

There will be 7 rest stops; one of them will be the lunch stop

Links:

30 Mile: http://www.mapmyride.com/ride/united-states/mi/holland/436925018

75 Mile: http://www.mapmyride.com/ride/united-states/mi/holland/633212723

100 Mile: http://www.mapmyride.com/ride/united-states/mi/holland/491090237

Day Two

June 1, 2008

Start: Hope College, Holland, MI (a portion of the 30 mile riders will start at Holland High School)

Finish: Holland High School, Holland, MI

Route opens at 7:00 AM and closes at 5:00 PM

There will be 3 routes ? 30 Mile, 75 Mile and 100 Mile

There will be 8 rest stops; one of them will be the lunch stop

Links:

30 Mile: http://www.mapmyride.com/ride/united-states/mi/holland/424575325

75 Mile: http://www.mapmyride.com/ride/united-states/mi/holland/2205038

100 Mile: http://www.mapmyride.com/ride/united-states/mi/holland/384269413

The National Multiple Sclerosis Society, Michigan Chapter depends on communication professionals like you to insure such events are safe and efficient, and your support is greatly appreciated. Please consider volunteering for this event, it can be one day or both. Plus please spread the word among your Clubs, groups, and coffee tables of the communication needs for this special event.

If you would to volunteer, please provide me via return email your full name, call sign, email address, your preference as it relates to working in a SAG or Medical vehicle, working Net Control, or assisting in leading the amateur radio efforts of this worthy event. As additional information becomes available, it will be shared via email to those whom have registered to volunteer.

Thank you for your time and consideration.

Hello, I would like to take this opportunity to wish you and your families an honorable and safe Memorial Day.

Also I would like to remind you of next weekend's MS150 Bike Tour which this year is being called "Bike MS: West Michigan Ride 2008". This years daily routes are listed below:

Day 1 Saturday, May 31 - 75 mile route
http://www.mapmyride.com/ride/united-states/mi/holland/490869887

Day 1 Saturday, May 31 - 30 mile route

http://www.mapmyride.com/ride/united-states/mi/holland/49772834

Day 1 Saturday, May 31 - 100 mile route

http://www.mapmyride.com/ride/united-states/mi/holland/773572168

Day 2 Sunday, June 1 - 75 mile route

http://www.mapmyride.com/ride/united-states/mi/holland/22653062

Day 2 Sunday, June 1 - 30 mile route

http://www.mapmyride.com/ride/united-states/mi/holland/440646677

Day 2 Sunday, June 1 - 100 mile route

http://www.mapmyride.com/ride/united-states/mi/holland/147781447

The National Multiple Sclerosis Society is planning on 8 SAG vehicles and 12 Medical Support vehicles, plus with a couple HAMS leading Net Control, we need at a minimum 22 Amateur Radio Operators for each day for the two day event. As of today, we have had only six Amateur Radio Operators that have volunteered, plus there is no one at this time to run Net Control or move the communications trailer to and from it's various locations throughout the weekend.

The National Multiple Sclerosis Society depends on communication professionals like you to insure such events are safe and efficient, and your support is greatly appreciated. Please consider volunteering for this event, it can be one day or both. Plus please spread the word among your Clubs, groups, and coffee tables of the communication needs for this special event.

If you would to volunteer, please provide me via return email your full name, call sign, email address, your preference as it relates to working in a SAG or Medical vehicle or Net Control, if you are able to tow a small

trailer, and if you need a dorm room for any of the nights. As things are finalized this week and additional information becomes available, it will be shared via email to those whom have registered to volunteer.

Thank you for your time and consideration.

Subject: FW: Bike MS 2008

Hi Jeffrey, reference electricity for the trailer, yes, that would help us out a lot, a standard outlet would be just fine.

Have the routes been finalized, the reason for asking, we are a bit concerned about the Southern route being out of range of the Holland repeater with just hand held radios, which most of our volunteers have. Also, the number of SAGs and Medical units is double of the previous years, which means we need to come up with double the radio operators, are the numbers cast in stone?

When can I start spreading the word of the ride and the details, I would like to start getting the word out ASAP.

Best regards,

Steve

Hello Steve,

I know that you usually set up net control at the lunch stop. Does you trailer require electricity? If so, is it just a standard outlet that is needed?

Thank you very much for your help and have a great weekend.

Regards,

Jeffrey Bross

Mark Try a pair of vice grip pliers with a piece of angle iron welded to it truckers have used this method for years than you mount a NMO or the mount of your choice , the cab is probably aluminum if the truck has heated mirrors than the brackets are allredy grounded or a mag mount on the muffler bracket also works well 73kc8uny John----- Original Message -----

Subject: [WestMichiganHams] New ham and a half wave

Hi all!

I am proud to announce the latest achievement of my little ham class, that is Tim Dunn, now known as KD8IQV!

(Golf claps are in order and highly encouraged)

Now, Tim is an over the road truck driver and wants to play with 2 meter / 440 repeaters. The problem is that his truck has a fiberglass body. Does anyone know of an antenna made for such use? My thoughts were that there has to be an antenna such as an end fed matched 1/2 wave made for use on boat and the occasional Corvette.

I suggested removing the headliner and sticking a bunch of aluminum foil between the liner and the roof but Tim has indicated that the truck is company owned and he had some sort of an instinct that the owner would probably not go for the idea! He also is looking for an antenna that will work while mounted on a mirror bracket so it can be removed when he changes trucks.

Thoughts? Ideas? Any will be appreciated and I will pass all along to Tim.

I am now returning this reflector back to normal amateur radio use....

Congrats to Tim!

The antenna will be tougher. There are half-wave antennas made that inherently do not require a ground plane but I haven't found one that's dual band. A 19" quarter-wave for 2m works pretty well on 70cm also but requires a ground plane. So that's not helpful either. Two separate single-band half-wave antennas fed with a band splitter could work.

If I think of something else I'll let you know...

Congrats to Tim.

There are any number of 1/2 mobile antenna on the market. They look like 5/8 but typically are just a little shorter. Just make sure that it is a 1/2 wave or multiple of 1/2 waves, not 5/8 wave or multiples of 5/8 wave.

I haves two of them, one is 2/440, the other is 6/2/440. I have had them mounted on the side of my van (on the sliding door) with no noticeable directivity.

Here is some surplus items that we would like to get out of our way:

3) 17" or 19" Computer Monitors. The monitors are new to very low hours. Two of the monitors are the dark colored Dell brand. $35.00 each. The other one is black and silver.

Onan Generator unit. 4 KW gas operated, electric start. Installation Manual. This unit was removed from the Old MCARES Motorhome. The unit powers either 220 VAC or 110 VAC. $100.00

Yes, we will accept offers also......

Contact Barney, KC8LLN or Jim, K8COP

For a vehicle with a fiberglass body, he could use a j-pole of some sort, if the metal parts of the vehicle are far enough away from the antenna. A glass mount antenna works fairly well. I used one for a few years on an SUV and a pickup truck. If it's a tractor, do the mirrors have metal brackets? If so, there are NMO mounts that can clamp to them.

Hello, reference this weekend's Bike MS 2008 Bike Tour through Ottawa and Allegan counties, we are still 10 short to either ride in a SAG or Medical vehicle or assist with Net Control.

Please consider volunteering for this worthwhile event, thank you.

Subject: RE: Bike MS 2008

Hello Steve,

I hope you had a great time at Tulip Time. It looks like you are going to have a busy couple of weeks ? we really appreciate your hard work.

Here are the answers to your questions.

Route Maps: I have attached the route maps for your team. We will also have copies in the vehicle packets. Please use those during the event just in case we have made a last minute change.

Lunch Stops: Day 1, 5/31/08 ? Casco United Methodist Church, 880 66th St., South Haven (Corner of 66th and 109th)

Day 2, 6/1/08 ? Robinson Elementary School, 11801 120th Ave, Grand Haven (120th between Buchanan and Rich)

Lunch volunteers will begin to arrive at 8:30 AM. The Salvation Army is helping with our lunch this year so they will have their Canteens on site each day

Briefing: We will have a briefing at 6:00 AM for drivers at Holland High School on 5/31. I am not sure that we will have anything on Sunday Morning. Most of our volunteers come for both days.

Route: The routes will open at 7:00 AM and the will close at 5:00 PM both days.

Lodging: Yes, you can still reserve rooms at Hope College. Please email Tammy Willis (she was cc?d on this message) the names of the people that will need rooms, who they would like to room with and whether they will be

there for one or two nights. Check in on Friday is at between 6PM and 10PM at the Haworth Conference Center. On Saturday afternoon, check in will be in front of Gilmore Hall at the finish line.

Vehicles: We will have 7 SAG vehicles, 8 Medical Vehicles and 2 Staff Vehicles (Shadows).

Agencies along the route: Basically, we notify the Sherriff Departments, Road Commissions and Fire Departments and the hospital we plan to use (if needed) will be in Holland. I have attached those phone numbers along with our staff numbers. You will be working closely with the Route Manager. Her name is Kim Howard and her number is on the Staff list.

You will also receive additional information when you arrive on Saturday at the briefing. All of the vehicles will have county maps with the routes highlighted so you can find shortcuts if necessary. The most important thing is that any key information is filtered through our Route Manager during the event. Kim will have additional action items in the event of an emergency.

Please let me know if you have any questions. After today, I will only be able to be reached by cell phone ? 248-229-1541. Otherwise, I will see you this weekend. In addition, please email Tammy the lodging information by the end of the day tomorrow. We could still get you in after tomorrow but it will be difficult to get everyone their keys and roommates.

Tim:

From this e-mail, it sounds like you won't be needing any help from us in Mecosta County, but if you do, just let me know.

I am giving presentations for a workshop at Ferris on Tuesday, but could be free after 5 p.m.

If I don't hear from you, I'll assume our help will not be needed.

Just keep me advised, and good luck on the exercise.
